Established by a bequest from Carolyn A. Ahrens, this scholarship is awarded to sophomores or juniors enrolled in the Philip Merrill College of Journalism. Students must be Maryland residents.

Fred I., Edna O. and Fred J. Archibald Scholarship
Established by a bequest from Fred I. Archibald of Baltimore News-American and Frederick News-Post newspaper editors, this scholarship is awarded to undergraduate students enrolled in the Philip Merrill College of Journalism.

Professor Thomas Aylward Journalism Scholarship
Awarded to a Merrill College Ph.D. student.

Paul Berg *Diamondback* Scholarship
Funded by friends and family and The Washington Post in memory of Paul Berg, Diamondback editor-in-chief 1978-79 and assistant editor of The Post's Health section at the time of his death in 1989. This scholarship is awarded to a Diamondback editor or news staff member who displays special achievement and effort while working for the campus daily newspaper. Applicants must have served at least one semester on the Diamondback staff, and must return to campus for the following fall semester. All majors may apply for this scholarship.

Bonnie Bernstein Scholarship
Bernstein is a 1992 Merrill College graduate who was an Academic All-American gymnast. Applicants must be a full-time, upperclass multi-platform journalism major (with preference for students in the broadcast component) who participates in an NCAA-sanctioned sport at the University of Maryland. Applicants also need to show evidence of financial need, have a GPA of 3.0 or above and submit an essay describing why they should receive the award.

John Story Cleghorn and Nona Reese Cleghorn Scholarship
Funded by the late College Dean Reese Cleghorn in honor of his parents, this scholarship is awarded to undergraduate or graduate journalism students based on academic merit, with preference given to students with financial need.

Reese Cleghorn Excellence in Journalism Scholarship
Created in memory of the late College Dean Reese Cleghorn, this scholarship is awarded to undergraduate or graduate journalism students based on academic merit, with preference given to students with financial need.

Frank R. Cormier White House Correspondents' Association Scholarship
Established in 1991 by the White House Correspondents' Association, this award was renamed in 1994 to honor the memory of Frank R. Cormier, who for two decades exemplified the best qualities of White House correspondents with a blend of gentleness, humor and professionalism that endeared him to the readers of his dispatches for The Associated Press. This renewable scholarship is awarded to four undergraduate students from Washington, D.C. or Prince George's County, Maryland on the basis of financial need. Students must re-apply each year to be considered for renewal.

Ralph Crosby Journalism Excellence Award
Funded by Mr. Crosby, a 1956 graduate of the college who is a member of the Merrill College Board of Visitors and chairman of Crosby Marketing Communications, Inc., in Annapolis. This scholarship provides an award toward tuition and fees to an undergraduate journalism student based on academic performance and financial need, with preference (in order) given to a student from Annapolis, Anne Arundel County or the State of Maryland.

The Ralph and Carlotta Crosby TerpStart Endowed Scholarship in Journalism
Ralph Crosby '56 said, "Being a journalism major at the University of Maryland helped form my character, gave me a profession, and trained me academically and socially. Good reasons for giving back." This scholarship provides annual need-based funds, under the auspices of the TerpStart Matching Scholarship Program, with preference given (in order) to undergraduate students from Anne Arundel County or the State of Maryland who are enrolled in the Philip Merrill College of Journalism. (Students can not apply for this scholarship.)

Theodore Crown, Sr. and Joseph T. Crown, Jr. Scholarship
Created by Kathryn Crown '66 in memory of her father and brother, this scholarship is awarded to undergraduate journalism students with junior or senior class standing.

Entravision
Awarded to a broadcast student in the Merrill College with high academic achievement. Preference is given to those who have demonstrated interest or experience covering issues or stories related to the Hispanic community, those who double major or minor in a Spanish language, who have studied abroad in Spain, Central America, or Latin America, and students who have worked or interned at a Spanish-language media organization.

Penny Bender Fuchs Scholarship
This fund was established by colleagues, family and friends of Penny Bender Fuchs, an admired and respected member of the Merrill College faculty from 1999 until her death in 2013. Rising Merrill College juniors and seniors are eligible for this award. Preference is given to students who might not otherwise be able to participate in an internship due to

financial limitations. Preference is also given to students who have earned a grade point average of 3.0 or higher in journalism courses.

Lawrence L. Goldberg and Lillie Z. Goldberg Journalism Scholarships

Funded by Mr. and Mrs. Goldberg and their relatives and friends in honor of former Knight Chair Professors Hodding Carter III and Haynes Johnson, and former professor David Broder, three faculty members who taught classes that the Goldbergs attended at the Merrill College as retirees. Scholarships are awarded to undergraduate or graduate journalism students based on academic merit, with preference given to students with financial need.

Gridiron Scholarship

The Gridiron Foundation Journalism Scholarship was established in 2002 by the Gridiron Club and Foundation. The Gridiron Club is the oldest and most prestigious journalistic organization in Washington D.C., and its foundation makes charitable contributions and provides scholarship to journalism students. The Gridiron Foundation Journalism Scholarship is awarded to undergraduate students based upon outstanding academic achievements and a stated commitment to pursue a career in journalism. Students must re-apply each year to be considered for renewal.

The Michael Gurevitch Journalism Scholarship

The Michael Gurevitch Journalism Scholarship was established in January 2009 by Patricia Gurevitch, in memory of her husband. An internationally renowned mass communication scholar, Professor Emeritus Michael Gurevitch taught at the University of Maryland's College of Journalism from 1983 until 2008. Much of his work was grounded in case studies and original research relating to how journalists grasped the practical problems of keeping the public informed. Professor Gurevitch would not have been able to be in the United States to earn his 2 degrees if he did not have help from others. This scholarship provides non-renewable funds for doctoral students in the Merrill College. Preference will be given to international students with financial need.

The Ralph M. Hamaker TerpStart Endowed Scholarship

Started by Ralph M. Hamaker '53, this scholarship provides annual need-based funds, under the auspices of the TerpStart Matching Scholarship Program, for undergraduate students enrolled in the Philip Merrill College of Journalism. (Students cannot apply for this scholarship.)

The Ray Hiebert Scholarship Fund

An endowed fund established by and named for College founding dean and Professor Emeritus Ray E. Hiebert. Provides travel reimbursements to enable undergraduate or graduate journalism students at Maryland to travel outside the U.S. on a particular journalistic or research project with a specific itinerary. Preference will be given to multiplatform journalism students with an interest in public affairs reporting.

Carol Horner Journalism Scholarship

This scholarship was established by family, friends and colleagues of the late Ms. Horner, a dedicated journalist and woman of wonderful good humor who forged a distinguished career as a reporter and editor at the Philadelphia Inquirer and Wall Street Journal before serving as director of the Knight Center for Specialized Journalism at the University of Maryland. This non-renewable scholarship is awarded to a high-achieving undergraduate student with financial need in the Philip Merrill College of Journalism.

Christopher Houston '85 Scholarship

The K. Christopher Houston Scholarship was established in memory of K. Christopher "Chris" Houston, '85, a distinguished journalist who worked for CNN Headline News in Atlanta and WUSA-TV in Washington, D.C. Funded by Karen Gray Houston, family and friends, this scholarship is awarded to a student at the Philip Merrill College of Journalism who has demonstrated a strong interest in pursuing a career in broadcast journalism. Undergraduate and graduate students are eligible to apply.

Jay Jackson Scholarship

Funded by former Annapolis newspaper executive Allen Jackson in memory of his brother Jay, an honors graduate of Maryland's second journalism class. This scholarship is awarded based on merit and need, to a multiplatform student who will be a senior the following semester.

John A. Jenkins '72 Internship Award

May be awarded to up to ten students per year and is to be used toward travel or tuition expenses related to an internship. This award cannot replace employee compensation.

Haynes Johnson Scholarship Fund

The Haynes Johnson Scholarship Fund was established in 2013 by funds donated from the faculty, staff and friends of Haynes Johnson. This scholarship will be awarded to an outstanding student in the Merrill College based on financial need and academic merit.

Robert C. Keith Fund for Investigative Journalism

The Fund shall be used to provide support for scholarships and teaching grants to faculty and students and support for other investigative journalism endeavors at the discretion of the dean of the Philip Merrill College of Journalism.

Phyllis and Frank Kopen Broadcast Journalism Scholarship

Endowed by broadcast faculty member and College alumna Sue Kopen Katcef '76 in honor of her parents, this scholarship is awarded to a sophomore or junior broadcast student (radio or TV) in recognition of their contributions to the college's broadcast journalism program. Consideration may be given to financial need and academic performance. Awards may be renewable for up to two years if recipients continue to make satisfactory academic progress. Students must re-apply each year to be considered for renewal.

Tom Kunkel Journalism Excellence Scholarship

Created by colleagues and friends of former dean Tom Kunkel (2000-2008), this scholarship is awarded to outstanding undergraduate students based on academic merit, with preference given to students with financial need.

Jonathan Ledecky Sports Journalism Scholarship

Funded by New York Islanders minority owner Jonathan Ledecky to support scholarships for students in the Philip Merrill College of Journalism who have interest in sports journalism. Recipients must have an expressed interest in sports journalism, be accepted for full-time enrollment. and maintain good academic standing.

Rick Martin '92 Scholarship in Journalism

The Rick Martin '92 Scholarship in Journalism was established in 2015 by Mr. Rick Martin. Mr. Martin has worked in the television news industry for more than 20 years as an assignment editor and manager – at CNN as well as other local news markets in Washington, D.C., Baltimore and Philadelphia. He has covered the White House, Congress, the Pentagon and the State Department. He has covered major breaking news, including the White House shooting by gunman Francisco Duran, the D.C. Sniper Attacks, and the September 11th terrorist attacks. Martin was born in Washington, D.C., and grew up in the West Indies' twin-island nation of Trinidad & Tobago. The Scholarship shall be awarded to an undergraduate student in the Philip Merrill College of Journalism who demonstrates financial need and maintains good academic standing.

This scholarship may be renewed each year if the student meets these criteria. Students must re-apply each year to be considered for renewal.

John McNamara '83 Endowed Sports Journalism Scholarship

This scholarship, funded by family and friends of 1983 Merrill College alumnus John McNamara, was created to recognize McNamara and his devotion to sports journalism, to allow others to learn fromMcNamara and his work, to develop and reward writers who demonstrate potential for producing accessible and informative sports journalism and to provide opportunity for talented students.

Maryland-Delaware-DC Press Association Scholarship

This scholarship is funded by the MDDC Press Association and is awarded to full-time undergraduate multi-platform (non-broadcast) students who are residents of Maryland, Delaware, or D.C. Recipients and must also have completed at least three semesters with an overall GPA of 3.0 or higher.

Ron Menchine Broadcast Journalism Scholarship

Established in 2013 with a bequest from the estate of Mr. Menchine, a 1956 Maryland graduate who was the last baseball broadcasting voice of the Washington Senators. In his earlier career, he was sports director of WBAL radio in Baltimore and WDCA-TV in Washington, and was a play-by-play announcer for Temple and Navy football games. The Menchine fund awards scholarships to high-achieving broadcast students in the Merrill College.

The David Mills Scholarship (The Diamondback)

The David Mills Scholarship is awarded annually to at least one student who will receive a $5,000 scholarship. The requirements include: they be a Diamondback (DBK) staffer with at least two semesters of experience; be full time (12 or more credits); and that they continue to work at the DBK for the two semesters that follow the award. The students are asked to submit an application and materials which should include writing, multi-media or other journalism samples. The final decision is made by David Simon (DBK and UMD alumnus), a current UMD professor from the English Department and a relative of the late David Mills for whom the award is named.

Gertrude Poe Fund for Journalism Excellence

An endowed fund established in 1988 by the former editor, publisher and owner of the weekly Laurel News Leader in Maryland. Ms. Poe was the first female president of the Maryland-Delaware-D.C. Press Association and was inducted into to the MDDC Hall of Fame in 1987. The Poe fund supports student scholarships in the Merrill College, with preference given to students with an interest in community journalism.

Frank Quine and Mary Ellen Doran-Quine Journalism Scholarship

Funded by the college's former Assistant Dean Frank Quine and his wife, this scholarship is awarded to a high achieving multi-platform student (grad or undergrad) with financial need and high potential as a professional journalist.

Gene Roberts Award

An endowed fund established by and named for Professor Emeritus Eugene Roberts to inspire more knowledge and understanding of the world outside the United States. Provides travel reimbursement to undergraduate or graduate journalism students at Maryland to travel outside the U.S. on particular journalistic or research projects with a specific itinerary. Preference is given to multiplatform journalism students with an emphasis in public affairs reporting.

Stanley E. Rubenstein Memorial Journalism Scholarship

Established by Ruth Ann Rubenstein '53 in memory of her husband, a 1953 economics graduate of Maryland, who became a leading New York City public relations executive. This scholarship is awarded to an outstanding undergraduate student based on financial need and academic merit.

Joseph R. Slevin Award

Established by the family of the late Joseph R. Slevin, former president of the National Press Club and National Press Foundation, former journalist with the Journal of Commerce, New York Herald-Tribune, Times of London and The New York Times, and author for 19 years of a widely syndicated column covering economics. This scholarship is awarded in consultation with the Merrill College Internship Director to students who obtain a full-time summer internship with a leading media organization in the area of political or economic reporting. Scholarships will cover the cost of tuition for internship academic credits and expenses associated with the internship.

Richard W. Worthington Journalism Scholarship

Named in memory of the late publisher of the weekly Bel Air, Md. Aegis newspaper. This scholarship is awarded to a multi-platform major (undergraduate or graduate) based on a combination of academic excellence, evidence of potential as a journalist and financial need. Preference given to a resident of Harford County, Maryland.

From the University

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For information, visit: www.financialaid.umd.edu (http://www.financialaid.umd.edu)

The National Scholarships Office is committed to helping students of the University of Maryland identify, apply for, and win national scholarships and fellowships in their pursuit of higher education. They also help students find research opportunities in their fields of study.

From Outside Sources

The Academy of Television Arts & Sciences — Fred Rogers Memorial Scholarship (www.emmys.com/foundation/programs/mister-rogers (http://www.emmys.com/foundation/programs/mister-rogers/)) - The Academy of Television Arts & Sciences and the accounting firm, Ernst & Young, have created this $10,000 scholarship to support and encourage college students to go into the field of children's television. The scholarship is open to graduating seniors who are continuing on to graduate school and graduate students (Masters/Ph.D.)

Awards and Recognition

Maryland-Delaware-District of Columbia Press Association Top News-Editorial Student

Awarded annually to an outstanding top broadcast journalism student and top multimedia journalism student at commencement.

Julie Galvan Outstanding Campus Member Award

The Society of Professional Journalists chapter selects one graduate in journalism who is outstanding in his or her class on the basis of character, service to the community, scholarship, proficiency in practical journalism and significant contributions to their SPJ chapter.

Kappa Tau Alpha Top Scholar Award

Awarded at each commencement to the journalism student earning the highest academic achievement for all undergraduate study.

Kappa Tau Alpha National Honor Society

The top ten percent of the journalism graduating class is inducted into this national organization each commencement.

Special Advantages and Facilities

The Merrill College is home to many unique programs and opportunities available to undergraduate students:

UMTV

Broadcast journalism students study and learn at UMTV, the college-owned cable TV station that houses state-of-the-art equipment, including DVCPro, Avid and ENPS systems used in the field today. Students begin their broadcast education from their first semester at the college, volunteering as crew members for programs produced under the guidance of renowned broadcast faculty members.

Capital News Service

The college's Capital News Service operates news-editorial and multi-platform bureaus in College Park, Washington, D.C., and Annapolis, and a daily television newscast. CNS provides students with real-life reporting experiences covering a beat, developing sources, generating story ideas and writing on deadline under the supervision of a faculty editor.

Real-World Experience

Students take their education out of the classroom and into the real world. Using internships, student media and in-class reporting, our students don't just learn why, but how. The college is located just outside Washington, D.C., the country's seventh largest media market.

Top-Notch Faculty

The Merrill College is home to internationally renowned journalists and media scholars. Courses are also taught by working journalists who serve as adjunct professors.

Access to Centers of Journalism Study

The Merrill College is home to several centers for journalism study and professional development. Undergraduates have opportunities to interact with these programs.

Technology for the Real World

Students use the same technologies used by professional journalists and media specialists. From the latest in non-linear editing systems, to updated technologies for digital art and pagination, every undergraduate will have access to the software used by professionals in TV/radio production, visual journalism, online news and media communication.

Journalism Major

The Philip Merrill College of Journalism prepares students for careers in newspapers, magazines, TV news, newsletters and online journalism outlets. The undergraduate journalism program culminates in a B.A. degree in journalism.

The College is fully accredited by the Accrediting Council on Education in Journalism and Mass Communications (ACEJMC).

Students learn in college programs such as Capital News Service, a daily wire service in College Park, Washington, D.C., and Annapolis and UMTV, a cable station operated by the college.

Students majoring in journalism take approximately one-third (42-48 credits) of their total coursework in the Philip Merrill College of Journalism. Journalism courses are designed to provide students with a working knowledge of the tools and concepts they will need to perform as top-flight professional communicators. Courses offered by this department may be found under the following acronym: JOUR.

The remaining approximately two-thirds (74-80 credits) of undergraduate coursework consists of a variety of other subjects such as history, economics, government, sociology and psychology. This exposure

acquaints students with fundamental problems and issues they will encounter in their careers. Within these credits, journalism students must choose a 'Concentration' (a core of advanced work in a substantive field) to establish competency in a specialized area of knowledge they will be able to use as professionals.

Program Objectives

About the College

The Philip Merrill College of Journalism is widely considered one of the best journalism programs in the nation, blending a mix of prize-winning journalists, communication scholars and nationally recognized professional programs. The school's mission is simple: to produce the best possible journalists for leading newspapers, magazines, TV, radio and online news outlets. Recent graduates are editors, reporters and producers at The New York Times, The Washington Post, CBS, Los Angeles Times, CNN and many of the nation's other top news organizations.

Located less than 10 miles from the news capital of Washington, students participate in internships during the academic year at The Washington Post, The (Baltimore) Sun, CNN, and a wide array of Washington news bureaus. In the summer, students intern at top news organizations around the country. Broadcast news students produce and anchor a 30-minute nightly news show that reaches more than 400,000 households in suburban Washington on the College-operated UMTV station, and advanced students enroll in Capital News Service, an intensive reporting program in Washington, Annapolis and College Park. Students also participate in some of the school's professional programs.

The Vision

The Philip Merrill College of Journalism is shaping the future of news and media. As the top journalism school in the Washington, D.C., region and a global leader in journalism education, the College is committed to promoting a strong and independent free press.

- Through its faculty and curriculum, the Merrill College champions the fundamental journalistic values of accuracy, accountability and fairness, and is a trailblazer in using digital and multimedia technologies in dynamic storytelling.
- It prepares its undergraduate students for success in today's exciting and innovative journalism landscape and gives its graduate students the skills and confidence to rise to the top of today's demanding news and media-dependent professions.

The Mission

The college educates students at the undergraduate, master's and doctoral levels within a liberal arts context, preparing them for careers in journalism and related fields, as well as careers in academic research and teaching.

- The College works to elevate professional and ethical standards of practice and advocates for increased public knowledge and involvement in democratic processes through dissemination of news.
- The mission of the College is to improve the production, delivery, and access to news, as well as to enhance the understanding of journalism's political, cultural and social roles in the United States and around the globe.

Our undergraduate mission is an uncompromising dedication to the principles of the journalism profession, with training in evolving types of news gathering and delivery.

Our professional master's program provides a post-graduate education to those with a host of undergraduate degrees seeking to enter the field and intensive specialized training for mid-career journalists with a particular focus on investigative, sports, security and computational journalism.

Program Learning Outcomes

1. Demonstrate the ability to research, write, report and edit relevant news stories acceptable by a professional news outlet.
2. Understand the history of journalism, its relationship with diverse groups in society and its historic special role in a democratic society.
3. Understand the ethical guidelines and practices that govern the profession and the legal implications and considerations that inform the profession.
4. Demonstrate the ability to apply tools, concepts and technology appropriate for the profession.
5. Conduct research and evaluate information by methods appropriate to the profession.
6. Apply basic numerical and statistical concepts appropriate for the profession.
7. Demonstrate knowledge of grammar, spelling, punctuation and syntax and an ability to apply Associated Press style to news stories in a manner acceptable to professional news outlets.
8. Demonstrate preparedness for the media job market through resumes and published clips.

Requirements

Students are required to earn a minimum of 122 credits. Accredited journalism programs require majors to complete successfully approximately two-thirds of their coursework in areas other than journalism and communication. The Philip Merrill College of Journalism at the University of Maryland adheres to this nationwide policy. In practical terms, this means that of the 122 minimum credits required for graduation, a journalism student must take 42 credits (and may take up to 48) in journalism (numbered 100 or above). Of the remaining 74-80 credits, a minimum of 65 must be earned in liberal-arts designated courses.

The Philip Merrill College of Journalism stipulates that 57 of the total credits must be taken in upper-level courses (courses numbered 300-499).

Required courses for all journalism majors, whether primary or secondary major:

Course	Title	Credits
Journalism Requirements Outside the College

or ECON201	Principles of Macroeconomics	
Government and Politics:		
GVPT170	American Government	3
Supporting Area:		
Select 4 upper upper-level courses for a minimum of 12 credits in a supporting field [4]		12
Select four additional upper-level courses for a minimum of 12 credits [4]		12
Journalism Course Requirements		
JOUR152	Introduction to Storytelling with Code	1
JOUR200	Journalism History, Roles and Structures	3
JOUR201	News Writing and Reporting I	3
JOUR320	News Writing and Reporting II: Multiplatform	3
JOUR352	Interactive Design and Development	3
JOUR396	Supervised Internship	2
JOUR402	Journalism Law and Ethics	3
Journalism and Society Course (One JOUR course from the 410-469 range)		**3**
Media Research Course (One JOUR course from the 470-479 range)		**3**
Menu 1 - Visual Menu (One course from the following):		**3**
JOUR262	News Videography	
JOUR370	Photojournalism	
Menu 2- Exploration Menu (One course from the following):		**3**
JOUR202	News Editing	
JOUR262	News Videography	
JOUR360	News Writing and Reporting II: Broadcast	
JOUR370	Photojournalism	
JOUR371	Feature Writing	
Journalism Capstone Experience		**3-9**
Upper-Level Courses of Choice. A minimum of 9 credits must be upper-level JOUR courses, at least 6 of which must be upper-level skills courses in the 321-389 range.		**9-15**

1 Should a student choose to combine the options, at least one language course must be at the intermediate level

2 Up to two courses with at least one course at the intermediate level and no more than one course at the introductory level. (High school equivalency does not satisfy this requirement.)

3 Up to two courses:
- Any mathematics (MATH) course numbered 107 or higher.
- Any computer science (CMSC) course numbered 102 or higher (at least three credits).

4 Numbered 300 or higher, cannot be in Communication.

Specializations

For students seeking to develop skills in particular areas, the Philip Merrill College of Journalism offers optional specializations that fit inside the curricular requirements.

Broadcast Specialization

Course	Title	Credits
JOUR262	News Videography	3
JOUR360	News Writing and Reporting II: Broadcast	3
An approved capstone [1]		3-9
Total Credits		9-15

1 Several broadcast capstones also require JOUR361

Investigative Reporting Specialization

Course	Title	Credits
JOUR343	Investigative Reporting	3
or JOUR353	News Bureau: Multimedia Reporting	
JOUR472	Data Journalism	3
An approved JOUR seminar course in the 410-469 range		3
Total Credits		9

Sports Specialization

Course	Title	Credits
Sports skills JOUR course from the 321-389 range		3
Sports discussion/seminar JOUR course from the 410-469 range		3
Sports capstone course [1]		3-9
Sports experiential course (an approved sports internship for JOUR396 or a second sports-focused capstone course)		2-6
Total Credits		11-21

1 If taking a second capstone for the sports experiential course, limit each to 6 credits

Specific Journalism Requirements

- Completion of JOUR201: Students must complete JOUR201 with a 'C-' or higher. Consult the Undergraduate Catalog or online Schedule of Classes for a list of prerequisites and restrictions for journalism courses.
- 'C-' Requirement: Students must earn a 'C-' or higher in the following courses in order to have them count for the major: JOUR152, JOUR200, JOUR201, JOUR202, JOUR262, JOUR320, JOUR352, JOUR360, JOUR361, JOUR370, JOUR371, JOUR402 and any course that qualifies as a Capstone Experience. This minimum grade must be achieved prior to taking courses which the aforementioned courses serve as a prerequisite.

Placement in Courses

Enrollment in JOUR201 requires proof of grammar competency through the attainment of at least a 'C-' in JOUR181 or a score of 80 or higher on the grammar diagnostic exam, completion of ENGL101 (or another FSAW course) with at least a 'C-' and completion of JOUR200 with at least a 'C-'.

Four Year Plan

Click here (https://merrill.umd.edu/academics/undergraduate-programs/undergraduate-advising/four-year-plan/) for roadmaps for four-year plans in the Philip Merrill College of Journalism.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog

School of Public Health

2242 SPH Building
301-405-2438
www.sph.umd.edu (http://www.sph.umd.edu)

Dean: Boris Lushniak

Associate Deans: Dushanka Kleinman, Stephen Roth

Assistant Deans: Coke Farmer, Amanda Grimes, Kelly Blake

The mission of the School of Public Health is to promote and protect the health and well-being of the diverse communities throughout Maryland, the nation and the world through leadership and collaboration in interdisciplinary education, research, practice, and public policy. The school provides preparation leading to the Bachelor of Science degree in the following professional areas: Kinesiology, Community Health, Family Science and Public Health Science. Additionally, stellar students may apply in the junior year to the combined undergraduate/masters in public health program, allowing the completion of both degrees within 5 years.

The School of Public Health is fully accredited through the Council on Education for Public Health.

Departments
Departments and Units

- Behavioral and Community Health (p. 412)
- Family Science (p. 414)
- Kinesiology (p. 417)
- Public Health Science (p. 420)

Academic Programs
Majors

- Community Health Major (p. 413)
- Family Science Major (p. 416)
- Kinesiology Major (p. 419)
- Public Health Science Major (p. 421)

Advising

The School of Public Health's Center for Academic Success and Achievement serves all students, particularly upon entry into the major. Following the first semester at College Park, students are encouraged to see their departmental advisors. It is strongly recommended that students seek regular advising throughout their academic career.

For student athletes and students currently on probation, advising is mandatory. Please see the CASA website: http://sph.umd.edu/%3Cfront%3E/undergraduate-center-academic-success-and-achievement (http://sph.umd.edu/%3Cfront%3E/undergraduate-center-academic-success-and-achievement/).

Opportunities
Global Public Health Scholars Living and Learning Community

The School of Public Health offers a Global Public Health Scholars program within the College Park Scholars Living and Learning Communities. For more information please refer to www.scholars.umd.edu (http://www.scholars.umd.edu).

College Honors Program

For specific departmental honors program admissions information and requirements, please refer to the individual departments.

Approved Student Societies and Professional Organizations

Phi Alpha Epsilon

Honorary Society of the School of Public Health. The purpose of this organization is to recognize academic achievement and to promote professional growth by sponsoring activities in the fields of kinesiology, family science, community health, public health science and related areas.

Students qualify for membership when they attain junior standing in kinesiology, family science, public health science or community health, and have a minimum overall average of 3.5 and a minimum of 24 credits at the University of Maryland, College Park. For additional information, please contact the Center for Academic Success and Achievement.

The School of Public Health is also home to the university- wide Public Health Without Borders organization. For more information, please see http://sph.umd.edu/content/public-health-without-borders (http://sph.umd.edu/content/public-health-without-borders/).

Student Engagement and Service Units

Center for Academic Success and Achievement

0222 School of Public Health Building, 301-405-2753
www.sph.umd.edu/advising (http://www.sph.umd.edu/advising/)

The Center for Academic Success and Achievement provides advising on admissions, orientation, academic policy, 4-year planning, career information, and required advising for students on academic probation or dismissal and all college athletes. The center collaborates with the departments in recruitment, retention and graduation initiatives. The center is open from 8:00 a.m. - 4:30 p.m. week days for use by students for studying and group meetings. There are twelve computers available for student use.

Gymkana Troupe

1120 SPH Building, 301-405-2566
www.gymkana.umd.edu (http://www.gymkana.umd.edu)
Director: Scott Welsh

For over 60 years, the University of Maryland Gymkana Troupe has been influencing young people to live healthy lifestyles. Founded at the University of Maryland College Park campus in 1946, the troupe has traveled throughout Maryland and neighboring states promoting drug-free living. Each of its 60+ members pledges themselves to be drug-free. Through their role-modeling and unique gymnastic performances, they have influenced hundreds of thousands of people to join them in living a drug-free life. The troupe, which is open to all University of Maryland students of all abilities, is considered a one-of-a-kind organization and is believed to be the only collegiate exhibitional gymnastic troupe actively touring the United States. As an outreach program of the School of Public Health, the Gymkana Troupe uses peer role models who share their experiences and their message of healthy living with others. Students influencing students to avoid drugs is the heart of Gymkana's program.

Public Health Without Borders

Director: Dr. Elisabeth Maring
Website: http://sph.umd.edu/content/public-health-without-borders (http://sph.umd.edu/content/public-health-without-borders/)

Half the Sky Movement

Director: Dr. Elisabeth Maring

STEP Program

The STEP Program is a professional training program designed to help students gain practical knowledge and develop essential skills to succeed in a professional work environment. This program was specifically designed to work with undergraduate students in the UMD School of Public Health. Through a series of workforce training workshops, students will enhance their competencies in communication, leadership and cultural intelligence. The STEP program allows students to embrace a supportive community and develop a professional network while in an active and engaging learning environment.

Director: Ms. Tia Cunningham

Undergraduate Teaching Assistant Program

The Undergraduate Teaching & Education Assistants and Mentors (UTEAM) Program facilitates peer educational support in the School of Public Health through peer mentoring and teaching assistance. The UTEAM Program is a **combination of experiences** designed to provide foundational knowledge to successfully support peer education and in-class, hands-on experiences within your major, The UTEAM members are dedicated student learners who provide peer educational support for a specific course as part of the teaching team. Working closely with faculty and graduate assistants, UTEAM members are an asset to the SPH learning community. This program is open to undergraduate students in the School of Public Health at the College Park Campus and requires a co-requisite enrollment in SPHL333 and SPHL399.

Director: Ms. Cynthia Kershaw

Financial Assistance

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For more information, visit: www.financialaid.umd.edu (http://www.financialaid.umd.edu).

Awards

Awards within the School of Public Health include the Jerry P. Wrenn Scholarships, the Noel Myricks Endowed Scholarship, the Ned Gaylin Endowed Scholarship, the Jeanette Spier Beavers Memorial Scholarship the Andrew Billingsley Endowed Scholarship, the David Hyde Scholarship, the Doris Sands Scholarship, the Quinn Scholarship, the Alice Morgan Love Scholarships, NASPE Major of the Year Award, EDA/AAPHERD Outstanding Future Professionals Awards, the Dean's Senior Scholars Awards the Fraley Award, and several TerpStart Scholarships.

Departments and Centers

The School is composed of several centers, departments and institutes. The Centers for Health Equity, Health Literacy, Prevention Research, Aging, Health Behavior Research and Young Adult Health and Development offer multiple opportunities for students to engage with faculty mentors in funded research projects. The following departments offer major programs that lead to a Bachelor of Science degree:

- Department of Behavioral and Community Health
- Department of Family Science
- Department of Kinesiology
- Public Health Science (at the College Park campus and also the Shady Grove Campus)

Special Advantages and Facilities

The Friedgen Family Student Lounge, located in the SPH Building is available for use by all students in the college between 7 a.m. and 10 p.m. Access is through the student ID card. See the Director of Facilities in 3310 SPH Bldg if you do not have access. The Student Service Center, 2242C SPH, has study areas and computers available to SPH students from 8:00 am - 4:30 pm daily. Occasionally, availability and access are limited due to classes and student programs.

The school also offers several specialized laboratories related to student success, technology and specific course applications.

Research Units

Center on Aging

http://sph.umd.edu/department/hlsa/center-aging (http://sph.umd.edu/department/hlsa/center-aging/)

The Center on Aging, as part of the Department of Health Services Administration (a graduate program), stimulates and supports aging-related activities within existing departments, colleges, and schools throughout all of the various institutions of the University System of Maryland. The center coordinates the Graduate Gerontology Certificate (master's and doctoral levels), the university's first approved graduate certificate program. The center assists undergraduate and graduate students interested in the field of gerontology and helps them to devise educational programs to meet their goals. It is a research center working in health and aging policy, lifelong learning and civic engagement, disability and aging, behavioral and social aspects of aging, and health service delivery systems. It also conducts community education programs, assists faculty in pursuing research activities in the field of aging, conducts conferences on adulthood and aging-related topics, provides on- and off-campus technical assistance to practitioners who serve older adults and sponsors the University of Maryland Osher Lifelong Learning Institute, Legacy Leadership Institutes, the University of Maryland Retirees Association, and Retired and Senior Volunteer Programs International (RSVPI).

Herschel S. Horowitz Center for Health Literacy

The Herschel S. Horowitz Center for Health Literacy has been established to address the major public health problem of poor health literacy and its effect on health outcomes. This is the nation's first academic based health literacy center and is devoted to improving health through the lifespan with emphasis on closing the health disparities gap. Research is needed to establish the nature of the casual relationships between and among the various factors including culture and society, education systems, health systems and health outcomes and costs to develop effective interventions and health policy. The center was established with a generous gift from Alice Horowitz and her family.

Maryland Center for Health Equity

The Maryland Center for Health Equity is designed to address issues connected with health disparities. The emphasis is on creating effective change from the level of the individual to issues at the macro policy level. The director is Dr. Stephen Thomas. For more information, please contact the Center at 3302E, School of Public Health Building, 301 405-8859.

The University of Maryland Prevention Research Center

Bradley O. Boekeloo, ScM, PhD
Professor, Department of Public and Community Health
Director, Prevention Research Center
University of Maryland School of Public Health
College Park, MD 20742
Office: 301-405-8546
Cell: 202-841-8546

Behavioral and Community Health

School of Public Health
1234 School of Public Health Building
301-405-2463
mwootten@umd.edu
http://sph.umd.edu/department/bch/

Behavioral and community health uses an ecological framework to identify the causes of and solutions for inequalities in the health of individuals, groups, and communities. The process of promoting health for all individuals is viewed as complex and multidimensional, thus it requires the perspectives of many stakeholder groups. Practitioners and researchers in this field use theory, evidence based practices, and community based strategies to improve health and well-being. By understanding the different aspects of behavioral and community health, students are able to actively engage with communities to develop approaches and solutions to everyday health issues.

Behavioral and community health also seeks to improve the public's health through the application of social and behavioral sciences. Through studying behavior, graduates are able to not just understand disease, but are also able to modify the incidence, prevalence, and mortality rates of many diseases that affect the communities in which we live. Additionally, community health specialists promote more efficient uses of health services, adopt self-care practices, and participate actively in the design and implementation of health programs.

The Department of Behavioral and Community Health works to establish community relationships in order to develop community interventions. The faculty and students of this department promote and foster active collaboration with researchers and community partners from many different specialties and institutions. By working with the University of Maryland, the department has established several partnerships and research and service centers that work to actively engage the community in a variety of capacities.

Programs

Major

- Community Health Major (p. 413)

Advising

In the Community Health major academic advising is not mandatory, but is strongly encouraged. It is recommended that students meet with an academic advisor once per semester at a minimum. To schedule an academic advising appointment with Matt Wootten or the BCH Academic Advising Graduate Assistant, Community Health Academic Advisors, go to: https://appointments-sphl.umd.edu/ramonline (https://appointments-sphl.umd.edu/ramonline/)

Opportunities

Internships

HLTH491: Community Health Internship

HLTH491: Community Health Internship is a unique and rewarding experience that provides Community Health majors with the opportunity to work in a mentored, professional, public and community health setting prior to graduation. This required internship is completed during the student's final semester after all other academic requirements have been successfully completed. HLTH491 is a 12 credit, 36 hours per week (15 weeks) requirement, and should be considered a full-time commitment. Students may not enroll in other classes during the internship semester.

HLTH491 may be completed during the fall, spring, or summer semesters; for planning purposes, summer internships require an application.

Questions related to HLTH491: Community Health Internship may be directed to Tracy Kennedy, Undergraduate Internship Program Manager, at kennedyt@umd.edu.

Community Health Honors Program

The Department of Behavioral and Community Health Honors Program offers undergraduates the opportunity to engage in challenging educational experiences related to social and behavioral aspects of public health. Rising juniors with strong academic records and significant interest in intellectual pursuits are invited to apply for this opportunity to partake in independent, mentored, scholarly work.

Students interested in the Community Health Honors program must meet the following requirements:

- Student in the Community Health major
- Overall GPA of 3.5 or higher
- Have successfully completed at least 3 HLTH courses (9 credits) with a major GPA of 3.5 or higher
- Must have taken HLTH200 by the start of the program
- Have completed 45 total credits before applying to the program (students should be of junior standing [approximately 60 credits] by the first semester in the program)
- Must have at least 2 semesters left of coursework prior to the HLTH491 Community Health Internship

Community Health Honors Program highlights include:

- Working one on one with a Department of Behavioral and Community Health faculty member on a thesis/project
- Graduating with distinction of departmental honors
- Ability to take HONR seminars and be a part of the UMD Honors College
- Access to HLTH410, a small, seminar-style Honors Program course to develop personal interests and professional skills

Interested students may learn more about the Community Health Honors Program by going to: http://sph.umd.edu/department/bch/undergraduate-honors-program (http://sph.umd.edu/department/bch/undergraduate-honors-program/) or contacting Dr. Kerry Green, Honors Program Director, at greenkm@umd.edu.

Eta Sigma gamma

Eta Sigma Gamma is the only National Professional Honorary in Health Education. Since being revitalized in 2017, the Epsilon Chapter of Eta Sigma Gamma (ESG) has proudly excelled in the ares of service, academics, and membership growth. Through our philanthropy and social activities, members find lifetime friendships and valuable connections for the future.

All community health majors (graduate and undergraduate) are welcome to join. Initiation of members occurs once per year. To be eligible for initiation members must:

- Attend meetings regularly
- Participate in at least 2 events per semester
- Maintain a GPA of 2.7 or higher

For more information visit: https://sph.umd.edu/department/bch/eta-sigma-gamma-epsilon-chapter (https://sph.umd.edu/department/bch/eta-sigma-gamma-epsilon-chapter/)

Scholarships and Financial Assistance

The Office of Student Financial Aid administers all types of federal, state, and institutional financial assistance programs, and in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, go to: https://www.financialaid.umd.edu/.

The School of Public Health also provides some scholarships for undergraduate students in need, including the Jerry P. Wrenn Endowed Scholarship, the School of Public Health Student Emergency Scholarship, the SPH Scholarship Fund, and TerpStart Scholarships. To learn more about School of Public Health scholarships, go to: http://sph.umd.edu/content/financing-your-degree (http://sph.umd.edu/content/financing-your-degree/).

Additional information on UMD-related financial resources can be found at http://sph.umd.edu/content/student-resources-and-services (http://sph.umd.edu/content/student-resources-and-services/), by clicking the "Financial/Resource Assistance" link.

Awards and Recognition

Each spring, the Department of Behavioral and Community Health recognizes a select few exceptional Community Health undergraduates and graduates by honoring them with awards in recognition of their achievements at the annual School of Public Health Convocation.

Community Health Major

The Bachelor of Science in Community Health is an interdisciplinary public health degree program rooted in social and behavioral science and theory and focused on making meaningful contributions to impact health and quality of life at all levels of society. Students learn to address the complex individual, community, and societal factors impacting health through a highly-structured, professionally-focused program that culminates in a full-time, mentored internship during the final semester.

The program is designed to serve as a gateway to graduate studies or as a transition directly to the field as an engaged, prepared, and well-informed public health practitioner. During the program, students have opportunities to learn outside of the classroom through volunteer work, study abroad opportunities, collaboration with departmental faculty through independent study, work at the University Health Center for credit, and public health-related student groups.

Graduates of the Community Health major pursue careers in research, advocacy, policy, health education, social work, community outreach, and other public health related areas. They work locally, nationally, and internationally primarily through foundations, non-profit organizations, and government services.

Course sequencing, the undergraduate program handbook, and opportunities for student involvement can be found on our website: https://sph.umd.edu/department/bch/undergraduate-degree-program (https://sph.umd.edu/department/bch/undergraduate-degree-program/).

Program Learning Outcomes

As a result of the Bachelor of Science in Community Health degree program, students will be able to:

1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. Examine the socio-economic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health-specific writing and communication.
10. Assess and communicate individual and community-level needs for health promotion and disease prevention.
11. Create and apply strategies that effectively incorporate cultural competences with health promotion and community health initiatives.
12. Synthesize and apply principles and theories of community health that are needed for the development of effective and evidence based health promotion and disease prevention strategies.
13. Promote and advocate for effective community health initiatives at the local, state, and federal levels.
14. Collaborate with community organizations to apply public health principles in a real-world setting.

Requirements

The total number of credits required to graduate with a Bachelor of Science degree in Community Health is 120, and the number of Community Health major-required course credits is 69. Students must earn a grade of C- or higher in all Community Health major-required coursework. HLTH491, Community Health Internship, is completed during the final semester in the Community Health major, after all other coursework has been successfully completed. Students can elect to complete an area of specialization in selected areas (Special Populations, Health Communication, Health Risk Behavior).

Course	Title	Credits
Public and Community Health Core		**13**
SPHL100	Foundations of Public Health	
HLTH124	Introduction to Behavioral and Community Health	
EPIB301	Epidemiology for Public Health Practice	
EPIB315	Biostatistics for Public Health Practice	
HLTH306	Macro Level Influences on Community Health	
Public and Community Health Foundational Science		**8**
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	
BSCI201	Human Anatomy and Physiology I	
Social and Behavioral Public Health		**9**
HLTH200	Introduction to Research in Community Health	
HLTH230	Introduction to Health Behavior	
HLTH364	Social Media & Digital Tools for Community & Public Health	
Community Public Health		**9**
HLTH140	Personal and Community Health	
HLTH302	Measuring Change in Community Based Research	
HLTH391	Making a Difference: Applying Community Health	
Health Electives		**12**
	Students can select from a pre-approved list of 3-credit health elective offerings	
Professional Preparation		**18**
HLTH420	Effective Strategies for Public Health Practice	
HLTH490	Professional Preparation in Community Health	
HLTH491	Community Health Internship	
Total Credits		69

Four Year Plan

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog

Family Science

School of Public Health
1142 School of Public Health, Bldg. 255
301-405-3672
fmsc@umd.edu
www.sph.umd.edu/fmsc (http://www.sph.umd.edu/fmsc/)

The major in Family Science focuses on the study of families and the problems they face in contemporary society. The major offers excellent training in scientific methods to understand family development, behavior, and strengths, and to solve family problems. Students learn to describe, explain, and improve the quality of family life through education, applied research, policy analysis, and human services program management. For additional information on the field of family science, please visit the National Council on Family Relations website: http://family.science (http://family.science/)

Programs

Major

- Family Science Major (p. 416)

Advising

The Family Science Department provides a multi-tier advising system that will help students design and carry out a program of study best suited to their interests and needs. Several advisors are available, depending on student need: the Family Science Academic Advisor, Kendyl Oliver; Undergraduate Program Director, Kerry Tripp; Faculty advisors; and SPH advisors at the School of Public Health Center for Academic Success and Achievement (CASA).

For general questions and consultation about degree requirements, the Family Science Academic Advisor, Kendyl Oliver, is available in the main office (1142MM School of Public Health) as a first point of contact. For questions about careers in Family Science and research opportunities, contact Undergraduate Program Director, Kerry Tripp at KTripp@umd.edu. The Family Science Academic Advisor, Kendyl Oliver, also conducts change of major workshops and orientations for students in the major.

For more information, or to schedule an appointment with the Undergraduate Program Director visit http://sph.umd.edu/department/fmsc/advising (http://sph.umd.edu/department/fmsc/advising/).

Opportunities

Undergraduate Research Experiences

The department has an active Undergraduate Research Assistant Program, which enables students to learn from and work with world-class scholars on family issues. Family Science undergraduates volunteer to assist Department faculty with their ongoing research projects on topics including:

- African American Families
- Couple Relationships
- Ethnicity & Families
- Family and Community Violence
- Family Financial Education
- Family Law
- Family Policy
- Fathering
- Latino Families
- LGBTQ Families
- Maternal and Child Health
- Mental Health/Addiction/Family Therapy
- Military Families
- Minority Populations
- Health
- Interracial Marriages
- Parenting
- Poverty
- Reproductive Health
- Rural Families
- Vaccine Behavior
- Work and Family

Undergraduate students who participate in Family Science research may also participate in the Maryland Center for Undergraduate Research and serve as research assistants. These research opportunities particularly benefit students who are applying to graduate school.

The department also participates in several other undergraduate research programs, such as the Senior Summer Scholars Program and the Ronald E. McNair Post-Baccalaureate Achievement Program. Students may also set an appointment with Undergraduate Program Director to answer questions and learn about current undergraduate research projects in Family Science.

Internships

All Family Science majors are required to complete an internship experience as part of the major. The internship program is a capstone project designed to integrate department and other coursework with a real-time work experience that focuses on healthy families. In addition to a 120-hour semester-long field placement, students are required to attend a capstone seminar (FMSC477). Students in the seminar integrate classroom theory with their field placement and share work-related activities, broadening their exposure to work in the discipline of Family Science and their knowledge of specific career opportunities. In addition, the seminar focuses on students' cultural competence in the workplace. Each approved internship must have a significant focus on the family unit, incorporating the needs and concerns of the family in addition to those of the individual. Interns will be expected to utilize Family Science theories and concepts throughout the accompanying seminar to evaluate their internship experience. Therefore, it is essential that the internship responsibilities relate directly to family.

Students who need help deciding on an internship have access to the **FMSC Internship Database**, which contains listings of organizations that have requested our students along with those where Family Science students have completed internships.

The internship course is open to all FMSC majors who have completed FMSC330 and FMSC383 plus a minimum of six additional credits of FMSC coursework. The internship contract forms and supervisor's letter are available online at https://sph.umd.edu/department/fmsc/family-science-internship-fmsc-477 (https://sph.umd.edu/department/fmsc/family-science-internship-fmsc-477/).

Students may also pick up the documents in the main FMSC office, 1142 School of Public Health Building.

There are strict deadlines for turning in completed contracts to the FMSC office:

Spring Internship contract: Due December 1

Summer & Fall Internship contract: Due May 1

Honors Program

The FMSC Honors Program is designed to provide academically talented students with a more advanced and enriching educational experience in Family Science. The Honors Program gives students an opportunity to participate in scholarly independent study, interact with FMSC faculty, and examine a range of intellectual topics in greater depth than is possible in the traditional Family Science program. Students enroll in special Honors courses, Honors option work in regular courses, and independent research. The program culminates with the preparation and possible presentation of a Senior Honors Thesis.

FMSC majors who are interested in this additional challenging educational experience and meet the following criteria, may apply to the FMSC Honors Program:

- A UMD GPA of 3.3 with at least 45 credits completed
- A FMSC GPA of 3.5 and
- Completed FMSC290 with a grade of 'B' or better and an additional three credits in FMSC

Or

- ECON200 and an additional six credits in FMSC

Students meeting the criteria and wishing to participate in the Honors Program must apply three semesters (not including summer) prior to graduation. More information and application forms are available on the FMSC web site or from the FMSC Honors Program Coordinator, Dr. Mia Smith Bynum at msbynum@umd.edu

Student Societies and Professional Organizations

Maryland Council on Family Relations (MCFR) is a student chapter of the National Council on Family Relations, a professional organization for family researchers, educators, and practitioners. The organization provides an opportunity for students to explore family issues, meet fellow students, and prepare for careers in teaching, research, policy analysis, or direct service to families. MCFR is open to all undergraduate and graduate Family Science students. For more information, please contact FMSC at FMSC.umd.edu

Phi Upsilon Omicron is a nationally recognized honor society focused toward observing academic excellence, enhancing qualities of leadership by providing opportunities for service, and encouraging lifelong learning and commitment in order to advance family and consumer sciences and related areas. Members participate in community service activities on campus and in the surrounding Metropolitan DC areas. They also collaborate with MCFR to conduct informative workshops for members and other Family Science students on academic skills development, stress management, graduate school, and potential career paths with a Family Science degree. The Gamma Lambda Chapter has a local alumni chapter to provide our members with networking and other resources. Other membership benefits include additional networking opportunities through regional and national meetings, scholarship and fellowship awards, honor cords at graduation, and leadership opportunities at the chapter, regional, and national levels. For more information please contact the FMSC Undergraduate Academic Advisor, Kendyl Oliver.

Scholarships and Financial Assistance

The Department of Family Science has several endowed scholarships that enable us to provide some assistance to meritorious students in our Family Science Program. Early in the spring semester the department announces the availability of the awards and begins the application process. Recipients are announced by May of each year.

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: www.financialaid.umd.edu (http://www.financialaid.umd.edu).

Awards and Recognition

FMSC nominates meritorious students for recognition at the annual SPH Convocation for many prestigious awards including Dean's Scholars awards, the Jerry Wrenn Scholarship awards and the Lester M. Fraley award. For more information on FMSC department Scholarships and Awards, please see the FMSC website at http://sph.umd.edu/department/fmsc/about-us **(**http://sph.umd.edu/department/fmsc/about-us/**)**

Academic Programs and Departmental Facilities

The Family Science program is located in the UMD School of Public Health, which supports our faculty and students' public health-focused programs and encourages cross-collaborations with other SPH departments. FMSC's main office, room 1142, is open year-round (except university holidays), Monday through Friday, from 8:30 am to 4:30 pm. Students are encouraged to drop by for: advising or information about undergraduate programs; department courses and internships; faculty meetings and mentoring; and ways to get involved in departmental research and student activities.

Family Science Major

The Family Science major provides an interdisciplinary focus on the study of families, health and the problems they face in contemporary society. The major offers excellent training in scientific methods to understand family development, behavior, strengths and challenges. Students learn to describe, explain, and improve the quality of family life through education, applied research, legal and policy analysis, and human services program management. Majors acquire skills in writing, speaking, and computing across the Family Science curriculum. As part of the required research course, all students design a study, collect data, prepare, and present an empirical research project prior to graduation.

The Family Science major prepares students for many career paths in areas including family therapy, public health, family life education, social work, law, policy analysis, human services, and family mediation. A wide variety of employment opportunities exist for Family Science graduates in direct service and management positions in government, non-profit, and private agencies. The major also provides excellent preparation for graduate study in family science, marriage and family therapy, social work, professional schools such as medicine, dentistry and law, public health, psychology, human resource management, and other social science disciplines.

Courses offered by this department are listed under the acronym **FMSC.**

Admission to the Major

Upper-level students who wish to change or declare a major in Family Science can only do so through a Change of Major Workshop. To register for a workshop, visit https://sph.umd.edu/content/become-sph-major (https://sph.umd.edu/content/become-sph-major/). Students must register in advance in order to attend a Change of Major Workshop. Freshman or admitted high school seniors may declare the FMSC major at orientation.

Program Learning Outcomes

1. Students evaluate policy and programmatic interventions to address social and behavioral factors that influence family well-being.

2. Students demonstrate the principles of cultural competence that shape the experiences and disparities of vulnerable families and populations.
3. Students create a hypothesis, conduct research, prepare data and present a research project that addresses a significant issue of family well-being.
4. Students demonstrate basic knowledge of family theories and apply the knowledge to diverse contexts, including experientially in the required workshop.
5. Students analyze and critique the range of social structures and systems including health, legal, and economic that affect family well-being.

Requirements

All students must earn a grade of 'C-' or better in all courses applied toward completion of the major.

Course	Title	Credits
Required Courses - Major Subject Area		
SPHL100	Foundations of Public Health	3
FMSC302	Research Methods in Family Science	3
FMSC310	Maternal, Child and Family Health	3
FMSC330	Family Theories and Patterns	3
FMSC332	Children in Families	3
FMSC381	Poverty, Affluence, and Families	3
FMSC383	Delivery of Human Services to Families	3
FMSC432	Adult Development and Aging in Families	3
FMSC477	Internship and Analysis in Family Science	3
FMSC487	Family Law	3
Required Courses - Department Electives		
Select six additional FMSC departmental credits [1]		6
Additional Courses Required of All Majors		
PSYC100	Introduction to Psychology	3
Select one of the following:		3
FMSC290	Family Economics	
ECON200	Principles of Microeconomics	
ECON201	Principles of Macroeconomics	
EDMS451	Introduction to Educational Statistics	3
or STAT100	Elementary Statistics and Probability	
SOCY100	Introduction to Sociology	3
or SOCY105	Introduction to Contemporary Social Problems	
Select one of the following:		3
COMM100	Foundations of Oral Communication	
COMM107	Oral Communication: Principles and Practices	
COMM125		
COMM200	Critical Thinking and Speaking	
INAG110	Oral Communication	
Total Credits		51

[1] FMSC105 and FMSC298F cannot be used to meet this requirement unless they are taken before the student completes 60 credits. For questions about independent studies and fieldwork, please consult an advisor.

Four Year Plan

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog

Kinesiology

Department of Kinesiology

School of Public Health Building
301-405-2450

http://sph.umd.edu/department/knes (http://sph.umd.edu/department/knes/)

The Department of Kinesiology studies the complex role of physical activity in human health and performance across the lifespan. We offer a Bachelor of Science degree in which students gain conceptual and experiential knowledge in the anatomical, physiological, psychological, sociological, and historical perspectives on physical activity, movement, exercise and sport. Today there are close to 900 undergraduates majoring in Kinesiology who will go on to further study in health professions (such as physical therapy, occupational therapy, medicine), sport-related professions (sport management, sport marketing, coaching), fitness-related professions (exercise leader, personal trainer) and other public health and physical activity-related careers. Our students are prepared to pursue graduate programs in Kinesiology and related fields. We offer a vibrant departmental Honors Program to students who excel in our program and seek research experience.

A brief description of the program follows. Students should obtain a current Student Handbook for the Kinesiology degree on the web at www.sph.umd.edu/department/knes (https://sph.umd.edu/department/knes/).

Programs

Major

- Kinesiology Major (p. 419)

Advising

There are a variety of advisors available to assist you with your degree progress and future plans. Kinesiology advisors assist with registration procedures, program updates, university resources, career guidance, and related issues. Students are strongly encouraged to follow their approved academic plan for timely progress throughout the degree program. Changes in the academic plan should be discussed with an academic advisor.

Walk-in hours are available each semester and advertised through the KNES listserv. Students are encouraged to use the online advising appointment process or email an advisor at advisingknes@umd.edu.

While advising is not mandatory, it is highly encouraged you meet regularly with an advisor. Additionally, meeting with a pre-health or career advisor should supplement, not replace, meeting with a KNES advisor.

To learn more about advising for Kinesiology students visit http://sph.umd.edu/department/knes/advising

Dr. Elizabeth Brown; Instructor, Advisor & Internship Coordinator, ebrown2@umd.edu

Dr. Joanna Klossner; Instructor, Advisor & Internship Coordinator, jklossne@umd.edu

Polly Schurer; Director of Undergraduate Studies, pollys@umd.edu

Lindsey Winter; Advisor/Perspective Student Coordinator, lmrodkey@umd.edu

---

Schedule an appointment online: https://sph.umd.edu/department/knes/advising (https://sph.umd.edu/department/knes/advising/)

Opportunities

Undergraduate Research Experiences

Undergraduate research experiences are strongly encouraged.

Research internships are available from 1 to 3 credits and are recommended at the junior or senior level, following the completion of most kinesiology core courses but requests can be made to participate earlier.

Additional information is available on the UMD Undergraduate Research website (www.ugresearch.umd.edu/ (http://www.ugresearch.umd.edu/)) or by contacting the director of the undergraduate programs (301-405-2480).

Internships

Internships are strongly encouraged to assist students in connecting and applying academic and conceptual knowledge to the real world. Most students consider internships during their junior and senior years (or earlier in certain situations) following the completion of related kinesiology core and options courses.

From a practical perspective, internships are invaluable in helping students focus on career options, gain experience, establish professional contacts and, perhaps most importantly, deciding whether a particular field is truly a good fit both professionally and personally. Students can take up to 15 credits of internship credits.

Additional information is available on the department website (http://sph.umd.edu/department/knes/internships (http://sph.umd.edu/department/knes/internships/)) or by contacting a member of our advising team.

Honors Program

The Department of Kinesiology Honors Program provides an opportunity for students to engage in challenging educational experiences related to the study of human movement, sport, and exercise. Students with strong intellectual interests and the ability to pursue those interests at a high level are eligible for this program. The goal of the Honors Program is to nurture these students and encourage them to pursue their interests in a range of intellectual topics. The Honors Program in the Department of Kinesiology is primarily designed for junior and senior level students to encourage them to engage in scholarly independent study and discussions.
Admission to the Honors Program is based on a multifaceted set of criteria and administered through the Departmental Honors Committee.

Students interested in entering the Honors Program should visit the following website: https://sph.umd.edu/department/knes/honors-program (https://sph.umd.edu/department/knes/honors-program/)

Admission to the Honors Program is based on a multifaceted set of criteria and administered through the Departmental Honors Committee. Students interested in entering the Honors Program should submit a written request to the Chair of the Honors Program, described below in detail. Each application will be treated on an individual basis; therefore the Honors Committee may take work experience, leadership, motivation and maturity into consideration. Contact the Director for more information. The applicant must meet the following minimum requirements and is expected to participate in the Honors Program for a minimum of 3 semesters:

1. An overall GPA of 3.50 on a minimum of 45 credits. (Exception: Students who are close to achieving a 3.50 GPA may submit additional materials to the Honors Committee for consideration.)
2. Have a 3.50 GPA in courses taken within the Department of Kinesiology, to include at least 9 credits from the following courses: KNES287, 293, 300, 350, 360, 370, 385.

Student Societies and Professional Organizations

Kinesiology Student Organization (KSO)

The mission of this Kinesiology Student Organization is to increase networking within the department (students, faculty, alumni), expose members to a variety of resources to help them succeed, and to enhance the overall sense of community through social events and community service. This is a student run organization that values opinions and ideas from everyone in the kinesiology community.
E-mail ksoumd@gmail.com to subscribe to the group's list-serve.

Pre-Physical Therapy Association

The Pre-Physical Therapy Association is a student organization that is directed towards students who are seeking a career or are interested in physical therapy. This organization is designed to prepare students for entrance into a professional curriculum for physical therapy at institutions that offer professional advanced degrees. Our goal is to be an effective organization that guides its members to become competitive candidates for PT school. We prepare our members by organizing meetings regarding GREs, PT school applications, resumes, community service, different paths in the PT field, plus much more.

Phi Alpha Epsilon

Phi Alpha Epsilon (PAE) is a local honorary society open to undergraduate and graduate students in Kinesiology, Behavioral and Community Health, Family Science, and Public Health Science.The organization was founded in the fall of 1952 by students and faculty of the college that would recognize academic achievement and promote professional development. Members make a commitment to provide service to the college, university, and community.

Scholarships and Financial Assistance

The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: www.financialaid.umd.edu (http://www.financialaid.umd.edu). or www.scholarships.umd.edu (http://www.scholarships.umd.edu)

For information on departmental scholarships, please visit the department website: https://sph.umd.edu/department/knes/financial-support (https://sph.umd.edu/department/knes/financial-support/).

Kinesiology Major

The Department of Kinesiology offers a Bachelor of Science Degree. Students gain conceptual and experiential knowledge in the anatomical, physiological, psychological, sociological, and historical perspectives on physical activity, movement, exercise and sport. Today there are close to 1000 undergraduates majoring in Kinesiology who will go on to further study in health professions (such as physical therapy, occupational therapy, medicine), sport-related professions (sport management, sport marketing, coaching), fitness-related professions (exercise leader, personal trainer) and other public health and physical activity-related careers. Our students are prepared to pursue graduate programs in Kinesiology and related fields. We offer a vibrant departmental Honors Program to students who excel in our program and seek research experience.

A brief description of the program follows. Students should obtain a current Student Handbook for the Kinesiology degree on the web at www.sph.umd.edu/KNES (http://www.sph.umd.edu/KNES/). The program requires a grade of 'C-' or better in all required course-work.

Program Objectives

The overall mission of the School of Public Health is to promote and protect the health and well-being of the diverse communities throughout Maryland, the nation, and the world through leadership and collaboration in interdisciplinary education, research, practice, and public policy.

The undergraduate educational mission of the Department of Kinesiology is to enable students to develop an interdisciplinary knowledge of kinesiology, value physical activity and its integration within the discipline, and understand how kinesiologists work to improve the health and well-being of individuals and society.

Program Learning Outcomes

At the completion of the B.S. degree in Kinesiology, students should demonstrate the following outcomes:

1. Students will interpret, synthesize, and critically analyze research underlying the kinesiological dimensions of physical activity and health.
2. Students will develop principled reasoning skills necessary to apply and extend kinesiology knowledge to address problems that are relevant to physical activity and the health of diverse populations.
3. Students will integrate, interrogate, and communicate the connection between the scholarship of kinesiology and the goals of public health.
4. Students will engage in a diversity of physical activities both within and outside their formal curriculum.
5. Students will integrate their physical activity experiences with kinesiology sub-disciplinary knowledge.

Requirements

The Kinesiology program offers students the opportunity to study the interdisciplinary body of knowledge related to human physical activity and sport, and to pursue specific specializations so that each individual can prepare for a particular career goal within the broad discipline. To complete the Kinesiology degree a minimum of 120 credits is required, including the general education program.

Course	Title	Credits
Supporting Courses		
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI201	Human Anatomy and Physiology I	4
BSCI202	Human Anatomy and Physiology II	4
MATH/STAT	Statistics Course	3
KNES Core Requirements		
KNES287	Sport and American Society	3
KNES293	History of Sport in America	3
KNES300	Biomechanics of Human Motion	4
KNES350	The Psychology of Sports & Exercise	3
KNES360	Physiology of Exercise	4
KNES370	Motor Development	3
KNES385	Motor Control and Learning	3
KNES497	Kinesiology Senior Seminar [1]	3
SPHL100	Foundations of Public Health	3
KNES Upper Level Option Courses		**12**
Select 12 credits of KNES upper level option courses [2]		
Physical Activity Courses [3]		
Select one of the following:		1-3
KNES200	Introduction to Kinesiology	
KNES201	Kinesiological Principles of Physical Activity	
KNES Activity	4 different KNES physical activity courses	4
Total Credits		61-63

1. Prerequisite: A professional writing course with a grade of 'C-' or better, 6 core and 2 KNES options; STAT100 or equivalent.
2. See handbook or webpage. Note: all Option courses have one or more KNES Core courses as a prerequisite. Prerequisites must be completed with a grade of 'C-' or better.
3. See handbook or webpage.

Four Year Plan

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog

Public Health Science

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena. As a collaborative degree involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park (p. 421) and Shady Grove (p. 435) campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes

1. **Discuss** the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. **Use** basic public health concepts, methods, and tools for data collection and analysis.
3. **Identify** the major health-related needs and concerns of populations and **formulate** basic processes, approaches, and interventions as possible solutions.
4. **Describe** the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. **Examine** the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.
6. **Demonstrate** the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. **Compare and contrast** the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. **Characterize** the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. **Illustrate** the basic concepts of public health specific writing and communication.
10. **Interpret and synthesize** scientific knowledge to **propose** evidence-based approaches and solutions to public health problems.

Programs

Major

- Public Health Science: College Park (p. 421)
- Public Health Science: Shady Grove (p. 435)

Advising

Academic advising is strongly encouraged. To see specific advising requirements and resources for each campus location, see below:

- Advising Requirements and Resources: College Park (http://sph.umd.edu/department/phs/advising/)
- Advising Requirements and Resources: Shady Grove (p. 436)

Opportunities

Internships and Research Experiences

Internships and research experiences are strongly encouraged. Students participate in experiences both on and off campus. Public Health Science internship and independent study coordinator, Nancy Smith (nsmith10@umd.edu), can be contacted regarding the opportunity to complete an internship or research experience for credit.

Student Societies and Professional Organizations

Students Engaged in Public Health (SEIPH) (https://sph.umd.edu/department/phs/students-engaged-public-health/) is the student-led service organization for Public Health Science students. With a mission to extend the work of public health to the nearby community, SEIPH identifies pressing public health issues each semester and then organizes activities related to the public health concern.

General Scholarships and Financial Assistance

The Office of Student Financial Aid administers all types of federal, state, and institutional financial assistance programs, and in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, go to: https://www.financialaid.umd.edu/.

The School of Public Health also provides some scholarships for undergraduate students in need, including the Jerry P. Wrenn Endowed Scholarship, the School of Public Health Student Emergency Scholarship, the SPH Scholarship Fund, and TerpStart Scholarships. To learn more about School of Public Health scholarships, go to: http://sph.umd.edu/content/financing-your-degree (http://sph.umd.edu/content/financing-your-degree/).

Additional information on UMD-related financial resources can be found at http://sph.umd.edu/content/student-resources-and-services (http://sph.umd.edu/content/student-resources-and-services/), by in "Financial/Resource Assistance."

Public Health Science Scholarships

The Public Health Science Program offers two scholarships specifically for Public Health Science students. These scholarships include the Barbara and Carl Alving Endowed Research Award in Public Health Science and the Whitlark Endowed Scholarship in Public Health Science. More details regarding these scholarships are available at the Public Health Science Scholarship website. (http://sph.umd.edu/department/phs/scholarship-opportunities-public-health-science-students/)

Awards and Recognition

Each spring, the Public Health Science program recognizes a select few exceptional undergraduates at the annual School of Public Health Honors Convocation.

Public Health Science Major

School of Public Health
Room 2387
301- 405-5436
phsc@umd.edu
https://sph.umd.edu/degrees/bachelor-science-public-health-science-college-park (https://sph.umd.edu/degrees/bachelor-science-public-health-science-college-park/)

The Public Health Science program includes a strong curriculum in science and public health courses, such as biostatistics, epidemiology, environmental health, and global health. Students will have the opportunity for individual exploration in public health through electives, laboratory experiences, optional internships, and a culminating interdisciplinary capstone course. As a collaborative degree involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park and Shady Grove campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes

1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. Examine the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health specific writing and communication.
10. Interpret and synthesize scientific knowledge to propose evidence-based approaches and solutions to public health problems.

Requirements

In order to graduate with a Bachelor of Science degree in Public Health Science, students must complete 120 credits, 74 of which are specific to the Public Health Science degree. Students must earn a minimum grade of C- or higher in all Public Health Science major-required coursework.

Course	Title	Credits
Scientific Foundation Courses		
MATH120	Elementary Calculus I	3
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4
BSCI201	Human Anatomy and Physiology I	4
BSCI202	Human Anatomy and Physiology II	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
BSCI222	Principles of Genetics	4
BSCI223	General Microbiology	4
Public Health Science Foundation Courses		
SPHL100	Foundations of Public Health	3
HLTH366	Behavioral and Community Issues in Public Health	3
EPIB301	Epidemiology for Public Health Practice	3
EPIB315	Biostatistics for Public Health Practice	3

MIEH300	A Public Health Perspective: Introduction to Environmental Health	3
MIEH400	Introduction to Global Health	3
KNES320	Physiological Basis of Physical Activity and Human Health	4
PHSC415	Essentials of Public Health Biology: The Cell, The Individual, and Disease	3
PHSC497	Public Health Science Capstone	3
Public Health Science Options Courses [1]		**12**
Total Credits		74

[1] The Public Health Science option courses build upon the Scientific and Public Health Science Foundation courses. The option courses are 300 and 400 level courses primarily offered within the School of Public Health. By choosing from these courses, students have an opportunity to customize their program. Students are encouraged to choose courses that best align with a particular career goal. Please visit the PHSC website for the current list of approved options. https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018 (https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018/)

Four Year Plan

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog

School of Public Policy

2101 Van Munching Hall
301-405-6330
https://spp.umd.edu/

Dean: Robert Orr
Associate Dean: Nina P. Harris

The school currently offers a Bachelor of Arts in Public Policy, as well as minors in Nonprofit Leadership and Social Innovation, Sustainability Studies and Public Leadership. Courses may be found under PLCY. These courses are suggested for students wishing to develop knowledge and experience in public policy and leadership. The school also offers a 5-year bachelor's/master of public policy program for selected students. For additional information on the wide range of undergraduate opportunities see https://spp.umd.edu/your-education/undergraduate (https://spp.umd.edu/your-education/undergraduate/)

Admission to the Major

First-time freshmen students who wish to major in Public Policy at the University of Maryland are encouraged to apply for admission to the university by the early action deadline of November 1. There is no separate application for our major and seats in the major are guaranteed as we are NOT a limited enrollment program.

Current University of Maryland students who wish to add the Public Policy major should contact our advisor at plcyundergrad@umd.edu for more information. Our major is not limited enrollment so all students are welcome assuming you have time to complete all the major requirements.

Academic Programs

Major

- Public Policy Major (p. 424)

Minors

- Nonprofit Leadership and Social Innovation Minor (p. 423)
- Public Leadership Minor (p. 423)
- Sustainability Studies Minor (PLCY) (p. 425)

Advising

The Public Policy major has mandatory advising every semester. Academic advising is an ongoing process that helps students clarify their educational and career goals, and then chart a meaningful plan for achieving those goals. Advising is the joint responsibility of the student and the advisor. The advisor assists students in evaluating their degree progress and helps them select appropriate courses and other educational experiences tailored to their personal goals. Ultimately, students are responsible for making decisions, setting and meeting identified goals and published requirements. More information for students can be found here (https://spp.umd.edu/info/students/undergraduate/). Students can contact the Public Policy advising office by calling (301) 405-2370 or emailing plcyundergrad@umd.edu.

Opportunities

Living-Learning Programs

Public Leadership Program in College Park Scholars

A living-learning program of the University's College Park Scholars (https://scholars.umd.edu/), Public Leadership explores the theory and practice of leadership, empowering students to become social change agents through hands-on public service projects and examination of pressing social, political and economic issues. Join a community of students from across the University who are committed to developing their leadership skills for the common good.

Learn more about Public Leadership (https://scholars.umd.edu/programs/pl/)

iGive: Carillon Community

A living-learning program in the University's Carillon Communities (https://www.carillon.umd.edu/), iGive explores a big question that matters to our world - how can you use philanthropy, innovation and social change for good? Spend your freshman year with a group of like-minded students as you identify a social cause you share a passion for and then develop and practice leadership skills as you support a local nonprofit organization.

Learn more about iGive (https://www.carillon.umd.edu/igive.html)

Specialized Academic Programs

Rawlings Undergraduate Leadership Fellows Program

Honoring the legacy of Howard Peters 'Pete' Rawlings and his decades of public service in the Maryland House of Delegates, the Rawlings Program provides students the opportunity to champion causes they are passionate about and advocate for those in the community that are underserved and marginalized. Combining mentorship, engagement with expert faculty and public leaders, and hands-on experiences working in the community, the Rawlings Program realizes students' commitment to ethical leadership and public service.

LEARN MORE ABOUT THE RAWLINGS PROGRAM (https://spp.umd.edu/your-education/undergraduate/co-curricular-programs/rawlings-undergraduate-leadership-fellows/)

Financial Assistance

Senator John A. Cade Public Leadership Scholarship

Senator John A. Cade was one of Maryland's most extraordinary and exemplary public servants. As a member of the Maryland Senate from 1975-1996, his dedication to government, public service and education helped enhance the lives of his constituents.

'As much as any legislator, Jack Cade understood that it was education that made a difference. He was a champion for higher education funding throughout his career.'
--Senator Thomas V. Mike Miller, Jr.

This scholarship was created to honor the memory of Senator John A. Cade by enabling students to carry on his legacy of public service and leadership.

Eligible candidates must:

- be a current Maryland resident
- be an undergraduate student
- have a 3.0 GPA or higher
- have an interest in public service, government involvement, or political leadership.

For more information: https://spp.umd.edu/admissions/financial-aid-scholarships (https://spp.umd.edu/admissions/financial-aid-scholarships/)

Rosalie Reilly Gubernatorial Fellowship

Rosalie Reilly was one of Maryland's most extraordinary and exemplary public servants who was a role model for young leaders as they prepared to enter public life.

This fellowship was created to honor the memory of Ms. Reilly by enabling female students to carry on her legacy of public service and leadership. As a part of the fellowship, students commit to completing a project of significant impact to the community during their fellowship year.

Eligible candidates must:

- be available to serve at least 135 fellowship
- hours have an interest in public service, government involvement, or political leadership
- be a female undergraduate or graduate student
- have a 3.0 GPA or higher

For more information: https://spp.umd.edu/admissions/financial-aid-scholarships (https://spp.umd.edu/admissions/financial-aid-scholarships/)

The Office of Student Financial Aid (OFSA) administers all types of federal, state, and institutional financial assistance programs and, in cooperation with other University offices, participates in the awarding of scholarships to deserving students. For more information, visit: www.financialaid.umd.edu (http://www.financialaid.umd.edu).

Nonprofit Leadership and Social Innovation Minor

School of Public Policy
1118 Taliaferro
plcyundergrad@umd.edu (plminor@umd.edu)
https://spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/)

Built with hands-on learning, the Minor in Nonprofit Leadership and Social Innovation heightens students' awareness of local, national and global issues and examines different approaches to social impact. Students study the role of the nonprofit, NGO, and social sector, as well as social innovation, leadership, and the skills required for effective nonprofit management. This minor is open to all undergrads on campus, regardless of major. Students who want to take a deeper dive, can pursue the Major in Public Policy (https://spp.umd.edu/your-education/undergraduate/public-policy-major/) with a focus on Nonprofit Leadership and Social Innovation.

Requirements

Complete the application form (https://spp.umd.edu/sites/default/files/2019-06/Nonprofit_Leadership_and_SI_Minor_Application.pdf) (electronically or handwritten) and email it to nplminor@umd.edu. More information about this minor can be found at https://spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/).

Students must complete at least 15 credits, including three required courses and two electives. Other electives are being added to this list and students may also propose other courses to meet the elective requirements. No course may be used to satisfy the requirements of more than one minor and at least nine credits must be at the 300-400 level. All courses must be passed with a grade of C- or better.

Course	Title	Credits
Required Courses: (3 classes, 9 credits)		
PLCY213	Foundations of Nonprofit Leadership and Social Innovation	3
PLCY310	Nonprofit Leadership and Social Innovation in Action	3
Add one of the following		3
PLCY215	Innovation and Social Change: Creating Change for Good	
PLCY388	Special Topics in Public Policy (PLCY388D Innovation and Social Change: Do Good Now)	
BSOS388	Behavioral and Social Sciences Special Topics (BSOS388B Innovation and Social Change: Do Good Now)	
HONR348	Advanced Honors Seminar (HONR348D Innovation and Social Change: Do Good Now)	
ENME467	Engineering for Social Change	
Electives (2 classes, 6 credits)		**6**
One of the following courses is allowed and encouraged as an elective (students may not count more than one of the courses below toward the minor requirements):		
PLCY214	Leading and Investing in Social Change: Re-defining and Experimenting with Philanthropy	
PLCY359	Contemporary Issues in Political Leadership and Participation (PLCY359I Re-defining and Experimenting with Philanthropy)	
PLCY388	Special Topics in Public Policy (PLCY388G Global Perspectives on Leading and Investing in Social Change)	
HONR349	Honors Colloquium (Re-defining and Experimenting with Philanthropy)	
Other Electives:		
For a comprehensive list of electives see website		
Total Credits		15

Three credits of study abroad or three credits of an internship or experiential learning related to nonprofits and social innovation and approved by the director will be accepted as an elective.

Public Leadership Minor

School of Public Policy

1118 Taliaferro
plminor@umd.edu
https://spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/)

The Public Leadership minor will allow students to examine today's most pressing issues. Matters facing our world leaders such as, the global environment, human rights, the criminal justice system, equity in education, diversity, poverty, and inequality will be analyzed on multiple levels. Students will face these same challenges in their courses while learning to critically assess and recommend viable solutions through effective leadership for the public good.

Objectives and Learning Outcomes

The minor in Public Leadership has the following objectives:

1. To develop students' knowledge of leadership theories;
2. To offer undergraduate students a coherent and integrated public leadership curriculum;
3. To give undergraduate students an education providing knowledge and skills appropriate to the understanding and exercise of appropriate leadership in their chosen professions, organizations, and communities;
4. To create and support a community of young public leaders who hold a common interest in leadership studies;
5. To offer students who are interested in public service a place to begin to build an intellectual foundation which will allow them to address the problems of the next decade;
6. To prepare our students for the responsibilities of leadership and citizenship in a complex world; and
7. To gain experience in applying leadership theories and concepts in a structured internship experience.

Requirements

Requirements: 15 approved credits, at least 9 of which are 300- or 400-level. All courses taken for a minor must be completed with a minimum grade of C-. A minimum C (2.00) cumulative grade point average across all courses used to satisfy the minor is also required. Notes: No more than 6 credits may overlap between your major and the Public Leadership Minor, unless otherwise approved by your major. Additionally, courses completed in one minor may not be used to satisfy the requirements in another minor.

Course	Title	Credits
Core Course		
Select one of the following:		3
PLCY201	Public Leaders and Active Citizens	
PLCY302	Examining Pluralism in Public Policy	
Signature and Elective Courses		
Select 12 credits from approved list [1]		12
Total Credits		15

[1] The remaining 12 credits will be selected by the student from a list of approved signature courses and electives. A credit-bearing experiential learning option for which a grade is earned, e.g., internship, study abroad, research project, etc. can count as part of the remaining 12 credits. The experiential learning option must be linked to public leadership and approved in advance.

For more information, visit here **(**https://spp.umd.edu/your-education/undergraduate/minors/**) or e-mail plminor@umd.edu.**

Public Policy Major

School of Public Policy
1118 Taliaferro Hall
301-405-2370
plcyundergrad@umd.edu
https://spp.umd.edu/your-education/undergraduate/public-policy-major (https://spp.umd.edu/your-education/undergraduate/public-policy-major/)

The interdisciplinary Public Policy major focuses on using analytical decision-making to study an array of subjects ranging from the processes of making, implementing and evaluating government policies to the ethical evaluation of contemporary social problems, both domestic and international. The major has two distinctive components:

1. core foundational skills critical for the understanding and analysis of problems and proposed solutions; and
2. the application of these skills and competencies to address challenges in the real world by engaging with the policy process at local, state and national levels through real-time projects.

The major in Public Policy at the University of Maryland equips students with competence in leadership and analytical skills, supported by theory and data, to prepare them for careers in public service, policymaking, and the public, private, and nonprofit sectors.

Courses offered by this department may be found under the following acronym: PLCY.

Program Objectives

The major aims of the program are to produce:

1. Individuals who better understand themselves and the world they live in through a focused, coordinated study of the major policy-related disciplines.
2. Citizens who are adept at promoting better public outcomes both by understanding public policy problems from an inter-disciplinary, multi-sector, multi-constituency perspective and by leading institutional and policy change.
3. Graduates who can easily find meaningful employment, and are well-prepared to enter numerous graduate and professional programs, due to their strong multi-sector, interdisciplinary, analytical, problem-solving, and leadership abilities.

Program Learning Outcomes

Students completing a Public Policy major will:

1. Possess a foundational understanding of the fields of public policy and leadership, including its key processes, methodologies, and actors, both present and historic.
2. Possess a foundational understanding of the key policy related precepts and methodologies of many disciplines, including history, economics, political science, international relations, sociology, data analysis, information science, ethics and justice.
3. Be adept at acquiring and maintaining a critical understanding of key policy related developments in the world.

4. Be adept at finding, understanding, organizing, and synthesizing data and the findings of other analysts/leaders, to produce an enhanced, multi-faceted, multi-perspective, objective understanding of public issues.
5. Be adept at seeing public issues from the perspectives of various constituencies and those with different backgrounds, especially those whose perspectives are under-represented in public forums and processes.
6. Be creative and systematic problem-solvers, able to relate and apply intellectual skills and theoretical knowledge to real world problems.
7. Be able to communicate – orally, on paper, and through media – analysis and findings, especially to people who do not share their analytical, professional, or cultural background.
8. Be able to intelligently work with and lead others who are working on, or are affected by, public issues, including those from different analytical, professional, or cultural backgrounds.

Requirements

C- or better is required in all major courses and the cumulative average of these courses must be a 2.0.

Course	Title	Credits
Benchmark Requirement One [1]		
PLCY100	Foundations of Public Policy	3
HIST201	Interpreting American History: From 1865 to the Present	3
Benchmark Requirement Two [2]		
PLCY101	Great Thinkers on Public Policy	3
STAT100	Elementary Statistics and Probability	3
(STAT100 equivalent accepted)		
Required Major Courses		
ECON200	Principles of Microeconomics	3
PLCY201	Public Leaders and Active Citizens	3
PLCY203	Liberty and Justice for All: Ethics and Moral Issues in Public Policy	3
PLCY300	Governance: Collective Action in the Public Interest	3
PLCY302	Examining Pluralism in Public Policy (UP Pending)	3
PLCY303	Public Economics Raising and Spending the People's Money	3
PLCY304	Evaluating Evidence: Finding Truth in Numbers	4
PLCY306	Public Policy Analysis in Action [3]	3
PLCY309	Internship in Political Institutions: State and Local	3-6
PLCY400	Senior Capstone [4]	3
PLCY401	Contemporary Issues in Public Policy [4]	3
Introduction to Public Policy Focus or General Policy elective		3
Students may choose an area of focus or choose general policy related electives		
Focus/PLCY Elective Course 2		3
Focus/PLCY Elective Course 3		3
Focus/PLCY Elective Course 4		3
Total Credits		58-61

1 Must be completed by the end of **two semesters** into the major

2 Must be completed by the end of **four semesters** into the major

3 Taken after 60 credits

4 Taken after 90 credits

Four Year Plan

Sustainability Studies Minor (PLCY)

Co-sponsored by the College of Agriculture and Natural Resources and the School of Public Policy

1118C Taliaferro
susminor@umd.edu
https://spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/)

The study of sustainability examines each generation's commitment to protect and preserve the quality of the natural environment for the benefit of succeeding generations. The stability of natural systems and the environment, economic progress, and promoting social justice are all important sustainability goals. Promoting these goals involves choices among competing ends.

The Sustainability Studies Minor at the University of Maryland provides students the opportunity to learn how human relationships, natural resources, and diverse environments can be understood and used to address creatively and positively the global challenges that will affect future human populations and cultures. It will complement any major on campus and provide both intellectual breadth and depth in a challenging area of inquiry that is gaining a high level of interest in businesses, government agencies, and non-governmental organizations. This minor will provide students with the critical thinking and problem-solving skills necessary for them as citizens, employees, or graduate students.

To apply please: 1) complete the application form (electronically) and email it to susminor@umd.edu and 2) schedule a mandatory advising appointment during advising hours. For more information, please visit our page at https://spp.umd.edu/your-education/undergraduate/minors (https://spp.umd.edu/your-education/undergraduate/minors/) or e-mail susminor@umd.edu.

Requirements

15 approved credits, at least 9 of which are 300- or 400-level. All courses taken for a minor must be completed with a minimum grade of 'C-'. A minimum C (2.00) cumulative grade point average across all courses used to satisfy the minor is also required. Notes: No more than 6 credits may overlap between your major and Sustainability Studies, unless otherwise approved by your major. Additionally, courses completed in one minor may not be used to satisfy the requirements in another minor. Students must declare the minor a full academic year before their intended graduation.

Course	Title	Credits
AGNR/PLCY301	Sustainability [1]	3
Select one course from each of the following groups: [2]		9
Science and Technology		
Policy and Institutions		
Social and Human Dimensions		
Select an additional approved course from one of these categories or an approved, credit-bearing experiential learning option for which a grade is earned [3]		3
Total Credits		15

1. This course will introduce you to the normative concepts and new thinking surrounding sustainability. We will use readings, lectures, writing exercises, and small group exercises that address how environmental responsibility, economic health, social equity, and cultural vitality are defined and considered in the sustainability context. The roles of resilience and adaptive management will be examined as key pragmatic dimensions of sustainability and as challenging concepts shaping our environmental ethics today. Guest speakers from the Washington region with research and policy expertise will discuss current policy issues.
2. See web site for a list of approved courses
3. These experiences include internships, study abroad trips, and research projects. The experiential learning option must be linked to sustainability and approved in advance.

The Universities at Shady Grove

Camille Kendall Academic Center Building III
9636 Gudelsky Drive
Rockville, MD 20850
301-738-6000
shadygrove@umd.edu
www.shadygrove.umd.edu (http://www.shadygrove.umd.edu)

USG Executive Director and Associate Vice Chancellor for Academic Affairs, USM:
Dr. Stewart L. Edelstein

The Universities at Shady Grove (USG) is part of the University System of Maryland and a partner campus of nine Maryland universities that collaborate to offer their top degree programs, as well as certificate and continuing education programs, at one convenient location in Montgomery County. USG currently serves more than 4,000 graduate and undergraduate students, with more than 1,400 undergraduates enrolled in daytime programs.

With coursework beginning at the junior level, USG provides all the prestige and benefits of a Maryland education during a student's final two years of undergraduate study. Most credit earned at Maryland community colleges will transfer, and students can choose from a variety of majors, with classes offered at times that meet their schedules. At the Universities at Shady Grove campus, students work closely with professors from nationally ranked academic programs. Everything you need to be successful as a student can be found on USG's campus, including advising, financial aid assistance, career and internship opportunities, academic support, a library, fitness center, and cafe. Students can also take advantage of a growing number of social events, community service activities and student leadership opportunities.

The University of Maryland, College Park is one of the powerful partners that make up USG. **Students can earn a University of Maryland, College Park degree** at USG and celebrate Terrapin traditions no matter which campus they call home.

The University of Maryland, the Universities at Shady Grove, and Montgomery College have worked together to offer the Terp Transfer Partnership, which benefits students while they are still enrolled at Montgomery College and creates a seamless pathway to one of the University of Maryland programs offered at the Universities at Shady Grove. Students with at least one semester left at Montgomery College gain early access to advising, workshops, and events related to their University of Maryland program of interest at Shady Grove through the Terp Transfer Partnership program.

The University of Maryland, College Park offers nine undergraduate degrees within seven different academic departments at Shady Grove.

- Accounting, B.S.
- Biological Sciences, B.S.
- Communication, B.A.
- Criminology and Criminal Justice, B.A.
- Embedded Systems and Internet of Things, B.S.
- Information Sciences, B.S.
- Management with Specialization in Entrepreneurship, B.S.
- Marketing, B.S.
- Public Health Science, B.S.

Biological Sciences at Shady Grove

The Universities at Shady Grove
9631 Gudelsky Drive
Biomedical Sciences and Engineering Facility (Bldg IV, Room 4110)
Rockville, MD 20850
301-738-6007
usgbiosci@umd.edu
https://www.shadygrove.umd.edu/academics/degree-programs/bs-biological-sciences (https://www.shadygrove.umd.edu/academics/degree-programs/bs-biological-sciences/)

Program Director: Dr. Hadiya Woodham **Program Coordinator:** Tracy Odim

The Biological Sciences Program at the University of Maryland offers a degree program in Physiology and Neurobiology (PHNB) at the Universities at Shady Grove. The Biological Sciences Program at Shady Grove offers the Advanced Program courses normally taken in the junior and senior years.

All Biological Sciences majors complete a common sequence of introductory and supporting courses referred to as the Basic Program. For students matriculating at the Universities at Shady Grove most of these introductory and supporting courses are taken at a community college or at another four-year institution prior to admission to the Biological Sciences Program. Depending on space available, students who matriculated at College Park may transfer to the Shady Grove Program in their junior year, where they may complete the Advanced Program in Physiology and Neurobiology.

Program Learning Outcomes

1. Students should have mastered the critical knowledge at each level in the curriculum that is necessary to move on to the next level in the curriculum.
2. Students should demonstrate an ability to use and apply quantitative methods, especially: interpretation of graphical or tabular data; expression of physical, chemical, or biological process in mathematical form; solving equations to determine the value of physical, chemical, or biological variables.
3. Students at the lower level should demonstrate an ability to carry out key experimental techniques used in the chemical and life sciences disciplines.
4. Students at the lower level should have a basic understanding of how to express questions as a hypothesis, how to design a test of a hypothesis, and how to gather and analyze simple data.
5. Students at the upper level should be able to integrate and apply a relevant body of basic knowledge to the evaluation of existing scientific studies and to design studies to test specific hypotheses that includes design elements typically found in a specific field of the chemical and life sciences.
6. Students should effectively communicate in writing the processes of science and the results of scientific inquiry.

Advising

Advising is mandatory during each pre-registration period for all Biological Sciences majors. Advising for students interested in or enrolled in the Shady Grove Program is available from the Director. Call 301-738-6007 for an advising appointment.

Communication at Shady Grove

The Universities at Shady Grove
9636 Gudelsky Drive
5119 Camille Kendall Academic Center (Building III)
Rockville, MD 20850
301-738-6208
sgcomm@umd.edu
https://www.shadygrove.umd.edu/academics/degree-programs/ba-communication (https://www.shadygrove.umd.edu/academics/degree-programs/ba-communication/)

The department offers an exciting curriculum that prepares students for academic and professional careers in business, government, health, education, social and human services, and related fields. Courses offered by the department include persuasion and social influence, rhetoric and the analysis of messages, communication and new media, digital communication, organizational communication, public relations strategies, and intercultural communication. All students in the program at Shady Grove are required to complete mandatory advising each semester.

ADMISSION TO THE MAJOR

Students interested in Communication should have an overall GPA of 2.7 or better, and a grade of 'C-' or better in each of the three courses specifically required by the major (COMM250, COMM107, Statistics, or their equivalents). Applicants should also attain junior standing (56 or more transferable college credits) by the time of enrollment. For more information on admission and 1xx or 2xx-level coursework requirements, please visit the Communication web site at https://www.shadygrove.umd.edu/academics/degree-programs/ba-communication (https://www.shadygrove.umd.edu/academics/degree-programs/ba-communication/) or the Transfer Credit Services website at www.transfercredit.umd.edu (http://www.transfercredit.umd.edu). Requirements for the major are as follows:

1. Complete one of the following courses with a grade of 'C-' or better: BMGT230, CCJS200, EDMS451, PSYC200, SOCY201, STAT100 or equivalent.
2. Complete COMM107, COMM200, COMM230, or equivalent with a grade of 'C-' or better
3. Complete COMM250 or equivalent with a grade of 'C-' or better
4. A cumulative GPA of 2.7 or better

Students may repeat only one of the gateway courses and that may be repeated only once in their attempt to meet the requirements.

TRANSFER STUDENTS

Internal and external transfer students who meet the gateway requirements specified above and have a cumulative GPA of 2.7 in all college-level coursework may apply to the program.

APPEALS

All students may appeal admission decisions. Those students denied admission may appeal to the university's Office of Undergraduate Admissions.

PROGRAM LEARNING OUTCOMES

Upon completion of the degree program in Communication, students should be able to demonstrate the following knowledge and skills:

1. An ability to distinguish among a variety of theoretical approaches in the communication discipline and use them appropriately and effectively in academic work.

2. An ability to conduct research and write research reports employing social scientific and/or humanistic approaches in the communication discipline.
3. An ability to argue clearly and effectively in a speech.

Requirements

The course of study for a Communication major must satisfy all of the following requirements:

Course	Title	Credits
Oral Communication		
Select one of the following:		3
COMM107	Oral Communication: Principles and Practices	
COMM200	Critical Thinking and Speaking	
COMM230	Argumentation and Debate	
Modes of Communication Inquiry

COMM471	Public Communication Campaigns	
COMM498	Seminar	
Electives		
3XX OR 4XX-LEVEL COMM ELE		12
Total Credits		46

Notes:

- Because the department's curriculum changes over time, the department's Undergraduate Director may approve other appropriate Communication courses to meet the requirements for each track.
- Courses required for the Communication major, but taken outside COMM, may be used to satisfy general education requirements.
- Only 3 credits of COMM386 may apply toward the major.
- No course grade below the grade of 'C-' may count toward the major.
- An overall GPA of 2.0 in the major is required for graduation.

Opportunities

Undergraduate Research Experiences

Research experiences include assisting on faculty research projects, and participating in special team research projects.

Fieldwork Opportunities

To further enhance learning and career training, the department incorporates special hands-on classes such as Health Communication Campaigns, Visual Communication, and Web Design. The department also strongly promotes internship and service learning opportunities with local and state businesses and institutions, and encourages students' participation in student-run clubs.

Internships

The department's internship program helps communication majors gain professional experience, build a professional portfolio, and take the first steps toward a career. The department structures its internship program around a course, COMM386: Experiential Learning, offered each school term.

Student Societies and Professional Organizations

Social and academic activities are available to students by participating in the following student organizations: the Undergraduate Communication Association and the Lambda Pi Eta Honor Society.

Scholarships and Financial Assistance

The department offers the Chaim and Miriam Bentzlovitch Scholarship to students who exhibit academic excellence. Each year the department distributes a call for applications through e-mail.

Advising

Advising is available throughout the year in the Camille Kendall Academic Center, Suite 5119. Students should check Testudo (http://testudo.umd.edu/) for their registration date and for any mandatory advising blocks.

Four Year Plan

Roadmaps for all four-year plans can be found here (http://4yearplans.umd.edu). Select the College of your major to find the corresponding roadmap.

For more information on developing a four-year academic plan, please refer to the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog.

Criminology and Criminal Justice at Shady Grove

The Universities at Shady Grove
9636 Gudelsky Drive
5105 Camille Kendall Academic Center (Building III)
Rockville, MD 20850
301-738-6307
ccjsusg@umd.edu
https://www.shadygrove.umd.edu/academics/degree-programs/ba-criminology-and-criminal-justice (https://www.shadygrove.umd.edu/academics/degree-programs/ba-criminology-and-criminal-justice/)

THE MAJOR

Criminology and criminal justice encompasses the study of both the causes of, and responses to crime. It involves studying individual, group, and mass behavior, as well as the institutions, professions, and laws that exist to detect, control, and ameliorate the effects of crime. As a discipline, criminology and criminal justice is situated at the nexus of other social science disciplines such as sociology, psychology, and government, in addition to public policy and legal studies.

The University of Maryland, College Park offers its Bachelor of Arts in Criminology & Criminal Justice at the Universities at Shady Grove. Students transfer into this Program after completing their freshman and sophomore years elsewhere, typically at a junior college. Through this Program, students complete their junior- and senior-year coursework at USG with the option to attend full- or part-time. Upon completion of this Program, students are awarded a University of Maryland, College Park B.A. degree.

PROGRAM LEARNING OUTCOMES

Having completed the CCJS degree program, students should have acquired the following knowledge and skills:

1. Students will demonstrate basic knowledge of major criminology and criminal justice content areas.
2. Students will demonstrate a basic knowledge of descriptive and inferential statistics appropriate to the social sciences.
3. Students will demonstrate competence in basic social science research methods.

Requirements

The CCJS major is comprised of 36 credit hours of coursework in the CCJS department and either MATH107 (formerly MATH111) or STAT100. A calculus class (MATH120, MATH130, or MATH140) with a grade of C- or higher may be substituted for MATH107 or STAT100.

Course	Title	Credits
Required CCJS Courses		
CCJS100	Introduction to Criminal Justice	3
CCJS105	Introduction to Criminology	3
CCJS200	Statistics for Criminology and Criminal Justice	3
CCJS230	Criminal Law in Action	3
CCJS300	Criminological and Criminal Justice Research Methods	3
CCJS Criminal Justice Courses		
Select two of the following:		6
CCJS340	Policing	
CCJS345	Courts and Sentencing	
CCJS342	Corrections	
CCJS Criminology/Theory Course		
Select one of the following:		3
CCJS450	Advanced Juvenile Delinquency	
CCJS451	Crime and Delinquency Prevention	
CCJS454	Contemporary Criminological Theory	
CCJS Courses of Choice		
Select four CCJS courses [1]		12
CCJS LEP Gateway Requirements		
Select one of the following: [2]		3
MATH107	Introduction to Math Modeling and Probability (Formerly MATH111)	

STAT100	Elementary Statistics and Probability	
Total Credits		39

1 Courses of Choice must be completed using one or a combination of the following ways:
- Complete additional CCJS courses that are not required (i.e., CCJS325, CCJS360, CCJS418)
- Complete 1 Independent Study for credit (max 3 credits)
- Complete 1 Internship for credit (max 3 credits)

Note: Two CCJS Courses of Choice must be at the 4xx-level.

2 A calculus class, MATH120 (formerly MATH220), MATH130 or MATH140, with a grade of C- or higher may be substituted

Please keep the following information in mind:

- No grade lower than a C- may be used toward the major
- Students must achieve a combined grade point average of a 2.0 in the CCJS major

OTHER REQUIREMENTS FOR THE MAJOR

The CCJS Department enforces all prerequisites and does not oversubscribe students to courses that are closed.

Opportunities

Internships

The internship must be a learning experience involving work in a criminal justice or criminological setting. Interns are expected to gain valuable information which will add to their overall understanding of the field of criminology and criminal justice. Internship positions must center around gaining new material over the course of the semester and are expected to involve some degree of ongoing training/learning for the intern. Internship placements are subject to the approval of the Internship Director.

Internship Eligibility

Interns must meet the following criteria:

- Interns must be CCJS majors
- Interns must have completed a minimum of 56 credits at the time of application
- Interns must have a cumulative GPA of at least 2.5 at the time of application
- Interns must work 45 hours per credit over the course of the semester
- A maximum of 6 internship credits per semester and a total of 12 internship credits overall will be permitted
- Internship credit will not be approved for current or previously held jobs

Interns must register themselves for the internship prior to the end of the semester's schedule adjustment period. Obtaining Departmental approval for the internship does NOT register the student for the class. Additional information about internships can be picked up from the CCJS advising office in Building III, room 5105 or found on the CCJS@USG blog (https://ccjsusg.blogspot.com/).

Student Societies and Professional Organizations

There are two student societies available for membership for CCJS majors: the Criminal Justice Student Association (CRIMSA) and Alpha Phi Sigma Honor Society (APS).

The Criminal Justice Student Association (CRIMSA) is dedicated to supplementing our members' academic experience by providing extracurricular opportunities to further explore critical issues involving criminology and criminal justice. Through a regular program of speakers, agency demonstrations, and community service projects, the CRIMSA provides students with valuable information for making decisions about career choices, further graduate level study, and law school. CRIMSA provides students with opportunities for academic and social interaction, and access to criminology and criminal justice researchers, teachers, and practitioners representing a variety of government, academic and commercial corporate and non-profit organizations. All Universities at Shady Grove students, regardless of home institution or major, are eligible for CRIMSA membership. CRIMSA meetings and programs are held at least monthly during the Fall and Spring semesters.

Alpha Phi Sigma (APS) is a National Criminal Justice Honor Society founded 1942 and membership is open to CCJS majors who have completed at least 40 total credits with at least 12 credits in CCJS courses. Undergraduate Applicants must have an overall GPA of at least a 3.2 and a major GPA of at least 3.4. Graduate student applicants must have a 3.4 overall GPA. Applicants must fill out an application, submit an official or unofficial transcript, and a check (personal check is fine) made out to Alpha Phi Sigma for $55. The local chapter's name is Omega Iota. Completed applications, check, and transcripts should be submitted to Dr. Stickle in Building III, room 5105. Applications are processed throughout the academic year. You will be notified when you have been officially accepted. Applications are available from Dr. stickle or at www.ccjs.umd.edu (http://www.ccjs.umd.edu).

Awards and Recognition

Each year the department selects the outstanding graduating senior for the Peter J. Lejins award. A graduating senior is also selected for the Shady Grove Academic Achievement Award and is eligible to receive the USG Student Leadership Award.

Advising

All majors are strongly encouraged to see an advisor at least once each semester. Advising is available by appointment in the Camille Kendall Academic Center (Building III), room 5105. Students must complete all course prerequisites and obtain department permission from the Program Director to enroll in most CCJS classes. Call 301-738-6307 or email ccjsusg@umd.edu.

Four Year Plan

Roadmaps for all four-year plans can be found here (http://4yearplans.umd.edu). Select the College of your major to find the corresponding roadmap.

For more information on developing a four-year academic plan, please refer to the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog.

Embedded Systems and Internet of Things at Shady Grove

The Bachelor of Science in Embedded Systems will provide students with a solid foundation in key emerging technologies of the Internet of Things (IoT), the ability to integrate devices into complete IoT systems, and an understanding of how IoT fits within the wider context of information and communications technology, including data analytics and cloud computing. At the senior level, students will be able to specialize in one of the following tracks: Hardware, Computational, or Security track. It is expected that graduates will be in high demand in such occupational areas as computer developers, computer systems analysts, network architects and administrators, information security analysts, information systems analysts and computer programs.

Admission to the Major

As an undergraduate program within the A. James Clark School of Engineering, the Embedded Systems major is a Limited Enrollment Program (LEP). Admission to this program will follow the School of Engineering's admissions criteria found on the LEP website: http://www.lep.umd.edu.

Beyond the LEP gateway criteria, students will need to fulfill the following requirements to gain admission to the Embedded Systems major:

- Completion of all first and second year required major courses with a minimum grade of a 'C-.'
- Completion of all lower-level University General Education requirements.
- Completion of 60 credits.

A minimum grade point average of 3.0 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Due to the similarity in curriculum content and the physical location of course offerings, students in the Electrical Engineering, Computer Engineering, and Computer Science programs at UMD will not be eligible to add Embedded Systems as a second major or degree.

This program is mainly intended for students transferring from a Maryland public community college. While students at the College Park campus can pursue the program, they will not be able to seek admission into the School of Engineering and the Embedded Systems major until they have completed the Engineering LEP gateway courses, required first and and second year major courses, lower-level General Education requirements, and have earned at least 60 credits. The junior and senior years would take place at the Shady Grove campus.

Program Objectives

The program education objective of this program is to produce a well-trained workforce in the emerging technologies of internet of things. The Bachelor of Science in Embedded Systems and Internet of Things will produce engineering graduates who:

- Use their hardware and software engineering design training and problem-solving skills to contribute professionally in an industrial, research and applications environment;
- Demonstrate initiative, leadership, teamwork, and continued professional development;
- Demonstrate understanding of the impact of their professional activities on society.

Program Learning Outcomes

1. An ability to apply knowledge of computing and mathematics appropriate to the program's student outcomes and to the discipline;
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;
3. An ability to design, implement, and evaluate a computer#based system, process, component, or program to meet desired needs;
4. An ability to function effectively on teams to accomplish a common goal;
5. An understanding of professional, ethical, legal, security and social issues and responsibilities;
6. An ability to communicate effectively with a range of audiences;
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society;
8. Recognition of the need for and an ability to engage in continuing professional development;
9. An ability to use current techniques, skills, and tools necessary for computing practice.

Requirements

First & Second Year

Prior to being admitted to the embedded system major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level General Education requirements, and at least 60 credits.

Course	Title	Credits
MATH140	Calculus I	4
MATH141	Calculus II	4
ENGL101	Academic Writing	3
CHEM135	General Chemistry for Engineers	3
PHYS161	General Physics: Mechanics and Particle Dynamics	3
PHYS260	General Physics: Vibration, Waves, Heat, Electricity and Magnetism	3
PHYS261	General Physics: Vibrations, Waves, Heat, Electricity and Magnetism (Laboratory)	1
Programming Requirement [1]		2-4
ENES100	Introduction to Engineering Design	3
One of the following MATH2xx courses:		3-4
MATH246	Differential Equations for Scientists and Engineers	
MATH241	Calculus III	
MATH240	Introduction to Linear Algebra	
General Education Requirements/Additional Electives		28-31

1 Embedded systems will accept any of the following programming courses or their equivalents:
- ENEE140
- CMSC131
- CMSC106
- Any introductory course in C, C++, Java, or Python (student must submit the course to ECE Department for Evaluation)

Four Year Plan

Click here (https://eng.umd.edu/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:

- 4yearplans.umd.edu (http://4yearplans.umd.edu/)
- the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog

Information Science at Shady Grove

The Universities at Shady Grove
9631 Gudelsky Drive
Biomedical Sciences and Engineering (BSE) Education Facility – Office 4109
Rockville, MD 20852
301-738-6243
USGInfoSci@umd.edu
ischool.umd.edu/infosci-shadygrove (https://ischool.umd.edu/infosci-shadygrove/)

Program Director: Dr. Galina Reitz
Assistant Director: Tetyana Bezbabna
Academic Advisor: Francisco Ruiz
Academic Program Specialist: Claudia Aragon

The University of Maryland College of Information Studies, also known as the UMD iSchool, is driven by the pursuit of big ideas and new discoveries that empower people and inspire communities. From labs to libraries, we are combining principles of information science with cutting edge technology to foster access to information, improve information interfaces, and expand how information is used in government, education, business, social media, and more.

Located just outside of Washington, D.C., the iSchool provides unmatched research, internship, and career opportunities with government agencies, nonprofits, and businesses that shape information science and policy.

The Major

The field of information science, particularly in an iSchool, is a field concerned with the intersections of information, people and technology. It is an interdisciplinary field, drawing from other areas of study such as computer science, management, social science, education, and the humanities, but with a focus on individual and institutional users of information and their information needs. Information Science students gain the knowledge and the skills for creating information systems, resources, and services that help address society's pressing needs in a variety of contexts and in a variety of private and public sector positions, ranging from financial services to healthcare; from information technology to consulting; and from education to cultural institutions. Undergraduate courses offered by this college may be found under the acronym: INST.

Starting in Fall 2018, UMD iSchool offers the Bachelor of Science in Information Science (BSIS) program at the Universities at Shady Grove (USG) (https://www.shadygrove.umd.edu/) campus, as well as the College Park campus.

Qualified transfer students are admitted to the BSIS at Shady Grove program as a cohort group. Students complete their degree over four consecutive semesters as full-time students, taking five 3-credit courses per semester, and graduate with a Bachelor of Science in Information Science degree. The BSIS program at Shady Grove is a cohort program with a pre-set class schedule to ensure admitted students are able to complete their degree in four consecutive semesters.

The BSIS at Shady Grove program offers outstanding nationally recognized faculty, uniquely qualified for excelled learning classrooms, academic support, valuable financial resources, career advising, and various student engagement and leadership opportunities.

Admission Requirements

Please note that admission into the BSIS at Shady Grove program is during the fall semesters only.

To be considered for admission to the BSIS program at Shady Grove, applicants must complete the following admission requirements:

1. Minimum 2.5 cumulative GPA (preferred, but may vary based on the overall application pool)
2. Have successfully (with a grade 'C-' or better) completed following BSIS benchmarks or their equivalents:
   - MATH 115 - Precalculus (or higher)
   - PSYC 100 - Intro to Psychology
   - STAT 100 - Elementary Statistics
   - INST 126 - Intro to Programming
3. Have completed 60 college-level credits:
   - Have completed a two-year Associate of Arts (A.A.) or Associate of Science (A.S.) degree in information science or other related field
     OR
   - Have completed all General Education requirements with the Exception of Professional Writing

Program Learning Outcomes

At the completion of this program, students will be able to:

1. Demonstrate an understanding of information design and management: the interrelationships among information consumers or creators, information content, and the conduits through which information flows.
2. Apply basic principles to the design, development and management of information to meet the needs of diverse users.
3. Assess the impact of existing or emerging technologies on information practices and the flow of information.
4. Employ state-of-the-art tools and techniques to create, manage, and analyze information.
5. Demonstrate an understanding of critical issues including the security, privacy, authenticity, and integrity of information.

Requirements

With the aid of an academic advisor, the BSIS student devises a course plan to meet the graduation requirements: ten core courses, five major electives, professional writing, and four open electives, for a total of twenty courses (60 credits). At least 45 of the 60 credits must be information studies courses taken from the College of Information Studies.

The Bachelor of Science degree will be awarded to the student who successfully completes a program of 120 undergraduate hours, with a cumulative grade point average of 2.0 on a 4.0 scale for all courses taken for undergraduate credit since matriculation into the program. A student whose cumulative grade point average at any time in the program is lower than 2.0 is automatically placed on academic probation by the College until the problem leading to probationary status has been corrected. Students have one semester to raise their GPA over 2.0.

Upon completion of all degree requirements, students will earn a Bachelor of Science (B.S.) degree from the College of Information Studies at the University of Maryland College Park.

Benchmark Courses

All BSIS at Shady Grove students need to have successfully completed (with a C- or better) all benchmark courses or their equivalents prior to taking program courses.

Course	Title	Credits
MATH115	Precalculus (or higher)	3
PSYC100	Introduction to Psychology	3
STAT100	Elementary Statistics and Probability	3
INST126	Introduction to Programming for Information Science [1]	3

[1] Other courses exist which fulfill this requirement. Please check with your advisor to make sure that a particular course fulfills this requirement before registering.

BSIS Curriculum

This program requires the completion of twenty 3-credit courses. Students are expected to follow all course prerequisites, (https://ischool.umd.edu/sites/default/files/page_files/prerequisite_list_2017_03_13.docx.pdf) course sequences, and major requirements.

Course	Title	Credits
INST Core Courses		
Select ten of the following:		30
INST301	Introduction to Information Science	

INST311	Information Organization	
INST314	Statistics for Information Science	
INST326	Object-Oriented Programming for Information Science	
INST327	Database Design and Modeling	
INST335	Organizations, Management and Teamwork	
INST346	Technologies, Infrastructure and Architecture	
INST352	Information User Needs and Assessment	
INST362	User-Centered Design	
INST490	Integrated Capstone for Information Science	
INST Elective Courses		
Complete at least 15 credits of INST-coded major electives		15
Complete 12 credits of open electives		12
Professional Writing		**3**
Total Credits		60

Advising

All BSIS @ USG students are required to meet with an advisor prior to registration for each academic semester. Advising is available by appointment in the Biomedical Sciences and Engineering (BSE) Education Facility, room 4107.

Opportunities

Internships

Internships are not required but are strongly encouraged by the program. An internship is a real-world application of concepts and theories that students learn in the classroom. It involves students providing meaningful work in a career field that is directly related to their major and/or area of career interest. An internship is an excellent opportunity for a student to gain professional experience in the information science field, as well as build/expand their professional network. The program does not provide internship placements. However, students have access to six career/networking events throughout each academic year (at College Park and Shady Grove campuses), giving them an opportunity to meet potential employers from the field.

Public Health Science at Shady Grove

The Universities at Shady Grove
University of Maryland
Public Health Science Program
9636 Gudelsky Drive
Building III
Rockville, MD 20850
301-738-6165
jhodgson@umd.edu
Shady Grove: https://sph.umd.edu/degrees/bachelor-science-public-health-science-shady-grove (https://sph.umd.edu/degrees/bachelor-science-public-health-science-shady-grove/)

The Public Health Science program includes a strong curriculum in science and public health courses, such as biostatistics, epidemiology, environmental health, and global health. Students will have the opportunity for individual exploration in public health through electives, laboratory experiences, optional internships, and a culminating interdisciplinary capstone course. As a collaborative degree involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park and Shady Grove campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes

1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. Examine the socio-economic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health-specific writing and communication.
10. Interpret and synthesize scientific knowledge to propose evidence-based approaches and solutions to public health problems.

Requirements

For full details of degree requirements, please view the Shady Grove curriculum online at: http://sph.umd.edu/department/phssg/shady-grove-curriculum (http://sph.umd.edu/department/phssg/shady-grove-curriculum/).

In order to graduate with a Bachelor of Science degree in Public Health Science, students must complete 120 credits, 74 of which are specific to the Public Health Science degree. Students must earn a minimum grade of C- or higher in all Public Health Science major-required coursework.

Course	Title	Credits
Scientific Foundation Courses		
MATH120	Elementary Calculus I	3
BSCI170 & BSCI171	Principles of Molecular & Cellular Biology and Principles of Molecular & Cellular Biology Laboratory	4

BSCI201	Human Anatomy and Physiology I	4
BSCI202	Human Anatomy and Physiology II	4
CHEM131 & CHEM132	Chemistry I - Fundamentals of General Chemistry and General Chemistry I Laboratory	4
CHEM231 & CHEM232	Organic Chemistry I and Organic Chemistry Laboratory I	4
BSCI222	Principles of Genetics	4
BSCI223	General Microbiology	4
Public Health Science Foundation Courses		
HLTH366	Behavioral and Community Issues in Public Health	3
PHSC300	Foundations of Public Health	3
EPIB301	Epidemiology for Public Health Practice	3
EPIB315	Biostatistics for Public Health Practice	3
HLSA300	Introduction to Health Policy and Services	3
MIEH300	A Public Health Perspective: Introduction to Environmental Health	3
MIEH400	Introduction to Global Health	3
KNES320	Physiological Basis of Physical Activity and Human Health	4
PHSC415	Essentials of Public Health Biology: The Cell, The Individual, and Disease	3
PHSC497	Public Health Science Capstone	3
Public Health Science Options Courses [1]		**12**
Total Credits		74

[1] The Public Health Science option courses build upon the Scientific and Public Health Science Foundation courses. The option courses are 300 and 400 level courses primarily offered within the School of Public Health. By choosing from these courses, students have an opportunity to customize their program. Students are encouraged to choose courses that best align with a particular career goal. Please visit the PHSC website for the current list of approved options: https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018 (https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018/)

Advising

Major academic advising is mandatory for Public Health Science students at Shady Grove each semester. Academic advising is by appointment only and can be scheduled at: sph.umd.edu/advising (https://sph.umd.edu/%3Cfront%3E/advising/)

Opportunities

Internships and Research Experiences

Internships and research experiences are strongly encouraged. Students participate in experiences both on and off campus. Public Health Science internship and independent study coordinator, Nancy Smith (nsmith10@umd.edu), can be contacted regarding the opportunity to complete an internship or research experience for credit.

General Scholarships and Financial Assistance

The Office of Student Financial Aid administers all types of federal, state, and institutional financial assistance programs, and in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, go to: https://www.financialaid.umd.edu/.

The School of Public Health also provides some scholarships for undergraduate students in need, including the Jerry P. Wrenn Endowed Scholarship, the School of Public Health Student Emergency Scholarship, the SPH Scholarship Fund, and TerpStart Scholarships. To learn more about School of Public Health scholarships, go to: http://sph.umd.edu/content/financing-your-degree (http://sph.umd.edu/content/financing-your-degree/).

Additional information on UMD-related financial resources can be found at http://sph.umd.edu/content/student-resources-and-services (http://sph.umd.edu/content/student-resources-and-services/), by clicking the "Financial/Resource Assistance" link.

Public Health science scholarships

The Public Health Science Program offers two scholarships specifically for Public Health Science students. These scholarships include the Barbara and Carl Alving Endowed Research Award in Public Health Science and the Whitlark Endowed Scholarship in Public Health Science. More details regarding these scholarships are available at the Public Health Science Scholarship website (http://sph.umd.edu/department/phs/scholarship-opportunities-public-health-science-students/).

Awards and Recognition

Each spring, the Public Health Science program recognizes a select few exceptional undergraduates at the annual School of Public Health Honors Convocation.

Four Year Plan

Roadmaps for all four-year plans can be found here (http://4yearplans.umd.edu). Select the College of your major to find the corresponding roadmap.

For more information on developing a four-year academic plan, please refer to the Student Academic Success-Degree Completion Policy (p. 61) section of this catalog.

The Robert H. Smith School of Business at Shady Grove

Director of Programs at Shady Grove: Luke Glasgow

The Robert H. Smith School of Business is an internationally recognized leader in management education and research for the digital economy. The faculty are scholars, teachers, and professional leaders with a commitment to superior education in business and management, specializing in accounting, finance, information systems, operations management, management and organization, marketing, logistics, transportation and supply chain management. The Smith School is accredited by AACSB International - The Association to Advance

Collegiate Schools of Business, the premier accrediting agency for bachelor's, master's and doctoral degree programs in business administration and accounting, http://www.aacsb.edu (http://www.aacsb.edu/).

The Smith School of Business offers students the opportunity to complete the junior-senior curriculum in three majors at the Shady Grove campus in Rockville, MD including:

1. Accounting;
2. Management; and
3. Marketing.

For details on the majors offered at Shady Grove visit http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove (http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/).

Admission Requirements

All students applying for admission to the Robert H. Smith School of Business as transfer students, whether internal transfers already enrolled at UMD or external transfer students entering the university for the first time, will be subject to competitive admission for a limited number of spaces in the Smith School at either the College Park or Shady Grove location. For complete details on admission to the Smith School at Shady Grove visit http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove (http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/).

Statement of Policy on Transfer of Credit from Community Colleges

It is the practice of the Smith School of Business to consider for transfer from a regionally accredited community college only the following courses in business administration: an introductory business course, business statistics, or elementary accounting. Thus, it is anticipated that students transferring from another regionally accredited institution to Shady Grove will have devoted the major share of their academic effort below the junior year to the completion of basic requirements in the liberal arts. A total of 60 semester hours from a community college may be applied toward a degree from the Smith School of Business.

Other Institutions

The Smith School of Business normally accepts transfer credits from regionally accredited four-year institutions. Junior- and senior-level business courses are accepted from colleges accredited by the Association to Advance Collegiate Schools of Business (AACSB). Junior- and senior- level business courses from other than AACSB-accredited schools are evaluated on a course-by-course basis to determine transferability.

The Smith School of Business requires that at least 50 percent of the business and management credit hours required for a business degree be earned at the University of Maryland, College Park.

Additional Information

For more information on the Smith School of Business undergraduate program at Shady Grove visit http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove (http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/).

- Management at Shady Grove (p. 439)
- Marketing at Shady Grove (p. 440)

College Requirements

Undergraduate Degree Requirements/ Degree Options

Upon completion of all degree requirements, students at the Smith School at Shady Grove will earn a Bachelor of Science (B.S.) degree from the Robert H. Smith School of Business at the University of Maryland, College Park. In addition, the Smith School of Business awards Master of Business Administration (M.B.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Information concerning admission to the M.B.A. or M.S. program is available at www.rhsmith.umd.edu (http://www.rhsmith.umd.edu/).

Summary of Bachelor of Science Degree Requirements (All Curricula)

At least 45 hours of the 120 semester hours of academic work required for graduation must be in business and management subjects. A minimum of 58 hours of the required 120 hours must be in 300- or 400-level courses. Fifty percent of the required BMGT credit hours must be completed at the Smith School of Business (College Park or Shady Grove campus). A 'C-' or higher is required in all Smith School required courses, and students must have an overall combined 2.000 GPA in Smith required courses. In addition, students are required to have an overall cumulative grade point average of 2.000 (C average) in all university course work.

Total Credits		61-71

1 BMGT110 provides a useful introduction to business as an academic program and exposes students to potential career opportunities. As a result, this course best serves students early in their college careers. However, this particular course is redundant for students who have already begun their upper level BMGT coursework and thus, have already received more in-depth exposure to business functions. Therefore this course is only required for students who enter the Smith School as freshmen. Students who transfer to the Smith School and have not completed BMGT110 will not be required to complete this course for graduation.

2 The following courses are approved substitutes for BMGT230: BIOM301, CCJS200, ECON230, ECON321, EDMS451, GEOG305, INST314, PSYC200, and SOCY201.

3 The following courses are approved substitutes for BMGT231: BIOE372, ENEE324, ENME392, or STAT400.

4 Any course that fulfills the university's Oral Communication General Education requirement will also satisfy the Smith School's public speaking requirement.

5 0-3 credits of approved upper-level economics courses are required by the Smith School of Business. Visit http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove (http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/) to view the specific requirements for each major offered at the Smith School at Shady Grove.

6 In addition to the Smith School of Business Bachelor of Science requirements listed above, generally another 18-24 credits are required for each major. See http://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove (https://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/) to view the specific requirements for each major offered at the Smith School at Shady Grove.

Accounting at Shady Grove

Go here (https://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

Accounting, in a limited sense, is the analysis, classification, and recording of financial events and the reporting of the results of such events for an organization. In a broader sense, accounting consists of all financial systems for planning, controlling, and appraising performance of an organization. Accounting includes among its many facets: financial planning, budgeting, accounting systems, financial management controls, financial analysis of performance, financial reporting, internal and external auditing, and taxation. The accounting curriculum provides an educational foundation for careers in public accounting and management, whether in private business organizations, government or nonprofit agencies, or consulting. Two tracks are provided: The Public Accounting Track leading to the CPA (Certified Public Accounting) and the Management Accounting/Consulting Track. ***Please note:*** Currently, only the Public Accounting track is available.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Prepare a multiple-step income statement from a trial balance and supporting documentation.
12. Understand the impact of audit objectives and risk of material misstatement in planning an audit.
13. Define audit engagement procedures and where each procedure is used appropriately.
14. Identify the factors that an auditor should consider in order to determine the correct format and contents of an audit opinion.

[1] Required for CPA in Maryland

In addition to the major requirements listed above, please consult the list of College Requirements (p. 271) or www.rhsmith.umd.edu (http://www.rhsmith.umd.edu) for a listing of additional Smith School degree requirements that apply to all Smith School majors.

The basic educational requirements of the Maryland State Board of Public Accountancy to sit for the CPA examination are a baccalaureate or higher degree with a major in Accounting or with a non-accounting degree supplemented by course work the Board determines to be substantially the equivalent of an Accounting major. Students planning to take the CPA examination for certification and licensing outside Maryland should determine the educational requirements for that state and arrange their program accordingly.

120 credits are required to complete a degree in Accounting; however, students seeking to become a Certified Public Accountant (CPA) must meet the certification requirements for the state in which they wish to practice. Most states, including Maryland, require a minimum of 150 credit hours of college education to fulfill the education requirements to obtain a CPA license. However many of these states, including Maryland, will allow applicants to take the CPA exam prior to earning 150 credits if they have accumulated 120 credits, earned a degree, and meet specified education requirements. In addition, do not assume the course and credit requirements for the accounting major are sufficient for all states. For details on various states' CPA requirements visit www.nasba.org (http://www.nasba.org).

Four Year Plan

Click here (http://www.gened.umd.edu/for-students/forstudents-4yearplans-bus.html) for roadmaps for four-year plans in the Robert H. Smith School of Business.

Management at Shady Grove

Go here (https://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

The Robert H. Smith School of Business has long been recognized as a leading undergraduate program in management and entrepreneurship. Both these programs regularly appear highly ranked in a variety of publications. The management major focuses on leadership and entrepreneurship to engage students in critical thinking and problem solving applicable in many careers.

The core of the management major offers two courses in leadership and negotiations. These core courses emphasize skills students need in a changing employment environment. As more jobs become automated, managing people and solving tough problems will become increasingly important to attaining meaningful employment. The core classes in the management major provide education in problem solving, leadership, and effective teamwork. The demanding and fast-paced careers of the future will require students to demonstrate a strong ability to communicate and solve problems in a team under extreme pressure. The core major classes prepare students for careers in areas such as strategy, information technology, operations, healthcare administration, and organizational transformation.

There are a number of potential career paths stemming from the management major, such as consulting analyst, financial advisor, human resource management, nonprofit management, rotational leadership programs, and entrepreneur, including social entrepreneurship. These are grouped into two major areas of focus, leadership & innovation and entrepreneurship. Both areas focus on critical thinking and problem solving, and allow students to create a major tailored to their future goals.

The Management & Organization department has relationships with a number of centers of excellence, including the Dignman Center for Entrepreneurship and the Center for Leadership, Innovation and Change which provide relationships with professors, researchers, and organizations for students interested in enhancing their course of study with co-curriculuar opportunities.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Develop and implement a concrete, relevant, and practical action plan based on a set of leadership approaches and skills selected best for a given management problem.
12. Identify key strengths and weaknesses of students' leadership skills and abilities based on the assessment data and self-reflection.
13. Apply negotiation concepts to prepare for and execute an actual negotiation based on strategic and tactical choices made best for a given situation.
14. Identify key strengths and weaknesses of students' negotiation skills and styles based on the assessment data and self-reflection.

Requirements

Course requirements for the junior-senior curriculum concentration of the Management major are as follows:

Course	Title	Credits
College Requirements (p. 271)		
BMGT363	Leadership and Teamwork in Organizations	3
BMGT362	Negotiations	3
Select four of the following:		12
BMGT360	Strategic Management of Human Capital	
BMGT366	Growth Strategies for Emerging Companies	
BMGT461	Entrepreneurship	
BMGT463	Cross-cultural Challenges in Business	
BMGT466	Global Business Strategy	
BMGT468	Special Topics in Management and Organization [1]	
BMGT469	Management and Organization Short-term Study Abroad [1]	
Total Credits		18

[1] A maximum combined total of 6 credits of BMGT468 and BMGT469 coursework can satisfy Management major requirements.

Click here (https://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

Four Year Plan

Marketing at Shady Grove

Go here (https://www.rhsmith.umd.edu/programs/undergraduate-programs/shady-grove/) for more information about the Robert H. Smith School of Business's undergraduate program at the Shady Grove campus in Montgomery County, Maryland.

The goal of marketing is to satisfy all the stakeholders of the firm - employees, dealers, stockholders, and customers - by seeing that quality goods and services are developed and provided at fair prices and in a way that benefits the community and society. World-class competition has forced businesses to develop marketing programs that are as good as the best. This means getting closer to the customer, joining other organizations to create value for the consumer, and designing integrated distribution and communication programs that provide a seamless flow from producers to consumers. Pricing, communication/promotion, product/service, and distribution activities inherent in the development of marketing programs are applicable to non-profit organizations, business-to-business organizations, and firms that sell to ultimate consumers.

Many types of careers are available to the marketing major. These include, but are not limited to: sales, advertising, retailing, product/service management, and marketing research. Because of the many different employment opportunities in marketing, many marketing electives are offered along with three core courses required of all marketing majors - consumer analysis, marketing research, and marketing strategy.

Program Learning Outcomes

1. Apply elements of critical thinking.
2. Identify common situations in chosen career that could result in ethical dilemma.
3. Analyze ethical scenarios and apply frameworks to develop solutions.
4. Foster and sustain team environments that are inclusive of ideas from all contributing members.
5. Apply leadership skills to motivate and coordinate with other to achieve goals.
6. Write professional-grade business documents.
7. Develop and deliver effective oral presentations.
8. Identify and use appropriate quantitative tools and techniques.
9. Use software applications to analyze and solve problems.
10. Explain how functional areas interact and drive one another.
11. Apply consumer behavior concepts to solve real world issues in marketing.
12. Analyze survey data using appropriate tools and techniques and apply findings to resolve marketing issues.
13. Formulate STP plans and apply the proper alignment of 4Ps of marketing to solve real world problems in business.

Requirements

Course requirements for the junior-senior curriculum concentration in Marketing are as follows:

ACADEMIC COMMON MARKET

2110 Marie Mount Hall, 301-405-9363
http://www.ugst.umd.edu/acmnotice.pdf
Dawn Simounet, Coordinator

SPECIAL NOTICE

August 23, 2012
(Updated April 12, 2014)

The University of Maryland, College Park has discontinued participation in the Academic Common Market.

The last ACM certifications the University of Maryland, College Park accepted were those specifying spring 2013 as the first term of enrollment in the certified major. The University of Maryland, College Park will not accept ACM certifications for later semesters. Only students with ACM certifications for spring 2013 or earlier semesters and who enroll in the certified program at UMD in their ACM certified semester may continue to receive the ACM in-state tuition benefit.

Transition Plans

Fall 2012 and Earlier

Undergraduate students approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of fall 2012 or earlier may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Undergraduate students admitted for fall 2012 who deferred their admission to spring 2013 or fall 2013 will be treated according to the rules for undergraduate students admitted fall 2012. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Graduate students approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of fall 2012 or earlier may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the graduate degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified program.

Graduate students admitted for fall 2012 who deferred their admission to spring 2013 or fall 2013 will be treated according to the rules for graduate students admitted fall 2012. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the degree. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Spring 2013

Undergraduate students, who receive ACM certification for spring 2013 and who are admitted to and enrolled in their approved ACM inventory majors for spring 2013, may receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Undergraduate students admitted for spring 2013 who deferred their admission to fall 2013 or spring 2014 will be treated according to the rules for undergraduate students admitted spring 2013. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 2.0 overall grade point average, and satisfactory progress toward the degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Graduate students, who receive ACM certification for *spring 2013* and who are admitted to and enrolled in their approved ACM inventory majors for spring 2013, may receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the graduate degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified program.

Graduate students admitted for spring 2013 who deferred their admission to fall 2013 or spring 2014 will be treated according to the rules for undergraduate students admitted spring 2013. They must be approved for participation in an Academic Common Market (ACM) major and enrolled in their certified majors as of the semester to which they deferred. They may continue to receive benefits as long as they are continuously enrolled full time in the ACM approved major, maintain permanent residency in their certifying state, a 3.0 overall grade point average, and satisfactory progress toward the degree. Students may not pursue multiple degrees while receiving ACM benefits. Benefits will not exceed six (6) years beginning in the first term of enrollment in the ACM certified major.

Air Force Reserve Officer Training Corps (AFROTC)

0121 Reckord Armory, 301-314-3242
www.afrotc.umd.edu (http://www.afrotc.umd.edu)
afrotcdet330@umd.edu

Director: Colonel David Bacot

The Air Force Reserve Officer Training Corps (AFROTC) provides students the opportunity to earn a commission as a second lieutenant in the United States Air Force while completing their undergraduate or graduate degree. It is highly recommended that students seeking a commission contact the AFROTC department for full program details before registering for classes.

Program Requirements

AFROTC is designed to be a 4-year experience, but the schedule can be compressed (minimum of 3 years) for qualified candidates. A full four-year program is composed of the two-year General Military Course (GMC) and the two-year Professional Officer Course (POC). GMC students

receive an introduction to the Air Force and various career fields, and may have a chance to compete for scholarships. Non-scholarship GMC students incur no military service obligation and may elect to discontinue the program at any time. Students wishing to continue with ROTC and gain entrance into the POC must successfully meet all cadet standards by the end of their final semester in the GMC in order to compete for acceptance into summer field training. After successfully completing field training, GMC students are accepted into the POC and begin their development of leadership skills and the study of United States defense policy. Additionally, all POC students receive a monthly allowance of $450-$500.

Scholarships and Incentives

If the Air Force is offering scholarships, members of AFROTC in all degree programs are eligible to compete for in-college scholarships based on a competitive selection process. Scholarship recipients receive money for tuition up to $18,000 per year, a book allowance (currently $900/year), and a monthly allowance from $300 to $500, depending on the student's AFROTC year.

Army Reserve Officer Training Corps (ROTC)

2100 Reckord Armory, 301-314-9939
www.armyrotc.umd.edu (http://www.armyrotc.umd.edu)
armyrotc@umd.edu

Director: Lieutenant Colonel Marisa Pace

The Army Reserve Officer Training Corps offers students the opportunity to develop leadership skills plus earn a commission as a Second Lieutenant in the United States Army (Active, Reserve, or National Guard) while completing their undergraduate degree.

Four-Year Program

The four-year program is composed of the Basic Leadership Course and the Advanced Leadership Course. The first two years (Basic Course) consist of a general introduction to military customs and courtesy, soldier skills, communication skills, personal development, and introductory leadership skills. Students enrolled in the Basic Course *incur* ***no obligation*** and *may discontinue the program at any time.* In the final two years (Advanced Course), students concentrate on developing leadership skills in organizations. Students must have permission of the Director of Army ROTC to enroll in the advanced course. The Advanced Course requires four weeks of field training at Fort Knox, Kentucky (Advanced Camp) the summer after their junior year.

Two-Year Program

The two-year program is available to students with two years remaining in their university studies. The academic requirements for this program are identical to the Advanced Course in the four-year program, and students are eligible to receive the same benefits. Prerequisites for the Advanced Course must be fulfilled prior to enrollment. The following options exist to help students fulfill Basic Course requirements before enrolling in the Advanced Course:

1. Basic Camp: Students may attend a five week adventure challenge course at Fort Knox, Kentucky. Students should start the application process for this option no later than January of their sophomore year.
2. Veterans: Students with prior military service.
3. Basic Training: Constructive credit will be awarded for students who have completed Basic Training prior to starting their junior year.
4. JROTC: Students who completed 3-4 years of JROTC in High School.
5. Service Academy or Senior ROTC: Two year attendance at a service academy or successful completion of two years in a sister service Senior ROTC training can qualify for constructive credit.

Scholarships and Incentives

Army ROTC Scholarships are available for four, three or two years on a competitive basis. The scholarships are based solely on merit, not financial need. Scholarship awardees may apply benefits for either Room and Board or Tuition and Mandatory Fees. An additional book allowance ($1,200 a year) and a non-taxable monthly stipend ranging of $420.

Army ROTC students/cadets may compete for summer training opportunities to include Airborne, Air Assault, Sapper School, Combat Diver Qualification, or Northern Warfare Training during the summer and winter breaks.

Curriculum

Freshman Year

First Semester	Credits	Second Semester	Credits
ARMY106	3	ARMY105	3
	3		3

Sophomore Year

First Semester	Credits	Second Semester	Credits
ARMY201	3	ARMY202	3
	3		3

Junior Year

First Semester	Credits	Second Semester	Credits
ARMY301	3	ARMY302	3
	3		3

Senior Year

First Semester	Credits	Second Semester	Credits
ARMY401	3	ARMY402	3
	3		3

Total Credits 24

Basic Leadership Course
Advanced Leadership Course
Military
History

Cadets must complete an approved course in Military History prior to graduation

All ROTC classes are *open to any student* for college credit, whether or not he or she is considered a cadet in the Army ROTC program. Students who complete the Advanced Course requirements (ARMY301,ARMY302,ARMY401,ARMY402 and Military History) may be conferred a Minor in Leadership Studies.

Carillon Communities

2110 Marie Mount Hall, 301-314-9402
www.carillon.umd.edu (http://www.carillon.umd.edu)
carillon@umd.edu

Assistant Director: Melissa Del Rios

Carillon Communities is a one year living-learning community with a focus on teamwork and creative problem solving. Students complete

a 3-credit I-Series course related to a community theme and a 1-credit Carillon Studio course using skills from the design field to map their academic plan. The admission process for this opportunity is managed by the Admissions Office.

College Park Scholars Program

1125 Cumberland Hall, 301-314-2777
https://scholars.umd.edu (http://www.scholars.umd.edu)
askcpscholars@umd.edu

Executive Director: Marilee Lindemann, PhD

College Park Scholars is a nationally acclaimed living–learning program that offers academically talented students the interpersonal benefits of a small college paired with the intellectual advantages of a major research university. Each of its 12 programs is based on a theme that allows students to explore complex issues from an interdisciplinary perspective. Admission to the two-year program is selective and by invitation.

In Scholars, students live together with other students in their program, and they take one or two classes together each semester. Classwork includes hands-on learning opportunities and co-curricular experiences, such as program field trips and Scholars-wide activities. (Several program faculty also lead global learning experiences during the winter term or summer semester.) Finally, program faculty maintain offices in the Cambridge Community residence halls, where Scholars students live. This framework has been deliberately designed to provide students immediate access to a supportive community, close faculty connections, and opportunities to learn and grow that other students typically don't get until they're upperclassmen.

Finally, academic and leadership opportunities abound for Scholars students. Scholars frequently engage with guest speakers and have the opportunity to continue conversations outside the classroom. Students are further encouraged to pursue leadership opportunities through various Scholars student organizations, design and implement community service and social events, participate in mentoring programs (https://scholars.umd.edu/student-life/student-groups/peer-mentors) and recruitment activities (https://scholars.umd.edu/student-life/student-groups/scholars-ambassadors), or serve on the Student Advisory Board (https://scholars.umd.edu/student-life/student-groups/student-advisory-board).
Upon successful completion of the program, students earn an academic citation (requirements vary by program, https://scholars.umd.edu/citation-requirements). In their junior year, students are encouraged to build on their Scholars experiences by participating in departmental honors programs and other research and internship opportunities.

Admission to College Park Scholars is selective and by invitation. Upon invitation to College Park Scholars, students indicate their preference from the following programs:

- Arts (http://www.scholars.umd.edu/programs/arts (http://www.scholars.umd.edu/programs/arts/))
- Business, Society and the Economy (http://www.scholars.umd.edu/programs/bse (http://www.scholars.umd.edu/programs/bse/))
- Environment, Technology and Economy (http://www.scholars.umd.edu/programs/ete (http://www.scholars.umd.edu/programs/ete/))
- Global Public Health (http://www.scholars.umd.edu/programs/gph (http://www.scholars.umd.edu/programs/gph/))
- International Studies (http://www.scholars.umd.edu/programs/is (http://www.scholars.umd.edu/programs/is/))
- Justice and Legal Thought (http://www.scholars.umd.edu/programs/jlt (http://www.scholars.umd.edu/programs/jlt/))
- Life Sciences (http://www.scholars.umd.edu/programs/ls (http://www.scholars.umd.edu/programs/ls/))
- Media, Self and Society (http://www.scholars.umd.edu/programs/mss (http://www.scholars.umd.edu/programs/mss/))
- Public Leadership (http://www.scholars.umd.edu/programs/pl (http://www.scholars.umd.edu/programs/pl/))
- Science, Discovery and the Universe (http://www.scholars.umd.edu/programs/sdu (http://www.scholars.umd.edu/programs/sdu/))
- Science and Global Change (http://www.scholars.umd.edu/programs/sgc (http://www.scholars.umd.edu/programs/sgc/))
- Science, Technology and Society (http://www.scholars.umd.edu/programs/sts (http://www.scholars.umd.edu/programs/sts/))

Federal Fellows Program

2407 Marie Mount Hall, 301-314-0261
www.federalfellows.umd.edu (http://www.federalfellows.umd.edu)
federalfellows@umd.edu

Director: Dr. Joan Burton

The Federal Fellows Program is a selective, yearlong program offered within the Office of Undergraduate Studies, in conjunction with other colleges, programs and campus initiatives. The program brings together students from all disciplines to learn, discuss, and explore issues related to federal policy, and galvanizes them toward public service careers. Rising sophomores, juniors, and seniors with strong academic backgrounds and an interest in exploring the possibility of public service are encouraged to apply.

Students who successfully complete all program requirements will earn a 'Federal Fellows' notation on their transcript.
The Federal Fellows Program consists of three primary components:

1. The Federal Fellows Seminar: FGSM310, FGSM320, FGSM330, or FGSM340 (3 credits, fall semester). A choice of seminar courses, each focused on a specific theme (for example, political engagement and advocacy, public health policy, homeland and national security policy, or energy and environmental policy). The seminars benefit from the diversity of students who participate in the program. The small setting allows students to bring knowledge from their disciplinary focus into the discussion. Taught by expert practitioners, the seminars examine the policy-making process and discuss vital current issues within each theme. Guest speakers provide real-world perspectives on how governments and other actors create and implement policy.
2. The Internship: FGSM398 (3-9 credits, spring semester). The Federal Fellows experiential learning course offers credit for an internship with a federal agency or related organization (including the White House, NGOs, etc.). In class, students work on professional development and reflect on their internship experiences through journal assignments. With permission, students may complete the internship under the course number for internships in the student's major or other programs.
3. Supporting course work: Two regular UM courses, approved by the Federal Fellows program, that complement the Federal Fellows

mission (6 credits). With permission, students may apply courses completed prior to the Federal Fellows year.

Students also participate in Federal Fellows Program activities including visits to Capitol Hill and federal agencies, conversations with leaders in public policy, professional development workshops, one-on-one advising check-ins, and an end-of-the-year reception. The program offers a lively, engaged community of students and supportive alumni.

Students in the program must have completed 45 credits by the end of the semester in which they apply and have a grade point average of 3.0 or higher. For details and application please see www.federalfellows.umd.edu. (http://www.federalsemester.umd.edu)

First Year Book Program

2110 Marie Mount Hall
www.firstyearbook.umd.edu (http://www.firstyearbook.umd.edu)
Assistant Dean: Lisa Kiely

Each year since 1993, the University has selected a book for all first year students. The goal of the First Year Book Program (FYB) is to provide a shared intellectual experience for all new students along with the opportunity to discuss the book from a variety of disciplines. Courses, departmental lectures, living/learning programs, and student groups all sponsor events that complement a major address by the author and/or other important visitors to campus.

Global Fellows in Washington DC Program

2407 Marie Mount Hall, 301-314-0261
www.globalfellowsdc.umd.edu (http://www.globalfellowsdc.umd.edu)
globalfellowsdc@umd.edu

Director: Dr. Joan Burton

The Global Fellows in Washington, D.C. Program is an innovative internship program designed to equip undergraduate students of all majors with the knowledge, skills, and experience to become leaders in an increasingly globalized society. The aim is to increase student involvement in and access to opportunities within the global arena. The program combines a fall academic seminar on global leadership and policy related to a specific theme with a spring internship experience in the Washington, D.C. area. Classes bring students in contact with professionals who share their knowledge, expertise, and perspectives. The spring internship placements are with international organizations, federal agencies, foreign embassies, NGOs, and non-profit organizations. The program is designed to support students of all majors and colleges. Rising sophomores, juniors, and seniors with strong academic backgrounds and an interest in the global arena are encouraged to apply. The program offers a lively, engaged community of students and supportive alumni.

Global Fellows in Washington, DC is a program of the Office of Undergraduate Studies, in collaboration with the College of Behavioral and Social Sciences and the Office of International Affairs, and includes stakeholders and supporters across the University. We are excited to announce a new partnership, starting Fall 2019, with the Clark School of Engineering, the College of Agriculture & Natural Resources, and the School of Public Health.

Students who successfully complete all program requirements will earn a 'Global' notation on their transcript.

The Global Fellows in Washington, D.C. Program consists of four primary components:

1. The Global Fellows in Washington, D.C. Seminar: FGSM350, FGSM360, FGSM370, or FGSM390 (3 credits, fall semester). Students in the program choose from several seminar courses based in global leadership and policy and designed especially for program participants. The courses are taught by expert practitioners and provide a deep understanding of global leadership and policy related to a specific theme. Guest speakers offer additional real-world and professional perspectives.
2. The Internship: FGSM398 (3-9 credits, spring semester). The experiential internship course offered by the Global Fellows in Washington, D.C. Program enables students to earn credits for their professional experience in the global arena. Students registering for FGSM398 will provide signed confirmation of an internship position, submit guided journal entries, and complete a final reflective report on their internship experience. (Important note: Students may substitute another departmental internship course, offered in the student's major or elsewhere at the University, for FGSM398 in the Global Fellows in Washington, D.C. Program.)
3. Supporting course work: To round out the Global Fellows experience, two additional UMD courses, approved by the Global Fellows program, are required of students participating in the program. These courses complement the fall seminar and spring internship by providing greater depth and context to the academic experience (6 credits). With permission, courses completed prior to beginning the program may be used to satisfy this requirement.
4. Supplemental Activities: Throughout the year, students attend workshops and roundtable discussions and participate in off-campus activities, including visits to Capitol Hill and federal agencies, to learn more about real-world applications. Program staff offer one-on-one consultations regarding cover letters, resumes, and interviews.

Minimum requirements: Students in the program must have completed 45 credits by the end of the semester in which they apply and have a cumulative grade point average of 3.0 or higher. For further details and application see www.globalfellowsdc.umd.edu (http://www.globalfellowsdc.umd.edu).

Global Studies

The Global Studies Minor Program provides opportunities for students from any discipline or major to study how evolving global connections affect the well-being of people throughout the world. Students in this interdisciplinary program develop an understanding and appreciation of how and why interactions across national and ethnic borders are shaped by language, culture, politics, economic development, and conflict. The program is comprised of a number of specialization tracks which address issues from the perspective of different disciplines. The tracks are:

- International Development and Conflict Management (http://www.globalstudies.umd.edu/)
- International Engineering (http://www.ilp.umd.edu/coursework (http://www.ilp.umd.edu/coursework/))
- Global Poverty (http://arec.umd.edu/undergraduate/minors/global-poverty (http://arec.umd.edu/undergraduate/minors/global-poverty/))
- Global Terrorism Studies (http://www.start.umd.edu/)

All students choose one course from a set of 'signature' courses outside of their chosen track for exposure to major global issues addressed by the other Global Studies minors. The minors provide an opportunity for an experiential component within a student's elective courses, including a study abroad experience. The Global Studies Minor Program includes special activities that involve students across the minors, such as special speaker forums, participation in major events, and experiences in Washington, D.C.

Honors College

Anne Arundel Hall, 301-405-6771
www.honors.umd.edu (http://www.honors.umd.edu)
honors@umd.edu

Executive Director: Susan Dwyer

Associate Directors: Stephen Blatti, Traci Dula, and Jenny Lang

The University of Maryland Honors College dares exceptional students to connect authentically with others and their ideas, to seek new insights and experiences, and to lead lives of integrity and purpose.

The Characteristics of an Honors College Graduate:
Critically self-reflective
Ethically aware
An intellectual and creative risk-taker
Collaborative

Small classes and outstanding teachers encourage discussion and foster innovative thinking across academic disciplines. Honors students have exclusive access to Honors living-learning program courses and Honors versions of courses offered by the academic departments on campus.

Students in the Honors College may earn an Honors College Citation on the transcript by completing coursework and satisfying all requirements in an Honors Living-Learning Program (http://www.honors.umd.edu/livinglearning-prospstudents.html). Honors Living-Learning Programs include: University Honors (http://www.universityhonors.umd.edu/), Gemstone (http://www.gemstone.umd.edu/), ACES (http://www.aces.umd.edu/), Design Cultures & Creativity (http://dcc.umd.edu/), Honors Humanities (http://www.honorshumanities.umd.edu/), and Integrated Life Sciences (http://www.ils.umd.edu/). Acceptance of first-year students into the Honors College is competitive and by invitation based on the standard application to the University of Maryland (by November 1st for best consideration for Honors College and merit scholarships).

In addition to joining an Honors College Living-Learning Program, Honors students may apply to one of 40 Departmental Honors Programs offered by the academic departments and colleges on campus to take full advantage of advanced, discipline-based Honors coursework and research opportunities in their major area of study. Most departmental honors programs begin in the sophomore or junior year. Students in a Departmental Honors Program (http://www.honors.umd.edu/departmentalhonors.html) may earn departmental honors on the transcript and diploma.

Incentive Awards Program

1103 Cole Student Activities Building
incentiveawards@umd.edu
www.umincentiveawards.umd.edu (http://www.umincentiveawards.umd.edu/)

Director: Jacqueline W. Lee

The Incentive Awards Program offers full financial support to the University of Maryland to exceptional students who demonstrate academic ability, uncommon persistence and maturity in the face of very difficult circumstances.

Directed toward graduates of Baltimore City and Prince George's County public high schools who demonstrate financial need, the award is more than a prestigious scholarship. At the heart of the Incentive Awards Program is the development of individual character and community responsibility within an intimate community of staff, peers, advisers and mentors.

The cohort of students who form the core of this community benefit from outstanding programming and, in return, are active in their home high schools and neighborhoods through peer advising, high school visits and other outreach programs, with the intention of inspiring young people to similar academic achievement.

Individual Studies Program

2407 Marie Mount Hall, 301-314-0023
www.ivsp.umd.edu (http://www.ivsp.umd.edu)
individualstudies@umd.edu

Director: Dr. Joan Burton

The Individual Studies Program (IVSP) is a degree-granting academic program administered through the Office of Undergraduate Studies. The program enables students to design their own interdisciplinary majors leading to the Bachelor of Arts or Bachelor of Science degree. Students draw primarily from the University of Maryland's course offerings to form an academic concentration not otherwise available to them at the institution. A written proposal defining the student's major and outlining the curriculum is required to apply to the program. Recent individually-created student majors have included such titles as Global Health, Civic Engagement and Media, Design and the Built Environment, Global Economic Development, Middle Eastern Studies, Immigration and Ethnic Studies, Neuroscience, Maternal and Child Health, Environmental Business, Medieval Studies, Modern Ethnomusicology, and Urban Planning and Renewal. The program provides a supportive community of highly engaged and self-motivated students, alumni, and staff.

Students must seek the guidance and approval of a Faculty Mentor prior to having their proposal reviewed by the Individual Studies Faculty Review Board. If approved, the courses agreed upon by the Faculty Review Board become the basis for the student's major requirements. These listed requirements from numerous academic departments, along with the general education requirements, are analogous to the academic requirements given to students who select from the University's traditional majors. However, each student is required to design a unique program of study and defend it in order to be a part of IVSP.

Individual Studies students must complete a senior capstone project and are encouraged to engage in internships, research projects, independent studies, and study abroad to supplement their work in the classroom. Drawing from real-world experience as a supplement to the academic curriculum is generally encouraged. Such projects often serve as a way for students to develop academic connections among the multiple disciplines involved in their programs.

While IVSP allows students the opportunity to create a unique academic program focused on a specific area of study, using courses from multiple

academic departments, it does not substitute for or replicate the educational goals of existing University programs, including the Limited Enrollment Programs (LEPs). IVSP programs may not include substantial numbers of courses from LEP departments.

Developing a successful IVSP proposal takes time and involves several meetings to review and edit the draft proposal. Ideally, interested students should contact the IVSP staff and begin the application process early in their academic career. Working closely with the IVSP staff and their prospective Faculty Mentor, students should plan to complete and submit their IVSP proposal, preferably during their sophomore year or in their junior year before reaching 90 credits.

To be admitted into the Individual Studies Program, the student must:

1. Have a clearly defined academic goal that cannot be reasonably satisfied in an existing curriculum at the University of Maryland, College Park.
2. Have at least 30 earned college credits with at least 12 credits completed at College Park.
3. Have a minimum of a 2.5 GPA in each of their previous two semesters of college and at least a 2.0 GPA overall.
4. Complete at least 30 additional credits beginning the term following admission to IVSP.
5. Identify an appropriate faculty mentor, preferably tenured or tenure track, with significant undergraduate education experience related to the field of study.
6. Complete a detailed plan of study (proposal) that is approved by their Faculty Mentor and then approved by the Individual Studies Faculty Review Board. This proposal will include:
   a. A clear statement of the central academic purpose for their major.
   b. Specific course requirements including at least 27 credits of upper-division major coursework (300- and 400-level) beyond the IVSP courses (IVSP317, IVSP318, and IVSP420).
   c. The list of courses must include at least one Writing Craft course (in addition to the CORE Fundamental Studies Academic Writing and the Professional Writing requirements) selected from an approved list that is available from the Individual Studies staff.
   d. A semester-by-semester plan for the completion of their undergraduate degree within a reasonable period of time.

Following admission, students must:

1. Earn a grade of 'C-' or better in all courses required in their IVSP program of study, including IVSP420 as well as a satisfactory grade in IVSP317.
2. Complete mandatory advising sessions with their Faculty Mentor and the IVSP staff every semester, including a review of their semester-by-semester academic plan for completion of their IVSP program.
3. If not already completed, work towards immediate completion of the Fundamental Studies requirements.

For details and further information, you may visit the IVSP website at www.ivsp.umd.edu (http://www.ivsp.umd.edu), Students are also encouraged to visit the program office at 2407 Marie Mount Hall.

Naval Reserve Officer Training Corps Program (Naval ROTC)

0110 Reckord Armory, 301-314-6289

http://navalrotc.umd.edu/
navalrotc@umd.edu

Director: Captain Troy Mong

The Naval Reserve Officers Training Corps (NROTC) Program was established to educate and train qualified young men and women for service as commissioned officers in the US Navy (unrestricted line), or in the Marine Corps while completing their undergraduate degree. The NROTC Scholarship Program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps. It is highly recommended that students seeking a commission contact the Department of Naval Science/NROTC unit for full program details before registering for classes.

Program Requirements

The UMD NROTC Program was established to educate and train qualified young men and women for service as commissioned officers in the United States Navy and Marine Corps. The NROTC Scholarship Program plays an important role in preparing mature young men and women for leadership and management positions in an increasingly technical military environment. NROTC midshipmen are required to complete the naval science courses and attend weekly professional seminars. During the summer, NROTC midshipmen participate in active duty at sea or shore-based training cruises for approximately four weeks. Upon receiving their Baccalaureate Degree and completing the NROTC program, qualified midshipmen are commissioned as ensigns in the U.S. Navy or second lieutenants in the Marine Corps. Commissioned naval officers go on to training in various warfare specialties and serve as surface or submarine officers, naval aviators, explosive ordinance disposal officers or SEALs. Marine Corps officers attend "The Basic School" in Quantico, Virginia, and serve in fields such as infantry, artillery, combat engineers, and aviation. Staff positions (intelligence, law, medicine) are not normally offered through NROTC.

The NROTC Program was established to develop midshipmen mentally, morally and physically and to imbue them with the highest ideals of duty, and loyalty, and with the core values of honor, courage and commitment in order to commission college graduates as naval officers who possess a basic professional background, are motivated toward careers in the naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship and government.

Academic Requirements

The Naval Science curriculum includes courses on topics such as Navy and Marine Corps organization, at-sea navigation, leadership, naval history, amphibious warfare, engineering, and weapons systems. Courses emphasize development of professional knowledge and leadership skills, which are placed in the context of military service immediately following graduation from University of Maryland.

Students in the NROTC program enroll in one Naval Science course per term. Some courses are required for both Navy and Marine option students, while others are specific to the branch of service. All NROTC students must also enroll in the Naval Science Laboratory (NAVY108) each term.

Navy option students must complete eight core curriculum courses offered by University of Maryland, including two term courses in calculus to be completed by the sophomore year, two term courses in calculus-based physics, with laboratory, to be completed by the junior year, two

term courses in English or equivalent writing courses, one term course in history or national security policy, and one term course in world culture or regional studies.

Curriculum

Navy Option students typically will take:

Freshman Year			
First Semester	**Credits**	**Second Semester**	**Credits**
NAVY100	3	NAVY101	3
	3		3
Sophomore Year			
First Semester	**Credits**	**Second Semester**	**Credits**
NAVY200	3	NAVY201	3
	3		3
Junior Year			
First Semester	**Credits**	**Second Semester**	**Credits**
NAVY300	3	NAVY301	3
	3		3
Senior Year			
First Semester	**Credits**	**Second Semester**	**Credits**
NAVY400	3	NAVY401	3
	3		3

Total Credits 24

Marine Option typically will take:

Freshman Year			
First Semester	**Credits**	**Second Semester**	**Credits**
NAVY100	3	NAVY101	3
	3		3
Sophomore Year			
First Semester	**Credits**	**Second Semester**	**Credits**

	3		3
Junior Year			
		Second Semester	**Credits**
		NAVY402	3
			3
Senior Year			
		Second Semester	**Credits**
		NAVY401	3
			3

Total Credits 18

Scholarships and Incentives

Recipients of National Scholarships are selected from applicants to a national competition (http://www.nrotc.navy.mil (http://www.nrotc.navy.mil/)). Additionally, through the NROTC 3 year and 2 year scholarship process, freshmen and sophomore members of NROTC in all degree programs are eligible to compete for scholarships also based on a competitive NROTC selection process. Scholarship recipients receive money for full tuition and fees, a book allowance (currently $750/year), and a monthly allowance from $250 to $400, depending on the student's NROTC year. If unqualified for a scholarship but recommended for 'advanced standing', a student will have the ability to commission in the U.S. Navy and will receive a book stipend and monthly allowance. There are no scholarship opportunities for juniors or seniors.

Campus Involvement

The NROTC unit values well-rounded future officers and encourages battalion members to get involved with numerous activities on campus. With participation in an internship, a semester abroad, intramural and varsity sports teams, fraternities or sororities, music or performance groups and countless clubs and groups, many members find outside activities an enjoyable aspect of their college experience.

National Scholarship Office

2403 Marie Mount Hall, 301-314-1289
www.scholarships.umd.edu (http://www.scholarships.umd.edu)
scholarships@umd.edu

Director: Francis DuVinage, Ph.D.

The National Scholarships Office at the University of Maryland, College Park aims to provide undergraduates with the best possible information, guidance and support as they learn about and apply for national scholarships.

National scholarships are competitive, prestigious awards that provide opportunities and support for a wide range of enriching experiences, including study abroad, graduate study (and sometimes undergraduate study also), federal employment, teaching, research, and public service. National scholarships are looking for students (with or without financial need) who are developing strong interests and goals - academic and extracurricular - and who want to take advantage of every constructive opportunity that will help them reach their objectives. Just as each national scholarship offers a different kind of opportunity, each is also looking for a different range of strengths and interests in its applicants. If you develop a strong academic record, are thoughtful about your choices and devote yourself to activities you care about, you may well find one or more scholarship opportunities of interest to you.

The National Scholarships Office strives to make learning about and applying for national scholarships an enlightening experience. In addition to providing information about national scholarships through our website, through group presentations and through individual advising, we also provide individualized guidance and support at every stage of the application process. We invite you to visit our website and to make an appointment with us to learn more about national scholarships that may help you attain your goals.

Advanced Cybersecurity Experience for Students Minor

Prince Frederick Hall
301-314-7414
aces@umd.edu
www.aces.umd.edu (http://www.aces.umd.edu)

The ACES (Advanced Cybersecurity Experience for Students) Minor is housed in the Honors College but is open to all undergraduate students in all majors. This minor takes a multidisciplinary approach to cybersecurity education in that students gain knowledge about many of the fields that intersect in cybersecurity (e.g., legal and public policy aspects, criminal justice, journalism, and computer science and engineering). With an emphasis on hands-on experiences, students will gain practical skills

through coursework, seminars, group projects, internships, and research, both on and off campus.

Students in the ACES Minor will also have opportunities to engage in the larger ACES community, including serving as peer mentors, tutors, and advisors for ACES Living-Learning Program students; participating in educational events; and serving as student leaders on the ACES Student Board. ACES Minor students will also have regular interactions with corporate and governmental leaders in cybersecurity, who will serve as both mentors and professional contacts.

Requirements

The ACES Minor features a customizable 16-credit curriculum.

Course	Title	Credits
PREREQUISITES: Required for students who have not completed the ACES Living-Learning Program		
HACS201	Introduction to UNIX [1]	1
HACS202	Group Project in Cybersecurity	3
Total Credits		4

[1] HACS201 is waived for students who have completed CMSC216

Course	Title	Credits
Required Course [2]		
HACS318	Cybersecurity Professionals Colloquium Series	1
Electives [3]		
HACS408	Advanced Seminar in Cybersecurity	3
Experiential Learning		
Select a minimum of 3 and a maximum of 6 credits		
HACS479	Undergraduate Research in Cybersecurity	1-3
HACS498	Cybersecurity Group Problem Solving	3
Total Credits		8-10

[2] Required for all ACES Minor students

[3] Select at least 3 courses. Students may also substitute one or two electives from courses including CCJS418B, CMSC414, CMSC456, CMSC498R, ENEE459C, ENEE459D, ENEE459E, and ENME442.

Notes:

- At the time of application students must have 30 university credits completed (including transfer credit), a minimum cumulative GPA of a 3.0, and at least 3 semesters remaining prior to graduation
- Upon admission to the minor students will become part of the Honors College and are subject to its policies
- Students must maintain a 3.0 cumulative GPA to remain in good standing in the minor per Honors College requirements
- All courses used to satisfy the requirements of the minor must be completed with a grade of "C-" or better
- A maximum of 2 courses may be used to satisfy the requirements of both a major and a minor

Army Leadership Studies Minor

The Army Leadership Studies program promotes the development of undergraduate students on small group leadership. Students will walk away with an in-depth understanding of Small Unit Tactics, Land Navigation and Field Training, Operations and Logistical Planning, Team Building, and Peer-to-Peer counseling. The core courses in the Minor are sequenced to meet the increasingly complex sets of outcomes-based instruction across cognitive, personal development, and group/organizational domains.

The Army Leadership Studies minor consist of the courses identified below and is open to any student at the University of Maryland. Students of all majors will be eligible to apply and prior military or ROTC experience is not required. Students seeking a minor in Army Leadership Studies must be approved by the Director of Army ROTC.

Requirements

Course	Title	Credits
ARMY301	Advanced Military Leadership I	3
ARMY302	Advanced Military Leadership II	3
ARMY401	Advanced Military Leadership III	3
ARMY402	Advanced Military Leadership IV	3
Elective		
HIST224	Modern Military History, 1494-1815	3
or HIST225	Modern Military History, 1815-Present	
Total Credits		15

At the 300 level, students learn the application of Army leadership strategies, critical decision making methodologies, physical and mental fitness excellence. Includes a laboratory period in applied leadership, common military tasks and physical fitness, as well as a three day field exercise.

At the 400 level, students learn the military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

Asian American Studies Minor

Asian American Studies Program (AAST)
2117 Susquehanna Hall
301-405-0996
aast@umd.edu
www.aast.umd.edu (http://www.aast.umd.edu)

Director: Julie Park, Ph.D.

In the Asian American Studies Program (AAST), students undertake an interdisciplinary and critical study of race, immigration, and political and social representation through examination of the experiences of Asian Americans. Students study the experiences of Asian Americans compared to and connected with other groups in the United States, as well as situated within a global and transnational context. Through this approach, students examine the histories, communities and cultures of Asian Americans as both distinctive and connected to the broader themes for diversity, ethnicity, race, gender, sexual orientation, and migration in the Americas. AAST offers a 15 credit-hour minor. For the minor, courses may be cross-listed in other departments and some may satisfy general education requirements.

Requirements

Course	Title	Credits
AAST Foundational Course		
Select one of the following:		3
AAST200/ AMST298	Introduction to Asian American Studies (AMST298C)	
AAST201/ HIST221/219	Asian American History (HIST219M, HIST219G)	
Elective Courses		
Select 9 credits of additional AAST or other approved courses [1]		9
At least two of which must be upper division (300 or 400 level)		
and		
One must fulfill comparative ethnic or global/transnational/ international area requirement [2]		
AAST222	Immigration and Ethnicity in America	
AAST233	Introduction to Asian American Literature	
AAST298	Special Topics in Asian American Studies (AAST298A: Islam in America)	
AAST298	Special Topics in Asian American Studies (AAST298B: Visual Cultures of Islam)	
AAST298	Special Topics in Asian American Studies (AAST298J:Asian American Performance)	
AAST378	Experiential Learning	
AAST388	Independent Research	
AAST398	Selected Topics in Asian American Studies (AAST398A: Vietnamese American Studies)	
AAST398	Selected Topics in Asian American Studies (AAST398B:Asian American Social Policy and Community Advocacy)	
AAST398	Selected Topics in Asian American Studies (AAST398D: Filipino American History and Biography)	
AAST398	Selected Topics in Asian American Studies (AAST398E: Growing up Asian American: The Asian Immigrant Family and the Second Generation)	
AAST398	Selected Topics in Asian American Studies (AAST398M: Asian Americans and Media)	
AAST420	Asian American Women: The Social Construction of Gender	
AAST424		
AAST443	Asian American Politics	
AAST498	Advanced Topics in Asian American Studies (AAST498B: Urban Democracy and Community)	
AAST498	Advanced Topics in Asian American Studies (AAST498J: Asian American Psychology)	
AAST498	Advanced Topics in Asian American Studies (AAST498M:Asian American Public Policy)	
AAST498	Advanced Topics in Asian American Studies (AAST498X: Techno-Orientalism)	
AAST498	Advanced Topics in Asian American Studies (AAST498B: Confucius' Many Lives in East Asia and Asian American) [2]	
AAST/ AMST498	Advanced Topics in Asian American Studies (AAST498W/AMST498R: Transnational American Studies) [2]	
Upper Division Courses		
AAST499	Senior Thesis (Or one additional 400-level AAST course) [3]	3
Total Credits		15

Notes:

- No more than 6 credits (2 courses) taken at the 100 or 200-level may count towards the minor.
- A minimum of 9 credits (3 courses) must be taken at the 300 or 400-level.
- All courses used for the minor must have a grade of C- or better.
- A student may use a maximum of 6 credits (2 courses) to satisfy requirements for both a major and a minor. Courses completed for one minor may not be used to satisfy the requirements for another minor.

1 Students may take a course not on this list with approval from the AAST Director.

2 For the most current list of courses that fulfill comparative ethnic/ global transnational/international area requirement, see AAST website (https://www.aast.umd.edu/aast-minor/#minorreq).

3 Restriction: Permission of instructor or enrolled in AAST minor. This advanced colloquium in Asian American Studies is designed as a senior seminar. The course offers an intensive learning experience and students are required to complete a thesis, applied research project, or take part in and write about a sustained community experience.

Global Studies Minor

The Global Studies Minor Program provides opportunities for students from any discipline or major to study how evolving global connections affect the well-being of people throughout the world. Students in this interdisciplinary program develop an understanding and appreciation of how and why interactions across national and ethnic borders are shaped by language, culture, politics, economic development, and conflict.

The program is comprised of a number of specialization tracks which address issues from the perspective of different disciplines. The tracks are:

- International Development and Conflict Management (https://cidcm.umd.edu/)
- International Engineering (http://www.ilp.umd.edu/coursework (http://www.ilp.umd.edu/coursework/))
- Global Poverty (http://arec.umd.edu/undergraduate/minors/global-poverty (http://arec.umd.edu/undergraduate/minors/global-poverty/))
- Global Terrorism Studies (http://www.start.umd.edu/)

All students choose one course from a set of 'signature' courses outside of their chosen track for exposure to major global issues addressed by the other Global Studies minors. The minors provide an opportunity for an experiential component within a student's elective courses, including a study abroad experience. The Global Studies Minor Program includes special activities that involve students across the minors, such as

special speaker forums, participation in major events, and experiences in Washington, D.C.

Individual Studies Program

2407 Marie Mount Hall
301-314-0023
individualstudies@umd.edu
www.ivsp.umd.edu (http://www.ivsp.umd.edu)

Director: Dr. Joan Burton

The Individual Studies Program (IVSP) enables UM students to design their own interdisciplinary majors, subject to a proposal process, when their educational goals cannot be reasonably achieved within an existing departmental curriculum. The Individual Studies Program leads to a Bachelor of Arts or Bachelor of Science degree. IVSP degree programs focus on academic and intellectual growth through interdisciplinary study. Individually created student majors have recently included such titles as International Relations and East Asia, Global Health, 3D Environment Modeling and Design, Environmental Sustainability, Education and Social Change in Latin America, Healthcare Management for Diverse Communities, Global Development, Middle Eastern Studies, Asian American Policy and Advocacy, Women's Health, Digital Media in Society, and Urban Policy Studies.

For information, see Office of Undergraduate Studies (p. 441).

Program Learning Outcomes

1. Students will demonstrate the ability to gather information, understand the defining-concepts from three or more areas of study, and combine these concepts to propose an individually designed major to be independently pursued.
2. Students will be able to apply the concepts of their individually designed major in an internship or independent research project.
3. Through a final capstone project, students will demonstrate their ability to integrate different areas of study to examine a question, problem, or phenomenon.

Military Studies Minor

The minor in Military Studies provides students with the opportunity to study the U.S. military and more specifically the U.S. Air Force. Students seeking a minor in Military Studies are not required to be members of the Air Force ROTC program. This minor enables students to develop a secondary academic experience which may serve them in the future. The minor may also alert potential employers to the student's knowledge in a minor field of study.

The Military Studies minor consists of the courses identified in the Requirements section, and is open to any student at the University of Maryland. Students seeking a minor in Military Studies must be approved by the Director of Air Force ROTC and be advised by instructional personnel in that office.

Requirements

Course	Title	Credits
Required Courses [1]		
ARSC300	Management and Leadership I	3
ARSC301	Management and Leadership II	3
ARSC400	National Security Forces in Contemporary American Society I	3
ARSC401	National Security Forces in Contemporary American Society II	3
Elective Courses [2]		
Select one of the following Global Affairs courses:		3
GVPT280	The Study of Comparative Politics	
HIST224	Modern Military History, 1494-1815	
HIST225	Modern Military History, 1815-Present	
HIST240	Europe in the Twentieth Century

HIST314		
Select one of the following Military Affairs courses:		3
BMGT360	Strategic Management of Human Capital	
BMGT364	Managing People and Organizations	
GVPT354	International Development and Conflict Management (Sophomore standing)	
GVPT360	International Negotiations	
SOCY462	[3]	
SOCY463	[3]	
SOCY464	Military Sociology [3]	
SOCY465	The Sociology of War [3]	
Total Credits		18

1 At the 300 level, students focus on case studies in effective leadership, management, and team-building. Readings explore topics such as accountability, motivation, teamwork, and ethical and moral leadership. These exercises help students develop critical thinking and problem solving skills, as well as effective professional writing. At the 400 level, students study military policies, doctrine, and strategy, especially as related to areas of the world that are in crisis or transition. Special units are included on Europe, South Asia, East Asia, Latin America, Russia, and the Middle East to prepare students to function effectively in today's multi-ethnic, multi-cultural societies at home and abroad. Students also explore problem areas in military personnel management, including sexual harassment awareness, suicide awareness, and guidelines for working with civilian personnel. Capstone projects and activities for each student are part of the 400-level curriculum.

2 Other courses may be substituted with approval of the minor advisor and Advisory Committee. Students will be advised on the options for seeking BMGT courses.

3 6 credits of SOCY or department permission

Restrictions

- Courses completed in one minor may not be used to satisfy the requirements in another minor.
- No more than six of the required credits (or two courses) may be taken at an institution other than the University of Maryland, College Park.
- At least six upper division credits applied to the minor must be taken at the University of Maryland, College Park.
- All courses presented for the Minor must be passed with a grade of 'C-' or better.
- Course work other than that listed in section B must be approved by the Air Force ROTC advisor and the ROTC Advisory Committee.

Naval Science Minor

The minor in Naval Science is a 24-Credit minor that provides students with the opportunity to develop their own inherent leadership skills through the Naval NROTC development program. Students seeking a minor in Naval Science are not required to be members of the Naval ROTC program. This minor program enables students to develop a secondary academic experience that may serve them in their future professional work.

The Naval Science minor is open to any student at the University of Maryland. Students seeking a minor in Naval Science must be approved by the Professor of Naval Science of the Naval ROTC program and be advised by instructional personnel in that office.

Requirements

Course	Title	Credits
Naval Science Core		**18**
18 credits selected from the following:		
NAVY100	Introduction to Naval Science

Appendix B: University of Maryland Sexual Misconduct Policy and Procedures VI-1.60(A) (http://president.umd.edu/administration/policies/section-vi-general-administration/vi-160a-0/)

Appendix C: University of Maryland Code of Student Conduct V-1.00(B) (http://president.umd.edu/administration/policies/section-v-student-affairs/v-100b/)

Appendix D: University of Maryland Policy and Procedures on the Disclosure of Student Education Records III-6.30(A)

The policy below is current as of this publication. For more information and possible updates go to:

http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-630a (http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-630a/)

III-6.30(A) University of Maryland Policy and Procedures on the Disclosure of Student Education Records

Approved by the President August 1, 1991; technical amendments April 15, 1996; June 2, 1997; October 1, 2002; amended December 11, 2018.

I. Policy

It is the policy of UMD to comply with the requirements of the Federal Family Educational Rights and Privacy Act (FERPA), also known as the Buckley Amendment, concerning the disclosure of student records. FERPA affords eligible students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student's education records.
2. The right to request the amendment of the student's education records.
3. The right to provide written consent before UMD discloses personally identifiable information (PII) from the student's education records, except to the extent that FERPA authorizes disclosure without consent.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by UMD to comply with the requirements of FERPA.

Following is an outline of the policy, and an explanation of the procedures by which students may obtain access to education records. Accordingly, UMD shall provide students with annual notification of their rights pursuant to FERPA.

II. Definitions

- **'Attendance'** includes but is not limited to attendance in person or by paper correspondence, videoconference, satellite, Internet, or other electronic information and telecommunication technologies for students who are not physically present in the classroom; and the period during which a person is working under a work-study program.
- **'Directory Information'** means information which would generally not be considered harmful or an invasion of privacy if disclosed. It includes, but is not limited to, a student's name, address, telephone listing, e-mail address, date and place of birth, major field of study, full-time/part-time status, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended.
- **'Disclosure'** means to permit access to or the release, transfer, or other communication of, PII contained in education records by any means, including oral, written, or electronic means, to any party except the party identified as the party that provided or created the record.
- **'Education Records'** means those records directly related to a student and maintained by UMD or by a party acting on UMD's behalf. Education records do not include:

  1. Sole possession records: records that are kept in the sole possession of the maker, are used only as a personal memory aid, and are not accessible or revealed to any other person except a temporary substitute for the maker of the record.
  2. Records maintained by the UMD Police Department solely for law enforcement purposes and kept separately from the education records described above.
  3. Records of employment which relate exclusively to the individual in that individual's capacity as an

employee, and are not available for use for any other purpose. (**NOTE**: If a currently enrolled student is employed as a result of their status as a student, records relating to that employment are education records.)

4. Medical records on a student who is eighteen years of age or older made by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional made or used only for treatment purposes and available only to persons providing treatment. (**NOTE**: Treatment for the purposes of this definition does not include remedial educational activities.)
5. Post-attendance records: also called alumni records, are records which contain only information relating to a person's activities after that person is no longer a student at UMD and do not relate to that person as a student.
6. Grades on peer-graded papers before they are collected and recorded by a teacher.

- **'Eligible Student'** means a student who has reached the age of 18 or is attending UMD.
- **'Parent'** means a parent of a student, and includes a natural or adoptive parent, a guardian, or, in the absence of natural or adoptive parents, an individual acting as a parent.
- **'Party'** means an individual, agency, institution, or organization.
- **'Personally identifiable information'** or **'PII'** means data or information which includes, but is not limited to, a student's name; a name of a student's parent or family member; an address of a student or a student's family; a personal identifier, such as a social security number, University Identification Number (UID), or biometric record; other indirect identifiers, such as mother's maiden name; other information that alone, or in combination, is linked or linkable to a specific student and that would allow a reasonable person in the UMD community who does not have personal knowledge of the relevant circumstances to identify the student with reasonable certainty; or information requested by a person who UMD reasonably believes knows the identity of the student to whom the education record relates.
- **'Record'** means any information or data recorded in any medium (e.g., handwriting, print, tape, film, microfilm, microfiche, database, or any form of electronic data storage including emails).
- **'School Official'** is a person employed by any institution within the University System of Maryland in an administrative, supervisory, academic, research, or support staff role; a member of the Board of Regents; or a person engaged, employed by, or under contract with UMD to perform a special task, such as an attorney, auditor, or student serving on a UMD committee (e.g., University Student Judiciary, Honor Council, Standing Review Committee, scholarship & awards committees, etc.).
- **'Student Recruiting Information'** is information identified in the Solomon Amendment that UMD is required to provide to military recruiters upon request. Those items are: student name, addresses, telephone listings, age (or year of birth), class level, academic major, degrees received, and the most recent educational institution in which the student was enrolled.

III. Right to Inspect and Review Education Records

Each student in attendance at UMD has a right to inspect and review their education records within 45 days after the day UMD receives a request for access. A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The school official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the school official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

Procedure

Form of Request

Requests for access to education records must be made in writing and signed by the student.

Place of Request

Requests are made to:
Office of the Registrar
1130 Clarence M. Mitchell, Jr. Building
College Park, Maryland 20742-5231

Response by UMD

UMD will comply with a request for access within a reasonable period of time, not to exceed 45 days after UMD receives a request for access. Whenever possible, arrangements shall be made for the student to read the records in the presence of a staff member.

Reproduction of Records

A student may ordinarily obtain copies of education records by paying the cost of reproduction. The fee for photocopies is $0.25 per page. There is no charge for staff time to search for or collect education records. Only copies of a student's current UMD transcript will be provided. However, an official UMD transcript can be provided upon specific request of the student and subsequent payment of costs for the document.

Types and Locations of Education Records Maintained at UMD

(**NOTE:** All requests must be routed through the Office of the Registrar.)

1. Admissions (e.g., applications and transcripts from institutions previously attended)

Undergraduate:
Director of Undergraduate Admissions
1130 Clarence M. Mitchell, Jr. Building

Graduate:
Director of Graduate Records
Lee Building

2. Records & Registration Services (e.g., all ongoing academic and biographical records, undergraduate and graduate)

Office of the Registrar
1130 Clarence M. Mitchell, Jr. Building

3. Departments

Departmental Offices

Chair or Head of the Department

4. Deans
Dean's Office of each School/College

5. Resident Life (e.g., student's housing records)
Director of Resident Life

6. Advisors (e.g., with student permission: letters of evaluation, personal information sheet, transcript, test scores)
7. Office of Student Conduct (e.g., student's judicial and disciplinary records)
Director of the Office of Student Conduct
1130 Clarence M. Mitchell, Jr. Building

8. Counseling Center (e.g., biographical data, summaries of conversations with students, test results)
Director of the Counseling Center
Shoemaker Building

(**NOTE**: Where records are used only for treatment purposes, they are not education records and are not subject to this policy.)

9. Financial Aid (e.g., financial Aid applications, needs analysis statements, awards made)
Director of Financial Aid
Lee Building

(**NOTE**: There is no student access to parents' confidential statements.)

10. University Career Center (e.g., recommendations and unofficial copies of academic records)
Director of the Career Center
Hornbake Library

11. Office of Student Financial Services (e.g., student accounts receivable, records of students' financial charges and credits with UMD)
Office of Student Financial Services
Lee Building

Waiver of Access to Confidential Recommendations

A student may waive any or all of their rights to review confidential letters of recommendation, subject to the following conditions:

1. The waiver must be in writing, signed by the student, regardless of age.
2. UMD shall not require such waivers as a condition to admission, or the receipt of any service or benefit.
3. If right of access is waived, a student will be notified, upon written request, of the names of all persons making confidential recommendations. Such recommendations shall be used only for the purpose for which they were specifically intended.

A waiver may be revoked in writing at any time; however, by revoking it, the student does not have the right to inspect and review documents collected while the waiver was in force.

IV. RIGHT TO REQUEST THE AMENDMENT OF EDUCATION RECORDS

It is the policy of UMD to provide students the opportunity to request that amendments be made to their education records which are believed to be inaccurate, misleading, or which violate the right to privacy or other rights.

Request to Amend an Education Record

1. A request must be in writing to the Office of the Registrar.
2. A request must contain:
   a. the specific document(s) being challenged; and
   b. the basis for the challenge.
3. UMD shall decide within a reasonable period of time whether to amend the document(s). The student shall be notified of the decision in writing, and if the decision is to refuse to amend, the student shall be notified of the right to a hearing.

Right to a Hearing

1. Upon request, a student shall be provided an opportunity for a hearing to challenge the content of education records.
2. A request for a hearing must be made in writing to the Office of the Registrar.
3. Within a reasonable period of time, the student shall be given reasonable advance notice in writing of the date, place, and time.

Conduct of Hearing

1. The hearing shall be conducted by a UMD official with no direct interest in the outcome.
2. The student shall have a full and fair opportunity to present evidence, and may be represented by individuals of their choice, including an attorney. The cost for such representation shall be the responsibility of the student.

Decision

1. The student shall be notified in writing within a reasonable period of time.
2. The decision is to be based solely upon evidence presented at the hearing, and must include a summary of the basis of the decision.
3. In cases where the challenged information is found to be inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student, the education records shall be amended accordingly within a reasonable time.
4. In cases where the challenged information is not found to be inaccurate, misleading, or otherwise in violation of the privacy or other rights of a student, the student shall be informed in writing of the right to place in the challenged record a statement commenting on the information and explaining any reasons for disagreeing with the decision.
5. The statements described above shall be kept as part of the student's record and disclosed whenever that portion of the record is disclosed.

V. Disclosure of Personally Identifiable Information

It is the policy of UMD to limit disclosure of PII without a student's prior written consent, subject to the following limitations and exceptions:

Directory Information

1. This information may be disclosed and may appear in public documents unless a student files a written notice

not to disclose any or all of the information (i.e., opts out). Such notice must be filed with the Office of the Registrar.

2. Students will be given annual notice of the categories of information designated as directory information.

Prior Consent Not Required

Prior consent is not required for disclosure of education records in several circumstances. These circumstances include disclosure:

1. To the student.
2. To anyone, if UMD has obtained the prior written consent of the student.
3. To anyone, in response to request for directory information, unless the student has opted out.
4. To UMD school officials determined to have a legitimate educational interest. They may access student education records within the scope of performing their job duties.

   A school official has a legitimate educational interest if the official is:
   a. Performing a task that has been assigned as part of their duties or a position description or contract.
   b. Performing a task related to a student's education.
   c. Performing a task related to the discipline of a student.
   d. Providing a service or benefit relating to the student's family, such as health care, counseling, job placement, or financial aid.
5. To officials of another institution of post-secondary education where the student seeks or intends to enroll, or where the student is already enrolled, if the disclosure is for purposes related to the student's enrollment or transfer. A student will be provided with a copy of the records which have been transferred upon request and payment of copying fees as described above.
6. To authorized representatives of the following government entities, if the disclosure is in connection with the audit or evaluation of federal- or statesupported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs: U.S. Comptroller General, U.S. Secretary of Education, U.S. Attorney General or state and local educational authorities, such as the Maryland Higher Education Commission (MHEC), the authority that is responsible for supervising UMD's education programs.

   Subject to controlling federal law, these officials will protect information received so as not to permit personal identification of students to outsiders.
7. To authorized persons and organizations, such as the Department of Veterans Affairs or an employer, in connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid.
8. To state and local officials to which such information is required to be reported by effective state law adopted prior to November 19, 1974.
9. To organizations conducting education studies for, or on behalf of, UMD for the purpose of developing, validating, or administering predictive tests; administering student programs; and improving instruction. The studies shall be conducted so as not to permit personal identification of students to outsiders, and the information is to be destroyed when no longer needed for these purposes.
10. To accrediting organizations to carry out their accrediting functions.
11. To either parent of a student who is claimed as a dependent for income tax purposes by at least one parent.
12. To parents when their student (under age 21) is found to have violated UMD's alcohol or drug policies.
13. To appropriate parties when UMD determines that disclosure is necessary to protect the health or safety of the student or other individuals and the information will assist in resolving the emergency.
14. In response to a court order or subpoena, including ex parte orders under the USA Patriot Act. Unless the issuing entity orders UMD against prior notification, UMD will make reasonable efforts to notify the student before complying with the court order or subpoena.
15. To an alleged victim of a crime of violence when the disclosure is the result of a disciplinary hearing regarding the alleged perpetrator of that crime with respect to that crime.
16. To anyone requesting the final results of a disciplinary hearing against an alleged perpetrator who has been found in violation of the UMD Code of Student Conduct or UMD Sexual Misconduct Policy and Procedures relating to a crime of violence or non-forcible sex offense.
17. To the Department of Homeland Security (DHS), Immigration and Customs Enforcement (ICE) for the purpose of complying with a request from ICE relative to UMD's participation in the Student and Exchange Visitor Program (SEVIS).
18. To military recruiters who request "Student Recruiting Information" for recruiting purposes only (e.g., Solomon Amendment).
19. To the Internal Revenue Service (IRS) for purposes of complying with the Taxpayer Relief Act of 1997.
20. When the disclosure concerns sex offenders and other individuals required to register under state or federal law, and the information was provided to the University under 42 U.S. C. 14071 and applicable federal guidelines.

Prior Consent Required In All Other Cases

1. UMD will not release PII in education records, or allow access to those records without prior consent from the student.
2. The consent must be in writing, signed by the student, and dated. The consent will remain in effect until rescinded by the student, or its purpose is achieved.
3. The student must specify the records to be disclosed, the identity of the recipient, and the purpose of the disclosure.
4. A copy of the record disclosed will be provided to the student upon request and payment of copying fees described above.

Record of Disclosures

1. **Maintenance of List**: UMD shall maintain a list of each request and each disclosure of PII with each student's education records. The list shall include:
   a. the parties who have requested and/or received the information; and
   b. the legitimate interest the parties had in requesting and/or receiving the information.
2. **Inspection of List**: The list of disclosures may be inspected by:
   a. the student;
   b. the official custodian of the record; and
   c. other UMD and governmental officials.
3. **Exceptions:** Disclosures in the following circumstances do not need to be recorded:
   a. disclosures to the student;
   b. disclosures pursuant to written consent;
   c. disclosures to school officials including instructional or administrative officials of UMD;
   d. disclosures of directory information; and
   e. disclosures related to judicial orders or lawfully issued subpoenas.

VI. Right to File a Complaint

Students have the right to file a complaint with the U.S. Department of Education concerning alleged failures by UMD to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Independence Avenue, S.W.
Washington, D.C. 20202

Appendix E: Policy on Smoking at University of Maryland VI-8.10(A) (http://president.umd.edu/administration/policies/section-vi-general-administration/vi-810a/)

Appendix F: University of Maryland Code of Academic Integrity III-1.00(A) (http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-100a/)

Appendix G: Statute of Limitations for the Termination of Degree Programs

Committee on Academic Procedures and Standards
Approved December 7, 1989

The following policies apply to all undergraduate degree programs terminated at the University of Maryland at College Park at the beginning of the Spring, 1990 Semester and thereafter.

1. All students enrolled at the University of Maryland, College Park or at a Maryland community college program articulated with the terminated degree program during the semester in which the program is terminated must complete the major requirements of the terminated degree program within five calendar years of the date upon which the program is terminated. If only a few students are enrolled in a terminated program, a shorter time limit may be imposed based on a study of the academic records of all students enrolled in the program. If a shorter time period is imposed, all students enrolled in the program will be notified of its length.
2. Students who, prior to the termination date had been enrolled in the terminated program or a Maryland community college articulated with the terminated program, but who subsequently interrupt their studies at the University of Maryland, College Park or the community college for one or more semesters will be allowed to enter or re-enter the program only if a careful analysis of their records by the appropriate dean indicates they will be able to complete the major requirements of the terminated program within the remaining time period specified.
3. When a program is terminated the University of Maryland, College Park will make a good faith effort to notify those students who had interrupted their studies in that program. As part of that good faith effort, the University of Maryland at College Park will publish in its re-enrollment forms, catalogues, and schedules of classes a statement advising returning students that programs may have been terminated and that the student needs to check the current status of the program.
4. At the end of the time period specified for completion of major requirements after the termination date of the program, the relevant department or college will evaluate the records of each student enrolled in the program for fulfillment of departmental major requirements and will notify students whether they have completed these requirements. Such notice shall be in writing and sent to the student's last known addresses.
5. When a degree program is terminated, the university will send notification of the time limit for completion of the major requirements to all students enrolled in the program at that time. It will also attempt to send notification to students who interrupted their studies while enrolled in the program in the preceding three years, insofar as such students can reasonably be identified. This notification will be sent to the students' last known addresses on file with the university. Such notifications also will be sent to the Maryland community colleges having programs articulated with the terminated program.

Appendix H: Policy on Student Classification for Admission and Tuition Purposes VIII-2.70

The policy below is current as of this publication. For more information and possible updates go to: www.usmd.edu/regents/bylaws/SectionVIII/viii270r.pdf (http://www.usmd.edu/regents/bylaws/SectionVIII/viii270r.pdf)

VIII-2.70 Policy on Student Classification for Admission and Tuition Purposes

(Approved by the Board of Regents August 28, 1990; Amended July 10, 1998; Amended November 27, 2000; Amended April 11, 2003; Amended June 23, 2006; Amended February 15, 2008, Amended October 24, 2014; Amended April 10, 2015)

Policy

Purpose

To extend the benefits of its system of higher education while encouraging the economical use of the State's resources[1], it is the policy of the Board of Regents of the University System of Maryland (USM) to recognize the tuition categories of in-state and out-of-state students for the purpose of admission and assessing tuition at USM institutions.

[1] Annotated Code of Maryland, Education Article, §12-101.

Burden of Proof

The person seeking in-state status shall have the burden of proving by clear and convincing evidence that he or she satisfies the requirements and standards set forth in this Policy. Assignment of in-state or out-of-state status will be made by the applicable USM institution upon a review of the totality of facts known or presented to it.

In-state Status

To qualify for in-state tuition, a student must demonstrate that, for at least twelve (12) consecutive months immediately prior to and including the last date available to register for courses in the semester/term for which the student seeks in-state tuition status, the student had the continuous intent to:

1. Make Maryland his or her permanent home; and
2. Abandon his or her former home state; and
3. Reside in Maryland indefinitely; and
4. Reside in Maryland primarily for a purpose other than that of attending an educational institution in Maryland.

Satisfying all of the requirements in Section II (and Section III, when applicable) of this policy demonstrates continuous intent and qualifies a student for in-state tuition. Students not entitled to in-state status under this policy shall be assigned out-of-state status for admission and tuition purposes.

Presumption

Either of the following circumstances raises a presumption that the student is residing in the State of Maryland primarily for the purpose of attending an educational institution and therefore, does not qualify for in-state status under this policy:

1. A student is attending school or living outside Maryland at the time of application for admission to a USM institution, or
2. A student is Financially Dependent on a person who is not a resident of Maryland.

This presumption may be rebutted. The student bears the burden of rebutting the presumption. See 'III. Rebuttal Evidence' below.

Requirements

Before a request for classification to in-state status will be considered, a student must comply with all of the following requirements for a period of at least twelve (12) consecutive months immediately prior to and including the last date available to register for courses in the semester/term for which the student seeks in-state tuition status. The student must demonstrate he or she:

1. Owns or possesses, and has continuously occupied, including during weekends, breaks and vacations, living quarters in Maryland. The student must provide evidence of a genuine deed or lease and documentation of rent payments made. In lieu of a deed or lease, a notarized affidavit from a landlord showing the address, name of the student as occupant, term of residence, and history of rent payments made will be considered. As an alternative, a student may demonstrate that he or she shares living quarters in Maryland which are owned or rented and occupied by a parent, legal guardian or spouse.
2. Has substantially all of his or her personal property, such as household effects, furniture and pets in Maryland.
3. Has paid Maryland income tax on all taxable income including all taxable income earned outside the State and has filed a Maryland tax return.
4. Has registered all owned or leased motor vehicles in Maryland.
5. Possesses a valid Maryland driver's license, if licensed.
6. Is registered to vote in Maryland, if registered to vote.
7. Receives no public assistance from a state other than the State of Maryland or from a city, county or municipal agency other than one in Maryland.
8. Has a legal ability under Federal and Maryland law to live permanently without interruption in Maryland.
9. Has rebutted the presumption that he or she is in Maryland primarily to attend an educational institution, if the student's circumstances have raised the presumption.

Rebuttal Evidence

Satisfying the requirements listed in paragraphs 1-8 of Section II, does not rebut the presumption that a student is in Maryland primarily to attend an educational institution. To overcome the presumption, a student must present additional evidence.

To determine a student's intent, the University will evaluate evidence of a student's objectively verifiable conduct. Evidence that does not document a period of at least twelve (12) consecutive months immediately prior to and including the last date available to register for courses in the semester/term for which the student seeks in-state tuition status is generally considered an unfavorable factor under this policy. Evidence of intent must be clear and convincing and will be evaluated not only by the amount presented

but also based upon the reliability, authenticity, credibility and relevance of the evidence.

The absence of objective, relevant evidence is generally considered an unfavorable factor. A student's statement of intent to remain in Maryland in the future is generally not considered to be objective evidence under this policy.

Additional evidence that will be considered includes, but is not limited to, the following:

1. Source of financial support:
   a. Maryland employment and earnings history through sources beyond those incident to enrollment as a student in an educational institution e.g., beyond support provided by work study, scholarships, grants, stipends, aid, student loans, etc. (Tuition costs will be considered as a student expense only to the extent tuition exceeds the amount of any educational scholarships, grants, student loans, etc.) or
   b. Evidence the student is Financially Dependent upon a person who is a resident of Maryland.
2. Substantial participation as a member of a professional, social, community, civic, political, athletic or religious organization in Maryland, including professionally related school activities that demonstrate a commitment to the student's community or to the State of Maryland.
3. Registration as a Maryland resident with the Selective Service, if male.
4. Evidence showing the student uses his or her Maryland address as his or her sole address of record for all purposes including on health and auto insurance records, bank accounts, tax records, loan and scholarship records, school records, military records, leases, etc.
5. An affidavit from a person unrelated to the student that provides objective, relevant evidence of a student's conduct demonstrating the student's intent to live permanently in Maryland.

Non-Residents Who May Temporarily Qualify For In-State Status

In addition, persons with the following status shall be accorded the benefits of in-state status for the period in which they hold such status:

1. A full-time or part-time (at least 50 percent time) regular employee of USM or a USM institution.
2. The spouse or Financially Dependent child of a full-time or part-time (at least 50 percent time) regular employee of USM or a USM institution.
3. An active duty member of the Armed Forces of the United States who is stationed in Maryland, resides in Maryland, or is domiciled in Maryland, or the spouse or a Financially Dependent child of such an active duty member. Spouses and children who qualify for exemptions under this provision will retain in-state status for tuition purposes as long as they are continuously enrolled, regardless of whether the active duty member's station assignment, residence, or domicile remains in Maryland.[1]
4. A veteran of the Armed Forces of the United States who provides documentation that he or she was honorably discharged and currently resides or is domiciled in Maryland.[2]
5. A veteran who lives in Maryland and was discharged" from a period of at least 90 days of service in the active military, navy, or air service less than three years before the date of the veteran's enrollment and is pursuing a course of education with educational assistance under 38 U.S.C. §3001 or 38 U.S.C. §3301.[3]
6. The spouse or child of a veteran, provided that:
   a. the veteran was discharged or released from a period of at least 90 days of service in the active military, navy, or air service less than three years before the date of the spouse or child's enrollment (or in the case of a spouse or child seeking benefits under the Post-9/11 G.I. Bill, the veteran died in the line of duty on or after September 11, 2001 but less than three years before the date of enrollment);
   b. the spouse or child is entitled to assistance under Post-9/11 G.I. Bill, , 38 U.S.C. §3319 and, 38 U.S.C. §3311(B)(9);
   c. the spouse or child currently lives in Maryland; and
   d. the spouse or child is pursuing a course of education with educational assistance under 38 U.S.C. §3001 or 38 U.S.C. §3301.[4]
7. A member of the Maryland National Guard, as defined in the Public Safety Article of the Maryland Annotated Code, who joined or subsequently serves in the Maryland National Guard to:
   a. provide a critical military occupational skill; or
   b. be a member of the Air Force Critical Specialty Code as determined by the National Guard.
8. For UMUC, a full-time active member of the Armed Forces of the United States on active duty, or the spouse of a member of the Armed Forces of the United States on active duty.
9. A graduate assistant appointed through a USM institution for the semester/term of the appointment. Except through prior arrangement, this benefit is available only for enrollment at the institution awarding the assistantship.

1 Annotated Code of Maryland, Education Article § 15-106.4.

2 Annotated Code of Maryland, Education Article § 15-106.4.

3 38 U.S.C.A. § 3679(c).

4 38 U.S.C.A. § 3679(c).

Procedures

1. An initial determination of in-state status will be made at the time of admission. The determination made at that time, and any determination made thereafter, shall prevail for each semester/term until the determination is successfully challenged in a timely manner.
2. A change in status must be requested by submitting a USM institution's 'Petition for Change in Classification for Tuition'. A student applying for a change to in-state status must furnish all evidence that the student wishes the USM institution to consider at the time the petition is due. The due date is based on the deadline set forth by the USM institution at which the student seeks to enroll. If the applicable USM institution has no such deadline,

the due date is the last published date to register for the forthcoming semester/term for which the change in classification is sought.

3. The student shall notify the USM institution in writing within fifteen (15) days of any change in circumstances which may alter in-state status.
4. In the event incomplete, false, or misleading information is presented, the USM institution may, at its discretion, revoke in-state status and take disciplinary action provided for by the institution's policy. Such action may include suspension or expulsion. If in-state status is gained due to false or misleading information, the institution reserves the right to retroactively assess all out-of-state charges for each semester/term affected.
5. Each USM institution shall develop and publish additional procedures to implement this Policy. Procedures shall provide that on request the institution President or designee has the authority to waive any requirement set forth in Section II if it is determined that the application of the requirements creates an unjust result. These procedures shall be filed with the Office of the Chancellor.

Definitions

1. Financially Dependent: For the purposes of this policy, a financially dependent student is one who is claimed as a dependent for tax purposes.
2. Parent: A parent may be a natural parent, or, if established by a court order recognized under the law of the State of Maryland, an adoptive parent.
3. Guardian: A guardian is a person so appointed by a court order recognized under the law of the State of Maryland.
4. Spouse: A spouse is a partner in a legally contracted marriage.
5. Child: A child is a natural child or a child legally adopted pursuant to a court order recognized under the law of Maryland.
6. Regular Employee: A regular employee is a person employed by USM or a USM institution who is assigned to a State budget line or who is otherwise eligible to enroll in a State retirement system. Examples of categories **not** considered regular employees are graduate students, contingent employees, and independent contractors.
7. Continuous Enrollment:
   a. Undergraduate Student - An undergraduate student who is enrolled at a USM institution for consecutive fall and spring semesters, until completion of the student's current degree program or unless on an approved leave of absence or participating in an approved program off-campus.
   b. Graduate and Professional - Continuous enrollment for a graduate or professional student is defined by the institution in accordance with program requirements.

Implementation

This policy as amended by the Board of Regents on April 10, 2015 shall be applied to all student tuition classification decisions **effective July 1, 2015 and thereafter**.

Appendix I: University of Maryland Policy on the Conduct of Undergraduate Courses and Student Grievance Procedure V-1.00(A) (http://president.umd.edu/administration/policies/section-v-student-affairs/v-100a-0/)

Appendix J: University of Maryland Procedures for Review of Alleged Arbitrary and Capricious Grading - Undergraduate Students III-1.20(B) (http://president.umd.edu/administration/policies/section-iii-academic-affairs/iii-120b/)

Appendix K: Policy on Participation by Students in Class Exercises that Involve Animals

Students who are concerned about the use of animals in teaching have the responsibility to contact the instructor, prior to course enrollment, to determine whether animals are to be used in the course, whether class exercises involving animals are optional or required and what alternatives, if any, are available. If no alternatives are available, the refusal to participate in required activities involving animals may result in a failing grade in the course. Departments including courses where animals are used must actively inform students of such courses, including, but not limited to, notices in the Catalog.

The University of Maryland, College Park campus, affirms the right of the faculty to determine course content and curriculum requirements. The University, however, also encourages faculty to consider offering alternatives to the use of animals in their courses. In each course, the instructor determines whether the use of animals in the classroom exercises will be a course requirement or optional activity. The following departments have courses that may require animals to be used in class activities: Animal and Avian Sciences, Cell Biology and Molecular Genetics, Psychology, Veterinary Medicine, Biology, and courses with the NFSC prefix.

Committee on Academic Procedures and Standards
April 27, 1990

Appendix L: Completion of Interrupted Degree

Students whose registration at the University of Maryland, College Park, has lapsed for more than 10 years shall be required to complete a minimum of 15 credit hours at College Park after their return to campus in order to earn a baccalaureate degree.

Recommendations about courses needed to satisfy the remaining degree requirements will be made at the department level, with approval of the Dean's Office required. The reason for requiring these credits is that many fields change sufficiently in 10 years to require that students take current courses if they are to be awarded a current degree. Exceptions to the requirement for a minimum of 15 credits earned at College Park upon return to the campus can be recommended by the Deans for approval in the Office of the Vice President for Academic Affairs.

Appendix M: University of Maryland Policy on the Collection, Use and Protection of ID Numbers VI-26.00(A)

The policy below is current as of this publication. For more information and possible updates go to:

http://president.umd.edu/sites/president.umd.edu/files/documents/policies/VI-2600a.pdf

VI-26.00(A) University of Maryland Policy on the Collection, Use and Protection of ID Numbers

(Approved by the President May 31, 2005; Technical Amendment November 7, 2013)

Purpose

The University of Maryland is dedicated to ensuring the privacy and proper handling of confidential information relating to students, faculty, staff and individuals associated with the University. Traditionally, the Social Security Number (SSN) has been used as a common "person" identifier and the key to University "person" databases. The purpose of this policy is to authorize the creation of new methods of unique identification that will replace reliance on the SSN and allow for easy identification of a person for University transactions.

Policy

Use of the SSN as an identifier will be discontinued, except where required for employment, IRS reporting, Office of Institutional Research, Planning & Assessment, federal student financial aid processing, state and federal reporting and a limited number of other business transactions.

While the SSN will be collected and retained as authorized by law, it will not be used for routine identification or authentication purposes. Instead, a unique, nine digit university identification number called U ID Number will be assigned to each individual. For computer access, individuals will also have a unique Directory ID. For complete authentication, these identifiers (U ID Number and Directory ID) are accompanied by the use of a PIN or password.

Policy Implementation

1. The University of Maryland prohibits the use of a person's SSN as a publicly visible identification number for University-related transactions, unless specifically required by law or business necessity. A listing of currently approved uses is provided in Appendix A. This list is subject to change.
2. The University of Maryland will use SSN as a data element but not as a key for access to databases.
3. Each member of the University community will be assigned a unique identification number that will not be the same as nor derived from the individual's SSN. This number is called the U ID Number.
4. Software systems purchased or developed by the University of Maryland will not display a SSN either in read-only format or on print or other system output, unless authorized by law or business necessity.
5. Name and directory systems, purchased or developed by the University of Maryland, will be keyed for access by an individual's unique U ID Number, not the SSN.
6. When databases need to utilize SSN, they will use secure conversion tables or other technical mechanisms that automatically cross-reference SSN and other information within systems. In exceptional circumstances, it may be necessary to use SSN as an alternate search field. All such cases shall be referred to the data custodian (Office of the Registrar for students, UHR for employees) who shall seek approval from the University Data Policy Advisory Committee (DPAC) DPAC has a strict procedure for reviewing and approving requests for the use of SSN in any campus application or database. Justifications must be submitted to the appropriate divisional DPAC representative for committee review and consideration of approval. In addition, any transmission of data containing SSN over any communication network must be transmitted using a secure methodology.
7. Systems or technology developed or purchased by the University of Maryland after the effective date of this policy shall comply with these provisions.
8. For computer access or login purposes, members of the University community will also be assigned a Directory ID. The Directory ID will be used as a standard identifier for all computer resource authentication purposes but individuals may also be allowed to authenticate by using their U ID Number.
9. Campus validation of University of Maryland photo ID cards will be by reference to either the holder's U ID Number or bar code.

Timeframe for Implementation

The University of Maryland recognizes that some of its major systems are currently keyed for access to SSN as an identifier and that the conversion of all systems will take time and resources. The expectation is that there will be a steady and purposeful movement away from dependency on SSN. Appropriate interim measures may be developed until such time as the conversion to U ID Numbers is complete.

"Legacy" Data

The University recognizes that the SSN must be retained and used as a person identifier in older "legacy" data pertaining to ex-students and ex-employees as it is impractical to assign U ID numbers to these individuals.

Protection of ID Data Held in Secondary or Derivative Data Files

Any University office that collects and maintains an individual's social security number in any media must:

1. Ensure that the number is stored in a secure and confidential environment;
2. eliminate using the number for any purpose except those specifically addressed in this policy;
3. begin a steady and purposeful movement away from its dependency on the SSN in performing its functions and processes; and

4. follow University guidelines for the retention and destruction of records containing the SSN.

Notification Requirement
Any University office that collects SSN from an individual must provide a disclosure statement approved by the Data Policy Advisory Committee. Notifications for students, employees, and affiliates/guests are provided in Appendix B.

Appendix A
Uses for Social Security Numbers (SSN) (Subject to change)

Employment
The SSN is required for a variety of employment matters; such as tax withholding, FICA, Medicare, etc. SSN may also be used and maintained if it is supplied by an employee as documentation when completing the Federal I-9 Employment Authorization Form.

Application and Receipt of Financial Aid
Any student who applies for student aid by use of the federal Free Application For Student Assistance (FAFSA) is required to provide his SSN. Students are also required to provide SSNs when applying for student education loans.

Tuition Remission
The SSN is required for state reporting of taxable tuition remission benefits received by employees, their spouses and dependents, and by graduate assistants.

Veterans Administration Benefits
The SSN is required for enrollment verification and reporting on all Veterans Administration beneficiaries.

IRS Reporting
The SSN is used for producing federally required 1098-T forms, which report the amount of tuition paid to the University during the tax year. Copies of these forms are mailed to students each year, and the information reported to the IRS. In addition, the University reports the value of all taxable and non-taxable scholarships and grants awarded to non-resident aliens to the IRS.

Inter-Institutional Communication and Information Exchange
Many institutions, including postsecondary educational institutions, use the SSN as a student identifier. To ensure the accuracy of inter-institutional data exchanges (transcripts, transfer credit evaluations, USM ArtSys data base, MHEC, etc.) the SSN may be used for the exchange of information from student academic records between appropriate institutions including other colleges and universities.

Tracking Name Changes of Students and Alumni
The SSN is also used internally to track name changes of students and alumni of the University.

Appendix B Required Disclosure Statements
Student Notification
"Use of Social Security Number (SSN) - Students

Section 15-110 of the Education Article of the Annotated Code of Maryland prohibits the use of SSN on University identification cards. Section 7(b) of the Privacy Act of 1974 (5 U.S.C. 522a) and section 10-624 of the State Government Article of the Annotated Code of Maryland, also require that when any Federal, State, or local government agency requests an individual to disclose his or her Social Security Number (SSN), that individual must also be advised whether the disclosure is mandatory or voluntary, by what statutory or other authority the number is solicited, what use will be made of it, the specific consequences for failure to provide the information, whether the information is generally available for public inspection and whether the information is made available or transferred to or shared with any entity other than the University.

Accordingly, each applicant for admission is advised that disclosure of his or her SSN is required as a condition for making application to the University of Maryland for purposes of administering federal financial aid programs and complying with various State and Federal reporting requirements including reporting to the IRS. The University may use a student's SSN to accurately report federally required data, to generate various federal tax and financial aid reports, and to ensure the accuracy of student data that is exchanged within the University of Maryland, between post-secondary education institutions, with the University System of Maryland and other outside entities as necessary or required for the conduct of legitimate University business and consistent with applicable law. The SSN will be maintained in a secure and confidential manner and not be re-disclosed for any other purpose.

The authority for requesting disclosure of a student's SSN is grounded in various federal laws including but not limited to: 42 USC 405c, affecting wage reporting and withholdings; 34 CFR 668.14 and 34 CFR 668.16, relating to student aid programs; and 26 CFR 1.6050S-1, addressing Internal Revenue Code reporting requirements pertaining to tuition payments.

In addition, it should be noted that the SSN of a parent, guardian or spouse of an applicant is also requested if the student claims dependency on that person for financial aid or residency for tuition purposes. A parent, guardian or spouse is advised that disclosure of his or her SSN is necessary for the above student purpose and failure to provide it may affect the student's financial aid or tuition status. A parent's, guardian's or spouse's SSN will only be used for the purpose for which it was collected and will not be maintained in any other system of records.

A unique U ID Number is assigned to students as part of their initial application to the University and is used for all University identification purposes."

Employee Notification
"Use of Social Security Number (SSN) – Employees

Section 7(b) of the Privacy Act of 1974 (5 U.S.C. 522a) and section 10-624 of the State Government Article of the Annotated Code of Maryland, requires that when any Federal, State, or local government agency requests an individual to disclose his or her social security number, that individual must also be advised whether the disclosure is mandatory or voluntary, by what statutory or other authority the number is solicited, what use will be made of it, the specific consequences for failure to provide the information, whether the information is generally available for public inspection and whether the information is made available or transferred to or shared with any entity other than the University.

Accordingly, each employee is advised that disclosure of his or her SSN is required as a condition of employment at the University of Maryland in complying with State and Federal employment matters including but not limited to, the withholding and reporting of State and Federal income tax, FICA, and Medicare insurance tax. Additionally, the SSN may be used and maintained, when supplied by an employee, as documentation for completing the Federal I-9 Employment Authorization Form. The employee's SSN will be used to accurately record state and federal

required data as necessary or required for the conduct of legitimate University business and consistent with applicable law. This number will be maintained in a secure and confidential manner and not be re-disclosed for any other purpose.

The authority for requesting disclosure of an employee's SSN is grounded in various federal laws including but not limited to, 42 U.S.C. 405c, affecting wage reporting and withholdings.

Efforts to limit the use of SSN include the issuance of a unique U ID Number that is assigned to all employees as part of their initial employment and will be used for all University identification purposes."

Affiliates Notification

"Use of Social Security Number (SSN) – Affiliates/Guests who receive University services and are not students, employees, or non-paid appointees.

Section 7(b) of the Privacy Act of 1974 (5 U.S.C. 522a) and section 10-624 of the State Government Article of the Annotated Code of Maryland, requires that when any Federal, State, or local government agency requests an individual to disclose his or her social security number, that individual must also be advised whether the disclosure is mandatory or voluntary, by what statutory or other authority the number is solicited, what use will be made of it, the specific consequences for failure to provide the information, whether the information is generally available for public inspection and whether the information is made available or transferred to or shared with any entity other than the University.

Accordingly, each affiliate/guest is advised that disclosure of his or her SSN is requested as a condition of applying for services from the University of Maryland for the purpose of administering those services. The University may use an affiliate or guest's SSN to accurately identify affiliates/guests, to coordinate services administered by different departments, and to ensure accuracy of data as necessary for the conduct of legitimate University Business and consistent with applicable law. The SSN will be maintained in a secure and confidential manner and not be re-disclosed for any other purpose.

A unique U ID Number is assigned to affiliates/guests as part of their initial request to receive University services and is used for all University identification purposes."

Appendix P: University of Maryland Immunization Policy V-1.00(H)

The policy below is current as of this publication. For more information and possible updates go to: http://president.umd.edu/administration/policies/section-v-student-affairs/v-100h (http://president.umd.edu/administration/policies/section-v-student-affairs/v-100h/)

(Approved by the President August 1, 1991; revised June 1, 2000; amended February 4, 2014)

Policy

The University enforces a mandatory pre-matriculation immunization requirement to reduce the incidence and risk of vaccine-preventable disease in the university community. This policy meets the regulatory requirements of the State of Maryland Department of Health and Mental Hygiene. It is also consistent with the recommendations for pre-matriculation immunizations of the Advisory Committee on Immunization Practices (ACIP) of the U.S. Center for Disease Control and Prevention, and the American College Health Association.

Applicability

This policy applies to all undergraduate and graduate degree and non-degree seeking students, regardless of credit hours, taking courses on campus at the University's main campus or any of its satellite locations. Students taking courses online, overseas, or at their place of employment if employment is off-campus, are exempt from this policy.

Immunization Requirements

1. All students to whom this policy applies shall be required to provide proof of 2 MMR immunizations or 2 measles, 1 mumps, 1 rubella and tetanus/diphtheria/pertussis (Td/Tdap) within the past 10 years. These immunization requirements do not apply to students born before 1957. Students living in on-campus residence halls must also provide proof of meningococcal vaccine within 5 years of matriculation, or sign the waiver on the University's immunization form.
2. An immunization form must be completed and returned to the Health Center prior to the first day of classes.
3. Students in noncompliance with this requirement shall be unable to drop/add classes or register for their second semester. This restriction shall be lifted by the University Health Center upon receipt of the required information or the granting of an approved waiver as described in Section 4.
4. Exemptions:
    a. A student who objects to immunization upon the grounds that it conflicts with his or her bonafide

religious beliefs and practices may not be required to present a physician's certificate of immunization in order to register for classes. A religious exemption may be obtained by submitting the request to the Director of the Health Center. In case of an epidemic or disease outbreak, declared by the State of Maryland Secretary of Health and Mental Hygiene or his/her designee, the student must be immunized or not attend classes or functions on campus until the outbreak has resolved.

b. A student may be exempted from an individual vaccine-specific immunization requirement if he or she presents a written statement from a licensed physician or a local deputy state health officer indicating that immunization is medically contraindicated. The physician's statement shall state whether the contraindication is permanent or temporary. If temporary, the physician must provide a date by which the student will receive the vaccine and provide documentation when the immunization has been completed. Should there be an epidemic or disease outbreak that is pertinent to the student's immunization status, the student cannot attend classes or functions on campus until the outbreak has resolved.

AASP - African American Studies

AASP100 Introduction to African American Studies (3 Credits)
Significant aspects of the history of African Americans with particular emphasis on the evolution and development of black communities from slavery to the present. Interdisciplinary introduction to social, political, legal and economic roots of contemporary problems faced by blacks in the United States with applications to the lives of other racial and ethnic minorities in the Americas and in other societies.

AASP101 Public Policy and the Black Community (3 Credits)
The impact of public policies on the black community and the role of the policy process in affecting the social, economic and political well-being of minorities. Particular attention given to the post-1960 to present era.
Formerly: AASP300.

AASP187 The New Jim Crow: African-Americans, Mass Incarceration and the Prison Industrial Complex (3 Credits)
Students will examine the birth of the racial caste system following the abolition of slavery, the parallels between the racial hierarchy of the Jim Crow system and contemporary mass incarceration, and the rise of the prison industrial complex as a multi-billon business which thrives on the oppression of low-income populations and poor communities of color.
Recommended: AASP100.

AASP200 African Civilization (3 Credits)
A survey of African civilizations from 4500 B.C. to present. Analysis of traditional social systems. Discussion of the impact of European colonization on these civilizations. Analysis of the influence of traditional African social systems on modern African institutions as well as discussion of contemporary processes of Africanization.

AASP202 Black Culture in the United States (3 Credits)
The course examines important aspects of African American life and thought which are reflected in African American literature, drama, music and art. Beginning with the cultural heritage of slavery, the course surveys the changing modes of black creative expression from the 19th-century to the present.

AASP210 Intro to Research Design and Analysis in African American Studies (3 Credits)
Introduces students to quantitative and qualitative research methods used in social science with a focus on Black populations and African American Studies Research. Uses practical exercises, such as class surveys and mock focus groups, to examine fundamental concepts of the research process from conceptualization of research questions to interpretation of data and research articles. The course is designed for undergraduate students with little or no background knowledge in social science research methods.

AASP211 Get Out: The Sunken Place of Race Relations in the Post-Racial Era (3 Credits)
Prevailing thought suggests that we live in an era that is post-racial, particularly after the election of Barack Obama. Media often serves to drive our assessment of where our nation stands on issues like race, gender and sexuality. This course uses the film Get Out to delve into the production, evolution and significance of race in present day America. The course will engage multiple forms of media to investigate life in 'Post-Racial' America, including but not limited to the role of stereotypes, interracial relationships, police-community relations, etc.
Credit Only Granted for: AASP298G or AASP211.
Formerly: AASP298G.

AASP230 Social (In)Justice and African-American Health and Well-Being (3 Credits)
African Americans suffer worse outcomes than non-Hispanic whites on nearly every health measure and outcomes that link to overall well-being like depressive symptoms or homicides. Health disparities are experienced by other underrepresented minority groups, but because of the unique historic and current experiences of African Americans, the determinants and solutions to African American health disparities are unique. The premise of this course is that African American health disparities are due to social injustices perpetuated on the institutional level that have permeated the lived experiences of African Americans leading to racial disparities in health and well-being. As such, the solutions on the both policy, and community, level must have a social justice approach.

AASP258 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AASP260 Africa in World Politics (3 Credits)
Introduction to the politics of Africa, especially Sub-Saharan Africa, on the world stage from the colonial period era to recent push towards democracy in Africa and the rise of religious extremism. It also engages such themes as culture, religion and progress, dictatorship, former colonial powers and international influence, etc.

AASP264 Quare/Queer Contentions: Exploration of Sexualities in the Black Community (3 Credits)
Centering the subjectivities of queer people of color generally and more specifically, Black people (as the word 'quare' invites us to do), Quare/Queer Contentions takes up key moments within the history of the Black community and asks us to consider the work and presence of LGBTQ people in these moments. The course also contends with the everyday experiences of LGBTQ subjects in the Black community. Quare/Queer Contentions, therefore, interrogates the material realities of Black queer people in the context of family, religion, cultural/creative work, among others. Interdisciplinary in orientation, the course will employ primary and secondary texts, film, art, autobiographical narratives and policy data.Cross-listed with: LGBT264, WMST264.
Credit Only Granted for: LGBT264, AASP264, or WMST264..

AASP274 Creative Writing Through The Eyes of African Americans: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing fiction, drama and poetry, with an emphasis on African American literary models. Critical reading, exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.
Restriction: Must not have completed ENGL271, ENGL274, ENGL294,or AASP274. Cross-listed with ENGL274.
Credit Only Granted for: ENGL274 or AASP274.

AASP297 Research Methods in African American Studies (3 Credits)
Introduces African American Studies majors to the basic research skills, methodologies, sources, and repositories for studying African Diaspora. Students will be required to select a research topic, write a research proposal, develop an annotated bibliography, and in the process will be prepared for completing their senior thesis or other significant writing projects necessary to fulfill the requirements of the major.
Prerequisite: AASP101 or AASP202.
Restriction: Must be in African American Studies program.
Credit Only Granted for: AASP297 or AASP299R.
Formerly: AASP299R.

AASP298 Special Topics in African American Studies (3 Credits)
An introductory multi-disciplinary and inter-disciplinary educational experience to explore issues relevant to black life, cultural experiences, and political, economic, and artistic development.
Repeatable to: 6 credits if content differs.

AASP298B Constructions of Manhood and Womanhood in the Black Community (3 Credits)
Investigates the ways that African Americans are represented and constructed in public and private spheres and explores the social constructions and representations of Black manhood and womanhood from various disciplinary perspectives.Cross-listed with: WMST265.

AASP298C African Civilization to 1800 (3 Credits)
Survey of the principal developments in the history and culture of the peoples of African descent in colonial North America and the United States to 1865. Examines the African past, the Atlantic slave trade, variation in slavery, the growth of free black communities, the transformations of families and cultural forms, and patterns of resistance.Cross-listed with: HIST254.
Credit Only Granted for: HIST254 or AASP298C.

AASP298L African-American Literature and Culture (3 Credits)
An exploration of the stories black authors tell about themselves, their communities, and the nation as informed by time and place, gender, sexuality, and class. African American perspective themes such as art, childhood, sexuality, marriage, alienation and mortality, as well as representations of slavery, Reconstruction, racial violence and the Nadir, legalized racism and segregation, black patriotism and black ex-patriots, the optimism of integration, and the prospects of a post-racial America.Cross-listed with: ENGL234.
Credit Only Granted for: ENGL234 or AASP298L.

AASP299 Selected Topics in African American Studies (1-3 Credits)
An introductory multi-disciplinary academic exploration of the cultural, political, and economic issues relevant to Africans and African-Americans.
Repeatable to: 6 credits if content differs.

AASP301 Applied Policy Analysis and the Black Community (3 Credits)
Development and application of the tools needed for examining the effectiveness of alternative policy options confronting minority communities. Review policy research methods used in forming and evaluating policies. Examination of the policy process.
Prerequisite: AASP101; and (ECON201 or ECON200).
Recommended: Completion of one semester of statistics is recommended.

AASP303 Computer Applications in African American Studies (3 Credits)
Introduction to statistics and database processing software used in model estimation and simulation in policy analysis. Special emphasis on applications for applied research on policy problems confronting minority communities.
Prerequisite: STAT100, MATH107, MATH111, or SOCY201; or students who have taken courses with comparable content may contact the department.

AASP305 Theoretical, Methodological and Policy Research Issues in African American Studies (3 Credits)
Theories and concepts in the social and behavioral sciences relating to problems in minority communities. Issues include validity and soundness of theoretical arguments, epistemological questions of various methodologies and the relationship between policy making and policy research.
Prerequisite: AASP301; and (STAT100, MATH111, PSYC200, BMGT230, or SOCY201). Or students who have taken courses with comparable content may contact the department.
Formerly: AASP401.

AASP310 African Slave Trade (3 Credits)
The relationship of the slave trade of Africans to the development of British capitalism and its industrial revolution; and to the economic and social development of the Americas.
Prerequisite: AASP202 or AASP100; or permission of BSOS-African American Studies department.
Formerly: AASP311.

AASP313 Black Women in United States History (3 Credits)
Black American women's history from slavery to the present. Focused on gaining a fuller understanding of the effect of race, class and gender on the life cycles and multiple roles of Black women as mothers, daughters, wives, workers and social-change agents.
Restriction: Sophomore standing or higher. Cross-listed with WMST314.
Credit Only Granted for: AASP313 or WMST314.

AASP314 The Civil Rights Movement (3 Credits)
Survey of the twentieth century civil rights movement from the desegregation of UM Law School through the National Black Political Congress in Gary in 1972. Major themes include leadership, legal and constitutional challenges, non-violence, Black Power, and Pan-Africanism.
Prerequisite: AASP100 or HIST157.

AASP358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AASP360 Issues in African Development (3 Credits)
An introduction to the study of development on the African continent. Students will have an opportunity to think critically about the ways in which Africa is portrayed in the academic literature, popular press, and media. Issues of focus include population dynamics, gender, health, migration, HIV/AIDS, and globalization with particular attention paid to the role of culture.
Credit Only Granted for: AASP398D, GEOG398A, GVPT359F, SOCY398Y, or AASP360.
Formerly: AASP398D.

AASP386 Experiential Learning (3-6 Credits)
Restriction: Permission of BSOS-African American Studies department; and junior standing or higher.

AASP395 Fundamentals of Quantitative Research in Socio-Cultural Perspective (3 Credits)
Introduction to quantitative methods for African American Studies majors in the cultural and social analysis concentration. Basics of survey design and experimental design and data analysis and use of statistical software programs.
Restriction: Must be in African American Studies program; and junior standing or higher.

AASP396 Independent Study Non-Thesis Option (3 Credits)
A research seminar that allows African American Studies majors to complete an independent study research project in lieu of completing the AASP397: Senior Thesis. Students will examine various concepts of race, gender, labor and ethnicity in the seminar lecture component to be applied toward their specific research projects.
Prerequisite: AASP386 and AASP297.
Restriction: Must be in African American Studies program.
Credit Only Granted for: AASP396 or AASP397.

AASP397 Senior Thesis (3 Credits)
Directed research in African American Studies resulting in the completion and defense of a senior thesis.
Restriction: Permission of BSOS-African American Studies department.

AASP398 Selected Topics in the African Diaspora (3 Credits)
Analysis of the historical experiences and cultures of Africans in the diaspora.
Repeatable to: 6 credits if content differs.

AASP400 Directed Readings in African American Studies (3 Credits)
The readings will be directed by the faculty of African American Studies. Topics to be covered will be chosen to meet the needs and interests of individual students.
Prerequisite: AASP202 or AASP100.

AASP401 Research Directions in African-American Studies (3 Credits)
Utilizing a pro seminar format, this course offers an overview of recent research on the experiences of African Americans and the African diaspora. The course will cover selective topics from research portfolios of department faculty related to the status of African Americans and the diaspora across a number of topics. Students will read recent original research studies and discuss with the authors both the theoretical underpinnings of the research, the methods and evaluate the interpretations. This course fulfills the capstone requirement for African American studies majors and certificate students by providing an opportunity to consolidate and integrate a range of ideas encountered in the curriculum.
Restriction: Must have earned a minimum of 90 credits; and must be major in African-American Studies.

AASP402 Classic Readings in African American Studies (3 Credits)
Classic readings of the social, economic and political status of blacks and other minorities in the United States and the Americas.
Prerequisite: AASP202 or AASP100.

AASP411 Black Resistance Movements (3 Credits)
A comparative study of the black resistance movements in Africa and America; analysis of their interrelationships as well as their impact on contemporary pan-Africanism.
Prerequisite: AASP100.

AASP441 Science, Technology, and the Black Community (3 Credits)
Scientific knowledge and skills in solving technological and social problems, particularly those faced by the black community. Examines the evolution and development of African and African American contributions to science. Surveys the impact of technological changes on minority communities.
Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP443 Blacks and the Law (3 Credits)
The relationship between black Americans and the law, particularly criminal law, criminal institutions and the criminal justice system. Examines historical changes in the legal status of blacks and changes in the causes of racial disparities in criminal involvement and punishments.
Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP468 Special Topics in Africa and the Americas (3 Credits)
Cultural, historical and artistic dimensions of the African experience in Africa and the Americas.
Repeatable to: 6 credits if content differs.

AASP478 Humanities Topics in African American Studies (3 Credits)
Advanced studies in the humanities, often requiring prerequisites, focusing on the literary, artistic and philosophical contributions of Africans and African Americans.
Repeatable to: 6 credits if content differs.

AASP493 Feminist and Nationalist Thought in Black Communities (3 Credits)
The historical and theoretical foundations of feminist and nationalist thought in Black Communities will be examined. Further, we will discover why feminist and nationalist thought has been routinely ignored or misrepresented as disparate, if not oppositional, themes in Black intellectual and political life.
Prerequisite: AASP101 or AASP100.
Credit Only Granted for: AASP493 or AASP499W.
Formerly: AASP499W.

AASP498 Special Topics in Black Culture (3 Credits)
Advanced study of the cultural and historical antecedents of contemporary African and African American society. Emphasis on the social, political, economic and behavioral factors affecting blacks and their communities. Topics vary.
Prerequisite: AASP202 or AASP100.
Repeatable to: 6 credits if content differs.

AASP499 Advanced Topics in Public Policy and the Black Community (3 Credits)
Examination of specific areas of policy development and evaluation in black and other communities. Application of advanced tools of policy analysis, especially quantitative, statistical and micro-economic analysis.
Prerequisite: AASP301; or permission of BSOS-African American Studies department.
Repeatable to: 6 credits if content differs.

AAST - Asian American Studies

AAST200 Introduction to Asian American Studies (3 Credits)
The aggregate experience of Asian Pacific Americans, from developments in the countries of origin to their contemporary issues. The histories of Asian Pacific American groups as well as culture, politics, the media, and stereotypes, viewed from an interdisciplinary perspective.Cross-listed with: AMST298C.
Credit Only Granted for: AAST200 or AMST298C.

AAST201 Asian American History (3 Credits)
Introduction to the history of Asian Americans and Asians in the United States and the Americas and to the field of Asian American Studies, from an interdisciplinary perspective. Topics include theories of race and ethnicity; Asian migration and diaspora to the Americas; Asian American work and labor issues; gender, family, and communities; nationalism and nativism, and anti-Asian movements; Asian Americans in World War II, the Cold War, and the issues in the civil rights & post-civil rights era.Cross-listed with HIST221.
Credit Only Granted for: AAST201 or HIST221.

AAST222 Immigration and Ethnicity in America (3 Credits)
The history of immigration and the development of diverse populations in the United States are examined. Topics include related political controversies, the social experiences of immigrants, ethnicity, generations, migration, inter-group relations, race and diversity in American culture.
Credit Only Granted for: AAST222 or HIST222.

AAST233 Introduction to Asian American Literature (3 Credits)
A survey of Asian American literature with an emphasis on recurrent themes and historical context.Cross-listed with ENGL233.
Credit Only Granted for: ENGL233 or AAST233.

AAST298 Special Topics in Asian American Studies (3 Credits)
An introductory multidisciplinary and interdisciplinary educational experience to explore issues relevant to Asian American life, cultural experiences; and political, economic, and artistic development.
Repeatable to: 6 credits if content differs.

AAST378 Experiential Learning (3 Credits)
Field experience/internship in professional organizations and appropriate private and governmental agencies serving the Asian American community.
Restriction: Permission of UGST-Undergraduate Studies.
Repeatable to: 6 credits.

AAST388 Independent Research (1-3 Credits)
Directed, independent study in Asian American Studies resulting in the completion of an original research paper.
Restriction: Permission of UGST-Undergraduate Studies.
Repeatable to: 6 credits if content differs.

AAST394 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)
An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.Cross-listed with: AMST324, IMMR394.
Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.
Formerly: AAST398E.

AAST398 Selected Topics in Asian American Studies (3 Credits)
Study of a specific theme or issue involving the Asian America experience.
Repeatable to: 6 credits if content differs.

AAST420 Asian American Women: The Social Construction of Gender (3 Credits)
Examines the intersection of gender, race and class as it relates to Asian American women in the United States; how institutionalized cultural and social statuses of gender, race, ethnicity and social class produce and reproduce inequality with implications for Asian Americans and the broader society.
Restriction: Must not have completed WMST420. Cross-listed with WMST420 .
Credit Only Granted for: AAST420 or WMST420.

AAST443 Asian American Politics (3 Credits)
Students will gain a greater understanding of 1)the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3)how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.Cross-listed with: AMST498J.
Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.
Formerly: AAST498T.

AAST498 Advanced Topics in Asian American Studies (3 Credits)
Advanced study of the cultural and historical antecedents of contemporary Asian American society. Emphasis on the social, political, economic, and behavioral factors affecting Asian Americans and their communities.
Repeatable to: 6 credits if content differs.

AAST499 Senior Thesis (3 Credits)
Under the supervision of faculty, research regarding a specific topic of the Asian American experience will be completed.
Prerequisite: AAST201 and AAST200.
Restriction: Permission of UGST-Undergraduate Studies; and must be in Asian American Studies program.
Repeatable to: 6 credits if content differs.

AGNR - Agriculture and Natural Resources

AGNR100 Agriculture Discovery: An Educational Odyssey Exploring Food, Culture, and the Environment (3 Credits)
Explores the history, cultural impact, and current issues of agriculture. Students are exposed to the wide range of professional opportunities associated with the use of plants and animals in the production and processing of food for human consumption. Students learn from Agriculture and Natural Resources (AGNR) faculty and USDA collaborators through lectures, labs and field trips to facilities in the Baltimore-Washington area.

AGNR200 AGNR 2+2 Program Extended Orientation Seminar (1 Credit)
Introduces AGNR 2+2 students to University and 'American' life. Assists with their successful transition to the College and Agriculture and Natural Resources and the University of Maryland. Helps students to understand their place in AGNR at to learn about the resources available to them.
Prerequisite: Must be a first semester international student enrolled in the AGNR 2+2 Program.
Restriction: Must be a first year international student enrolled in the College of Agriculture and Natural Resources 2+2 Program.
Additional Information: It is strongly recommended that AGNR 2+2 students take AGNR 200 during the first semester at the University. One class meeting per week. This courses is initiated by International Programs and will be coordinated in conjunction with the College of AGNR.

AGNR270 Technology Training Seminar (2-3 Credits)
A hands-on training seminar about pedagogical applications of information technology and mastery of several technical skills. Special emphasis is placed on gainfully understanding technological issues such as copyright and intellectual property, accessibility, and usability.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-College of Agriculture & Natural Resources.
Credit Only Granted for: AGNR270 or BSCI279.

AGNR301 Sustainability (3 Credits)
Designed for students whose academic majors would be enhanced by the complementary study of a widely shared but hard-to-operationalize aspiration: that present choices should preserve or improve future options rather than foreclose or degrade them. How should we understand sustainability? How might we achieve it? How would we know if we had achieved it? And how could sustainability activists of a rising generation lead by example?Cross-listed with PLCY301.
Credit Only Granted for: AGNR301, PLCY301 or PUAF301.

AGNR386 Experiential Learning (3-6 Credits)
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.
Formerly: AGRI386.

AGNR388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Must be admitted to AGNR Honors program.
Repeatable to: 6 credits if content differs.
Formerly: AGRI388.

AGNR489 Field Experience (1-4 Credits)
Credit according to time scheduled and organization of the course. A lecture series organized to study in depth a selected phase of agriculture not normally associated with one of the existing programs.
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.
Repeatable to: 4 credits if content differs.
Formerly: AGRI489.

AGNR499 Special Problems (1-3 Credits)
Formerly: AGRI499.

AGST - Agricultural Science and Technology

AGST130 Did Yeast Create Civilization? (3 Credits)
Fermented foods have played a major role in the transition from nomadic to settled agrarian societies, the establishment of social and religious customs, the expansion of empires, and modern economies. To what extent are our past and current attitudes towards fermented foods rooted in historical and cultural imprints? Explore the central role of fermentation in human history and culture, the basic microbiological processes underlying fermentation processes, and the processes used to produce and distribute fermented foods. Find out how the fruits, grains, and dairy products used to produce fermented foods are grown and selected. Students will learn about the development and modern use of fermented dairy products, pickles, bread, tea, chocolate, wine, beer, distilled liquors, and pharmaceutical/manufactured products.
Recommended: CHEM103, CHEM131, CHEM135, or CHEM146. Cross-listed with: PLSC130.
Credit Only Granted for: AGST130 or PLSC130.

AMSC - Applied Mathematics & Scientific Computation

AMSC420 Mathematical Modeling (3 Credits)
The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and minimum grade of C- in STAT400. And 1 course with a minimum grade of C- from (CMSC106, CMSC131); or students who have taken courses with comparable content may contact the department. Cross-listed with MATH420.
Credit Only Granted for: AMSC420 or MATH420.

AMSC460 Computational Methods (3 Credits)
Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246. Also offered as: CMSC460.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

AMSC466 Introduction to Numerical Analysis I (3 Credits)
Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410. Also offered as: CMSC466.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

AMSC498 Selected Topics in Applied Mathematics (1-3 Credits)
Topics in applied mathematics of special interest to advanced undergraduate students.
Repeatable to: 6 credits if content differs.

AMST - American Studies

AMST101 Introduction American Studies (3 Credits)
Introduces students to the interdisciplinary field of American Studies by examining concepts such as culture, identity, cultural practices, and globalization, as well as theories underlying these concepts. Engages key themes, especially constructions of difference and identity, cultures of everyday life, and America and the world.
Credit Only Granted for: AMST101 or AMST201.
Formerly: AMST201.

AMST120 Race, Gender, and the Global Economy (3 Credits)
An exploration of the building blocks of the global economy (e.g. free trade, financial institutions) in relation to racial and gender difference, hierarchies, and ideologies.

AMST202 Cultures of Everyday Life in America (3 Credits)
Examine the structures and patterns of everyday life in the U.S., utilizing methods such as ethnography, oral history, survey research, and textual, visual, and material cultural analysis.

AMST203 Popular Culture in America (3 Credits)
An introduction to American popular culture, its historical development, and its role as a reflection of and influence on our culture and society.

AMST204 Film and American Culture Studies (3 Credits)
Exploration of the American film from a historical perspective, illustrating the motion picture's role as an institutional phenomenon, as a form of communication, and as a source of cross-cultural study.

AMST205 Material Aspects of American Life (3 Credits)
Historical survey of American material culture. Ways of describing and interpreting accumulated material evidence (e.g., buildings, town plans) introduced by stressing relationship between artifact and culture.

AMST207 Contemporary American Cultures (3 Credits)
World views, values, and social systems of contemporary American cultures explored through readings on selected groups such as middle-class suburbanites, old order Amish, and urban tramps.

AMST212 Diversity in American Culture (3 Credits)
Exploration of the role of diversity in the shaping of American culture. Special emphasis will be placed on the multicultural origins of American popular and material culture, such as foodways and entertainment, and on the experience of 'Americanization.'

AMST213 Heroes and Villains in American Film (3 Credits)
We will examine the complex, changing, and ever-present representations of heroes and villains in American film. Beginning with a foundational understanding of how heroes and, conversely, villains have been defined through classic Hollywood film, we will explore how these definitions have shifted throughout the 20th and 21st century in various narrative genres, including westerns, war films, film noir, fantasy, science fiction, and, of course, superhero movies. In particular, we will be focusing on how the hero and villain maintain or disrupt specific cultural ideologies concerning race/ethnicity, gender, sexuality, and ability. This course will examine how these various ideologies have evolved throughout the 20th and 21st century, impacting the ways in which heroes and villains are both represented in American film and perceived by diverse audiences. Finally, we will examine our own complicated and sometimes troubling identification with these heroes, even when they might stand in stark contrast to our cultural values and identities.Cross-listed with: FILM298V.
Credit Only Granted for: AMST213, HONR219F or FILM298V.
Formerly: HONR219F.

AMST260 American Culture in the Information Age (3 Credits)
Examines the ways in which content and form of public information interact with the culture, families & individuals.
Credit Only Granted for: AMST260 or AMST298I.
Formerly: AMST298I.

AMST262 Houses, Schools, and Prisons in American Life (3 Credits)
This interdisciplinary course explores the role of property, discipline, and punishment in American life. By exploring the ideological underpinnings in property, discipline, and punishment and their manifestations in houses, schools, and prisons we will explore how these entities reflect American society and its values.

AMST269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AMST298 Selected Topics in American Studies (3 Credits)
Cultural study of a specific theme or issue involving artifacts and documents from both past and contemporary American experience.
Repeatable to: 6 credits if content differs.

AMST298Q U.S. Latinx Literature and Culture (3 Credits)
Examines the poetry, prose, and theater of Latinx communities in the United States from their origins in the Spanish colonization of North America to their ongoing development in the 21st century. Considers how authors use literary form to gain insight into human experience, including mortality, religious belief, gender and sexuality, war and peace, family, language use, scientific inquiry, cultural tradition, ecology, and labor. Also studies how Latinx literary traditions have shaped and been shaped by broader currents in American literature, as well as what connections exist between Latinx literature and social and artistic developments in other parts of the world, particularly Latin America and the Caribbean. Authors may include Alvar Nunez Cabeza de Vaca, Eulalia Perez, Juan Nepomuceno Seguin, Maria Amparo Ruiz de Burton, Jose Marti, Arthur A. Schomburg, Jesus Colon, Julia de Burgos, Cesar Chavez, Ariel Dorfman, Gloria Anzaldua, Junot Diaz, and Cristina Garcia.Cross-listed with: ENGL235.
Credit Only Granted for: ENGL235 or AMST298Q.

AMST324 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)
An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.Cross-listed with: AAST394, IMMR394.
Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.
Formerly: AAST398E.

AMST328 Perspectives on Identity and Culture (3 Credits)
Analysis of the cultural aspect of identity formation and the role of individual or community identities in cultural production. Examination of cultural texts such as film, literature, fashion, artifacts, archival records, architecture, monuments, sports, and paintings.
Repeatable to: 9 credits if content differs.

AMST328V Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)
An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.Cross-listed with: AMST324, IMMR394.
Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.
Formerly: AAST398E.

AMST340 Introduction to History, Theories and Methods in American Studies (3 Credits)
Introduction to the process of interdisciplinary research, including research literatures, questions, first-hand sources and library and analytic methods in American Studies. Each student will craft a prospectus for original research.
Prerequisite: Must have completed AMST201; and 2 courses in AMST.
Restriction: Must be in American Studies program; and sophomore standing or higher.

AMST369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

AMST386 Experiential Learning (3-6 Credits)
Restriction: Permission of ARHU-American Studies department; and junior standing or higher.

AMST388 Honors Thesis (3-6 Credits)
Individual research, thesis and oral defense. The research project will be conducted under the supervision of a faculty member.
Restriction: Must be admitted to AMST honors program; and permission of ARHU-American Studies department; and senior standing.
Repeatable to: 6 credits if content differs.

AMST398 Independent Studies (1-3 Credits)
Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.
Restriction: Permission of ARHU-American Studies department.
Repeatable to: 6 credits if content differs.

AMST418 Cultural Themes in America (3 Credits)
Examination of structure and development of American culture through themes such as 'growing up American,' 'culture and mental disorders,' 'race,' 'ethnicity,' 'regionalism,' 'landscape,' and 'humor.'
Repeatable to: 6 credits if content differs.

AMST428 American Cultural Eras (3 Credits)
Investigation of a decade, period, or generation as a case study in significant social change within an American context. Case studies include 'Antebellum America, 1840-1860' and 'American culture in the Great Depression.'
Repeatable to: 6 credits if content differs.

AMST429 Perspectives on Popular Culture (3 Credits)
Topics in popular culture studies, including the examination of particular genres, themes, and issues.
Repeatable to: 6 credits if content differs.

AMST450 Seminar in American Studies (3 Credits)
Developments in theories and methods of American Studies scholarship, with emphasis upon interaction between the humanities and the social sciences in the process of cultural analysis and evaluation.
Prerequisite: AMST201 and AMST340; and 1 course in AMST.
Restriction: Senior standing; and must be in American Studies program.

AMST498 Special Topics in American Studies (3 Credits)
Topics of special interest.
Repeatable to: 9 credits if content differs.

AMST498J Asian American Politics (3 Credits)
Students will gain a greater understanding of 1)the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3)how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.Cross-listed with: AAST443.
Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.
Formerly: AAST498T.

AMST499 Independent Studies (1-3 Credits)
Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.
Restriction: Permission of ARHU-American Studies department; and must be in American Studies program.
Repeatable to: 6 credits if content differs.

ANSC - Animal Science

ANSC101 Principles of Animal Science (3 Credits)
A comprehensive overview of the application of biology in the care and use of animals that live in close association with humans including food animals, companion animals, lab animals, zoo animals, etc. The role of science in modern food production using animals will be emphasized.

ANSC103 Principles of Animal Science Laboratory (1 Credit)
Laboratory focusing on the application of biology in the care and use of animals that live in close association with humans including food animals, companion animals, lab animals, zoo animals, etc. Labs will include live animals. Offered in fall semester only.
Prerequisite: Must have completed or be concurrently enrolled in ANSC101.
Restriction: Must be in one of the following programs (Environmental Sci & Pol-Environment & Agriculture; Agricultural and Veterinary Medicine; Agricultural Science and Technology) ; or must be in a major within the AGNR-Animal & Avian Sciences department; or permission of department required for students in other College of AGNR programs.

ANSC115 Careers in the Animal Sciences (1 Credit)
Discussion of current employment opportunities in Animal Science, primarily by invited speakers. In addition, students will have the opportunity to prepare resumes and improve oral presentation skills while working with their peers.
Prerequisite: ANSC101 and ANSC103.

ANSC120 Introduction to Dairy Judging (2 Credits)
Students will establish an understanding of dairy cattle anatomy and importance in dairy production, while gaining the ability to evaluate dairy cattle for soundness and show-ring appeal. Additionally, the class aims to provide students with confidence in justifying decisions of evaluation and gain confidence in public speaking.

ANSC121 Introduction to Livestock Judging (2 Credits)
Students will establish a working understanding of the structural anatomy of several livestock species- cattle, sheep, pigs, goats- and their individual importance in the Agricultural Industry, while gaining the ability to evaluate these species for soundness and show-ring appeal. Additionally, the class aims to provide students with confidence in justifying decisions of based on their evaluations and gain skills in public speaking. The course will include two weekend field trips to farms in order to practice judging skills.

ANSC204 Anatomy of Domestic Animals (2 Credits)
Covering the anatomy of major species of domestic animals. Utilizes a systemic approach to provide a general knowledge of both gross and microscopic mammalian structure. Comparative differences between the major domestic species are covered.
Prerequisite: ANSC101 and ANSC103. And BSCI105; or (BSCI170 and BSCI171).
Corequisite: ANSC205.
Restriction: Must be in one of the following programs (Environmental Sci&Pol-Wildlife Resources & Cons; Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).
Credit Only Granted for: ANSC211 or ANSC204 AND ANSC205.
Formerly: ANSC211.

ANSC205 Anatomy of Domestic Animals Laboratory (2 Credits)
A regional approach is taken to study the gross anatomy of major domestic species in the laboratory portion of this course.
Prerequisite: ANSC101 and ANSC103. And BSCI105; or (BSCI170 and BSCI171).
Corequisite: ANSC204.
Restriction: Must be in one of the following programs (Environmental Sci&Pol-Wildlife Resources & Cons; Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).
Credit Only Granted for: ANSC211 or ANSC204 and ANSC205.
Formerly: ANSC211.

ANSC210 Veterinary Terminology (1 Credit)
Students will learn terminology related to the clinical practice of small and large animal medicine including medical record terminology and a systems-based consideration of common practices and pathologies.
Prerequisite: ANSC204 and ANSC205.
Credit Only Granted for: The course is offered on-line through a series of self-paced modules on ELMS..

ANSC212 Applied Animal Physiology (3 Credits)
The physiology of domesticated animals with emphasis on functions related to homeostasis, and the physiological adaptation to environmental influences.
Prerequisite: ANSC211; or (ANSC204 and ANSC205); or students who have taken courses with comparable content may contact the department.

ANSC214 Applied Animal Physiology Laboratory (1 Credit)
Application of physiological laboratory techniques to domestic and lab animals.
Prerequisite: Must have completed or be concurrently enrolled in ANSC212.

ANSC220 Livestock Management (3 Credits)
Management of meat animals including beef, sheep, and swine. This course will emphasize obtaining optimal efficiency of production through the integration of leading edge breeding, feeding, management, and marketing practices.
Prerequisite: ANSC101 and ANSC103.

ANSC225 Love Me, Hate Me, Use Me, Save Me: Our Conflicting Views of Animals (3 Credits)
Examine the evolution of human-animal relationships and consider some of the major social an scientific debates that have arisen in the last century as a result of our rapidly changing and diverse views about animals.

ANSC226 The Future of Animal Agriculture (3 Credits)
Offers students the opportunity to learn about the history of animal agriculture in the United States and envision what its future might be as it adapts to major challenges such as our growing global population, climate change, food injustice, antimicrobial and insecticide resistance, animal welfare concerns, and farmer distress. The course will examine technological & biotechnological, agroecological, and social innovations that address these issues while providing healthy, safe, nutritious food. Students are invited to learn about these issues and to create and propose their own solutions through weekly 'extend your learning' opportunities and a course project in animal agricultural extension.
Additional Information: The course is hosted on ELMS-Canvas and will require students to have reliable access to the internet.

ANSC227 Eating with Eyes Wide Open (3 Credits)
Students will investigate the tension that is created by trade-offs that, knowingly or not, are made by consumers relative to agricultural production methods and dietary choices. Course will inform students about their food supply so they can make informed decisions and practice intentional or informed eating.

ANSC232 Horse Management (3 Credits)
An introductory course on the care, management, and use of horses. Major topics include the industry, breeds, conformation, feeding, health, reproduction, facilities and business.
Prerequisite: ANSC101 and ANSC103.
Credit Only Granted for: ANSC232 or ANSC332.
Formerly: ANSC332.

ANSC233 Equine Behavior (2 Credits)
Both normal and anomalous behavior of horses will be covered. Emphasis will be given to techniques based on knowledge of behavior that are known to be safe and effective in handling horses.
Prerequisite: ANSC101, ANSC103, and ANSC232.
Credit Only Granted for: ANSC489B or ANSC233.
Formerly: ANSC489B.

ANSC235 Applied Small Ruminant Parturition (2 Credits)
Popularly known as 'Lamb Watch', the course provides an immersion environment for learning and understanding pre- and post-natal care of ewes and lambs through direct, hands-on involvement in the birthing process and care of the neonate through weaning. Covered topics include zoonoses, basic reproductive physiology of the sheep, normal and abnormal delivery, management of lambs, qualitative assessment, breeding principles, etc.
Prerequisite: Minimum grade of C- in ANSC101 and ANSC103.
Restriction: Must be in one of the following programs (Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/ Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).

ANSC236 Equine Business Management (3 Credits)
The study and practice of applying decision-making skills and tools needed for operating a profitable equine boarding or training stable business.
Prerequisite: ANSC232.
Recommended: AREC250.
Credit Only Granted for: ANSC236 or INAG232.

ANSC237 Equine Reproductive Management (3 Credits)
Students learn the fundamental skills necessary to manage an equine breeding herd including anatomy/physiology of genital tracts, estrus detection, manipulation of the estrous cycle, semen collection, pre- and post-foaling techniques, infertility, and health and nutrition of the mare, foal and stallion. Students will be required to spend ~ 30 hours during the spring semester caring for broodmares and foals and attending at least one foaling and estrous detection checks on broodmares outside of regularly scheduled class time.
Prerequisite: ANSC232.
Credit Only Granted for: ANSC237 or INAG233.
Additional Information: Course participation will include nightly checks of mares in the two weeks prior to parturition, and out-of-class time imprinting and working with newborn foals.

ANSC242 Dairy Cattle Management (3 Credits)
All aspects of dairy production, including nutrition, reproduction, mastitis control, milking management, farmstead facilities, financial management and forage production.
Prerequisite: ANSC101 and ANSC103.
Formerly: ANSC240 and ANSC241.

ANSC244 Dairy Cattle Type Appraisal (1 Credit)
Laboratory. Analysis of dairy cattle type with emphasis on the comparative judging of dairy cattle.
Prerequisite: Permission of AGNR-Animal & Avian Sciences department.

ANSC245 Sheep Management (3 Credits)
Popularly known as 'Lamb Watch', this course provides an immersion environment for learning and understanding pre- and post-natal care of ewes and lambs through direct, hands-on involvement in the birthing process and care of the neonate through weaning on the campus farm. Course topics include zoonoses, basic reproductive physiology of the sheep, normal and abnormal parturition, management of lambs, qualitative assessment, breeding principles, nutrition, products and their marketing, and ram management.
Prerequisite: Minimum grade of C- in ANSC101 and ANSC103.
Restriction: Must be in one of the following programs (Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/ Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).
Credit Only Granted for: ANSC235 or ANSC245.

ANSC250 Companion Animal Care and Management (3 Credits)
Care and management of the companion small animals. Species covered include the cat, dog, rodents, lagomorphs, reptiles, amphibians, birds and others as class interest and schedule dictate. Basic description, evolutionary development, breeding, nutritional and environmental requirements, and public health aspects will be presented for each species.
Credit Only Granted for: ANSC250 and ANSC305.
Formerly: ANSC305.

ANSC252 Introduction to the Diseases of Wildlife (3 Credits)
The principal diseases of North American wildlife will be briefly considered. For each disease, specific attention will be given to the following: signs evidenced by the affected animal or bird, causative agent, means of transmission and effects of the disease on the population of the species involved.
Prerequisite: BSCI105; or (BSCI170 and BSCI171); or permission of AGNR-Animal & Avian Sciences department; or students who have taken courses with comparable content may contact the department.

ANSC255 Introduction to Aquaculture (3 Credits)
Introduces the art and science of rearing aquatic animals and the essential principles of aquaculture. Students receive hands-on training in the methods required for successful husbandry and management of aquatic animals in their water environment.
Prerequisite: ANSC101 and ANSC103; or must have completed an introductory biology course.

ANSC260 Laboratory Animal Management (3 Credits)
A comprehensive course in care and management of laboratory animals. Topics covered include regulations governing the use of animals in research, laboratory animal facility design and management, animal research models, animal health management and husbandry, responsibilities of lab animal workers and career opportunities in the field. Hands-on labs focus on lab animal handling, husbandry and common techniques. Field trips are required, and you must attend a minimum number of field trips which will be held during lab time.
Prerequisite: ANSC101 and ANSC103.
Credit Only Granted for: ANSC260 or ANSC413.
Formerly: ANSC413.

ANSC262 Commercial Poultry Management (3 Credits)
Theory and science of rearing poultry and marketing poultry meat and eggs in the commercial sector. Includes current issues, organization of the industry, as well as fundamental biology of the domestic chicken. Students will help raise a flock of broiler chickens. Field trips to commercial poultry operations are required.
Prerequisite: ANSC101 and ANSC103.

ANSC270 Animal Enterprise Management (3 Credits)
General principles of enterprise organization, management, and operation as applicable to food, livestock, and companion animals. Enterprise planning and establishment, management of financial, human, and animal resources, and other related topics will be investigated.
Prerequisite: ANSC101 and ANSC103; or permission of instructor.
Credit Only Granted for: ANSC270 or AREC306.

ANSC275 Introduction to Veterinary Medical Science and Practice (3 Credits)
The fundamentals of clinical veterinary medical practice and the research that supports it. Topics presented will include the histology, gross anatomy and physiology of the musculoskeletal, cardiovascular, respiratory, reproductive, digestive, renal and neurological systems as they relate to the description of specific disease states taught in this course. Additionally, examples of diseases caused by pathologic disturbances to these systems will be discussed, as well as the basic principles of preventative health care, diagnostic testing and pharmacologic intervention. Significant attention will be given to research in veterinary science and the practice of evidence-based medicine. This course is intended for any student interested in veterinary medicine, animal physiology, or medical science.
Prerequisite: BSCI105; or (BSCI170 and BSCI171).

ANSC282 Grazing Animal Management (3 Credits)
For students interested in acquiring knowledge and skills in pasture management, grazing management of livestock (large and small ruminants, horses), and hay production. Fundamental information regarding best management practices for soils, plants, and grazing livestock will be covered
Prerequisite: ANSC101 and ANSC103; or permission of instructor.
Credit Only Granted for: ANSC110, ANSC282, or INAG116.
Formerly: ANSC110.

ANSC314 Comparative Animal Nutrition (3 Credits)
The fundamental role and implications of dietary preference, gastrointestinal physiology and nutrients in animal nutrition. Biochemical roles of nutrients in metabolism, digestion, absorption and assimilation as it relates to various life processes.
Prerequisite: ANSC101 and ANSC103; and (CHEM231 or PLSC275).

ANSC315 Applied Animal Nutrition (3 Credits)
Elements of nutrition, source characteristics and adaptability of various feedstuffs to several classes of livestock. A study of the composition of feeds, nutrient requirements and computerized formulation of economic diets and rations for livestock.
Prerequisite: ANSC314.

ANSC327 Molecular and Quantitative Animal Genetics (3 Credits)
Classical, molecular, and population genetics with specific emphasis on animal systems will be covered. Also, disseminate information on molecular approaches for manipulating genetics at the whole animal level (transgenic and cloning). Other model organisms will be discussed to provide a conceptual framework.
Prerequisite: ANSC101, CHEM131, and ANSC103. And BSCI105; or (BSCI170 and BSCI171).

ANSC330 Equine Science (3 Credits)
Scientific principles of horse behavior, anatomy, physiology, locomotion, nutrition, reproduction, growth, health and disease as applied to horses are emphasized.
Prerequisite: ANSC232; or permission of instructor.
Recommended: ANSC212 and ANSC211.
Credit Only Granted for: ANSC230 or ANSC330.
Formerly: ANSC230.

ANSC340 Health Management of Animal Populations (3 Credits)
A study of common and emerging animal diseases and their prevention and control. The main focus will be on livestock and poultry diseases. However, zoonotic, wildlife, and laboratory animal diseases will also be discussed along with risk assessment, bioterrorism counter-measures, and animal welfare, especially as these topics interface or impact animals used in food production.
Prerequisite: BSCI223; and (ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, or ANSC262).
Recommended: ANSC212.
Credit Only Granted for: ANSC340 or ANSC412.
Formerly: ANSC412.

ANSC359 Internship Experience in Animal and Avian Sciences (3-6 Credits)
Experiential learning is a key component in an animal science education. Through the internship program, you will have the opportunity to develop your expertise in a specific species and discipline within the animal science curriculum. You will arrange an on- or off-campus internship experience related to animal science. You will spend a specified number of hours at the internship site each week and attend biweekly classroom sessions where we will discuss how the study of animal science fits into your specific internship experience as well as understand how to achieve each of the course learning outcomes.
Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, or ANSC262.
Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Students are required to submit an application to the Animal Science Internship Coordinator to enroll in this course.

ANSC379 Animal Science Undergraduate Teaching Assistant Seminar (2 Credits)
Seminar course for undergraduate teaching assistants within ANSC.
Prerequisite: Permission of instructor.
Repeatable to: 8 credits.
Formerly: ANSC390.

ANSC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of AGNR-Animal & Avian Sciences department.
Restriction: Junior standing or higher.

ANSC388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Must be in the AGNR Honors program.
Repeatable to: 6 credits if content differs.

ANSC389 Experiential Learning (3-6 Credits)
Prerequisite: Permission of AGNR-Animal & Avian Sciences department.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.
Formerly: ANSC386.

ANSC398 Seminar - Research (1 Credit)
Presentation and discussion of current literature and research work in animal science.
Prerequisite: ANSC101 and ANSC103.
Repeatable to: 2 credits if content differs.

ANSC399 Special Problems in Animal Science (1-2 Credits)
Work assignments are designed to be proportional to the amount of credit. Students are expected to develop an abstract, fact sheet, manuscript, oral presentation, poster, webpage, journal-log, or other scholarly product associated with their study and/or project.
Prerequisite: ANSC101 and ANSC103.
Restriction: Permission of AGNR-Animal & Avian Sciences department; and junior standing or higher.
Repeatable to: 6 credits if content differs.

ANSC410 The Gut Microbiome and its Roles in Health and Disease (3 Credits)
A comprehensive perspective of the role of gut microbiome/microflora in nutrition, metabolism, disease prevention and health issues including farm animal health and food value, and human gastrointestinal health and immunity.
Prerequisite: BSCI223, ANSC212, ANSC327, EPIB301, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC489M or ANSC410.
Formerly: ANSC489M.

ANSC417 Regulatory Issues in Animal Care and Management (3 Credits)
A study of regulatory issues affecting animal care and management in the livestock industry. Guest speakers and classroom discussions will focus on key topics including animal welfare, feed and drug regulations, animal identification, CAFO management, processing and marketing of animal products.
Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, ANSC262, or ANSC282; or permission of instructor.
Additional Information: Field trips may be required for this course.

ANSC435 Experimental Embryology (3 Credits)
Experimental approaches to mammalian embryology with emphasis on domestic livestock systems as applied to research and production systems. Lab will include hands-on experiments and demos of in vitro embryo production, embryo splitting, cell injection and nuclear transfer.
Prerequisite: ANSC212.
Recommended: Completion of one course in reproductive physiology is recommended.
Credit Only Granted for: ANSC435 or ANSC489M.
Formerly: ANSC489M.

ANSC436 Animal Health Policy and Communication (3 Credits)
Intended for upper level students in Veterinary Medicine or Animal Science as well as other students who are interested in understanding how science and politics interact and influence animal health policy and how veterinarians and animal scientists can effectively communicate science to non-scientists such as legislators and policymakers.
Recommended: Completion of ANSC225 and ANSC340 recommend.
Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; or permission of AGNR-VA-MD Regional COL Veterinary Med.
Credit Only Granted for: ANSC489A or ANSC436.
Formerly: ANSC489A.

ANSC437 Animal Biotechnology (3 Credits)
Key concepts and current issues in animal biotechnology are covered. Current techniques and applications systems as well as social, ethical, and regulatory issues associated with biotechnology will be discussed.
Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

ANSC440 Zoonotic Diseases and Control (3 Credits)
Global perspective of foodborne diseases common to animals and man, specifically those caused by farm animal-originated human pathogens (zoonoses) and their control. A selection of important zoonoses and food safety issues will be specifically covered with an emphasis on the principles of zoonotic disease transmission and control, risk factors to humans, and surveillance methods.
Prerequisite: BSCI223, ANSC212, ANSC327, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC440 or ANSC489R.
Formerly: ANSC489R.

ANSC443 Physiology of Lactation (3 Credits)
A comprehensive survey of lactation in laboratory and domestic animals. Other species are discussed where possible. Emphasis will be placed on physiological aspects of milk synthesis and secretion and on the cellular and molecular biology of mammary gland development.
Prerequisite: CHEM231, ANSC212, and CHEM232.
Recommended: BCHM463.

ANSC444 Domestic Animal Endocrinology (3 Credits)
Current developments in endocrinology as it relates to animals used in the production of food and other products important to the well being of humans will be covered.
Prerequisite: ANSC212; or permission of instructor.
Restriction: Must not have completed ANSC644.
Credit Only Granted for: ANSC489I, ANSC444, or ANSC644.
Formerly: ANSC489I.

ANSC446 Physiology of Mammalian Reproduction (3 Credits)
Anatomy and physiology of reproductive processes in domesticated and wild mammals.
Prerequisite: ANSC212 or BSCI440.

ANSC447 Physiology of Mammalian Reproduction Laboratory (1 Credit)
Gross and micro-anatomy, artificial insemination, estrous cycle synchronization and invitro-fertilization procedures and analytical techniques useful in animal management and reproduction.
Prerequisite: Must have completed or be concurrently enrolled in ANSC446.

ANSC450 Animal Breeding Plans (3 Credits)
Design of animal breeding programs for the genetic improvement of livestock and companion animal species. Principles of population and quantitative genetics. Genetic evaluations of animals, selection strategies and crossbreeding systems. Incorporation of statistics and biotechnology into animal breeding plans.
Prerequisite: ANSC101; and 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140).
Restriction: Junior standing or higher.

ANSC452 Avian Physiology (3 Credits)
The digestive, excretory, respiratory, circulatory, immune, skeletal muscle, endocrine and nervous systems of avian species will be examined.
Prerequisite: ANSC212.
Restriction: Junior standing or higher.

ANSC453 Animal Welfare and Bioethics (3 Credits)
Ethical concerns related to the use of animals in modern society. Historical and philosophical overview of animal welfare and bioethics. Applied ethical discussions on human/animal interrelationships, physical and genetic manipulation, and other current issues associated with the treatment of animals used in food production, research, zoos, and as pets.
Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161); or permission of instructor.
Restriction: Junior standing or higher.

ANSC454 Nutritional Aspects of Metabolic Disease (3 Credits)
Biochemical and physiological fundamentals of nutrition. Discussion of protein, fat,carbohydrate, minerals and vitamins and their roles and interrelationships innutrition, metabolism and diseases in humans and animals. The course will use recommended texts for foundation material as well as research papers to provide in-depth coverage and illustrate emerging themes in metabolic aspects of nutrition and disease.
Prerequisite: CHEM131 and ANSC101, or BSCI170; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC4890 or ANSC454.
Formerly: ANSC489O.

ANSC455 Applied Animal Behavior (3 Credits)
Principles of animal behavior applied to production systems in animal agriculture.
Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161).

ANSC460 Comparative Vertebrate Immunology (3 Credits)
Basic concepts in immunology, and comparing immunity in different vertebrates, including organization of immune systems, innate and adaptive immune responses. Special attention will be paid to how cell-mediated and humoral immune responses are induced in natural infections, and what are the effector mechanisms in both of these processes. Immune response in representative disease models such as infections with viruses and bacteria, cancer, and autoimmune disease will be discussed. Lectures concerning cutting-edge research will also be given.
Prerequisite: ANSC212, BSCI201, or BSCI440.
Credit Only Granted for: ANSC460 or ANSC489I.
Formerly: ANSC489I.

ANSC489 Current Topics in Animal Science (1-3 Credits)
Examination of current developments in the animal sciences.
Repeatable to: 6 credits if content differs.

ANSC497 Animal Biotechnology Recombinant DNA Laboratory (3 Credits)
An advanced course offering hands-on experience in performing recombinant DNA experiments. Current molecular biology techniques used for cloning genes, analyzing the gene products, and modifying the genes of animals will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.
Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.
Recommended: ANSC437 and ANSC435.

ANTH - Anthropology

ANTH138 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH210 Introduction to Medical Anthropology and Global Health (3 Credits)
An introduction to the central concepts in medical anthropology and the anthropology of global health. This course is a survey of anthropological notions of health, disease, and the body in cross-cultural and global contexts, including classic and contemporary texts. It will provide an examination of systems of knowledge and practice with regard to illness, healing, and global health inequities.

ANTH220 Introduction to Biological Anthropology (4 Credits)
Human biological evolution, including the biology of contemporary human groups, non-human primate social behavior, and the fossil, biochemical, and molecular evidence for human evolution. Includes a laboratory study of human population genetics, biochemical variation, and anatomical diversity in modern and fossil human and non-human primate groups.

ANTH221 Introduction to Forensic Sciences (3 Credits)
Provides a brief history of forensic sciences, an introduction to some of the techniques used, and a demonstration of some of the applications of forensic sciences. A survey course designed to give the student some exposure to the kinds of scientific knowledge and techniques applied to the medico-legal investigation of death and other crimes.
Credit Only Granted for: ANTH298A or ANTH221.
Formerly: ANTH298A.

ANTH222 Introduction to Ecological and Evolutionary Anthropology (4 Credits)
An introduction to the evolution of human physiology and human behavior, the relationship between hominid and non-hominid primates, and the study of relationships between a population of humans and their biophysical environment.
Credit Only Granted for: ANTH220 or ANTH222.

ANTH238 Special Topics Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH240 Introduction to Archaeology (3 Credits)
Exploration of the variety of past human societies and cultures through archaeology, from the emergence of anatomically modern humans to the more recent historical past.

ANTH242 Fire, Farming and Climate Change: An Archaeology Take on the History of Human Impacts on our Planet (3 Credits)
An examination of why climate changes, the methods for recording climate change, and case studies of the varied responses of past human societies to climate change in different geographic regions and time periods with varying socio-political and economic systems.

ANTH260 Introduction to Sociocultural Anthropology and Linguistics (3 Credits)
Culture and social relationships in a wide variety of settings from small-scale to complex societies. An overview of how anthropology analyzes human behavior. Particular attention to the relationship between language and culture.

ANTH263 Sexuality and Culture (3 Credits)
An overview of sexuality from an anthropological perspective, looking at aspects of sexuality within our own culture and in cultures around the world. Course topics include the biology and culture of sex, gender, physical attraction, sexual orientation, marriage and mating taboos, fertility control, sexually transmitted diseases, and commercial aspects of sex.
Credit Only Granted for: ANTH298K or ANTH263.
Formerly: ANTH298K.

ANTH264 Immigration Policy, Immigrant Lives (3 Credits)
An examination of the phenomenon of international migration, or immigration. Students develop awareness of how immigration has been framed in the general public and examined by social science disciplines, most prominently anthropology. Examination of case studies of different immigrant groups in distinct geographic contexts will illuminate the varied incorporation experiences of immigrants into U.S. society.Cross-listed with: IMMR219C.
Credit Only Granted for: ANTH264 or IMMR219C.

ANTH265 Anthropology of Global Health (3 Credits)
An overview of the growing field of global health including health care systems, medical practices, ideas about illness in cross-cultural contexts, issues of health development, global health inequity, and human rights issues. The course will focus on the history of global health, the critique of major international health agencies and their development paradigms, and the political economy of social inequalities and health.

ANTH266 Changing Climate, Changing Cultures (3 Credits)
Explore past, present, and future interactions between humans and climate. Discussions, methods-oriented activities, and case study analyses provide students a foundation for appreciating the role of anthropology in understanding, responding to, and preparing for climate change.

ANTH298 Special Topics in Anthropology (3 Credits)
Anthropological perspectives on selected topics of broad general interest.
Repeatable to: 6 credits if content differs.

ANTH305 Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ARTH305, CLAS305, JWST319Y.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

ANTH310 Method & Theory in Medical Anthropology and Global Health (3 Credits)
Provides a critical perspective to global health that encompasses key political, economic, and cultural factors associated with the nature and magnitude of global health issues such as HIV/AIDS, tuberculosis and malaria, paying particular attention to how poverty and inequalities within and between societies has accelerated current global health challenges. Introduces students to how medical anthropologists have contributed to the debates surrounding the globalization of health.
Prerequisite: ANTH210. Jointly offered with ANTH665. Credit only grant ed for: ANTH310, ANTH465, or ANTH665.
Formerly: ANTH465.

ANTH320 Method and Theory in Biological Anthropology (3 Credits)
Theoretical and methodological overview of biological anthropology, including evolutionary anthropology, anthropological genetics, physiological anthropology, human biology, primatology, paleoanthropology, human biodiversity, and contemporary selective challenges to modern humanity. Emphasis on core concepts and their research applications.
Prerequisite: ANTH220; or permission of BSOS-Anthropology department.
Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.
Credit Only Granted for: (ANTH320 and ANTH425) or ANTH625.

ANTH322 Method and Theory in Ecological Anthropology (3 Credits)
A theoretical consideration of ecological anthropology, focusing on issues related to cooperation, the management of common property, resilience, and sustainability. Explores the methods of sociocultural anthropology, including ethnology, evolutionary game theory and agent-based modeling; and natural-science approaches including behavioral and systems ecology.
Prerequisite: ANTH220 or ANTH222.
Restriction: Must be in a major within the BSOS-Anthropology department.
Credit Only Granted for: ANTH320, ANTH322, ANTH425, or ANTH625.

ANTH323 Plagues, Pathogens and Public Policy (3 Credits)
The impact of diseases on populations from prehistoric times through the present will be examined, along with public perceptions of disease, scientific breakthroughs on treatment and prevention, and the ways that politics and public health policies can enhance or impede the advancement of disease treatment. The natural history of disease, population structure, and immunity will be discussed. The class will address emerging and re-emerging diseases and the ways that first responders, researchers, and policy makers may affect the outcome of an outbreak.
Credit Only Granted for: ANTH429A or ANTH323.
Formerly: ANTH429A.

ANTH338 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH340 Method and Theory in Archaeology (3 Credits)
Theory, method, and practice which guides modern anthropological archaeology. Includes research design and execution (from survey through excavation and interpretation), the reconstruction of aspects of past cultures, and the understanding of cultural change and meaning.
Prerequisite: ANTH240.
Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.

ANTH341 Introduction to Zooarchaeology (3 Credits)
Zooarchaeology is the study of animal remains, especially bones, from archaeological contexts. This course will address both methodology as well as many of the main issues in contemporary zooarchaeology. Zooarchaeology stands at the intersection of a number of social and biological sciences, such as Biology, Osteology, Ecology, History, Anthropology and Economics. We will discuss basic animal osteology and the concepts and practices behind the identification of animal remains from archaeological contexts. We will cover the nature of the data in zooarchaeology, especially issues around using proxy data.
Credit Only Granted for: ANTH298D, ANTH641 or ANTH341.
Formerly: ANTH298D.

ANTH358 Undergraduate Teaching Assistant (1-3 Credits)
Individual instruction course: contact department or instructor to obtain section and index numbers.
Prerequisite: ANTH220, ANTH260, or ANTH240.
Restriction: Junior standing or higher; and must be in Anthropology program.
Repeatable to: 6 credits if content differs.

ANTH360 Method and Theory in Sociocultural Anthropology (3 Credits)
Theoretical approaches and research methods in sociocultural anthropology. Emphasis on current debates, new directions, and their historical antecedents.
Prerequisite: ANTH260.
Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.

ANTH368 Regional Ethnography (3 Credits)
Peoples and cultures of a particular region of the world, on the basis of ethnographies, archaeological evidence, and relevant works by social historians and political economists. The regional focus and thematic emphasis will vary by semester.
Prerequisite: ANTH260; or permission of BSOS-Anthropology department.
Repeatable to: 6 credits if content differs.

ANTH380 Culture and Discourse (3 Credits)
Contemporary discourse analysis and pragmatics applied to ethnographic research problems with particular attention to roots in recent linguistic anthropological work in ethnographic semantics and ethnography of speaking.

ANTH386 Experiential Learning (1-6 Credits)
Recommended: Completion of advanced courses in relevant subfield of anthropology recommended.
Restriction: Permission of BSOS-Anthropology department; and junior standing or higher; and must be in Anthropology program.

ANTH398 Independent Study (1-3 Credits)
Independent interdisciplinary research and reading in specific areas of anthropology.
Restriction: Permission of BSOS-Anthropology department.
Repeatable to: 9 credits if content differs.

ANTH411 Anthropology of Immigration and Health (3 Credits)
The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.Jointly offered with ANTH611.
Credit Only Granted for: ANTH411 or ANTH611.

ANTH412 Hypermarginality and Urban Health (3 Credits)
Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality--the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities.
Credit Only Granted for: ANTH412 or ANTH612.

ANTH413 Health Disparities in the United States (3 Credits)
Powerful economic, political, social, and cultural forces shape who gets sick, what illnesses/diseases they get, how they are treated while seeking care, what treatment options they have, and what their ultimate health outcomes are. The goal of the course is to understand these processes through the lens of critical medical anthropology
Credit Only Granted for: ANTH468Q, ANTH688Q, ANTH413, or ANTH613.
Formerly: ANTH468Q.

ANTH415 Advanced Studies in Global Health (3 Credits)
Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.
Recommended: ANTH210, ANTH310, or ANTH265 or a similar course focused on global health or medical anthropology course. Jointly offered with: ANTH615.
Credit Only Granted for: ANTH415 or ANTH615.

ANTH416 Anthropology of Global Violence (3 Credits)
An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts.Jointly offered with ANTH616.
Credit Only Granted for: ANTH468O, ANTH66 8O, ANTH416 or ANTH616.
Formerly: ANTH468O.

ANTH421 Nutritional Anthropology (3 Credits)
The study of nutrition from an anthropological perspective which includes both biological and cultural aspects of nutrition. We will explore how nutrition can affect culture how culture can affect nutrition. Nutritional anthropology includes the study of cross-cultural variation in diet, nutritional status and subsistence systems as well as variation in these factors over the evolutionary course of human existence, from prehistoric and historic to modem times. Students will be introduced to nutritional anthropology and provided with the basics for assessing reliability and feasibility of nutritional advice and policy encountered in everyday modern life in a global setting.
Credit Only Granted for: ANTH421, ANTH428N, or ANTH621.
Formerly: ANTH428N.

ANTH422 Human-Plant-(Human & Bioactive Plant) Interaction (3 Credits)
This seminar course will discuss the evolutionary, historical, cultural, and ecological aspects of coevolution with respect to humans and their interactions with specific bioactive plants. Case studies of human- plant-(pathogen) interactions will be discussed as well as an inclusive survey of anthropologically important phytochemicals. The seminar incorporates human-plant-(pathogen) interactions into models of human evolution and ecology.
Prerequisite: ANTH220 and ANTH320; or permission of BSOS-Anthropology department.
Credit Only Granted for: ANTH422.
Formerly: ANTH428I.

ANTH424 Human Skeletal Anatomy (3 Credits)
In addition to descriptive information about bone identification, the lectures will address the history of human anatomical studies, the development of analytical techniques, and the application of these techniques in paleoanthropology, comparative anatomy, functional anatomy (and related fields, such as physical therapy), and skeletal analysis in museum, historic cemetery, archaeological, and forensic settings. Emphasis will be on the development of the skeleton and recognition of normal variation in bones. The laboratory sessions will allow the students access to human bones for the purpose of identification, documentation of human variation, and application of techniques to obtain information about the living individual from the skeleton.

ANTH428 Special Topics in Bioanthropology (3 Credits)
Advanced research courses in biological anthropology on changing topics that correspond to new theoretical interests, faculty research interests, or the specialties of visiting scholars. Prerequisites or background knowledge vary with the topic. Check with the department for requirements.
Repeatable to: 6 credits if content differs.

ANTH429 Advanced Special Topics in Biological Anthropology (3 Credits)
Upper level biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH438 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH440 Theory and Practice of Historical Archaeology (3 Credits)
Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories.
Prerequisite: ANTH240. Jointly offered with ANTH640. Credit only grant ed for: ANTH440 or ANTH640.

ANTH441 Archaeology of Diaspora (3 Credits)
Diaspora' is defined, theorized, deconstructed, and employed throughout the social sciences. There are context specific relations that define who leaves, when, and how they are received in the new place of settlement. Over the course of the semester the class will actively and critically examine the relevance of historical archaeology and material culture studies in the understanding of the formation, experiences, and transformation of diasporic groups over time and space.
Prerequisite: ANTH240.
Credit Only Granted for: ANTH448A, ANTH688Z, or ANTH441.
Formerly: ANTH448A.

ANTH442 Public Archeology (3 Credits)
Explores the uses and environments for archaeological work through a discussion of museum, electronic media, heritage settings, outdoor history museums, including the legal environment that offers protection for archaeological remains. The course exposes students to the majority of cultural media within which archaeology is currently practiced. The interdisciplinary course is a survey of the progress made within and beyond anthropology in understanding the function of heritage, public memory, tourism, and the other popular uses of materials from the past, including the progress made in linguistics psychology and other cognitive disciplines in understanding the purpose of the past.
Credit Only Granted for: ANTH442, ANTH448V, or ANTH642.
Formerly: ANTH448V.

ANTH444 Theories of the Past (3 Credits)
The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern socieity. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.
Prerequisite: ANTH240. Jointly offered with ANTH740. Credit only grant ed for: ANTH448P, ANTH444, or ANTH740.
Formerly: ANTH448P.

ANTH445 Laboratory Methods in Archaeology (3 Credits)
The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn that basics of laboratory techniques necessary for the final analysis and interpretation of field data.
Prerequisite: ANTH496.
Recommended: ANTH240.

ANTH447 Material Culture Studies in Archaeology (3 Credits)
An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.
Prerequisite: ANTH240.
Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.
Formerly: ANTH448C.

ANTH448 Special Topics in Archaeology (3 Credits)
Advanced topics in archaeological research, corresponding to new theoretical developments, faculty research interests, or specialties of visiting scholars. Prerequisites may vary with course topic; check with the department for requirements.
Prerequisite: ANTH240.
Repeatable to: 6 credits if content differs.

ANTH449 Advanced Special Topics in Archaeology (3 Credits)
Upper level archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH450 Theory and Practice of Environmental Anthropology (3 Credits)
An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach.
Restriction: Junior standing or higher. Jointly offered with ANTH650.
Credit Only Granted for: ANTH450 or ANTH650.

ANTH451 Environmental Archaeology (3 Credits)
An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.
Credit Only Granted for: ANTH451, ANTH651, ANTH448F, ANTH668F.
Formerly: ANTH448F.

ANTH452 Anthropology and Climate Change (3 Credits)
Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation.
Prerequisite: ANTH220, ANTH222, ANTH240, or ANTH260.
Credit Only Granted for: ANTH452 or ANTH652.

ANTH453 Archaeology of the Modern City (3 Credits)
An overview of how social scientists, in particular historical archaeologists, approach modern cities as being part of the materiality of the social structure and order.
Prerequisite: ANTH240; or permission of instructor.
Credit Only Granted for: ANTH448Q or ANTH453.
Formerly: ANTH448Q.

ANTH454 Political Ecology (3 Credits)
The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.Jointly offered with: ANTH654.
Credit Only Granted for: ANTH454 or ANTH654.

ANTH456 Conservation and Indigenous People in South America (3 Credits)
Considers indigenous peoples and their relation to the lands on which they live, issues of traditional indigenous knowledge and land management as well as new contributions by indigenous peoples to changing landscapes. Reviews legal mechanisms and instruments through which indigenous peoples have rights to the resources they occupy and utilize. Taking specific cases and examining them through the lens of political and social ecology, the role of indigenous peoples in local and worldwide conservation efforts is considered. Case studies will emphasize the indigenous peoples and conservation policies of Latin America.Jointly offered with: ANTH656.
Credit Only Granted for: ANTH468L, ANTH456, ANTH688L, or ANTH656.
Formerly: ANTH468L.

ANTH461 Language as Practice (3 Credits)
An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.Jointly offered with: ANTH661.
Credit Only Granted for: ANTH461, ANTH468I or ANTH661.
Formerly: ANTH468I.

ANTH462 Amazon Through Film (3 Credits)
An interdisciplinary course that utilizes film to consider the Amazon basin, its history, peoples, and landscapes through cinematic representations. The course places the films in the context of film history and critical theory. The course takes into consideration the Brazilian, North American, Mexican, European and Argentine creators of the films and their visions of Amazonia, as well as the audiences and markets to which the films are intended.
Credit Only Granted for: ANTH468D or ANTH462.
Formerly: ANTH468D.

ANTH464 Anthropology of Cultural Heritage (3 Credits)
A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.
Prerequisite: ANTH260. Jointly offered with ANTH664. Credit only grant ed for: ANTH469T, ANTH689T, ANTH464, ANTH664.
Formerly: ANTH469T.

ANTH467 Researching Environment and Culture (3 Credits)
In this applied course, students use mixed methods to research a locally-based, environmental sustainability issue. Classroom time will be split between seminar discussions of theory, methods, and relevant case studies, and lab work focused on project development, data analysis, and report write up. Students are expected to spend additional time outside class on data collection, analysis, and writing
Recommended: ANTH322, ANTH360, ENSP101, or ENSP102.

ANTH468 Special Topics in Cultural Anthropology (3 Credits)
Advanced courses in varying specialty areas of cultural anthropology that respond to new theoretical developments, faculty research interests, or specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH469 Advanced Special Topics in Cultural Anthropology (3 Credits)
Upper level cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH472 Medical Anthropology (3 Credits)
An exploration of the cultural, social, economic and political dimensions of health, disease, and illness. These dimensions will be examined through both the health-seeker's and the care-provider's perspectives.
Credit Only Granted for: ANTH472, ANTH468, ANTH672, or ANTH688L.
Formerly: ANTH468L.

ANTH476 Senior Research (3-4 Credits)
Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of a senior thesis in anthropology.
Restriction: Must be in Anthropology program.
Credit Only Granted for: ANTH476 or ANTH486.

ANTH477 Senior Thesis (3-4 Credits)
Capstone course in which students write a senior thesis on independent research into a current problem in anthropology. The thesis is defined before a committee of faculty.
Prerequisite: ANTH476.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program.
Credit Only Granted for: ANTH477 or ANTH487.

ANTH478 Special Topics in Linguistics (3 Credits)
Advanced courses in specialty areas that respond to new theoretical developments and faculty research interests in linguistics.
Recommended: LING200.
Repeatable to: 6 credits if content differs.

ANTH485 Honors Research Preparation (3 Credits)
Honors Research Preparation is an independent study course during which the Honors candidate will work with their Honors Thesis Advisor to establish not only the structure of the thesis and timeline, but also the formation of Thesis Review Committee.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

ANTH486 Honors Research (3-4 Credits)
Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of an honors thesis in anthropology.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.
Credit Only Granted for: ANTH486 or ANTH476.

ANTH487 Honors Thesis (3-4 Credits)
Capstone course in which students write a thesis on the results of independent research into a current problem in anthropology.
Prerequisite: ANTH486.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.
Credit Only Granted for: ANTH487 or ANTH477.

ANTH491 Applied Urban Ethnography (3 Credits)
The focus is on the use of applied ethnographic field methods in community assessment research in urban settings. Also, it will extend beyond most ethnographic training in which the emphasis is on being there, and relying predominantly on the classical ethnographic methods of recursive observations, participant observations, and a variety of approaches to interviewing.
Prerequisite: ANTH260. Jointly offered with ANTH617. Credit only grant ed for: ANTH468B, ANTH491, or ANTH617.
Formerly: ANTH468B.

ANTH492 Anthropology of the Immigrant Life Course (4 Credits)
Explores social issues affecting local immigrant populations through readings, research and service learning. Theorizing immigration as a social policy issue in the U.S. culture, students learn about the specific contributions that anthropology has made to the understanding of immigration: globalization on the one hand, and the context of daily life in local neighborhoods on the other.
Credit Only Granted for: ANTH498N, ANTH492, ANTH689N, or ANTH692.
Formerly: ANTH498N.

ANTH496 Field Methods in Archaeology (6 Credits)
Field training in the techniques of archaeological survey and excavation.

ANTH498 Advanced Field Training in Ethnography (1-8 Credits)
Experience in field research utilizing a variety of ethnographic methods of inquiry.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: ANTH498 or ANTH698.

AOSC - Atmospheric and Oceanic Science

AOSC123 Causes and Implications of Global Change (3 Credits)
Responsible policy and decision making on issues related to the global environment requires understanding of the basic scientific issues, relationships between the geophysical and biological sciences, the impacts on regional and global endeavors, and the political manner in which humans respond. This course embodies an integrated introduction to the broad scientific and social aspects of the global change problem.Cross-listed with GEOL123.
Credit Only Granted for: AOSC123, GEOG123, GEOL123, or METO123.
Formerly: METO123.

AOSC200 Weather and Climate (3 Credits)
Broad survey of the state of knowledge and problems of atmospheric science. Origin and structure of the atmosphere, meteorological observations, weather maps, forecasting, satellites, energetics, wind, general circulation, storms, severe weather, climate change, air pollution.
Prerequisite: MATH107, MATH110, or MATH115.
Recommended: Concurrent enrollment in AOSC201.
Formerly: METO200.

AOSC201 Weather and Climate Laboratory (1 Credit)
Laboratory exercises to supplement AOSC200, including weather observations, weather map analysis, use of the Internet, forecasting practice and climate modeling.
Corequisite: AOSC200.
Formerly: METO201.

AOSC247 Scientific Programming: Python (3 Credits)
A comprehensive introduction to scientific computation and visualization techniques with Python applied to data intensive questions in the Natural Sciences. The class emphasizes real-world applications, providing students with essential hands-on experience using Python for data analysis and visualization, developing analytical skills for observational and modeling data, and performing virtual experiments to distinguish data contributing factors. Students will gain an understanding of the scientific data issues including: signal vs noise, trend vs periodicity, mean vs extreme changes, and accuracy vs uncertainty. Students will gain extensive experience using command line linux. Skills including local and remote file transfer and synchronization, file and directory permission, utilities for diagnosing performance issues, and data compression.
Prerequisite: MATH140.
Recommended: Familiarity with basic descriptive statistics.
Credit Only Granted for: AOSC458J, AOSC247 or CMSC131.
Formerly: AOSC458J.

AOSC347 Computing and Data Analysis: Deciphering Climate Change Clues (3 Credits)
A comprehensive introductory course designed to prepare students to identify, interpret, and visualize Earth's climate variations observed in the past and projected into the future. The class emphasizes real-world applications, providing students with essential hands-on experience using MATLAB for data analysis and visualization, developing analytical skills for observational and modeling data, and performing virtual experiments to distinguish data contributing factors. Students will gain an understanding of the scientific issues concerning the modern global warming debate on detection and attribution including: signal vs noise, trend vs periodicity, natural vs anthropogenic forcing, local vs remote response, mean vs extreme changes, and accuracy vs uncertainty.
Prerequisite: MATH140.
Recommended: Familiarity with basic descriptive statistics.
Credit Only Granted for: AOSC347 or AOSC358L.
Formerly: AOSC358L.

AOSC358 Special Topics in Atmospheric and Oceanic Science (1-4 Credits)
Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.
Repeatable to: 12 credits.

AOSC375 Introduction to the Blue Ocean (3 Credits)
Oceans are an important component of the Earth System and this course builds towards Earth System Science education. Oceanography is an intrinsically interdisciplinary subject with strong connections to astronomy (tidal forces), biology (ecosystems), geography (world climate), geology (sea floor tectonics), and physics (waves). We begin with the history of ocean exploration and origin of Earth and life and learn about properties of seawater, air-sea interactions, atmospheric and oceanic circulation, El Nino-Southern Oscillation, waves, tides, and tsunamis.Cross-listed with GEOL375.
Credit Only Granted for: GEOL375 or METO375.

AOSC386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and must have a learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor and student's internship sponsor.
Formerly: METO386.

AOSC399 Independent Study in Academic Peer Mentoring (1-3 Credits)
Earn academic credit for the time spent supporting an AOSC course in the Academic Peer Mentoring Program (AMP).
Corequisite: TLTC333.
Repeatable to: 6 credits.

AOSC400 Physical Meteorology of the Atmosphere (3 Credits)
The application of basic classical physics, chemistry and mathematics t the study of the atmosphere. Composition of the atmosphere; energy sources and sinks (radiation in the atmosphere; radiative balance and radiative forcing of atmospheric processes); atmospheric thermodynamics; clouds and precipitation physics; atmospheric electricity and optics; mesoscale processes (e.g., orographic mesoscale phenomena and instabilities); air mass boundaries; severe weather, tropical cyclones; storms; global circulation.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of CMNS-Atmospheric & Oceanic Science department.
Formerly: METO400.

AOSC401 Climate Dynamics and Earth System Science (3 Credits)
Introduction of the earth and global climate systems and their major components: atmosphere, land, ocean, biosphere and cryosphere. Key processes governing the function of the earth's climate: Global energy balance and water cycle, climate dynamics (general circulation of the atmosphere and ocean) and climate physics (aerosol, cloud and rain), as well as climate variability and climate changes. Phenomena resulting from this coupled system including El Nino-Southern Oscillation, monsoons, and the hydrological cycle will be discussed, with a focus on how the Earth System responds to global warming.
Prerequisite: AOSC400 or AOSC200; and MATH141; and (PHYS161 or PHYS171). Or permission of instructor.

AOSC420 Physical Oceanography (3 Credits)
Ocean observations. Water masses, sources of deep, intermediate, and surface water. Mass, heat, and salt transport, and the meridional overturning circulation. Geochemical tracers and cycles, including carbon. Western boundary currents, mixed layers, and processes maintaining the thermocline. Coastal and estuarine processes. Surface waves and tides. the ocean's role in climate.
Prerequisite: MATH141 and PHYS141.
Recommended: AOSC200. Also offered as: GEOL670, AOSC670.
Credit Only Granted for: AOSC420, AOSC670, or GEOL670.

AOSC424 Remote Sensing of the Atmosphere and Ocean (3 Credits)
Many of the properties of the atmosphere, ocean, and land surface are most easily observed from satellite remote sensing. This course will provide students with a hands-on introduction to a variety of passive and active sensing techniques and sensors observing our changing environment. Topics include: orbital dynamics and electromagnetic properties of the atmosphere and surface; atmospheric emission characteristics and scattering; chemical composition and spectroscopy; temperature retrievals; detection and retrieval of aerosol, cloud and rain; ocean surface properties; sea surface temperature and color; active sensing of wind stress, sea level, and internal waves; time-dependent gravity; properties of vegetation and ice.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of instructor.

AOSC431 Atmospheric Thermodynamics (3 Credits)
Classical thermodynamics applied to both the dry and the moist atmosphere. Composition; phase changes of water; stability concepts; Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141).
Recommended: MATH246.
Credit Only Granted for: AOSC431 or METO431.
Formerly: METO431.

AOSC432 Dynamics of the Atmosphere and Ocean (3 Credits)
Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Geostrophic/balanced and ageostrphic/unbalanced motion. Circulation, vorticity, and potential vorticity. Introduction to the boundary layer.
Prerequisite: AOSC431.
Corequisite: MATH246.
Credit Only Granted for: AOSC432, METO432, or AOSC632.
Formerly: METO432.

AOSC434 Air Pollution (3 Credits)
Production, transformation, transport and removal of air pollutants. The problems of photochemical smog, the greenhouse effect, stratospheric ozone, acid rain and visibility. Analytical techniques for gases and particles.
Prerequisite: MATH241; or permission of CMNS-Atmospheric & Oceanic Science department.
Formerly: METO434.

AOSC436 Principles of Biogeochemistry (3 Credits)
An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with GEOL436.
Credit Only Granted for: GEOL436 or AOSC436.

AOSC437 Global Climate Change: Past and Present (3 Credits)
A highlight to the fact that global climate change is part of the Earth's past as well as of its present and future. Changes in climate that have occurred in the geologic past can be viewed as the Earth's natural climate variability. These changes are different from, though could be linked with, historical and present anthropogenically-induced climate change. We will discuss the modern climate system, the factors capable of forcing climate change on various time scales, the geologic proxies of past climate change and what these proxies tell us. Finally, we will compare and contrast past climate change with what is understood (and not understood) about modern climate change.
Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).
Restriction: Non-degree seeking students require permission of the instructor.

AOSC447 Machine Learning in Earth Science (3 Credits)
A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.
Prerequisite: Must have completed MATH140.

AOSC458 Advanced Topics in Atmospheric and Oceanic Science (1-4 Credits)
Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.
Repeatable to: 12 credits.

AOSC462 Ecohydrology (3 Credits)
Focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC662.
Credit Only Granted for: AOSC462 or AOSC662.

AOSC463 Water and Climate Systems (3 Credits)
Focuses on exploring the relationships between water, climate, land, energy, and the economy (the so called 'nexus') through an interwoven understanding of the physical, economic, and institutional relationships and constraints that influence management and decision-making process in water supply, energy generation and food production. The course emphasizes the use of integrated assessment (IA) modeling tools as a way to formalize these relationships and explore their implications. Lectures will be complemented with online discussion sessions and applied modeling exercises to get hands-on knowledge of practical solutions to nexus challenges.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC663.
Credit Only Granted for: AOSC463 or AOSC663.
Additional Information: This course is offered through a joint effort of the Earth System Science Interdisciplinary Center (ESSIC, part of UMDb Sciences) and the Joint Global Change Research Institute (a collaboration between UMD and the US Dept of Energyb Northwest National Laboratory).

AOSC470 Synoptic Meteorology (3 Credits)
Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitiude and mesoscale weather systems. Tropical meteorology. Weather forecasting using numerical and statistical models. Prediction of weather phenomena on the global, syoptic, meso, and local scales. Analysis of surface and upper air data; Norwegian cyclone model; introduction to weather forecasting.
Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.
Credit Only Granted for: AOSC470, AOSC600, or METO600.

AOSC472 Mesoscale Meteorology (3 Credits)
Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.
Prerequisite: AOSC432, AOSC600, AOSC610, or AOSC470.
Restriction: Non-degree-seeking students require the permission of the instructor. Jointly offered with AOSC602.
Credit Only Granted for: AOSC472 or AOSC6 02.

AOSC475 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)
The fundamentals of the Earth's carbon cycle, a key biogeochemical cycl that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO2 and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration.Jointly offered with AOSC675.
Credit Only Granted for: AOSC475 or AOSC6 75.

AOSC480 Introduction to Earth System Science (3 Credits)
Focuses on exploring the relationships between the atmosphere, the oceans, water, climate, land, vegetation, energy, and human systems through an interwoven understanding of the physical, biogeochemical and socioeconomic relationships and constraints that influence management and decision-making processes in societal issues such as water supply, power generation, food production, ecosystem services and others. The course introduces integrated assessment (IA) science as a framework to formalize these relationships and explore their implications.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC680.
Credit Only Granted for: AOSC480 or AOSC680.
Additional Information: This course is offered through a joint effort of the Department of Atmospheric and Oceanic Science (AOSC) and the Earth System Science Interdisciplinary Center (ESSIC).

AOSC484 Climate System Modeling (3 Credits)
Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Nino and global warming.Jointly offered with AOSC684.
Credit Only Granted for: AOSC484 or AOSC6 84.

AOSC493 Senior Research Project I (3 Credits)
Technical writing and oral presentation skills. Planning, writing, and presenting a plan for research in the geosciences.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.
Restriction: Must be in Atmospheric and Oceanic Science program; or permission of instructor.

AOSC494 Atmospheric and Oceanic Science Seminar (1 Credit)
Exposure to a wide range of contemporary topics in atmospheric, oceanic, and climate sciences, to foster research interests and promote critical thinking through the weekly AOSC departmental seminar series.
Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.

AOSC498 Senior Research Project II (3 Credits)
The project will be based on the research or development plan created in AOSC493. It may be completed with the approval of a faculty advisor in conjunction with an internship. Final written thesis and oral defense will be expected.
Prerequisite: AOSC493.

AOSC499 Special Problems in Atmospheric Science (1-3 Credits)
Research or special study in the field of meteorology and the atmospheric and oceanic sciences.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.
Repeatable to: 6 credits.
Formerly: METO499.

ARAB - Arabic

ARAB101 Elementary Arabic I (3 Credits)
Introduction to modern standard Arabic in both its spoken and written form. Equal emphasis on all four skill areas: speaking, listening, reading, and writing.

ARAB104 Elementary Modern Standard Arabic I-II (6 Credits)
An intensive course focusing on developing functional proficiency in the standard Arabic language, both written and formal spoken. Begins with script and phonology, and develops into a limited range of situation-based texts and topics that build vocabulary, grammar, general communicative competence and cultural awareness.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB105 Elementary Modern Standard Arabic III-IV (6 Credits)
Continuation of ARAB104, developing further linguistic proficiency in Standard Arabic, both written and formal spoken. Covers an extended range of situation-based texts and topics that build vocabulary, grammar, general communicative competence and cultural awareness.
Prerequisite: ARAB104; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARAB204 Intermediate Modern Standard Arabic I (6 Credits)
Covers topics related to contemporary Arabic society, literature and culture in standard written and formal spoken Arabic. Acquisition of more complex grammatical structures, expanding vocabulary, and reading, to develop a better understanding of the formal aspects of using MSA.
Prerequisite: ARAB105; and must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB205 Intermediate Modern Standard Arabic II (6 Credits)
Continuation of ARAB204, with exposure to a wide range of Arabic texts from different domains. Focus on vocabulary, more complex grammatical forms, and a better understanding of the formal aspects of using MSA as well as the cultural aspects of using the language.
Prerequisite: ARAB204; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB206 Egyptian Colloquial Arabic I (3 Credits)
Develops communicative skills and cultural knowledge in Egyptian Arabic. Focuses on various social interactions, work and school situations, as well as specifics of pronunciation and grammar of the Egyptian dialect. Designed for students who have completed two years of the regular Arabic sequence classes (104-105 and 204-205) or equivalent.
Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB207 Egyptian Colloquial Arabic II (3 Credits)
Further develops communicative skills and cultural knowledge in Egyptian Arabic, extending range of contexts and types of social interaction. Focuses on various aspects of Egyptian popular culture.
Prerequisite: ARAB206; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB253 The Arabian Nights and the Art of Storytelling (3 Credits)
One Thousand and One Nights (Arabic Kitab alf laylah wa laylah; English The Arabian Nights) is a collection of stories and folk tales compiled in Arabic during the Islamic Golden Age, and explores how this text has shaped Western perceptions of the Arabic-Islamic world as well as its impact on the literary production of similar works in Europe and the Middle East. Taught in English.
Credit Only Granted for: ARAB 298B or ARAB253.
Formerly: ARAB298B.

ARAB269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARAB282 The Arab-Israeli Conflict through Readings in Translation (3 Credits)
Literary works by both Arab and Jewish authors depicting the impact of the conflict on society and individuals. In English.

ARAB298 Special Topics in Arabic Studies (1-3 Credits)
Language and content to be announced when course is offered.
Repeatable to: 9 credits if content differs.

ARAB304 Advanced Modern Standard Arabic I (3 Credits)
Advanced grammar, reading, writing, speaking in Arabic; study of contemporary Arabic society, politics, and culture.
Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.
Formerly: ARAB301.

ARAB305 Advanced Modern Standard Arabic II (3 Credits)
Further advanced grammar, reading, writing, speaking in Arabic; study of current issues within the Arab World.
Prerequisite: ARAB304; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB315 Intensive Advanced Arabic I (6 Credits)
Intensive training in written and spoken Arabic at the Advanced-low level of proficiency. Additional intensive training in effective listening and reading skills. Substantial cultural component exploring traditions and customs of the Middle East in addition to current social issues.
Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed ARAB304.

ARAB316 Intensive Advanced Arabic II (6 Credits)
Intensive training in written and spoken Arabic at the Advanced-mid level of proficiency. Additional training in effective listening and reading skills. Substantial cultural component exploring traditions and customs of the Middle East in addition to current social issues.
Prerequisite: ARAB304 or ARAB315; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed ARAB305.
Credit Only Granted for: ARAB305 or ARAB316.

ARAB321 Arabic Media (3 Credits)
Examines the role of the Arabic media in shaping public opinion and influencing relations between the Arab world and the non-Arab world. Focus on content and acquistion of Modern Standard Arabic. Taught in Arabic.
Prerequisite: ARAB305; or permission of instructor.

ARAB341 Filming War Zones: Representations of Wars in Iraq and Chechnya (3 Credits)
Comparative study of ideological and cultural discourses in war films covering military conflicts in Iraq and Chechnya in late 20th-early 21st centuries. Materials include American, Middle Eastern, and Russian feature films and documentaries; theories of propaganda, ideology and popular culture. Taught in English.Cross-listed with FILM341.
Credit Only Granted for: ARAB341 or FILM341.

ARAB369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARAB386 Experiential Learning (3-6 Credits)
Pre-professional experience in research, analysis and writing in a work setting. Project proposal approved by faculty and internship sponsor. Junior standing.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB398 Special Topics in Arabic Studies (3 Credits)
In-depth study of a particular aspect of Arabic culture, literature, and language. Specific topic to be announced when offered. Taught in Arabic.
Prerequisite: ARAB304.
Repeatable to: 6 credits if content differs.

ARAB399 Independent Study In Arabic (1-3 Credits)
Research and writing or specific readings on a topic selected by the student and supervised by a faculty member on the Department of Arabic Studies. To be planned during semester preceding registration.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB401 Readings in Arabic Literature (3 Credits)
A survey of Modern Arabic literature is given through a range of selected texts. Texts are studied as literature with constant reference to the social, cultural and political contexts in which they were written. Taught in Arabic.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB402 Arabic English Translation (3 Credits)
In-depth practicum in translation from Arabic to English. Exploration of the complexities of translation as an exercise of textual interpretation and linguistic transformation.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB410 Ideology of Stereotyping: American and Middle Eastern Film and Television (3 Credits)
Exploration of cultural stereotyping, using examples from American and Middle Eastern cinema and television. Students will examine ideological constructs of Otherness and its history, including Orientalism; propaganda techniques; and audiovisual aspects of stereotyping. While the focus is on American and Middle Eastern cultural production, the course will engage broader issues of stereotyping in contemporary society and media. Readings include theories of propaganda and cultural ideology.
Credit Only Granted for: ARAB410, ARAB499B (2014 and 2015), ARAB499Q, FILM429Q.
Formerly: ARAB499Q.

ARAB489 Special Topics in Arabic Studies (3 Credits)
In-depth study of particular aspect of Arabic language and culture. Specific topics to be announced when course is offered. Taught in Arabic.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB499 Special Topics in Arabic Studies (3 Credits)
In-depth study of particular aspect of Arabic culture, literature and language. Specific topic to be announced when course is offered.
Repeatable to: 6 credits if content differs.

ARCH - Architecture

ARCH101 Foundations in Architecture (1 Credit)
To pursue any field of knowledge one must first begin with the basics. By learning the 'language' of architecture one can explore the foundations of the architectural profession through interactive and experiential learning.
Prerequisite: UNIV100; or permission of ARCH-Architecture Program.
Restriction: Freshman standing.

ARCH150 Discovering Architecture (3 Credits)
Introduction to architecture and design studio education. The course examines fundamental design principles and skills related to architecture. The design studio projects apply ideas and concepts introduced in lectures, readings and on site visits. The design studio projects are both analytic and synthetic in nature. The explicit goals of the course are: To explore the discipline of architecture; To promote visual thinking and representational skills; To develop analytic design thinking skills; To learn some of the conventions of architectural representation; To enhance cultural awareness of architecture and design.
Prerequisite: Permission of ARCH-Architecture Program.

ARCH170 Design Thinking and Architecture (3 Credits)
Examines conceptual, perceptual, behavioral, and technical aspects of the built environment, and methods of analysis, problem-solving, and design implementation.

ARCH171 Design Thinking and Making in Architecture (3 Credits)
Examines iterative design processes and critical thinking skills through active learning and design thinking methodologies to solve problems and apply design as a lens of inquiry and exploration. Students will understand Design Thinking through interactive and experiential learning.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH200 Design Media and Representation I (3 Credits)
Study of architectural representation in physical and digital design media. Examine visual literacy and visual communications through applied drawing, modeling and visual making to explore the role of design media and representation in design and design thinking.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH201 Elements and Principles of Architecture (1 Credit)
Survey of fundamental elements and principals of architecture and architectural education. Frames study of architecture as a profession, discipline and critical practice.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH223 History of Non-Western Architecture (3 Credits)
Survey of non-western architectural history, including prehistoric and vernacular; ancient civilizations and the Indus valley; the Islamic world; Hindu and Buddhist traditions of Asia; and pre-European Africa and the Americas.

ARCH225 History of World Architecture I (3 Credits)
Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture

ARCH226 History of World Architecture II (3 Credits)
Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture

ARCH227 History of World Architecture III (3 Credits)
Survey of architectural history from 1800 to present.
Restriction: Sophomore standing or higher.

ARCH242 Basic Architectural Drawing (3 Credits)
Study of drawing as a learned skill with emphasis on observation, documentation, analysis, and synthesis. This introductory course immerses students in visual thinking and learning how to see through drawing. The course explores the traditional conventions of architectural drawing (orthographics, isometrics, axonometrics, and linear perspective) as well as abstract and pictorial visualization techniques primarily through freehand drawing and sketching.
Prerequisite: ARCH170; or ARCH171.

ARCH270 Design in Practice (3 Credits)
Case studies and hands-on design projects ranging in scale from a product to a building to give students insight into the process by which architects work both individually and collaboratively to put disciplinary knowledge and expertise into practice to shape our built environment.

ARCH271 People, Planet, and Profit: Building Sustainable Places (3 Credits)
An introduction to the four disciplines represented in the School: architecture and urban design, community planning, historic preservation, and real estate development, that work to create a more sustainable environment for the future to create a more sustainable environment for the future using our interpretation of the quadruple bottom line: socio-cultural, economic, environmental, and design sustainability. Students will be provided with an understanding of the fundamental scholarship and processes of each of these disciplines and examine the intersections between them. Additionally, they will learn by applying the approaches of the four disciplines through a series of field studies.Cross-listed with RDEV250.
Credit Only Granted for: ARCH271 or RDEV250.

ARCH288 Selected Topics in Sustainability (3 Credits)
Selected Topics in Architectural Sustainability
Restriction: Must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits.

ARCH289 Independent Studies in Architectural Sustainability (1-4 Credits)
Independent Studies in Architectural Sustainability. Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH300 Design Media and Representation II (3 Credits)
Study of architectural representation in physical and digital design media. Examine visual communications and speculative visual studies through applied drawing, modeling and making to explore expanded roles of representation in design and design thinking.
Prerequisite: ARCH200; or permission of ARCH-Architecture Program.
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH343 Intermediate Architectural Drawing (3 Credits)
Development of media technique (including color pencil, pastel, graphite, ink, and watercolor) as vehicles for investigating color, composition, and abstraction. Exploration of historical and contemporary issues of representation in architectural visual communication.
Prerequisite: ARCH242; or permission of ARCH-Architecture Program.

ARCH386 Experiential Learning (1-6 Credits)
Learning experience tied to internship of specified duration with targeted learning outcomes.
Restriction: Must have learning proposal approved by faculty sponsor and student's internship sponsor; and sophomore standing or higher; and permission of ARCH-Architecture Program.

ARCH400 Architecture Design Studio I (6 Credits)
Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

ARCH401 Architecture Design Studio II (6 Credits)
Continuation of ARCH 400 with introduction to building typology, urban and contextual issues, design of the vertical surface, and architectural interiors.
Prerequisite: Minimum grade of C- in ARCH400.
Restriction: Must be in Architecture (B.S.) program.

ARCH402 Architecture Design Studio III (6 Credits)
Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical.
Prerequisite: Minimum grade of C- in ARCH401.
Restriction: Must be in Architecture (B.S.) program.

ARCH403 Architecture Design Studio IV (6 Credits)
Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.
Prerequisite: Minimum grade of C- in ARCH402.
Restriction: Must be in Architecture (B.S.) program.

ARCH404 Graduate Architecture Design Studio I (6 Credits)
Introduction to architectural design with particular emphasis on conventions and principles of architecture , visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses. Offered fall only.
Recommended: For 3 1/2 year graduate students only.
Restriction: Must be in Architecture (Master's) program.

ARCH405 Graduate Architecture Design Studio II (6 Credits)
Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical. Offered spring only.
Prerequisite: Minimum grade of C- in ARCH404.
Restriction: Must be in Architecture (Master's) program.

ARCH406 Graduate Architecture Design Studio III (6 Credits)
Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.
Prerequisite: Minimum grade of C- in ARCH405.
Restriction: Must be in Architecture (Master's) program.

ARCH407 Graduate Architecture Design IV (6 Credits)
Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high-density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit Oriented Development, density, sustainable development, building typology, and street design.
Prerequisite: Minimum grade of C- in ARCH406.
Restriction: Must be in Architecture (Master's) program.

ARCH408 Special Topics Architecture Design Studio (6 Credits)
Design Studio course to examine topical problems in architecture and urban design.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 12 credits if content differs.
Additional Information: May also be taken for repeat credit for ARCH400, ARCH401, ARCH402, or ARCH403 only by permission of Architecture Program Director.

ARCH410 Architecture Technology I (4 Credits)
First course in a four course sequence which develops the knowledge and skills of architectural technology. Addresses climate, human responses to climate, available materials, topography and impact on culture. Principles of assembly, basic structural principles and philosophies of construction.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And PHYS121; and (GEOG140, GEOG123, GEOL120, AOSC123, GEOL123, or BSCI205).
Corequisite: ARCH400.
Restriction: Must be in Architecture (B.S.) program.

ARCH411 Technology II (4 Credits)
Second course in a four course sequence. Building construction processes and terminology; use and performance characteristics of primary building materials; principles of structural behavior related to the building systems; equilibrium and stability, stiffness and strength, types of stress, distribution of force and stress, resolution of forces, reactions, bending moments, shear, deflection, buckling.
Prerequisite: ARCH410.
Corequisite: ARCH401.
Restriction: Must be in Architecture (B.S.) program.

ARCH412 Architecture Technology III (4 Credits)
Third course in a four course sequence. Design of steel, timber, and reinforced concrete elements and subsystems; analysis of architectural building systems. Introduction to design for both natural and man-made hazards.
Prerequisite: Minimum grade of C- in ARCH411.
Corequisite: ARCH402.
Restriction: Must be in Architecture (B.S.) program.

ARCH413 Architecture Technology IV (4 Credits)
Final course in a four course sequence. Theory, quantification, and architectural design applications for HVAC, water systems, fire protection electrical systems, illumination, signal equipment, and transportation systems.
Prerequisite: ARCH412.
Corequisite: ARCH403.
Restriction: Must be in Architecture (B.S.) program.

ARCH418 Selected Topics in Architectural Technology (3 Credits)
Selected Topics in Architectural Technology
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH419 Independent Studies in Architectural Technology (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH420 History of American Architecture (3 Credits)
American architecture from the late 17th to the 21st century.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture program.

ARCH422 History of Greek Architecture (3 Credits)
Survey of Greek architecture from 750-100 B.C.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH423 History of Roman Architecture (3 Credits)
Survey of Roman architecture from 500 B.C. To A.D. 325.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH425 History of Architecture I (3 Credits)
Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH225 or ARCH425.
Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH426 History of Architecture II (3 Credits)
Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH226 or ARCH426.
Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH427 Theories of Architecture (3 Credits)
Survey of architectural theories - theories of architectural design, representation and urban design from antiquity to the present day.
Prerequisite: ARCH426; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH428 Selected Topics in Architectural History (1-4 Credits)
Selected Topics in Architectural History
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH429 Independent Studies in Architectural History (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH430 Measuring Sustainability in Architecture (3 Credits)
Studies metrics of sustainability as included in rating standards, including LEED. All students will take the LEED GA test.
Credit Only Granted for: ARCH430 or ARCH418M.
Formerly: ARCH418M.

ARCH433 History of Renaissance Architecture (3 Credits)
Renaissance architectural principles and trends in the 15th and 16th centuries and their modifications in the Baroque period.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH435 History of Contemporary Architecture (3 Credits)
Architectural history from World War II to the present.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH443 Visual Communication For Architects (3 Credits)
Investigation of the relationship between drawing from life and architectural drawing, the conventions of architectural drawing and the role of architectural drawing as a means to develop, communicate, and generate architectural ideas.
Corequisite: ARCH400.
Restriction: Must be in Architecture (Master's) program; and must be in the 3.5 year M. ARCH program.

ARCH445 Visual Analysis of Architecture (3 Credits)
Study of visual principles of architectural and urban precedents through graphic analysis. Exercises include on-site observation, documentation and analysis. Focuses on the development of an architect's sketchbook as a tool for life-long learning.
Prerequisite: ARCH400; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH448 Selected Topics in Visual Studies in Architecture (3 Credits)
Selected Topics in Visual Studies in Architecture
Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH449 Independent Studies in Visual Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH456 Great Cities (3 Credits)
Case studies from a selection of the great cities of the world.
Prerequisite: Permission of ARCH-Architecture Program.

ARCH458 Selected Topics in Urban Design (3 Credits)
Selected Topics in Urban Design
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH459 Independent Studies in Urban Design (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH460 Site Analysis and Design (3 Credits)
Principles and methods of site analysis; the influence of natural and man-made site factors on site design and architectural form.
Restriction: Permission of ARCH-Architecture Program.

ARCH461 Sustainability in Architecture (3 Credits)
Strategies of sustainability as related to the broader context of architectural problem solving.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH418S or ARCH461.
Formerly: ARCH418S.

ARCH462 Methods & Materials of Building Construction (3 Credits)
Building Construction methods and materials are examined through case studies to explore the means and techniques applied to the material execution of buildings and BIM. Focus on an understanding of the organization of the design and construction process and awareness of building and zoning codes, material systems and types.
Prerequisite: PHYS121 or equivalent; and MATH120 or MATH140 or equivalent; or permission of the ARCH-Architecture Program.
Restriction: Must be in a major in undergraduate or graduate ARCH program or Construction Project Management Minor.
Credit Only Granted for: ARCH410 or ARCH462.

ARCH463 Sustainable Systems in Architecture (3 Credits)
Sustainable systems in architecture examines the nature of the global problem, environmental economics, understanding the local environment, bioclimatic design, solar control and shading, solar access zoning, residential scale energy design issues, commercial scale energy design issues, and urban scale energy design issues.
Prerequisite: ARCH462.
Restriction: Must be in a major in undergraduate or graduate ARCH program.

ARCH464 Architectural Structures I (3 Credits)
This course covers the basic principles of architectural structures, including the influence of geometric, sectional, and material properties related to flexure and shear in beam and framed systems; vector mechanics with application to analysis of trusses, catenaries, and arches; diagrammatic analysis of beams for bending moment, shear, and deflection as well as the study of structural framing systems for vertical and lateral loads.
Prerequisite: ARCH462, ARCH463, and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.
Corequisite: ARCH401 or ARCH406.
Restriction: Must be in either BS in Architecture or M.Architecture Program.
Credit Only Granted for: ARCH411 or ARCH464.

ARCH465 Architectural Structures II (3 Credits)
The basic principles of elastic behavior for different materials such as wood, steel, concrete, and composite materials and compares the properties and applications of materials generally will be covered. It investigates cross sectional stress and strain behavior in flexure and in shear, and torsion as well as the stability of beams and columns. The qualitative behavior of combined stresses and fracture in materials is also covered.
Prerequisite: ARCH464 and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.
Restriction: Must be in either BS in Architecture or M. Architecture Program.
Credit Only Granted for: ARCH412 or ARCH465.

ARCH466 Environmental Systems in Architecture (3 Credits)
Environmental systems in architecture presents the theory, quantification, and architectural design implications for heating ventilating and air conditioning, water and waste, fire protection, electricity, illumination, acoustics, and vertical transportation.
Prerequisite: ARCH462 and ARCH463.
Corequisite: ARCH403 or ARCH406.
Restriction: Must be in either BS in Architecture or M. Architecture Program.
Credit Only Granted for: ARCH413 or ARCH466.

ARCH467 Integrated Project Delivery (3 Credits)
Integrated Project Delivery is examined from design to implementation through an exploration of building construction, architectural design and construction management perspectives.
Restriction: Must be in a major in ARCH-Architecture Program; or must be in Construction Project Management Minor.

ARCH470 Computer Applications in Architecture (3 Credits)
Introduction to computer utilization, with emphasis on architectural applications.
Prerequisite: ARCH400; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH472 Building Information Modeling Communication and Collaboration (3 Credits)
Building Information Modeling is explored as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.
Restriction: Must be in a major in ARCH-Architecture Program; or must be in the Construction Project Management Minor.
Credit Only Granted for: ARCH678I or ARCH472.
Formerly: ARCH678I.

ARCH474 Integrated Education in Architecture NAAB/IDP (1 Credit)
Examine National Architectural Accrediting Board (NAAB) student performance criteria in the context of architectural education. Contextualize NAAB accredited curricula and examine the relationship to graduate study and professional practice, including the Intern Development Program (IDP) of the National Council of Architectural Registration Boards (NCARB).
Restriction: Must be in a major in ARCH-Architecture Program.

ARCH478 Selected Topics in Architecture (1-4 Credits)
Selected Topics in Architecture
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH479 Independent Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH481 The Architect in Archaeology (3 Credits)
The role of the architect in field archaeology and the analysis of excavating, recording, and publishing selected archaeological expeditions.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH482 The Archaeology of Roman and Byzantine Palestine (3 Credits)
Archaeological sites in Palestine (Israel and Jordan) from the reign of Herod the Great to the Moslem conquest.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH483 Field Archaeology (3 Credits)
Participation in field archaeology with an excavation officially recognized by proper authorities of local government.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH488 Selected Topics in Architectural Preservation (1-4 Credits)
Selected Topics in Architectural Preservation.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH489 Independent Studies in Architectural Preservation (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

AREC - Agricultural and Resource Economics

AREC200 The Chesapeake Bay Ecosystem: Intersection of Science, Economics, and Policy (3 Credits)
The Chesapeake Bay is one of the most studied and monitored ecosystems in the world. To develop effective policies to restore this system to a healthier status requires integrating what we know about the biological and physical properties of the system with our understanding of the human dimension. Issues such as achieving nutrient reduction goals, restoring healthy blue crab and oyster fisheries in the bay will be used to demonstrate how economics interacts with science to guide policies that can be effective in achieving Bay restoration goals.

AREC240 Introduction to Economics and the Environment (3 Credits)
Costs and social impacts of pollution and human crowding in the modern environment. The economic, legal and institutional causes of these problems. Public policy approaches to solutions and the costs and benefits of alternative solutions.
Credit Only Granted for: ECON200, AREC240, or AREC250.

AREC241 Environment, Economics and Policy (4 Credits)
Studies the relationship between the economy, environment and policy. Causes of modern environmental problems and policies to address them. Importance of production, consumption, externalities, property rights and public goods in environmental issues. Technological and incentive-based solutions to environmental problems.
Credit Only Granted for: AREC240 or AREC241.

AREC250 Elements of Agricultural and Resource Economics (3 Credits)
An introduction to economic principles of production, marketing, agricultural prices and incomes, farm labor, credit, agricultural policies, and government programs.
Credit Only Granted for: ECON200, AREC240 or AREC250.

AREC260 The Science of Gender in Economics and Development (3 Credits)
Describes the process by which various scientific disciplines, including anthropology, evolutionary biology, psychology and economics do research on the topic of gender. We will examine the current state of the literature on the reason why different sexes exist and how sex translates into gender across different societies today. With a better understand of the source of gender, we will examine how researchers are learning about the reasons behind the highly divergent economic outcomes for men and women today. The class will discuss these issues in the context of the labor market in developed countries like the US (why are there fewer women in high paying STEM jobs?, for example) and in the context of a wide variety of markets in developing countries (what role do women play in agriculture, health and politics?, for example). A particular focus of the class will be on techniques for learning more about the underlying reasons for these differences, how they can be overcome and whether women play a special role in improving economic outcomes in the poorest parts of the world.
Recommended: Completion of introductory statistics recommended but not required.

AREC306 Farm Management and Sustainable Food Production (3 Credits)
The organization and operation of farm businesses are explored through principles of management, financial analysis, production economics, marketing, and business planning. These farm management principles are presented in the context of a sustainable food production system.

AREC326 Intermediate Applied Microeconomics (3 Credits)
Deepens and broadens your ability to apply rigorous economic analysis skills to a broad range of problems.
Prerequisite: ECON200, AREC250, or AREC240; and ECON201. And MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.
Credit Only Granted for: ECON306, ECON326, AREC489M, or AREC326.
Formerly: AREC489M.

AREC345 Global Poverty and Economic Development (3 Credits)
This interdisciplinary course explores social and economic development around the world. Topics include geography, democratization, political instability and conflict, health and education, agricultural development, micro-entrepreneurship, and an introduction to impact evaluation methods used to evaluate the efficacy of public policy aimed at alleviating poverty.

AREC357 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)
Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.Cross-listed with: GERM457.

AREC360 Global Agriculture: Developing Extension Education & Agriculture Technologies in Africa (3 Credits)
Identifies challenges faced by farmers in Nimba County, Liberia, and works collaboratively across borders to discuss these challenges and develop extension education programming that will be implemented in the region in order to empower local farmers. The course is designed to create a paradigm shift for both cohorts of students who will educate and learn from each other in what is now becoming a critical context - the globalized workspace. UMD and LICC students will be grouped together to identify and develop particular thematic areas most needed by local farmers, and then as a cohort create a week-long extension program to be implemented on the ground.
Restriction: Permission of AGNR-Agricultural & Resource Economics department.

AREC365 World Hunger, Population, and Food Supplies (3 Credits)
An introduction to the problem of world hunger and possible solutions to it. World demand, supply, and distribution of food. Alternatives for leveling off world food demand, increasing the supply of food, and improving its distribution. Environmental limitations to increasing world food production.

AREC380 Data Science for Environmental and Resource Economics (3 Credits)
An introduction to principles of data science using modern, open source software tools with applications to important problems in environmental, energy and resource economics. Topics include data wrangling, exploratory data analysis and visualization, modeling, forecasting, practices for reproducible research, and communication of results.
Prerequisite: AREC240, AREC241, AREC250, or ECON200.

AREC382 Computer-Based Analysis in Agricultural and Resource Economics (3 Credits)
Analysis of economic data using computer spreadsheets. Exercises include analyses of forest land shares, farmer willingness to pay, farm production planning, fisheries management, corn prices, and index numbers. Analyses features use of cell formulas, spreadsheet functions, Excel's Data Analysis Tool and Solver. This is a lab course featuring experimental learning.
Prerequisite: STAT100, MATH107, or MATH111; or students who have taken courses with comparable content may contact the department. And AREC240, AREC250, or ECON200; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC182 or AREC382.
Formerly: AREC182.

AREC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of AGNR-Agricultural & Resource Economics department.
Restriction: Junior standing or higher.

AREC388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Must be in the AGNR Honors program.
Repeatable to: 6 credits if content differs.

AREC399 Special Problems (1-3 Credits)
Concentrated reading and study in some phase of a problem in agricultural and/or natural resource economics.
Repeatable to: 6 credits if content differs.

AREC405 Economics of Production (3 Credits)
The use and application of production economics in analysis of firm and policy decisions. Production functions, cost functions, multiple product and joint production, and production processes through time.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC422 Econometric Analysis in Agricultural and Environmental Economics (3 Credits)
This course offers a hands-on introduction to econometrics. Students will explore the linear regression model from the ground up by analyzing real-world datasets and learning how to distinguish causation from correlation. They will gain practical experience using econometrics to address important questions in agricultural economics and environmental economics.
Prerequisite: 1 course from (AREC326 or ECON326); and 1 course from (ECON230, ECON321, or BMGT230).
Credit Only Granted for: ECON422, ECON424, or AREC422.

AREC426 Economic Methods and Food Consumption Policy (3 Credits)
An overview of major econometric tools used by policy makers, economists and social scientists to analyze the effects of food consumption policy. Major food assistance programs in the United States such as SNAP, the School Lunch Program and the School Breakfast Program will be discussed.
Prerequisite: AREC326; or ECON326.
Credit Only Granted for: AREC489O or AREC426.
Formerly: AREC489O.

AREC427 Commodity Pricing and Markets (3 Credits)
Economic theory as applied to the marketing of agricultural commodities. How commodity prices vary with current demand and production, and how prices are linked over time, across space, and across grades.
The role played by contractual arrangements, cooperative marketing, vertical integration, and governmental policies in commodity marketing strategies.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC430 Introduction to Agricultural and Resource Law (3 Credits)
Survey of law with emphasis on problems and applications related to agricultural and natural resource economics. The course emphasizes strategies for managing legal risk arising from ownership, management, and use of agricultural resources. Students will get practical information to utilize in personal or professional settings. Contract law, constitutional law, tort law, property law, real estate transactions, business organization, estate planning, and debtor.
Prerequisite: ECON326 or AREC326.
Credit Only Granted for: AREC430 or AREC489K.
Formerly: AREC489K.

AREC431 Agricultural Water Quality: Policy and Legal Issues (3 Credits)
An overview of the American and Maryland legal systems and sources of legal information as it pertains to water quality and agriculture.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC489L or AREC431.
Formerly: AREC489L.

AREC433 Food and Agricultural Policy (3 Credits)
Economic and political context of governmental involvement in the farm and food sector. Historical programs and current policy issues. Analysis of economic effects of agricultural programs, their benefits and costs, and comparison of policy alternatives. Analyzes the interrelationship among international development, agricultural trade and general economic and domestic agricultural policies.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC435 Commodity Futures and Options (3 Credits)
The economics and institutional features of commodity futures and options markets. Students will develop a basic understanding of the underlying price relationships between cash and futures markets and will apply this information to business risk management decision making.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

AREC445 Agricultural Development, Population Growth and the Environment (3 Credits)
Development theories, the role of agriculture in economic development, the agricultural policy environment, policies impacting on rural income and equity, environmental impacts of agricultural development.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC446 Sustainable Economic Development (3 Credits)
Examine why socially equitable and environmentally sustainable economic growth is difficult to achieve. It explores the interactive dynamics of environmental degradation, human capital, inequality and institutions. Emphasis is on the role of market imperfections and political failure in explaining the persistence of extractive economic institutions that hinder sustainable development.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC446 or AREC489G.
Formerly: AREC489G.

AREC447 The Economy of China (3 Credits)
An introductory survey course of economic development in China with emphasis on understanding the process of economic reform in mainland China since 1978.
Prerequisite: AREC326, ECON306, or ECON326.
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness).

AREC453 Natural Resources and Public Policy (3 Credits)
Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.
Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics). Cross-listed with ECON453.
Credit Only Granted for: AREC453 or ECON453.

AREC454 The Economics of Climate Change (3 Credits)
The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON484.
Credit Only Granted for: AREC454 or ECON484.

AREC455 Economics of Land Use (3 Credits)
Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON485.
Credit Only Granted for: AREC455 or ECON485.

AREC456 Energy and Environmental Economics (3 Credits)
Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation , climate change, and transportation policies.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON486.
Credit Only Granted for: AREC456 or ECON486.

AREC457 Energy, Climate Change, and Options for a Low-Carbon Economy (3 Credits)
Provides a primer in the physics and atmospheric chemistry of climate change, describes what the effects of climate change may be and explains how energy generation and use in various sectors of the economy contribute to greenhouse gas. It presents policy options meant to curb the use of fossil fuels (e.g., carbon taxes), improve energy efficiency (e.g., standards and incentives), and identifies possible drawbacks or unintended effects of such policies. Students will also study adaptation from the engineering, policy and anthropology points of view. The course further covers other aspects of climate change, as the potential effect of climate change on human health, cultural artifacts and the built environment, and sensitive ecological systems, and the legal implications of carbon storage options.
Recommended: ECON200. And AREC326; or ECON326.
Restriction: Junior standing or higher.

AREC481 Environmental Economics (3 Credits)
An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Environmental Science & Policy-Env Economics; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts program). Cross-listed with: ECON481.
Credit Only Granted for: ECON481 or AREC481.

AREC489 Special Topics in Agricultural and Resources Economics (3 Credits)
Repeatable to: 9 credits.

ARHU - Arts and Humanities

ARHU158 Explorations in Arts and Humanities (3 Credits)
A first-year innovation and research experience. It introduces multiple disciplinary perspectives within a given theme to understand human beings, cultures and societies. Students will learn about key questions, concepts, methods, and practices within ARHU and will engage in original humanistic research while working with campus and college tools and resources.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and freshman standing.

ARHU230 Introduction to Humanities, Health, and Medicine (3 Credits)
An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: ENGL289C.
Credit Only Granted for: ARHU230 or ENGL289C.

ARHU240 Cultural Institutions of the United States (3 Credits)
An introduction to cultural institutions in the United States, while providing student exposure to the professional environment artist find themselves in. In order for artist and arts administrators to succeed after their educational experience it is critical to understand the history of their respective field, and which events and questions have shaped, and are shaping, their industry. This course is very much an interdisciplinary initiative. Over the past century the arts have become ever-more integrated with one another resulting in a requirement of not only understanding one discipline, but how other disciplines affect a particular practice.

ARHU269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARHU269A Morocco: In the Footsteps of the Beat Generation (3 Credits)
Educates students about the history, culture and socio-political situation in Morocco through the reading of fiction related to this country. The focus will be on the intersection of American and Moroccan culture and will cover film, music and literature. The American perception of the 'orient' has historically been channeled through the French characterization of Arab societies in North Africa. This course aims to disentangle this western mythology from reality in Morocco. Some of the themes addressed will be globalization, colonialism, racism, orientalism, and women's oppressionCross-listed with: ENGL269M.
Credit Only Granted for: ARHU269A or ENGL269M.

ARHU275 Scriptwriting for Theater, Film, and Television (3 Credits)
Introduction to the theory and practice of scriptwriting with an opportunity to read, view, evaluate, write, and revise texts meant to be performed. Students will practice writing for the stage, film, and television and also examine selected scripts, performances, and film and television clips as models for their own creative work. Students will complete frequent writing exercises, participate in workshops, and learn to apply scholarship to the analysis and critique of scripts.Cross-listed with: ENGL275.
Credit Only Granted for: ENGL275 or ARHU275.

ARHU286 Experiential Learning (3-6 Credits)
Designed for students who have completed fewer than 60 credits, students who are in their first semester at the University of Maryland, and/or students who wish to complete legislative internships, research-based internships, some start-up internships and some remote internships. All students must be enrolled in an ARHU major or minor and the internship must be in one of the academic fields covered within the College of Arts and Humanities. In addition to completing their required hours on site, students with fewer than 60 credits and students who are in their first semester at the University of Maryland will be required to attend three bi-weekly seminars at the beginning of the semester to help develop their para-professional goals and understandings.
Prerequisite: Permission of ARHU-College of Arts & Humanities.
Restriction: Minimum cumulative GPA of 2.5; and must be in a major or minor in ARHU - College of Arts and Humanities; and must have earned a minimum of 12 credits; and must not have earned more than 60 credits.

ARHU298 Special Problems in Arts and Humanities (3 Credits)
Repeatable to: 6 credits if content differs.

ARHU298L Are you - Nobody - too?' Why we create and share stories, poems, comics and zines (3 Credits)
Our ability to create and maintain meaningful social connections tells us that we are not alone; it reminds us that we are connected to something larger, a community, a group of people willing to celebrate our triumphs and help us cope during difficult times. Emphasizing the principles of participation, connection, and collaboration, this course explores how various traditionally marginalized people form their own cultural communities and develop a sense of reciprocal belonging through the creation (and independent distribution) of stories, poems, spoken word poetry, comics and zines.In spite of intersectional obstacles such as the lack of political power, access to resources and economic opportunities, these communities may find it possible to redefine their place in society by demonstrating originality, resilience, and talent.

ARHU299 Studies in Humanities Technology (1-3 Credits)
Selected topics in the use of Information Technology in the Humanities.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

ARHU308 Critical Eras: An Interdisciplanary View (3 Credits)
An interdisciplinary exploration of a critical period, ranging from a year to an era, stressing the relationship between different forms of human expression and the social milieu.
Repeatable to: 6 credits if content differs.

ARHU309 Writers' House Colloquium: Creative Writing in Community (1-3 Credits)
Colloquium designed to improve students' skills in literary and communication arts through lectures, workshop and discussions on the history and craft of writing across cultures. Topics include poetry and fiction in translation, and exploration of modes of critique, elements of craft of fiction and poetry, writing for different media, genre writing, writing for performance, screen or scriptwriting and creative non-fiction.
Prerequisite: Permission of ARHU-College of Arts & Humanities; and must be admitted to the Jimenez-Porter Writers' House.
Repeatable to: 6 credits if content differs.

ARHU318 Writers' House Colloquium: Creative Writing Across Languages and Cultures (1-3 Credits)
Colloquium designed to improve students' skills in literary and communication arts through lectures and discussions on the history and craft of writing across cultures. Topics for the different versions of ARHU 318 include poetry, fiction, writing for different media, autobiography and memoir, scriptwriting, screenwriting, and community engagement projects.
Prerequisite: Permission of ARHU-College of Arts & Humanities; and must be admitted to the Jimenez-Porter Writers' House.
Repeatable to: 6 credits if content differs.

ARHU319 Writers' House Second Year Colloquium: Form and Theory of Creative Writing (1-3 Credits)
Required course for Writers' House students pursuing the notation program. Offered in either poetry or imaginative prose writing. Students work at the intermediate level, refining creative writing skills through cross-cultural reading and writing exercises. As part of the course, students attend a series of lectures and readings given by professional writers.
Restriction: Must be in the Jimenez-Porter Writer's House program.
Repeatable to: 6 credits if content differs.

ARHU320 Writers' House Second Year Colloquium: Writing for Publication (3 Credits)
Students write, discuss and revise for multiple forms of publication: reading their own work at least once in public, sending work out for publication to literary journals, and producing a chapbook of high quality by end of semester.
Recommended: Completion of ARHU318 and ARHU319 recommended.
Restriction: Currently enrolled in Writers' House or permission of program.
Credit Only Granted for: ARHU319A or ARHU320.
Formerly: ARHU319A.

ARHU338 Undergraduate Teaching Assistantship in a Living Learning Program (1-3 Credits)
Offers exceptional students the opportunity to work closely with a faculty member and gain valuable experience. ARHU Living learning program UTAs also serve as peer mentors and program leaders. They assist with course planning, research, and student advising (as appropriate). We are also allowing for variable credit (1-3 cr hrs).
Restriction: Sophomore standing or higher; and must be in an ARHU Living Learning Program or be a graduate of the program; and must have permission of the Living Learning Program to enroll.
Repeatable to: 6 credits if content differs.

ARHU340 Financial Entrepreneurship for Arts Leaders (3 Credits)
An introduction to financial entrepreneurship for the arts leader in order to prepare students for diverse and ever-changing careers in the arts and creative fields. Topics explored will include Professional Paperwork (resumes, cover letters, biographies, job searches), Financial Literacy (taxes, budgets, boards, tickets sales, musicians unions), Marketing (website development, social media, press packets, record labels vs. online distribution, headshots, audience development, community engagement, branded content), Communication (public speaking, writing), and Technology (online tools, computer software, peripherals, recording, photography/videography, on campus resources).Cross-listed with: MUSC448E.
Credit Only Granted for: ARHU340 or MUSC448E.

ARHU350 Chilean Culture, Democracy, and Social Change (3 Credits)
Short term education abroad course offered in Summer term, in Santiago and Valparaiso, Chile. An exploration of both the conditions that led to the 1973 coup d'etat in Chile, and the complex legacy left by the following dictatorship, including competing economic philosophies that are underpinned by religious, historical, and ideological components. This course focuses on how the arts and literature continued to flourish during the dictatorship, and how they have played a continuing role in the country's recovery from its traumatic past.
Credit Only Granted for: ARHU350, ARHU369C, CMLT498C, GVPT309F, HIST329N, HONR349C.
Formerly: ARHU369C.

ARHU351 James Joyce's Dublin: A multi-media Odyssey (3 Credits)
Chapter by chapter analysis of the text with in situ tours to settings important to the book, and examination of the culture and circumstances from which it arose; review of the impact of Ulysses, and continuing controversies around the text. Multi-media explorations and creative projects will be included in course activities: collaborations on tumblr, and the use of such technologies as vine, instagram, twitter, etc., in an exploration of how our subjective experiences and the expressions they inspire are impacted by new technologies.
Credit Only Granted for: ARHU369I, ARHU351, ENGL369J, or HONR349L.
Formerly: ARHU369I.

ARHU369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARHU375 The TV Writers Room Screenwriting for Television and Video (3 Credits)
Students engage with the theory and practice of screenwriting for television and video. Students read and watch teleplays designed to teach advantages of the television format. Students apply what they learn to prepare frequent writing exercises, share and provide feedback for peers scripts in a workshop format, and work together as a Writers Room to prepare an original pilot episode.
Prerequisite: ARHU275, ARHU318, or FILM370; and permission of instructor.
Additional Information: Priority in enrollment will be given to students participating in the Jimenez-Porter Writers' House and FILM studies programs.

ARHU380 Arts & Humanities Special Topics: Social Innovation, Change, and Justice: Do Good Now (3 Credits)
The course serves as the core course for the Arts-and-Humanities track in PLCY's minor in 'Nonprofit Leadership and Social Innovation.' Students will be introduced to the role that the Arts and Humanities can play in social innovation and social change, while exploring various mechanisms for achieving impact with a focus on advancing social justice, equity and systems change. This course deepens understandings of nonprofit leadership, entrepreneurship and social innovation by guiding students through the creation and implementation of social change projects and ventures of their choice.
Credit Only Granted for: ARHU380, BSOS388B, or PLCY388D.

ARHU386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-College of Arts & Humanities.
Restriction: Junior standing or higher.

ARHU390 Cross-Cultural Perspectives on Quality (3 Credits)
Examines strategic quality management in a globalized setting with emphasis on cross-cultural communication and culturally influenced perception of quality. One of four courses in the QUEST curriculum.
Prerequisite: Must be in the Quest Program.

ARHU398 Special Topics in Arts and Humanities (3 Credits)
An in-depth exploration of thematic topics in Arts and Humanities.
Repeatable to: 9 credits if content differs.

ARHU439 Interdisciplinary Studies in Arts and Humanities (3 Credits)
An interdisciplinary exploration of chronological, geographical or thematic topics in Arts and Humanities.
Repeatable to: 6 credits if content differs.

ARHU440 Arts Leadership Seminar (3 Credits)
An advanced seminar in arts leadership exposing students to the foundations of arts leadership in not-for-profit organizations as it intersects with current trends in technology, demographics, government policy, and the economy. In case studies based on examples drawn from local arts organizations, students will learn about audience engagement as well as institutional development terminology and best practices.Cross-listed with: TDPS440.
Credit Only Granted for: TDPS4440 or ARHU440.

ARHU458 Graduate School Preparation (1 Credit)
Designed for Juniors and Seniors who are interested in applying to graduate school. Topics include skills needed for the graduate school search and application process, evaluation and reflection of application materials, preparation for GRE exam, and exploration into career options after graduate school. Focus on the Humanities fields.
Restriction: Must have earned a minimum of 45 credits.
Repeatable to: 3 credits if content differs.

ARHU468 Peer Mentoring Program (1 Credit)
A workshop for sophomore, junior or senior students who wish to serve as peer mentors helping first-year students to cope with the numerous issues which often arise in the transition to the university.
Restriction: Sophomore standing or higher; and permission of ARHU-College of Arts & Humanities.
Repeatable to: 3 credits if content differs.

ARHU486 Internship Practicum in Arts and Humanities (3-6 Credits)
An internship intended for students who have already completed an internship for credit. ARHU486 must be a different experience from the internship students have already taken for credit. Generally students intern with a different company, but they may continue working for the same company if the job is significantly different. See ARHU internship coordinator for details.
Prerequisite: Have completed previous internship at U of MD.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and permission of ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits; and completed 12 credits at U of MD.

ARHU489 Advanced Internship Practicum in ARHU (3-6 Credits)
Designed for students who have already completed at least 2 upper level internship courses for academic credit. It is an advanced practicum to assist students in continuing to develop and hone their professional writing, presentation and analytical skills.
Prerequisite: ARHU486.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Course is designed to follow ARHU486.

ARHU498 Special Topics in Arts and Humanities (3 Credits)
Repeatable to: 6 credits if content differs.

ARHX - Art History & Archaeology Education Abroad

ARHX100 Art of Rome (3 Credits)
An introductory course in the history of art. The course focuses on Rome, from its origin to contemporary times. Masterpieces of painting, sculpture, architecture and urban planning are examined within their historical contexts. The course hones a method of description, critical analysis and interpretation of art and builds an understanding of traditional forms and cultural themes useful in the comprehension of all western art.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX201 Media, Art and Social Activism (3 Credits)
Focuses on media that have been created expressly for communicating and/or promoting positive social change, blending social theory with aesthetics and civics. The course investigates current trends in visual communication, as well as the methods for how to analyze and contextualize these, with an emphasis on politics in art and new media.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX300 The Art of Florence: Exploring Visual Culture (3 Credits)
During the Renaissance, the city of Florence was the site of some of the most remarkable artistic experiences in European history. Why, though, should one city have contributed so much to the course of the arts? Why should so many of the city's works of art, monuments, and buildings have played a major rule in the development of the visual arts? What set of circumstances and conditions made this possible? This course is designed to explore these questions through an examination of historical factors that made Florence the birthplace and point of reference for what we now call 'Renaissance art.'
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX301 New Perspectives: Visual Technology in Renaissance and Baroque Art (3 Credits)
This interdisciplinary course explores the depiction of visual space in Renaissance and Baroque Art through the medium of modern technologies. The visual theories of authors including Leon Battista Alberti, Piero della Francesca and Leonardo da Vinci will be given practical application through the use of the digital design software Autodesk Autocad.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX302 Raphael and The High Renaissance in Florence and Rome (3 Credits)
This course will examine the career and achievements of Raphael (1483-1520), and will consider the artist in the context of the High Renaissance in Florence and Rome. It will consider the sources and documents for his career, as well as the later historiography, and it will include study of the many works by Raphael in Rome and in the Vatican Museums.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX303 Nordic Contemporary Art (3 Credits)
Focuses on current trends and the dynamics of regional identity in contemporary art, art history, and curating. The Stockholm art scene is used as an entry-point to analyze artworks, exhibitions and texts: What is contemporary, and what is Nordic, about the art and issues that surface here?
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARHX304 Contemporary Spanish Art (3 Credits)
A dynamic, multi-disciplinary introduction to Contemporary Art in Spain. We will discuss recent classics as well as emerging artists, and we will cover a wide range of artistic practices, from photography to afterpop music, including installation art, performance art and comic art.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

ARHX310 The Business of Art: The Economics and Management of Culture (3 Credits)
Markets for visual arts provide a particularly fertile ground for those concerned with the economics of culture. The study of the past and current structure of the market for visual art, the mechanisms that fuel this flourishing market and the involvement of public and private institutions in the context of the current globalization of the arts, provides significant instruments for the development of museum management studies, as well as a different methodological approach to art history and history of culture management.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARMY - Army

ARMY101 Basic Military Science I (1 Credit)
An exploration of leadership application through classroom instruction, leadership training and mentorship, adventure exercises and camaraderie. Hands on experience in managerial operations and military techniques. Applied military customs and techniques through physical and mental training.

ARMY103 Basic Army Physical Fitness (2 Credits)
This course allows beginners to learn the basic Army Physical Fitness program. Through a series of rigorous progressive workouts, the student advances from novice status to meet the requirements of the Army Physical Fitness Test. Course content also introduces students to Army managerial skills and basic military tactics and techniques.
Recommended: ARMY101.

ARMY105 Basic Military Science II (3 Credits)
Exploration of the Army Leadership Model through classroom instruction, leadership training and mentorship. Develops knowledge and competency in physical fitness through rigorous training and experiential leadership education through leadership laboratories.
Credit Only Granted for: ARMY119 or ARMY105.

ARMY106 Basic Military Science I (3 Credits)
Introduction to the personal challenges and competencies that are critical for effective leadership and communication. Develops knowledge and competency in physical fitness through rigorous training and experiential leadership education through leadership laboratories.
Restriction: Students must meet Officer candidate criteria to participate in field training.

ARMY119 ARMY ROTC INDEPENDENT STUDY (1 Credit)
Exploration of the Army Leadership Model through group discussion, leadership exercises and research.
Restriction: Permission of UGST-Army ROTC.
Repeatable to: 2 credits.
Credit Only Granted for: ARMY119 or ARMY105.
Additional Information: -Intended to impart the lecture curriculum of ARMY105 without the labs.

ARMY201 Army Leadership Development (3 Credits)
This course is an intensive examination of the Army Leadership Model in practice. The model is compared to leadership styles and techniques from government and industry and the comparative effectiveness of each. Students form their own personal leadership styles.
Restriction: Sophomore standing or higher.

ARMY202 Military Leadership in Practice (3 Credits)
This course uses the case study method to examine the Army Leadership Model as applied to assigned missions in U.S. history. Students learn to evaluate and assimilate effective leadership methods and techniques. Includes a laboratory period in which case studies are worked out and presented by individuals and groups.

ARMY301 Advanced Military Leadership I (3 Credits)
Reinforces understanding and application of Army leadership strategies, critical decision making methodologies, physical and mental fitness excellence. Includes a laboratory period in applied leadership, common military tasks and physical fitness.

ARMY302 Advanced Military Leadership II (3 Credits)
Prepares contracted students for certification at the Army National Advance Camp, a prerequisite for commissioning as an officer in the U.S. Army. Focus is directed to military tactics, squad and platoon drills, marksmanship, land navigation and fitness excellence. Includes a laboratory period in applied leadership skills as well as a three day field exercise.

ARMY401 Advanced Military Leadership III (3 Credits)
Introduces contracted students to the study of Army structure, practices and processes exercised by Army Commanders and Staff in completing personnel, logistics, training and combat operations. Includes a laboratory in applied leadership skills and two field exercises.

ARMY402 Advanced Military Leadership IV (3 Credits)
The military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

ARSC - Air Science

ARSC100 The USAF Today I (1 Credit)
Freshman course for AFROTC cadets. Introduces students to the United States Air Force and encourages participation in Air Force Reserve Officer Training Corps. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. Leadership laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC101 The USAF Today II (1 Credit)
Freshman course for AFROTC. Continuation of ARSC100 for freshmen AFROTC cadets. Study of topics relating to the Air Forces and defense. Focuses on organizational structure and missions of the Air Force; officership and an introduction to both written and oral communication skills.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC200 The Development of Air Power I (1 Credit)
Sophomore course for AFROTC cadets. Study of factors contributing to the development of air power from its earliest beginnings through two world wars; the evolution of air power concepts and doctrine; introductory leadership; and assessment of communicative skills.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC201 The Development of Air Power II (1 Credit)
Continuation of ARSC 200 for sophomore AFROTC cadets. The study of historical events, leaders, and technical developments which surrounded the growth of air power; the basics of leadership; environment of an Air Force officer; and concepts of ethical behavior.
Corequisite: AFROTC cadets must also register for ARSC059.

ARSC300 Management and Leadership I (3 Credits)
The study of leadership and management fundamentals, professional knowledge, Air Force doctrine, and written and oral communication skills. Case studies are used to examine leadership and management situations. This course will satisfy credit toward a minor in military studies.
Corequisite: AFROTC cadets must also register for ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Junior standing or higher.

ARSC301 Management and Leadership II (3 Credits)
Continuation of ARSC300. Study of leadership and management skills and leadership ethics as well as written and oral communication skills required of Air Force officers. This course will satisfy credit towards a minor in military studies.
Corequisite: AFROTC cadets must also register for ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Junior standing or higher.

ARSC399 Independent Study in Air and Space Power Implementation (1-3 Credits)
Independent study to broaden understanding of the implementation of air and space power. Topics of research are selected by the student and instructor to focus the student on a particular aspect of air and space power implementation during a particular campaign or conflict.
Prerequisite: Permission of UGST-AFROTC-Air Science.
Recommended: ARSC401 and ARSC400.

ARSC400 National Security Forces in Contemporary American Society I (3 Credits)
Study of American national security policy and processes to include information and implementation, impact of major national and international actors, and development of major policy issues. This course will satisfy credit towards a minor in military studies.
Prerequisite: Permission of UGST-AFROTC-Air Science; or (ARSC300 or ARSC301).
Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Senior standing.

ARSC401 National Security Forces in Contemporary American Society II (3 Credits)
This course examines various subjects including: military law/justice, preparation for active duty, and current issues affecting military professionalism. This course will satisfy credit towards a minor in military studies.
Prerequisite: ARSC300 or ARSC301; or permission of UGST-AFROTC-Air Science.
Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Senior standing.

ARTH - Art History & Archaeology

ARTH169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTH200 Art and Society in Ancient and Medieval Europe and the Mediterranean (3 Credits)
Examines the material culture and visual expressions of Mediterranean and European societies from early times until ca. 1300 CE, emphasizing the political, social, and religious context of the works studied, the relationships of the works to the societies that created them, and the interrelationship of these societies.

ARTH201 Art and Society in the West from the Renaissance to the Present (3 Credits)
Examines representative European and American works of art from the later Middle Ages to the present, highlighting the dynamic exchange between artistic and cultural traditions both within periods and across time.

ARTH221 Color: Art, Science, and Culture (3 Credits)
An interdisciplinary exploration of the intersections of art, science, and culture. Using research on human vision, neurobiology, and cognitive psychology, examines how vision works, why we see color, and how we respond to color. Investigates the cultural significance of color: how artists across time and cultures have had access to and used color; how cultures have created specific language to describe color; and how cultures have imbued color with profane, sacred, and/or symbolic meanings.

ARTH230 Symbolic Images: The Theory and Practice of Iconography in European Art, 1400-1850 (3 Credits)
Iconographic interpretation of visual narratives, signs and symbols has long been a topic of art-historical inquiry. In early modern European art, images were often conceived with the deliberate intent of posing a 'puzzle' or 'problem' for the beholder to solve; yet in most cases we have little or no evidence of how contemporary beholders solved such enigmas. Provides students with the opportunity to take command of these research methods and source materials, addressing a genuine iconographic problem, researching the relevant literature, identifying the essential primary source evidence, making contextually appropriate assumptions, and producing a valid result.

ARTH240 Humanists on the Move (3 Credits)
Introduces students to the practices of a field that is only about twenty years old: the Digital Humanities. We will explore how humanities scholars can reexamine their materials, configuring them as 'data' that can be gathered and visualized in order to ask new questions about the past. Using traditional humanities source materials from this different perspective, students will produce entirely new data; using new digital platforms, they will create visualizations of that data; and using humanistic methods, they will interpret those visualizations. Focusing on the original Humanists from the Renaissance period, this course will teach students to engage closely with the most traditional materials of the humanities - primary texts produced in an historical period - and with the newest tools to work with humanities data. Students will complete two major projects by collecting data on the same humanist figures: mapping their travels, and tracing their networks. We will also consider how texts can be treated as data.

ARTH250 Art and Society in the Ancient American World (3 Credits)
Surveys major arts and architecture of the pre-Columbian world, including Mesoamerican and Andean cultures from the earliest known civilizations through European contact and conquest. Acquaints students with the monumental architecture, urban planning, painting, sculpture, and portable arts of the ancient Americas.

ARTH255 Art and Society in the Modern American World (3 Credits)
Explores the origins and evolution of art in the modern American world, from the late colonial era to the present, comparing major artistic movements and their historical contexts. Considers the diversity of art across Latin America and the United States, and the ways in which artworks mediate social, ethnic, political, and national identities.

ARTH260 Art and Activism (3 Credits)
Can art effect social change? How may we use the history of radical and avant-garde art to inform present-day movements and models of artistic and creative activism? This course explores the modern and contemporary history of political art and arts activism on local, national, and global scales.

ARTH261 Monuments, Monumentality, and the Art of Memorial (3 Credits)
Adopts a chronological approach to the study of, and intersections between, art and society in ancient, medieval, modern, and postmodern Africa, Europe, and America. We begin with the art of ancient Egypt (roughly 3000 BCE) and end with developments after 9/11. We emphasize the historical, religious, political, social, and cultural contexts of the works studied; the relationships of the works to the society that created them; and the interrelationships of these societies and their cultural values as seen through their material and visual culture.

ARTH262 Public Art (3 Credits)
How does public art function on a university campus, in major cities, and across the United States? Can emerging technologies support the interpretation, experience, and reception of public art in new, and imaginative, ways? This course invites students to empirically study the modern history and civic values of public art spanning sculpture, painting, mixed-media, and installation. We consider the nature of public space, the politics of representation and community, and the civic and memorial functions of art. Leveraging a panoply of digital tools, students generate metadata, prototype creative interventions and experiences, and collectively write a community-sourced history of public art.

ARTH263 Art and Difference (3 Credits)
A comparative and thematic approach to studying the representation of otherness in art and visual culture from the eighteenth century to the present. Students will work to expand the definition of otherness, and consider the roles that ethnicity, nationality, and politics play in representations of otherness across various continents and chronologies.

ARTH265 Art and the Environment (3 Credits)
A consideration of modern and contemporary art as way of rethinking the concepts of nature, wilderness, civilization, and the human being. Paintings, photographs, sculptures, films, and songs as they pertain to the sustainability of life on earth.
Credit Only Granted for: ARTH265 or ARTH465.
Formerly: ARTH465.

ARTH269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.
Additional Information: No more than 3 credits total of ARTH 269 or ARTH 289 can be used to satisfy the art history major requirement.

ARTH275 Art and Society in Africa (3 Credits)
A comparative study of art and material culture from various regions of the African continent. Looking across ethnic and national boundaries, considers the many relevant political, social, and religious contexts.

ARTH289 Special Topics in Art History and Archaeology (3 Credits)
Selected topics in the visual arts to introduce students to the history of various modes of visual expression and communication.
Repeatable to: 6 credits if content differs.
Additional Information: No more than 3 credits total of ARTH 269 or ARTH 289 can be used to satisfy the art history major requirement.

ARTH290 Art and Society in Asia (3 Credits)
A comparative, interrelational study of the different visual arts and material cultures produced by societies in Asia. An examination of the historical traditions and forms in political, social, and religious contexts.

ARTH292 Discovering Japan: How the Arts Shaped a Nation (3 Credits)
Explores the origins and creation of Japan from ancient to contemporary times through East Asian and European exchange. Acquaints students with painting, sculpture, architecture, ceramics, gardens, and other art forms in relation to the various cultural contexts within which they were produced and used.

ARTH300 Egyptian Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts of ancient Egypt from earliest times through the Roman conquest. Emphasis on the pharaonic period.

ARTH301 Aegean Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts of Crete, the Cycladic islands, and the Greek mainland from the earliest times to the downfall of the Mycenaean empire.

ARTH302 Greek Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts from the Geometric through the Hellenistic period with emphasis on mainland Greece in the Archaic and Classical periods.

ARTH303 Roman Art and Archaeology (3 Credits)
Sites and monuments of painting, sculpture, architecture, and the minor arts from the earliest times through the third century A.D. with emphasis on the Italian peninsula from the Etruscan period through that of Imperial Rome.

ARTH305 Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ANTH305, CLAS305, JWST319Y.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

ARTH307 Late Roman and Early Christian Art and Archaeology (3 Credits)
Painting, sculpture, architecture, and the minor arts from the early third century through the sixth century A.D.

ARTH313 Early Medieval Art (3 Credits)
Painting, sculpture and architecture in Western Europe, ca. 500-1150.

ARTH314 Gothic Art (3 Credits)
Painting, sculpture and architecture in Western Europe, ca. 1150-1400.

ARTH320 Fourteenth and Fifteenth-Century Northern European Art (3 Credits)
The art of northern Europe with an emphasis on painting in the Netherlands and France.

ARTH321 Northern European Art of the 16th Century: Art in the Age of Renaissance and Reformation (3 Credits)
Painting in France, Germany, England, and the Low Countries during the Renaissance and Reformation.

ARTH323 Fifteenth-Century Italian Renaissance Art (3 Credits)
Painting, sculpture, architecture, and the decorative arts of the fifteenth century in Italy.

ARTH324 Leonardo's World: Art and Experience in Renaissance Italy (3 Credits)
Painting, sculpture, architecture, and the decorative arts of the sixteenth century in Italy.

ARTH330 Seventeenth-Century European Art (3 Credits)
Painting, sculpture and architecture concentrating on Italy, Spain, France, and England.

ARTH335 Seventeenth-Century Art in the Netherlands (3 Credits)
Painting, sculpture and architecture in seventeenth-century Netherlands.

ARTH337 Cities and the Arts (3 Credits)
Cities and the Arts, as taught by different faculty members in the Department of Art History and Archaeology, will investigate the urban environment and visual culture(s) of one or several major centers. The class will consider how a large city's culture absorbs, transforms, and utilizes multiple external sources in developing a particular local brand defined as its 'identity.' It examines the visualization of ideals of local coherence as well as the arts of fragmentation and competing internal cultures. Cities and the Arts considers how a large city's interface with an expanding external world, even a global one, allows for appropriations and the rise of discrimi-nations; it examines how exclusions form within the city itself, and how social groups visually articulate identities that may run counter to the larger urban mythology.

ARTH345 Nineteenth-Century European Art to 1850 (3 Credits)
Major trends from Neo-Classicism to Romanticism through an interdisciplinary perspective with an emphasis on historical context.

ARTH346 Nineteenth-Century European Art from 1850 (3 Credits)
Major trends from Realism and Impressionism to Symbolism, exploring the historical context, in which concepts of gender, class, and race are integral to the transformation of Western art.

ARTH350 Twentieth-Century Art to 1945 (3 Credits)
Painting, sculpture, and architecture in Europe and America from the late nineteenth century to the end of World War II.
Prerequisite: ARTH201.

ARTH351 Picturing Contemporary Life: Art Since 1945 (3 Credits)
Visual art since 1945, with an emphasis on North America and Europe.

ARTH357 History of Photography (3 Credits)
An exploration of the historical, social, aesthetic, and technological developments of the photographic medium and its relationship to other modes of visual representation in the creation of the modern world.
Credit Only Granted for: ARTH357 or ARTH457.

ARTH359 Film as Art (3 Credits)
The study of film as a visual art, from theoretical, cultural and aesthetic perspectives. Content varies by semester.
Repeatable to: 6 credits if content differs.

ARTH360 History of American Art to 1876 (3 Credits)
Painting, sculpture, architecture, and decorative arts in North America from the colonial period to 1876.

ARTH361 American Art Since 1876 (3 Credits)
Painting, sculpture, architecture, and the decorative arts in North America after 1876.

ARTH362 Twentieth-Century African-American Art (3 Credits)
Surveys and evaluates the art and visual culture of African Americans from 1900 to the present.

ARTH369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.
Additional Information: No more than 6 credits of ARTH 369 can be used to satisfy the art history major requirements.

ARTH370 Latin American Art and Archaeology before 1500 (3 Credits)
Pre-Hispanic painting, sculpture, and architecture, with a focus on the major archaeological monuments of Mexico.

ARTH372 Modern Latin American Art to 1945 (3 Credits)
Painting and sculpture in Latin America, with an emphasis on avant-garde movements in Mexico City, Havana, Buenos Aires, Sao Paulo, and Rio de Janeiro.

ARTH373 Latin American and Latinx Art Since 1945 (3 Credits)
Visual arts and architecture in Latin America from local and international perspectives. Emphasis on late modernist and post-modern practices including geometric abstraction, pop, conceptualism, performance art, and installation art.

ARTH376 Living Art of Africa (3 Credits)
Art styles among the segmentary, centralized, and nomadic people of Africa. The iconography and function of their art and its relationship to their various societies, cults and ceremonies.

ARTH377 Global African Art (3 Credits)
A survey of the African-inflected arts around the world, focusing on such countries as Brazil, Haiti, Cuba and the United States

ARTH378 Special Topics for Honors Students (3 Credits)
Writing of a research paper. With an instructor's permission work may be done in conjunction with a graduate colloquium or seminar.
Prerequisite: Must be admitted to art history honors; and permission of ARHU-Art History & Archaeology department.
Restriction: Must be in Art History program.
Repeatable to: 6 credits.

ARTH382 Art of Japan before 1500 (3 Credits)
Thematically-focused topics in painting, sculpture, architecture and decorative arts of early and medieval Japan, from 5000 BC to 1500 AD.

ARTH383 Art of Japan after 1500 (3 Credits)
Thematically-focused topics in the painting, sculpture, architecture, gardens and decorative arts of early modern, modern and contemporary Japan, from 1500 to present.

ARTH385 Art of China (3 Credits)
A chronological survey of Chinese painting, sculpture, and the applied arts.

ARTH386 Experiential Learning (3-6 Credits)
Supervised internship experience in diverse areas of art historical, archaeological, and museological work.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Junior standing or higher.

ARTH389 Special Topics in Art History and Archaeology (3 Credits)
Repeatable to: 6 credits if content differs.

ARTH418 Special Problems in Italian Renaissance Art (3 Credits)
Focus upon aspects of painting, sculpture, and architecture of Renaissance.
Repeatable to: 6 credits if content differs.

ARTH426 Renaissance and Baroque Sculpture in Northern Europe (3 Credits)
Sculpture in France, Germany, England, and the Low Countries from the fourteenth to the seventeenth century.

ARTH456 Photography Since World War II (3 Credits)
An exploration of the many uses and meanings of photography since 1945.

ARTH466 Feminist Perspectives on Women in Art (3 Credits)
Principal focus on European and American women artists of the 19th and 20th centuries, in the context of the new scholarship on women.

ARTH484 Modern Chinese Film and Visual Culture (3 Credits)
Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.Cross-listed with FILM426.
Credit Only Granted for: ARTH484 or FILM426.

ARTH485 Chinese Painting (3 Credits)
Chinese painting history from the second century B.C. through the twentieth century, covering cultural, stylistic and theoretical aspects.

ARTH486 Japanese Painting (3 Credits)
Japanese painting from the sixth through the nineteenth century, including Buddhist icon painting, narrative scrolls, and Zen-related ink painting.

ARTH488 Colloquium in Art History (3 Credits)
Colloquium to investigate a specific topic in depth.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 9 credits if content differs.

ARTH489 Special Topics in Art History (3 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 9 credits if content differs.

ARTH496 Methods of Art History and Archaeology (3 Credits)
Methods of research and criticism applied to typical art-historical/archaeological problems, familiarizing the student with bibliography and other research tools. Introduction to the historiography of art history and archaeology, surveying the principal theories, encouraging methodological debates within the discipline. Course for majors who intend to go on to graduate school.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Must be in Art History program.

ARTH498 Directed Studies in Art History I (2-3 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Junior standing or higher.
Repeatable to: 99 credits if content differs.

ARTH499 Honors Thesis (1-6 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 6 credits if content differs.

ARTT - Art Studio

ARTT100 Two-Dimensional Design Fundamentals (3 Credits)
Principles and elements of two-dimensional design. Introduction to visual communication.

ARTT110 Elements of Drawing I (3 Credits)
Fundamental concepts, media, and processes of drawing. Emphasis on observation and representation in combination with individual expression. Subject matter includes still life, human figure, nature, the built environment, and conceptual projects.

ARTT150 Introduction to Art Theory (3 Credits)
Fundamental concepts of global, philosophic, and critical art theory examined through various historic and contemporary texts, and the analysis of works of art.

ARTT169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT200 Three-Dimensional Art Fundamentals (3 Credits)
Fundamental concepts of three-dimensional form and space examined through the manipulation and organization of various materials.
Prerequisite: ARTT100 and ARTT110.

ARTT208 Intermediate Special Topics in Art (3 Credits)
Intermediate special topics in Art.
Repeatable to: 6 credits if content differs.

ARTT210 Elements of Drawing II (3 Credits)
Continuation of ARTT110 with additional emphasis on color, figure drawing, and contemporary issues.
Prerequisite: ARTT110.

ARTT255 Introduction to Digital Art and Design Processes (3 Credits)
Introduction to basic software and principles of digital imaging, and how they are applied to art and design. Topics covered: Digital image construction and manipulation, Vector-Based digital techniques layout, typography, etc), time-based digital techniques (video and audio composition and manipulation), and basic interactivity (web-design). Digital media used to explore visual principles established in ARTT100.
Prerequisite: ARTT100 and ARTT110.
Credit Only Granted for: ARTT255 or ARTT354.
Formerly: ARTT354.

ARTT260 Dangerous Art: Censorship or Subsidy (3 Credits)
Combines a broad historical analysis of the relationship between art and authority with an examination of contemporary culture criticism and art practice. Explores the uses and abuses of art and culture in totalitarianand theocratic states as a prelude to a review of the role of official culture in the United States. Examines art and culture in the public arena and many related areas where the arts and policy interact.

ARTT269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT320 Elements of Painting (3 Credits)
Concepts and fundamental processes of oil and/or acrylic painting.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT330 Elements of Sculpture: Metal Casting (3 Credits)
Sculptural concepts and fundamental processes related to metal casting.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT331 Elements of Sculpture: Steel (3 Credits)
Sculptural concepts and fundamental processes related to steel fabrication; torch cutting, welding, hot forging, and finishing.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT333 Elements of Sculpture: Wood and Mixed Media (3 Credits)
Sculptural concepts and fundamental processes using wood and mixed media.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT340 Elements of Printmaking: Intaglio (3 Credits)
Concepts and fundamental processes related to etching, aquatint, and drypoint.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT341 Elements of Printmaking: Woodcut and Relief (3 Credits)
Concepts and fundamental processes related to woodcuts, linocuts, and other relief printing media.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT343 Elements of Printmaking: Screen Printing (3 Credits)
Concepts and fundamental processes related to silkscreen printing.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT344 Elements of Printmaking: Lithography (3 Credits)
Concepts and fundamental processes related to drawing, preparing, and printing images on lithograph stones or plates.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT353 Elements of Photography (3 Credits)
Introduction to black-and-white photography. Basic technical and aesthetic vocabulary, camera mechanics and darkroom techniques. Introduction to the photographic message and meaning in both fine art and design concept.
Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT355 Intermediate Graphic Design Principles (3 Credits)
Investigation of basic concepts, history, techniques, and materials used by professional graphic designers, focusing on typography. Explores various aspects of design related to typography through examination and production of many types of finished work.
Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; and must be admitted to the Graphic Design Concentration (Track 3).
Credit Only Granted for: ARTT350 or ARTT355.
Formerly: ARTT350.

ARTT356 Graphic Design Processes (3 Credits)
Explores computer graphics and visual communcation principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.
Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; and must have been admitted to Graphic Design Concentration (Track 3).
Credit Only Granted for: ARTT351 or ARTT356.
Formerly: ARTT351.

ARTT357 Interactive Design (3 Credits)
In-depth exploration of interactive design and website construction. Emphasis on concept-driven and community-based projects using variety of interactive software programs.
Prerequisite: ARTT355 and ARTT356.

ARTT360 African American Art Theory: Exploration/Expression of Identity (3 Credits)
Examines how African American artists have used their work to represent, reinvent, and subvert racial identity. By examining changes in modes of expression, formal concerns, and pictorial themes, it will explore the impact of black aesthetics in American art.
Prerequisite: ARTT150.
Credit Only Granted for: ARTT360 or HONR279C.

ARTT361 Design Literacy: Decoding Our Visual Culture (3 Credits)
Holistic presentation of design history and theory from pre-history to present. Covers primarily visual communication design and includes the interrelationship of interior-, furniture-, industrial-, fashion-design, and architecture.
Prerequisite: ARTT355 and ARTT356.
Credit Only Granted for: ARTT361 or ARTT489L.
Formerly: ARTT489L.

ARTT369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT370 Elements of Digital Media (3 Credits)
Exploration of image creation and manipulation, interactivity, and linkages between digital audio and video. Emphasis on issues in contemporary digital art.
Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; or permission of ARHU-Art department.

ARTT386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-Art department.
Restriction: Junior standing or higher.

ARTT389 Department of Art Undergraduate Teaching Assistantship (3 Credits)
Individual contractual agreement with faculty/mentor. Individualized assistantship in the teaching of a specified department course offering. Must have previously received an 'A' grade for the class to be assisting.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT399 Department of Art Research Assistantship (1-3 Credits)
Individual contractual agreement with faculty/mentor. Individualized experiential learning developed in relation to art-related research issues.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT409 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT418 Advanced Drawing Studio (3 Credits)
Multi-level drawing studio emphasizing advanced concepts and processes related to drawing; emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT200, ARTT210, and ARTT150; and must have completed one 300-level studio course. Or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT428 Advanced Painting Studio (3 Credits)
Multi-level painting studio emphasizing advanced concepts and processes related to oil and acrylic painting; emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: ARTT320.
Repeatable to: 12 credits.

ARTT438 Advanced Sculpture Studio (3 Credits)
Multi-level sculpture studio; continuation of media-specific sculpture courses with emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: Must have completed one 300-level sculpture course; or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT448 Advanced Printmaking Studio (3 Credits)
Multi-level printmaking studio; continuation of media-specific printmaking courses with emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: Must have one 300-level printmaking course; or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT449 Advanced Photography Studio (3 Credits)
Advanced photographic processes and theory. Emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT353; or permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT454 Advanced Graphic Design Principles: Design in Society (3 Credits)
Focus on social responsibility and community activism. History and theory of propaganda and advocacy-based design. Students explore current design practices, work individually, and collaborate in teams with non-profits or other clients with community-based or socio-cultural agendas. Research and writing-intensive course.
Prerequisite: ARTT355 and ARTT356.

ARTT455 Three Dimensional Graphic Design (3 Credits)
Continued exploration of advanced graphic design practices with primary emphasis on 3-D object and packaging design. Includes research, course reading discussion, oral presentations, and specific project assignments which will require a proficient level of hand-skills (craft) and computer skills.
Prerequisite: ARTT355, ARTT356, and ARTT357.
Recommended: ARTT333.
Credit Only Granted for: ARTT352 or ARTT455.
Formerly: ARTT352.

ARTT456 Motion Design (3 Credits)
Explores computer graphics and visual communication principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.
Prerequisite: ARTT355, ARTT356, and ARTT357; or permission of ARHU-Art department.

ARTT457 Advanced Interactive Design (3 Credits)
Advanced concepts and techniques of interactive design and interactive software. Examination of corporate, client-based, and public service-based interactive graphic design. Emphasis on web-based interactive design structures.
Prerequisite: ARTT357.

ARTT458 Graphic Design Portfolio (3 Credits)
Creation of a comprehensive professional portfolio. Curriculum includes portfolio preparation and presentation, contracts, copyright issues, interviewing skills, resume and cover-letter writing, design briefs and proposals, and freelance business issues. Portfolio presentation includes basics of book arts.
Prerequisite: ARTT454.
Repeatable to: 9 credits if content differs.

ARTT459 Advanced Graphic Design Studio (3 Credits)
Student-run design firm working with non-profits and other organizations. Organizations act as clients; the students as a creative firm. Under guidance and supervision of faculty, students learn first-hand about working with clients, working within a budget, working with printers and press runs, and working under real deadlines.
Prerequisite: ARTT454; or permission of ARHU-Art department.
Repeatable to: 9 credits if content differs.

ARTT460 Seminar in Art Theory (3 Credits)
Exploration of relationship between content and processes of art in a contemporary multi-cultural context.
Restriction: Senior standing.

ARTT468 Seminar on the Interrelationship Between Art and Art Theory (3 Credits)
The relationship between a student's work and the theoretical context of contemporary art.
Restriction: Junior standing or higher; or permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT469 Professional Practice (3 Credits)
Business aspects of being an artist, with an emphasis on starting and maintaining a professional career.
Restriction: Senior standing; or permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.
Formerly: ARTT462.

ARTT479 Advanced Digital Media Studio (3 Credits)
Variable multi-level studio emphasizing advanced concepts and processes related to time-based, projection, installation, interactive, and audio/visual integrated digital art. Emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT370; or permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT481 Advanced Specialization Seminar (3 Credits)
Seminar combines contemporary art theory, criticism, professional practice and career preparation in relation to students works from all areas of specialization.
Prerequisite: Permission of ARHU-Art department.

ARTT487 Capstone for Citation in Interdisciplinary Multimedia and Technology (1 Credit)
Independent study: a paper or website synthesizing the various citation learning experiences.
Prerequisite: Permission of ARHU-Art department.

ARTT488 Advanced Special Topics in Graphic Design (1-3 Credits)
Variable topics in Graphic Design theory and practice.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT489 Advanced Special Topics in Art (1-3 Credits)
Advanced studio art and theory within the context of a special topic.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT498 Directed Studies in Studio Art (1-3 Credits)
Advanced independent work in Studio Art. Meeting with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT499 Directed Studies in Graphic Design (1-3 Credits)
Advanced independent studies in Graphic Design. Meetings with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTX - Art Studio Education Abroad

ARTX201 Historic Artistic Techniques (1 Credit)
This intensive one-credit course introduces students to the materials and techniques of the past through a practical workshop. The course also introduces the history of the ancient technique, with examples from Rome and the Mediterranean world. Techniques for the conservation and restoration of mosaics will also be covered through relevant case-studies.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX203 Photo Documentary and Discovery (3 Credits)
In this course, you learn to research and tell your individual story through photography. Utilizing workshops and excursions outside the classroom, you develop the skills to dive into different cultures and use your camera as a medium for understanding a community and telling your story through photographs.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARTX204 Ways of Seeing: Storytelling Through Photography (3 Credits)
This class is an effort to make sense of your study abroad stay: rather than creating photographs as mementos, you will make pictures that are unique to your stay in Stockholm, but still refer back to your life in general. This class combines a studio critique and a survey of the history and theory of photography.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARTX301 Painting Workshop (3 Credits)
This is an advanced course in painting techniques, which may include other media, such as photography and printmaking as research aids. Students will further develop and explore personal concepts in the painting medium to produce a coherent body of work.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX302 Printmaking Workshop (3 Credits)
This is an advanced course in printmaking techniques. Students will further develop and explore personal concepts in the printmaking medium to produce a coherent body of work.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ASTR - Astronomy

ASTR100 Introduction to Astronomy (3 Credits)
An elementary course in descriptive astronomy, especially appropriate for non-science students. Topics include the Sun, Moon, planets, stars, and nebulae, galaxies, and evolution of the Universe.
Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR101 General Astronomy (4 Credits)
Descriptive astronomy, appropriate for non-science majors. Sun, moon, planets, stars, nebulae, galaxies and evolution. Laboratory exercises include use of photographic material, computer simulations, and standard laboratory equipment.
Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR120 Introductory Astrophysics - Solar System (3 Credits)
For students majoring in astronomy or with a strong interest in science. Topics include development of astronomy, planetary orbits, electromagnetic radiation, telescopes as well as constituents and origin of the solar system (planets, satellites, comets, asteroids, meteoroids, etc.).
Prerequisite: Must have completed or be concurrently enrolled in MATH140.
Restriction: Must not have completed ASTR101 or ASTR100.
Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR121 Introductory Astrophysics II - Stars and Beyond (4 Credits)
For students majoring in astronomy or with a strong interest in science. Includes instrumentation, stellar properties, stellar evolution, structure of the galaxy, other galaxies, large scale structure, Big Bang Theory, and future of the universe.
Prerequisite: ASTR120 and MATH140; or permission of CMNS-Astronomy department.

ASTR220 Collisions in Space - The Threat of Asteroid Impacts (3 Credits)
Appropriate for non-science majors. Worried? Can't sleep? Collisions in Space will evaluate the threat of asteroid impacts with the Earth using knowledge of asteroid characteristics and orbits. The merits of possible defense plans will be discussed, as well as the budgetary and political concerns associated with implementing any such plan.
Restriction: Must not be in Astronomy program.
Additional Information: Course is open to Astronomy and Planetary Sciences minors.

ASTR230 The Science and Fiction of Planetary Systems (3 Credits)
Have you ever wondered if humans will ever terraform Mars or Europa so we could live there without a spacesuit? Has it ever crossed your mind how lucky you are that you live on a water-rich planet with an oxygen-rich atmosphere? Have you ever suspected novelists and scriptwriters of creating ridiculous planets that violate scientific laws? Does the fate of our planet's thin biosphere keep you up at night? How common is life in the Universe? These are difficult questions, but armed with the right information, you can answer all of them. The Science and Fiction of Planetary Systems will help you develop a deeper understanding of why planets are the way they are. Along the way, you'll see examples of mistakes made in classic science fiction movies, novels and short stories and get the chance to invent your own plausible planets!
Prerequisite: Must have math eligibility of MATH115 or higher; or MATH113.

ASTR288 Special Projects in Astronomy (1-3 Credits)
Independent study, short research projects, tutorial reading, and assisting with faculty research and teaching under special supervision.
Prerequisite: Permission of CMNS-Astronomy department.
Repeatable to: 6 credits.

ASTR300 Stars and Stellar Systems (3 Credits)
Designed primarily for non-science majors. Study of stars-types, properties, evolution, and distribution in space; supernovae, pulsars, and black holes.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

ASTR305 Astronomy and the Media (3 Credits)
Although science plays a central role in modern life, the media can present scientific discoveries and thought as too complex and arcane for intelligent laypeople to understand. This has the effect of excluding non-scientists from this important intellectual discourse and sometimes of even manipulating their views. This course uses astronomy (and other science) news stories to give students the tools and motivation to critically evaluate scientific news for themselves, enabling them to use the media to keep abreast of science throughout their lives.

ASTR310 Observational Astronomy (4 Credits)
Introduction to current optical observational techniques, with brief coverage of infrared, ultraviolet, and x-ray techniques. Statistics, spherical trigonometry time, catalogs, geometrical and physical optics, telescopes, and optical instruments. Effects of the atmosphere. Practical work at the observatory using a CCD camera. Some nighttime observing sessions.
Prerequisite: ASTR121; and (PHYS171 or PHYS161). Or permission of CMNS-Astronomy department.
Restriction: Must be in Astronomy program.

ASTR315 Astronomy in Practice (4 Credits)
Students learn astronomy research techniques and contribute significantly to the existing body of astronomical knowledge. Students apply methods and tools such as celestial coordinates, telescopes and CCD cameras, and appropriate analysis software to a specific observational goal. Students produce a work detailing their scientific result which will be submitted for publication in a professional venue. Each semester, the course focuses on a specific astronomical topic or type of object, such as asteroids, extrasolar planets, supernovae in other galaxies, quasars, etc.
Restriction: Must not be in Astronomy program.
Additional Information: Appropriate for non-science majors.

ASTR320 Theoretical Astrophysics (3 Credits)
Application of selected physics concepts in an astrophysical context. Topics would include gravity (Keplerian motion, Virial theorem, Roche limit, dynamical friction); gas dynamics (hydrostatic equilibrium, stellar models, spiral density waves), thermodynamics and statistical physics (Boltzmann distribution, Wien displacement, convective instability, degenerate gas); atomic physics (quantum principles, H atom, permitted and forbidden lines); radiation processes (line radiation, opacity).
Prerequisite: ASTR121; and (PHYS270 and PHYS271; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR330 Solar System Astronomy (3 Credits)
Designed primarily for non-science majors. The structure of planets and of their atmospheres, the nature of comets, asteroids, and satellites. Comparison of various theories for the origin of the solar system. Emphasis on a description of recent data and interpretation.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or the General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR330 or GEOL212.

ASTR340 Origin of the Universe (3 Credits)
Designed primarily for non-science majors. A study of our progression of knowledge about the universe. Topics include: early cosmological models, geocentric vs. heliocentric theory, curvature of space, Hubble's Law, Big Bang Theory, microwave background radiation, evolution of stars and galaxies, dark matter, active galaxies, quasars and the future of the universe.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

ASTR350 Black Holes (3 Credits)
Black holes are the most exotic prediction of Einstein's Theory of General Relativity and, amazingly, the Universe seems to manufacture these bizarre objects in copious numbers. As well as being the ultimate laboratory for studying the nature of space and time, they drive some of the most energetic and extreme phenomena known to astronomers (with quasars and gamma-ray bursts being just a couple of examples). In this introduction to the physics and astrophysics of black holes, we start by examining the basic physics of black holes, which fundamentally means understanding gravity. We then look at the nature of stellar-mass black holes and supermassive black holes. We will discuss the fairly recent realization that black holes may be crucial agents for regulating the growth of galaxies. Finally, we dive into the realm of theoretical physics and probe how black holes may provide a route for uncovering new laws of physics governing the structure of space and time.
Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR 398B or ASTR 350.
Formerly: ASTR 398B.

ASTR380 Life in the Universe - Astrobiology (3 Credits)
Designed primarily for non-science majors. Study of the astronomical perspective on the conditions for the origin and existence of life in the universe.

ASTR386 Experiential Learning (1-3 Credits)
Restriction: Junior standing or higher; and permission of CMNS-Astronomy department.

ASTR398 Special Topics in Astronomy (3 Credits)
This course is designed primarily for students not majoring in astronomy and is suitable for nonscience students. It will concentrate study in some limited field in astronomy which will vary from semester to semester. Possible subjects for study are the solar system, extragalactic astronomy and cosmology, the inconstant universe.
Restriction: Junior standing or higher; or permission of CMNS-Astronomy department.
Repeatable to: 6 credits if content differs.

ASTR399 Honors Seminar (1-16 Credits)
Credit according to work done.
Restriction: Must be admitted to the departmental honors program in astronomy.

ASTR406 Stellar Structure and Evolution (3 Credits)
Study of stellar internal structure, nuclear reactions, and energy transport. Study of stellar evolution of both low-mass and high-mass stars, including the stellar end states of white dwarfs, neutron stars, and black holes.
Prerequisite: ASTR320; or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR 498N or ASTR 406.
Formerly: ASTR 498N.

ASTR410 Radio Astronomy (3 Credits)
Introduction to current observational techniques in radio astronomy. The radio sky, radiophysics, coordinates and catalogs, antenna theory, Fourier transforms, interferometry and arrays, aperture synthesis, and radio detectors.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR415 Computational Astrophysics (3 Credits)
Introduction to the most important computational techniques being used in research in astrophysics. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department. Jointly offered with ASTR615.
Credit Only Granted for: ASTR415 or ASTR615.

ASTR421 Galaxies (3 Credits)
Introduction to structure, kinematics, and dynamics of normal and peculiar galaxies. Quantitative descriptions of normal spiral galaxies (like our Milky Way) and elliptical galaxies will be followed by more exotic considerations such as interacting and merging galaxies, and active galactic nuclei.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR422 Cosmology (3 Credits)
Introduction to modern cosmology. Topics include large scale structure of universe, the intergalactic medium, the nature of dark matter cosmological models and galaxy formation.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR430 The Solar System (3 Credits)
Formation and evolution of the Solar System. Planetary surfaces, interiors, atmospheres, and magnetospheres. Asteroids, comets, planetary satellites, and ring systems. Emphasis on using basic physics to understand observed properties of the Solar System. Intended for students majoring in the physical sciences.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR435 Astrophysics of Exoplanets (3 Credits)
Introduction to exoplanets. Topics include historical development, advantages, and limitations of detection methods, the statistics of exoplanet characteristics, the bulk properties of known expolanets, and remote sensing for characterization of exoplanets.
Prerequisite: ASTR121; and (PHYS273; or (PHYS270 and PHYS271)). Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR 498X or ASTR 435.
Formerly: ASTR 498X.

ASTR450 Orbital Dynamics (3 Credits)
Vectorial mechanics, motion in a central force field, gravitational and non-gravitational forces, the two-body and three-body problems, orbital elements and orbital perturbation theory, resonances in the solar system, chaos. Intended for students majoring in any of the physical sciences.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR480 High Energy Astrophysics (3 Credits)
The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined. Phenomena such as supernovae and high-energy particles are also covered.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR498 Special Problems in Astronomy (1-6 Credits)
Research or special study. Credit according to work done.
Restriction: Must be in one of the following programs (Physics; Astronomy) ; and permission of CMNS-Astronomy department.

BCHM - Biochemistry

BCHM386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and must have a learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

BCHM461 Biochemistry I (3 Credits)
First semester of a comprehensive introduction to modern biochemistry. Structure, chemical properties, and function of proteins and enzymes, carbohydrates, lipids, and nucleic acids. Basic enzyme kinetics and catalytic mechanisms.
Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.
Credit Only Granted for: BCHM461 or BCHM463.

BCHM462 Biochemistry II (3 Credits)
A continuation of BCHM 461. Metabolic pathways and metabolic regulation, energy transduction in biological systems, enzyme catalytic mechanisms.
Prerequisite: Minimum grade of C- in BCHM461.
Credit Only Granted for: BCHM462 or BCHM463.

BCHM463 Biochemistry of Physiology (3 Credits)
A one-semester introduction to general biochemistry. A study of protein structure, enzyme catalysis, metabolism, and metabolic regulation with respect to their relationship to physiology.
Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.
Credit Only Granted for: BCHM461, BCHM462 or BCHM463.

BCHM464 Biochemistry Laboratory (3 Credits)
Biochemical and genetic methods for studying protein function. Site-directed mutagenesis and molecular cloning, protein purification, enzyme activity assays, computer modeling of protein structure.
Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for all College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: BCHM465.
Restriction: BCHM, CHEM, and Nutritional Sciences majors have first priority, followed by other life science majors.

BCHM465 Biochemistry III (3 Credits)
CORE Capstone (CS) Course. An advanced course in biochemistry. Biochemical approach to cellular information processing. DNA and RNA structure. DNA replication, transcription, and repair. Translation of mRNA to make proteins.
Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Recommended: BCHM462.

BCHM485 Physical Biochemistry (3 Credits)
Physical Chemistry with applications to biological systems. Principal topics: quantum chemistry, spectroscopy, structural methods for biological macromolecules, statistical thermodynamics, transport processes in liquid phase, chemical and biochemical kinetics, modeling and simulation, polymer dynamics.
Prerequisite: Minimum grade of C- in CHEM481.
Restriction: Must be in Biochemistry program; or permission of instructor.
Credit Only Granted for: CHEM482 or BCHM485.

BIOE - Bioengineering

BIOE120 Biology for Engineers (3 Credits)
Introduction to the functions and interactions of biological systems from a quantitative perspective. Introduction to the modern experimental techniques and methods of data analysis. Roles for bioengineers in biology, and the role of biology in bioengineering will be elucidated.
Prerequisite: Must have completed or be concurrently enrolled in MATH140.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE121 Biology for Engineers Laboratory (1 Credit)
Bioengineering encompasses numerous sub-disciplines that apply engineering principles to analyze biological systems and that utilize engineering design strategies to solve biological and biomedical problems. This course is aimed at providing students with the opportunity to learn how biology and engineering can synergistically contribute to our understanding of such problems, and to gain hands-on experience in basic techniques relevant to Bioengineering.
Prerequisite: Must have completed or be concurrently enrolled in BIOE120.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE160 Biopharmaceutical Production (3 Credits)
Focuses on the basics of recombinant DNA technology as applied to biopharmaceutical manufacturing in a classroom setting. Students will work through a 'production campaign' including all key steps of manufacturing a protein product.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Young Scholars Program.

BIOE221 Academic and Career Planning (1 Credit)
Provides practical tools to help Bioengineering majors think critically about their goals and career paths. Guides Bioengineering students through accessing useful resources both on- and off-campus.
Prerequisite: BIOE120 and BIOE121.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE232 Bioengineering Thermodynamics (3 Credits)
A quantitative introduction to thermodynamic analysis of bioengineering systems. Bioengineering encompasses a wide range of applications from nanoscale interactions (e.g. reactions between molecules), to cellular interactions (e.g. membrane electrical currents), to overall balances on organisms, all the way to large scale manufacturing. Each of these applications (and many others not mentioned) involve energy interactions which is the domain of thermodynamics. The basic laws of thermodynamics will be introduced and explained through a series of examples related to bioengineering systems.
Prerequisite: PHYS261 and PHYS260.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE232, ENES232, ENME232, or ENME320.

BIOE241 Biocomputational Methods (3 Credits)
Application of computer technology to biological and natural resource systems considering engineering aspects. Designed to help students in the use of computer technology for problem solving. The course will cover 4-5 software packages important for later use by the student.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE331 Biofluids (3 Credits)
Principles and applications of fluid mechanics with a focus on bioengineering topics. Content includes conservation of mass, momentum, and energy, as well as the application of these fundamental relations to hydrostatics, control volume analysis, internal and external flow, and boundary layers. Applications to biological and bioengineering problems such as tissue engineering, bioprocessing, imaging, and drug delivery.
Prerequisite: MATH246, BIOE120, BIOE121, BIOE241, and BIOE371; and must have completed or be concurrently enrolled in BIOE232.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE331, ENCE305, ENFP300 or ENME331.

BIOE332 Transport Process Design (3 Credits)
Fluid flow, heat transfer, and mass transfer with applications in medicine, environment, biotechnology, food, agriculture, and other biosystems. Design of solutions to current problems in biological engineering is emphasized.
Prerequisite: BIOE331.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE340 Modeling Physiological Systems and Lab (4 Credits)
Topics covered will include cell and general physiology, membrane physiology, blood cells and clotting, circulation, metabolism, respiration, and the nervous system. A lab component will also be included.
Prerequisite: BSCI330, BIOE120, BIOE121, BIOE241, and MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE340 or (BSCI440 and BSCI441).

BIOE371 Linear Systems and Ordinary Differential Equations for Bioengineering Applications (3 Credits)
This class utilizes fundamentals in linear systems, including eigenvalues and eigenvectors, as well as linear differential equations, to study various problems in bioengineering and biological systems, with a particular emphasis on feedback, stability, controllability, and control design.
Prerequisite: BIOE241; and must have completed or be concurrently enrolled in MATH246.
Restriction: Permission on ENGR-Fischell Department of Bioengineering department.

BIOE372 Biostatistics for Experimental Design and Data Analysis (3 Credits)
This course will instruct students in the fundamentals of probability and statistics through examples in biological phenomenon, the design of bioengineering experiments, and clinical data analysis. Fundamentals covered in the course include probability distributions, hypothesis testing, power analysis, regression analysis, and correlation analysis.
Prerequisite: BIOE120, BIOE121, and BIOE241.
Recommended: MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE372 or STAT464.

BIOE389 Special Projects in Bioengineering (1-3 Credits)
Exploring a variety of projects in Bioengineering.
Restriction: Permission of instructor; and permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 6 credits.

BIOE399 Independent Study in Bioengineering (1-3 Credits)
Independent study.
Prerequisite: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 6 credits if content differs.

BIOE404 Biomechanics (3 Credits)
Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.
Prerequisite: MATH246, BIOE120, ENES102, BIOE121, and BIOE241; and must have completed or be concurrently enrolled in BIOE371.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE411 Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and (BIOE120, BIOE121, BIOE241, MATH246, and MATH241). Or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: BSCI330 and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE411 or CHBE487.

BIOE413 Stem Cell Engineering (3 Credits)
Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.
Prerequisite: BIOE241, BIOE120, BIOE121, MATH246, and BSCI330; and must have completed or be concurrently enrolled in BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department. Jointly offered with: BIOE613.
Credit Only Granted for: BIOE489J, BIOE413, BIOE689J or BIOE613.
Formerly: BIOE489J.

BIOE420 Bioimaging (3 Credits)
Examines the physical principles behind major biomedical imaging modalities and new ways of using images for bio-related applications.
Prerequisite: MATH246, BIOE120, BIOE121, and BIOE241.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE431 Fundamentals of Biosensor Techniques, Instrumentation, and Applications (3 Credits)
A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.
Prerequisite: CHEM135, PHYS260, PHYS261, BSCI330, BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE433 Optical Microscopy (3 Credits)
Includes a large variety of techniques central in many fields of biological and engineering research as well as clinical medicine. This course will provide a comprehensive overview of the fundamentals of optical microscopy. At a fundamental level, the course will cover the interaction of light with tissue, cells and biomaterials, and the mathematical foundations that describe optical systems.
Prerequisite: BIOE120, BIOE121, BIOE241, BIOE371, and MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489I or BIOE433.
Formerly: BIOE489I.

BIOE434 Image Signal Processing (3 Credits)
An introduction to fundamentals of signal and image processing, including machine learning, and their applications in biomedicine. Students will be introduced to the basic set of skills to analyze biomedical signals and images and convert them into useful diagnostic information. Students will also explore current research in the area of biomedical signal imaging and discuss how those technologies help to improve the efficiency, accuracy, and patient experience of conventional medical and diagnosis procedures.
Prerequisite: BIOE241, BIOE371, and BIOE372; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE434 or BIOE489K.
Formerly: BIOE489K.

BIOE437 Computer-Aided Design in Bioengineering (3 Credits)
Introduction to Computer-Aided Design (CAD). Basic CAD operations will be demonstrated in class with Creo Parametric (formerly Pro/E). Lecture topics will summarize design methodology, review best-practices in hardware development, and discuss engineering applications. The course will culminate in a student-selected project leveraging CAD.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE437, BIOE689V, ENME414, ENME272, or ENAE488D.
Formerly: BIOE689V.

BIOE442 Python: Introduction to Programming and Data Analysis (3 Credits)
Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.
Prerequisite: BIOE241, BIOE120, BIOE121, and MATH241; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489A or BIOE442.
Formerly: BIOE489A.

BIOE453 Biomaterials (3 Credits)
Examination of the structure and function of natural biomaterials, and cell-extracellular matrix interactions. Study physical properties of synthetic biomaterials for biomedical applications. Understanding molecular level interactions between biomolecules and biomaterials to design novel biomaterials with desirable characteristics. Application of biomaterials as implants, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds will be covered.
Prerequisite: CHEM231, MATH246, CHEM232, BIOE120, BIOE121, and BIOE241.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

BIOE457 Biomedical Electronics & Instrumentation (4 Credits)
Students learn fundamental concepts of electronics, assembly of electronic components into functional circuits, and integration of functional electronic devices and circuits into a system. In the lab component, students will learn to assemble and evaluate circuits and systems.
Prerequisite: BIOE120, BIOE121, BIOE241, PHYS261, MATH246, and PHYS260.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE460 Biotechnology and Bioproduction (3 Credits)
Basics of recombinant DNA technology and biopharmaceutical manufacturing.
Restriction: Junior standing or higher.
Credit Only Granted for: BIOE460, BIOE468B, or ENES489Q.
Formerly: BIOE468B.

BIOE461 Synthetic Biology and Biological Engineering (3 Credits)
Students are introduce to the scientific foundation and concepts of synthetic biology and biological engineering. Current examples that apply synthetic biology to fundamental and practical challenges will be emphasized. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: Completion of BSCI222 and/or BSCI330 recommended.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489G or BIOE 461.
Formerly: BIOE489G.

BIOE462 Therapeutic Development and Delivery (3 Credits)
The ultimate purpose of the pharmaceutical and biotechnology industries is the development and delivery of therapeutics. This course covers fundamentals of engineering and the pharmaceutical sciences related to therapeutics, including basic pharmaceutics/drug delivery, pharmacokinetics, biomolecular kinetics, and regulatory issues. Specific focus is placed on biotherapeutics, including antibodies and protein engineering,RNA and DNA therapeutics (gene therapy and RNAi), extracellular vesicle biotechnology (exosomes), and cell-based therapies, including stem cells. The use of delivery technologies to enable therapeutics (e.g. nanomedicine) will also be discussed.
Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and BSCI330; and must have completed or be concurrently enrolled in BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489P or BIOE462.
Formerly: BIOE489P.

BIOE463 Spatial Control of Biological Agents (3 Credits)
Description and solution of the movement of passive and active biological agents in homogeneous and heterogeneous bioenvironments using partial differential equations and numerical methods. Identification and diagnosis of hot spots. Prescription of control strategies using techniques from Artificial Intelligence (AI) and verification of effectiveness. Applications environments may include landscapes and tissues.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; and must have completed or be concurrently enrolled in BIOE332.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE464 Introduction to Computational Molecular Bioengineering (3 Credits)
Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.
Prerequisite: BIOE120, BIOE241, MATH246, BIOE232, and BIOE372; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489N or BIOE464.
Formerly: BIOE489N.

BIOE468 Selected Topics in Bioengineering (3 Credits)
Selected topics in Bioengineering will be covered and taught by a variety of department faculty.
Prerequisite: BIOE120 and BIOE121.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 9 credits if content differs.

BIOE485 Capstone Design I: Entrepreneurship, Regulatory Issues, and Ethics (3 Credits)
This is the first part of a two-semester senior capstone design course which covers principles involved in engineering design, design approaches, economics of design, ethics in engineering, and patent regulations. It also helps students learn team work and write design project proposals under the mentorship of a faculty advisor.
Prerequisite: 21 credits in BIOE courses.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and senior standing; and must be in Engineering: Bioengineering program.
Credit Only Granted for: BIOE485 or ENBE485.
Formerly: ENBE485.

BIOE486 Capstone Design II (3 Credits)
This is the second part of the senior capstone design course. This part is independent instruction where faculty mentoring each project team works with students to order supplies, fabricate their proposed design under BIOE485, test the design, write the report and present it to their fellow seniors and board of faculty mentors. Students are taught to convert the blue print of a design to actual device and test it.
Prerequisite: Must have completed BIOE485 in the immediately preceding semester.
Restriction: Senior standing; and must be in Engineering: Bioengineering program; and permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE486 or ENBE486.
Formerly: ENBE486.

BIOE489 Special Topics in Bioengineering (1-3 Credits)
Exploring a variety of topics with Bioengineering.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 6 credits.

BIOM - Biometrics

BIOM301 Introduction to Biometrics (3 Credits)
Descriptive statistics, introduction to probability, sampling, confidence interval estimation, hypothesis testing, simple regression and correlation. Emphasis on simple applications of statistical techniques and interpretation of statistical results.
Prerequisite: MATH113 or MATH115.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

BIOM386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

BIOM405 Computer Applications in Biometrics (1 Credit)
An introduction to computer applications for data analysis. This is equivalent to the computer lab of 601 and is required for students that have taken BIOM 301 and BIOM402 and wish to go directly into BIOM602.

BMGT - Business and Management

BMGT110 Introduction to the Business Value Chain (3 Credits)
Students are provided with an introduction to the business value chain with an emphasis on inter-organizational and intra-organizational coordination of core business processes. Emphasis is on cross-functional integration and the efficient and effective management of core processes with an emphasis on marketing, operations and supply chain management.

BMGT190 Introduction to Design and Quality (4 Credits)
QUEST students learn and apply design practices to design new products and services. Working in multidisciplinary teams, students use quality and process improvement methods to identify, analyze, and recommend solutions to real-world problems.
Restriction: Must be in the Quest program. Cross-listed with ENES190.
Credit Only Granted for: BMGT190 or ENES190.

BMGT198 Special Topics in Business and Management (1-3 Credits)
Introductory special topics in business and management.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT207 Technology, Society and the Future of Humanity (3 Credits)
New emerging and converging technologies (such as blockchain, AI, and synthetic biology) are disrupting business-as-usual in fields as diverse as finance, supply chain, medicine and the creative industries. This course deals with the question of how we should use technology to create ethical economic and social systems that reflect the kind of world we want to exist in 25, 50, 100 years from now. Our ideas of what humanity considers to be a 'good life' will influence and govern how disruptive technologies can either contribute to it or lead to a dystrophic future.

BMGT210 Foundations of Accounting for Non Business Majors (3 Credits)
Provides an understanding of the common statements that report a company's profitability and financial health, and are useful to all economic agents who are engaged with the firm. Students will also recognize and understand managerial accounting as a system for accumulating and modeling information to support decision-making.
Restriction: Must not have completed BMGT221; and must not be in a major in the R.H. Smith School of Business.
Credit Only Granted for: (BMGT220 and BMGT221) or BMGT210.
Additional Information: Does not apply to a Smith School degree. Students pursuing a Smith School minor who have completed both BMGT220 and BMGT221 may substitute these courses for BMGT210. Credit will not be given for both BMGT210 and the combination of BMGT220 and BMGT221.

BMGT220 Principles of Accounting I (3 Credits)
Basic theory and techniques of contemporary financial accounting. Includes the accounting cycle and the preparation of financial statements for single owner and partnership forms of business organizations operating as service companies or merchandisers.

BMGT221 Principles of Accounting II (3 Credits)
Basic theory and techniques of accounting for managerial decision making. Involves the introduction of the corporation and manufacturing operations. Includes cost-volume-profit analysis and capital budgeting. Introduces the topics of income taxation and international accounting.
Prerequisite: BMGT220.

BMGT230 Business Statistics (3 Credits)
Introductory course in probabilistic and statistical concepts including descriptive statistics, set-theoretic development of probability, the properties of discrete and continuous random variables, sampling theory, estimation, hypothesis testing, regression and decision theory and the application of these concepts to problem solving in business and management.
Prerequisite: MATH113 or MATH115; or must have math eligibility of MATH120 or higher.
Restriction: Must not have completed ENCE302, ENME392, STAT400, BMGT231, or ENEE324.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

BMGT289A Social Enterprise: Changing the World through Innovation and Transformative Action (3 Credits)
In this course, students will hear from real-life social entrepreneurs, explore current day social issues of sustainability, climate change, leadership, disruptive innovations, and create or blueprint business plans to generate positive social change. This class will focus on innovative thinking skills, personal narratives, and social interaction strategies and plans.

BMGT289B How Do Innovators Think? (3 Credits)
In this course, students will learn about: a) the innovation process and the role of the individual in generating innovations and b) the attributes, habits, and skills of individuals who have successfully started innovative new businesses or significantly added value to an existing company.

BMGT289D Frauds, Scams, and Thefts: What, How and Why? (3 Credits)
The primary objective of this course is for students to gain a conceptual understanding of how fraud occurs, how it can be prevented, and how fraud can be detected through practical application of skills and tools. This course provides general background relating to fraud (e.g. history, prevalence, psychology), and it delves into the myriad types of fraud, scams and theft. This course also examines the trends in fraud detection and investigation; and introduces and explores with students the constant tension between public order and civil liberties in white collar crime, forensics, and hacking.

BMGT289E Entrepreneurial Thinking for Non-Business Majors: How Not to Miss Great Opportunities Your Life Throws at You (3 Credits)
In this course, students learn how to analyze the world around them and then notice and define new trends, emerging problems, impending gaps, and how to turn these into exciting opportunities by providing creative solutions. Students will have a chance to not only sharpen their critical thinking skills, but also learn how to take initiative, develop a working solution, identify and resolve conflicts, and be confident and persistent, yet flexible enough to respond to changes. Student teams identify a compelling problem in present day life and then propose a creative solution taking into account possible difficulties in implementation. In addition, students will also be given problems on a much smaller scale and asked to create and present a workable solution. Students will be exposed to how a visionary's mind works and the creative solution process. In addition, students will also learn how entrepreneurial thinking can improve their day-to-day life.

BMGT289I Why Good Managers Make Bad Decisions (3 Credits)
This course provides an overview of the concepts, approaches, and vocabulary of evidence-based management (EBM) and provides an understanding of how experts in many disciplines can employ evidenced based decision making. EBM is an emerging movement in business to explicitly use the current best information in management decision making with special emphasis on relevant scientific findings and unbiased organizational facts. The course stresses how individuals practicing EBM learn how to rethink their approaches to data and knowledge in order to make more effective decisions.

BMGT289L The Proper Role of Government in a Free Enterprise System (3 Credits)
This course examines the proper role of the government in overseeing, promoting, or regulating various business activities in a free market system. Areas that warrant government involvement are identified and appropriate government responses are evaluated. The course identifies causes of market failure and discusses when, how and to what extent the government should act to remedy those failures. Finally, varieties of capitalism and the role of the government in other free enterprise counties are evaluated.

BMGT289M European Debt Crisis: More Integration or Withering of a Dream? (3 Credits)
This course explores the developments and events that led to the formation of the Economic and Monetary Union (EMU) and analyzes the causes for the eruption of the debt crisis. In addition, the course evaluates the policy steps taken to stabilize the crisis (monetary, banking, fiscal and institutional measures), and it discuss policy options to overcome in a lasting manner the design flaws and strengthen the governance of the EMU, so as to improve its overall economic growth performance.

BMGT298 Special Topics in Business and Management (1-3 Credits)
Introductory special topics in business and management.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT300 Information Systems for Non Business Majors (2 Credits)
Introduces students to the transformative potential of emerging and existing information technologies and their impacts on the structure and competitive dynamics of various industries.
Restriction: Must be admitted to the Minor in General Business or the Minor in Innovation and Entrepreneurship; and must not have completed BMGT301; and must not be in a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT300 or BMGT301.
Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT301 for General Business or Innovation and Entrepreneurship minor students only.

BMGT301 Introduction to Information Systems (3 Credits)
Comprehensive overview of information systems (IS), which explores the strategic and tactical nature of IS. The basic concepts in analyzing and designing information systems for business applications will be presented. Aspects of data management such as databases, data warehousing, data analysis, and data mining will be analyzed, and the basics of web page and web site design will be outlined. Students will also be introduced to modern information systems infrastructure such as telecommunications, networks, and information systems security. Knowledge of Excel or a similar spreadsheet tool.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major. All BMGT majors, including students who are a double major in CMCS, must complete BMGT301 for their BMGT degree.

BMGT302 Designing Applications for Business Analytics (3 Credits)
Provides an introduction to structured programming with business applications. Programming logic and data structures are introduced. The course especially emphasizes hands-on exercises using Excel macros and Visual Basic for Applications (VBA), and covers business functions and analytics.
Prerequisite: BMGT301; or permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; and must not be in Computer Science program.

BMGT310 Intermediate Accounting I (3 Credits)
Comprehensive analysis of financial accounting topics related to financial statement preparation and external reporting.
Prerequisite: BMGT221.

BMGT311 Intermediate Accounting II (3 Credits)
Continuation of BMGT310.
Prerequisite: BMGT310.

BMGT313 Financial Statement Analysis (3 Credits)
Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. Involves understanding and using the information that financial statements are communicating to users.
Prerequisite: BMGT221.

BMGT321 Managerial Accounting (3 Credits)
A study of the basic concepts of product costing and cost analysis for management planning and control. Emphasis is placed on the role of the accountant in organizational management, analysis of cost behavior, standard cost budgeting, responsibility accounting and relevant costs for decision-making.
Prerequisite: BMGT221.

BMGT323 Taxation of Individuals (3 Credits)
Federal taxation of individuals focusing on income, exclusions, deductions, depreciation, credits and capital transactions. Property coverage includes the tax consequences of sales and dispositions of investment and business assets. Both tax planning and compliance issues are covered.
Prerequisite: BMGT221.

BMGT326 Accounting Systems (3 Credits)
A study of accounting systems and computer and communications technology.
Prerequisite: BMGT221; and (BMGT201 or BMGT301).

BMGT332 Quantitative Models for Management Decisions (3 Credits)
The aim of this course is to introduce management science techniques for informed decision-making that can be applied in spreadsheet models to assist in the decision-analysis process. Models include Linear Programming, Transportation and Assignment problems, network flow models, Integer and non-linear programming, Simulation and Decision Trees.
Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.

BMGT340 Business Finance (3 Credits)
Topics include: the principles and practices involved in the organization, financing and rehabilitation of business enterprises; the various types of securities and their use in raising funds, apportioning income, risk and control; intercorporate relations; and new developments. Emphasis on solution of problems of financial policy faced by management.
Prerequisite: BMGT220; and (BMGT231 or BMGT230).

BMGT341 Financial Markets (3 Credits)
Shows the interconnectedness of the markets. The role of the Central bank and monetary policy is included in this context. Students develop an understanding of: (i) the determination of interest rates; (ii) financial instruments, markets and institutions; (iii) the impact of monetary policy on institutions; and (iv) how financial innovations create markets.
Prerequisite: Must have completed or be concurrently enrolled in BMGT340.
Formerly: BMGT498G.

BMGT342 Wall Street Finance (3 Credits)
Using concepts and tools of finance, students will examine a wide range of business problems and explore possible solutions. The course is designed to improve a student's problem solving capabilities, business writing and communication skills, teamwork, and planning skills. Students will also gain experience in analyzing issues frequently faced by financial decision-makers.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT448F or BMGT342.
Formerly: BMGT448F.

BMGT343 Investments (3 Credits)
An introduction to financial investments. Topics include: securities and securities markets; investment risks, returns and constraints; portfolio policies; and institutional investment policies.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT343 or ECON435.
Additional Information: This course cannot be used to fulfill any requirements for majors in Economics.

BMGT345 Foundations of Financial Management for Non Business Majors (3 Credits)
Provides students an overview of financial management. Students will understand how a business allocates financial resources in an uncertain environment to maximize shareholder value. In addition students will learn the following: how to apply accounting principles to corporate finance; how to value assets, projects, companies and investment securities; understand the relationship between risk and return and how it impacts investment and corporate decisions; how to calculate a company's cost of capital, and develop an intuitive comprehension of financial concepts and analysis.
Prerequisite: BMGT210 or BMGT220.
Restriction: Must not have completed BMGT340; and must not be a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT345 or BMGT340.
Additional Information: Course does not apply to a Smith School degree. BMGT340 may substitute for BMGT345.

BMGT347 Quantitative Financial Analysis (3 Credits)
Course provides general coverage of portfolio theory and asset pricing models. Also covers ordinary least squares (OLS), with an emphasis on linear regression application and interpretation of results. Introduces students to financial databases and data analysis in R to apply the theories to real data and test the asset pricing models.
Prerequisite: BMGT340; must have completed or be concurrently enrolled in BMGT343.
Credit Only Granted for: BMGT347 or BMGT448G.
Formerly: BMGT448G.

BMGT349 Private Equity and Venture Capital (3 Credits)
The New Markets Private Equity/Venture Capital Clinic allows students to gain professional experience commensurate with that of an Associate in a Venture Capital Firm. Students are trained to buy, own, actively manage and sell high growth technology companies in private transactions. The class format includes: lectures; presentations from guest speakers, including the regions leading CEOs, private equity and service providers; and a series of facilitated exercises that simulate buying, owning and selling businesses. The course exposes students to real life activities covering the entire deal process from market research, diligence, selection, negotiation valuing, and structuring an investment, as well as management, growth and exit of portfolio companies.
Prerequisite: Must have completed or be concurrently enrolled in BMGT313 and BMGT340.
Repeatable to: 6 credits.
Formerly: BMGT448B.

BMGT350 Marketing Principles and Organization (3 Credits)
An introduction to the concepts and principles of marketing including the marketing of service and nonprofit organizations. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.
Recommended: ECON200.

BMGT352 Customer-Centric Innovation (3 Credits)
Addresses the management of new products and services with a focus on the innovation process, specifically the development and launching of new products or services: Opportunity Identification, Concept Generation, Design, Testing and Launch.
Prerequisite: BMGT350.
Credit Only Granted for: BMGT352 or BMGT382.

BMGT353 Retail Management (3 Credits)
Planning and implementing retail marketing strategy. Store and nonstore (catalog, internet) retailing. Evaluation of how environmental trends in the consumer market, competition, the economy and technology affect retail strategy in the U.S. and global market.
Prerequisite: BMGT220 and BMGT350.

BMGT355 Foundations of Marketing for Non Business Majors (3 Credits)
Introduces the concepts and principles of marketing. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.
Restriction: Must not have completed BMGT350; and must not be a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT355 or BMGT350.
Additional Information: Course does not apply to a Smith School degree. BMGT350 may substitute for BMGT355.

BMGT357 Retailing and Marketing Internship (3-6 Credits)
Supervised work experience with a firm engaged in marketing goods or services. Students apply concepts learned in marketing classes and analyze the firm's organizational structure, environment and marketing strategy.
Prerequisite: BMGT350.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in a major in BMGT-Robert H. Smith School of Business.

BMGT360 Strategic Management of Human Capital (3 Credits)
Provides students with the basic knowledge needed to help organizations attract, select, develop, engage, evaluate, and retain talent. Topics covered may include strategic HRM, the role of globalization, legal issues in HRM, work analysis, HR planning, recruitment, personnel selection, performance management and appraisal, training and development, career development, compensation systems, motivating and rewarding performance, labor relations, and employee health and safety.

BMGT361 Entrepreneurship: Starting and Managing the Entrepreneurial Venture (3 Credits)
Focuses on the early development of a new venture. Topics include: idea-getting, opportunity recognition, feasibility studies, new venture financing and startup. Guests speakers and practicing entrepreneurs offer real world guidance. Restricted to students admitted to the Smith Entrepreneurship Fellows Program.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; and must be in the Smith Entrepreneurship Fellows Program; and must not have completed BMGT461.
Credit Only Granted for: BMGT261, BMGT361, or BMGT461.
Formerly: BMGT261.

BMGT362 Negotiations (3 Credits)
By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, this experiential course is designed to enhance students' negotiating self-confidence and improve students' analytical skills, interpersonal skills, creativity and persuasive abilities.
Restriction: Must not have completed COMM425.
Credit Only Granted for: BMGT362 or COMM425.

BMGT363 Leadership and Teamwork in Organizations (3 Credits)
Provides a comprehensive understanding of fundamental leadership concepts, theories, and skills in organizations and applies to assessing and developing effective leadership practices in organizations.

BMGT364 Managing People and Organizations (3 Credits)
An introduction to selected aspects of human behavior in organizations generally known as organizational behavior (OB). This course is designed to help students develop systematic and fundamental understanding of people and their behaviors in organizations, as well as useful abilities and skills required to effectively and ethically manage various individual, interpersonal, group, and organization-level processes.

BMGT365 Entrepreneurial Finance and Private Equity (3 Credits)
Studies venture capital and private equity using a combination of cases, lectures and guest speakers. Addresses how venture capitalists provide capital to start-up firms in growing industries and how private equity markets provide capital to help established medium-sized firms (often family businesses) grow and restructure. Focuses on how financial, legal, and economic issues are dealt with in the financial contracts between venture capitalists and their limited partners and between capitalists (or other private equity investors) and the firms in which they invest.
Prerequisite: BMGT461 or BMGT361.
Restriction: Junior standing or higher.
Credit Only Granted for: BMGT365, ENES466, SMLP471 or HLMN471.

BMGT366 Growth Strategies for Emerging Companies (3 Credits)
Offers practical management tools that are needed to build a new venture into a significant enterprise. The competencies, strategies and structures of successful high performance businesses are studied through cases, videos and guest lecturers. Topics include leadership, internal growth strategies, merger, acquisition and franchising.
Prerequisite: BMGT461 or BMGT361.
Restriction: Junior standing or higher.

BMGT367 Career Search Strategies in Business (1 Credit)
An overview and opportunity to practice job search skills critical to obtaining internships and full-time positions. Course will cover strategies for exploring career options, preparing job search materials, development of job search skills such as interviewing and networking. Students are encouraged to take this course in the sophomore or junior year.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT369 Experiential Learning in Business Innovation and Entrepreneurship (1-3 Credits)
Selected experiential learning opportunities in business innovation and entrepreneurship
Repeatable to: 15 credits if content differs.
Additional Information: Priority will be given to students enrolled in the Management Major, Innovation and Entrepreneurship Minor, and the General Business Minor.

BMGT370 Introduction to Transportation (3 Credits)
An overview of the transportation field with an emphasis on freight movements from the perspective of both providers of capacity and users of freight services. Examines the characteristics of the freight modes and the role of each mode as a major component of logistics and supply chain management. Explores the economics, energy use, and finances of each mode as well as the impact of government policies on each mode's future. Discussion of infrastructure and capacity needs of the transportation system and its ability to support the economy.

BMGT372 Introduction to Logistics and Supply Chain Management (3 Credits)
Supply chain management involves the coordination of suppliers, manufacturers, distributors, and retailers to ensure that products and services are available to the final consumer in a timely and cost-effective fashion. Logistics management is the subset of supply chain management dealing with the physical flows of product and includes such activities as transportation management, warehousing, materials handling, inventory management, and order fulfillment. Attention is paid to the logistics cost trade-offs within the firm and between members of the supply chain.

BMGT373 Supply Chain Management Internship (3-6 Credits)
Involves supervised work experience in supply chain management, logistics and/or transportation. Students will be expected to relate course material to work experience in an analysis of a firm's operations.
Prerequisite: BMGT370 or BMGT372.
Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT374 Supply Chain Risk Management (3 Credits)
Since supply chain risk is increasingly more recognized as an organizational threat, and therefore a critical part of corporate strategy; this course examines a wide range of supply chain risk and develops a process to identify, assess, and prioritize this risk. Through a series of readings and case studies, the course focuses on factors that contribute to supply chain risk within the firm as well as the supply chain. Strategies to mitigate risk are explored.
Credit Only Granted for: BMGT478C or BMGT374.
Formerly: BMGT478C.

BMGT375 Supply Chain Management for Non Business Majors (2 Credits)
Examines management decision-making in the design, implementation and coordination of a firm's supply chain activities. Topics include transportation management, warehousing, materials handling, inventory management, and order fulfillment.
Restriction: Must be admitted to the Minor in General Business or the Minor in Innovation and Entrepreneurship; and must not have completed BMGT372; and must not be a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT375 or BMGT372.
Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT372 for General Business minor or Innovation and Entrepreneurship minor students only.

BMGT380 Business Law I (3 Credits)
Legal aspects of business relationships. Examination of torts and business crimes, contracts and agency. The law of personal property and bailment relationships. Survey of public policy issues.

BMGT381 Business Law II (3 Credits)
The Uniform Commercial Code, including sales, commercial paper, secured transactions, bulk sales and documents of title. The law of partnerships and corporations. Reorganization and liquidation under the bankruptcy laws. The law of real property, landlord and tenant relationships and decedents' estates.
Prerequisite: BMGT380; or permission of BMGT-Robert H. Smith School of Business.

BMGT382 Marketing and Innovation for Entrepreneurs (3 Credits)
Marketing and Innovation are two critically important activities that determine success in any business venture. This course will focus on understanding the fundamentals of marketing and innovation from the perspective of an entrepreneur. At a broad level, we will apply proven marketing frameworks (STP and 4Ps) to effectively deliver innovation in an entrepreneurial context.
Restriction: Must not have completed BMGT352.
Credit Only Granted for: BMGT352 or BMGT382.
Additional Information: Course will not satisfy a Marketing major requirement.

BMGT385 Operations Management (3 Credits)
Studies the design, management and improvement of a firm's processes and systems for creation and delivery of products and services. Includes strategic and operational views of supply chain, product development, and capacity analysis, highlighting the competitive advantages that operations management can provide the firm.
Credit Only Granted for: BMGT385 or ENME426.

BMGT386 General Business Internship (3-6 Credits)
Supervised work experience in business. Students will be expected to relate course material to work experience in an analysis of a firm's operations.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in a major in BMGT-Robert H. Smith School of Business.

BMGT390 Designing Innovative Systems (3 Credits)
QUEST students develop an understanding of complex systems that incorporate elements of business and technical design and analyze how these systems evolve over time and may be shaped by technology disruptions, internal decisions, and external forces. Students apply these concepts to real-world complex systems in a team environment.
Prerequisite: ENES190 or BMGT190.
Restriction: Must be in the QUEST program. Cross-listed with ENES390.
Credit Only Granted for: BMGT390 or ENES390.

BMGT392 Introduction to International Business Management (3 Credits)
A study of the domestic and foreign environmental factors affecting the international operations of U.S. business firms. The course also covers the administrative aspects of international marketing, finance and management.
Prerequisite: ECON200.

BMGT395 Foundations of Management for Non Business Majors (2 Credits)
Introduces concepts related to organization behavior. Topics include leadership, team decision making and management, conflict resolution and negotiations, organizational culture, and organization change. Students will learn how to apply those concepts and theories to understanding and critically analyzing various individual, interpersonal, group, and organizational management processes.
Restriction: Must be admitted to the Minor in General Business or the Minor in Innovation and Entrepreneurship; and must not have completed BMGT364; and must not be a major in the R.H. Smith School of Business.
Credit Only Granted for: BMGT395 or BMGT364.
Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT364 for General Business minor or Innovation and Entrepreneurship minor students only.

BMGT397 Mentoring Multidisciplinary Teams (3 Credits)
QUEST students practice essential skills for mentoring and coaching multidisciplinary teams. These include effective communications, facilitation, conflict resolution, and the ability to motivate. Students will practice these skills as mentors for student teams from BMGT/ENES 190H. In the process, they will strengthen their knowledge of design and quality techniques.
Restriction: Restricted to QUEST Program (TQMP) students. Also offered as: ENES397.
Credit Only Granted for: BMGT397 or ENES397.

BMGT398 Individual Study in Business and Management (1-3 Credits)
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits.

BMGT402 Database Systems (3 Credits)
The fundamentals of database management systems (DBMS), data models, query processing, and data warehouses, and their application in the development of business information systems will be covered. An important goal of this course is to understand the value of information resources and information management challenges within an organization.
Recommended: BMGT302.
Credit Only Granted for: INST327 or BMGT402.

BMGT403 Systems Analysis and Design (3 Credits)
Techniques and tools applicable to the analysis and design of computer-based information systems. System life cycle, requirements analysis, logical design of databases and performance evaluation. Emphasis on case studies. Project required that involves the design, analysis and implementation of an information system.
Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.
Recommended: BMGT302.

BMGT404 Essential Data Skills for Business Analytics (3 Credits)
Understand the principles of data science and business analytics to collect, analyze and visualize business data. Students will learn the use of industry standard software with applications in finance, accounting, marketing and operations.
Prerequisite: BMGT301.

BMGT405 Data Communications and Networking (3 Credits)
Concepts of business data communications and data processing. Application of these ideas in computer networks, including basic principles of telecommunications technology, computer network technology, data management in distributed database systems and management of the technical and functional components of telecommunications technology.
Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: INST346 or BMGT405.

BMGT406 Developing Applications for the Web and Social Media (3 Credits)
The design and development of Web applications and the underlying platforms and standards for Web application development will be covered. It will examine the phenomenon of social media, social networking and crowdsourcing and understand their use within organizations.
Prerequisite: BMGT402 and BMGT302.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: INST377 or BMGT406.

BMGT407 Information Systems Projects (3 Credits)
Senior capstone course for the decision and information sciences major. Collected knowledge from the DIS courses and application to significant problems of size and complexity. State-of-the-art research ideas and current business and industrial practices in information systems.
Prerequisite: BMGT402 and BMGT403.
Restriction: Senior standing.

BMGT408 Emerging Topics in Information Systems (3 Credits)
Selected advanced topics covering emerging developments in the field of decision and information technologies.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.

BMGT410 Government Accounting (3 Credits)
An introduction to the theory and practice of accounting and financial reporting as applied in both federal and state/local governments, with a focus on generally accepted accounting principles applicable in each. Topics include analyzing transactions; recognizing transactions in the accounting cycles; and preparing and analyzing financial statements and the overall financial reports at both the federal and state/local government levels.
Prerequisite: BMGT221.

BMGT411 Ethics and Professionalism in Accounting (3 Credits)
Analysis and discussion of issues relating to ethics and professionalism in accounting.
Prerequisite: BMGT311.
Restriction: Must be in Accounting program.

BMGT417 Taxation of Corporations, Partnerships and Estates (3 Credits)
Federal taxation of corporations using the life-cycle approach-formation, operation, assessment, merger, reorganization and liquidation. Overviews of pass-through entities - partnerships and s-corporations -using the life-cycle approach, and the tax consequences of wealth transfers by individuals - gift and estate taxation. Both tax planning and compliance issues are addressed.
Prerequisite: BMGT221.

BMGT422 Auditing Theory and Practice (3 Credits)
A study of the independent accountant's attest function, generally accepted auditing standards, compliance and substantive tests and report forms and opinions.
Prerequisite: BMGT310; and must have completed or be concurrently enrolled in BMGT311.

BMGT423 Fraud Examination (3 Credits)
Covers fraud prevention, detection and investigation techniques. The traditional accounting areas of fraud-fraudulent financial accounting and misappropriation of assets as well as recent and historical cases of fraud will also be examined. Current fraud topics will be discussed.
Prerequisite: BMGT310.

BMGT424 Advanced Accounting (3 Credits)
Advanced accounting theory applied to specialized topics and current problems. Emphasis on consolidated statements and partnership accounting.
Prerequisite: BMGT311.

BMGT428 Special Topics in Accounting (3 Credits)
Selected advanced topics in Accounting.
Prerequisite: BMGT310.
Restriction: Must be in Accounting program.
Repeatable to: 9 credits if content differs.

BMGT430 Data Modeling in Business (3 Credits)
Explores the role of statistical models in business analytics to drive managerial decision-making and improve performance through the use of relevant data-motivated examples. Topics include regression models (both simple and multiple regression, as well as logistic regression for binary data), model validation, variable transformation, variable selection, discriminant analysis, and forecasting. These topics are modeled using state-of-the-art data analytics software.
Prerequisite: BMGT231 or BMGT230; or permission of BMGT-Robert H. Smith School of Business.

BMGT431 Data Analytics (3 Credits)
An introduction to the tools and techniques that are central to the analysis of abundant data that is being collected in many forms including web traffic, social network data, and reviews and comments on websites.
Prerequisite: BMGT430.

BMGT434 Analytics Consulting: Cases and Projects (3 Credits)
This course assumes that students have already been introduced to the concepts and techniques of operations research/business analytics (OR/BA). Published papers, short cases, and projects in OR/BA will be analyzed and discussed in a thoughtful way, taking into account the soft (people-related) issues and the hard (mathematical/optimization) issues.
Prerequisite: BMGT332; and (MATH120 or MATH140; or must have completed MATH220). Or students who have taken courses with comparable content may contact the department.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT435 Business Process Simulation (3 Credits)
Develop and plan simulation studies, build simulation models with special purpose software, analyze and interpret the results. Extensive use of applications and real-world examples. The emphasis is on model formulation and the interpretation of results, rather than mathematical theory.
Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT438 Special Topics in Operations Management (1-3 Credits)
Selected advanced topics in operations management.
Repeatable to: 6 credits if content differs.

BMGT440 Advanced Financial Management (3 Credits)
Analysis and discussion of cases and readings relating to financial decisions of the firm. The application of finance concepts to the solution of financial problems is emphasized.
Prerequisite: BMGT340.

BMGT441 Fixed Income (3 Credits)
Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT448A or BMGT441.
Formerly: BMGT448A.

BMGT442 Advanced Portfolio Management (3 Credits)
An in-depth coverage of statistical methods for choosing stocks is provided. Financial markets data is used in the class. Students are also expected to learn and use Matlab during the class to implement the concepts of the class.
Prerequisite: BMGT343.
Credit Only Granted for: BMGT442 or BMGT448C.
Formerly: BMGT448C.

BMGT443 Applied Equity Analysis and Portfolio Management (3 Credits)
Study and application of the concepts, methods, models, and empirical findings to the analysis, valuation and selection of securities, especially common stock.
Prerequisite: BMGT343.

BMGT444 Futures and Options Contracts (3 Credits)
The institutional features and economic rationale underlying markets in futures and options. Hedging, speculation, structure of futures prices, interest rate futures, efficiency in futures markets and stock and commodity options.
Prerequisite: BMGT343.
Credit Only Granted for: BMGT444 or MATH424.

BMGT445 Banking and Financial Institutions (3 Credits)
Analysis and discussion of cases and readings in commercial bank management. The loan function is emphasized; also the management of liquidity reserves, investments for income and source of funds. Bank objectives, functions, policies, organization, structure, services and regulation are considered.
Prerequisite: BMGT340.
Recommended: ECON330 or BMGT341.

BMGT446 International Finance (3 Credits)
Financial management from the perspective of the multinational corporation. Topics covered include the organization and functions of foreign exchange and international capital markets, international capital budgeting, financing foreign trade and designing a global financing strategy. Emphasis of the course is on how to manage exchange and political risks while maximizing benefits from global opportunity sets faced by the firm.
Prerequisite: BMGT340.

BMGT447 Computational Finance (3 Credits)
Students will be introduced to tools for solving financial problems, specifically Excel functions and techniques, Visual Basic (VBA) Programming and Monte Carlo method & variations. Students will then apply these tools to solve problems related to options valuation, portfolio management, and risk management.
Prerequisite: BMGT343.
Credit Only Granted for: BMGT447 or BMGT448E.
Formerly: BMGT448E.

BMGT448 Special Topics in Finance (1-3 Credits)
Selected advanced topics in finance.
Repeatable to: 9 credits if content differs.

BMGT449 Investment Fund Management: Lemma Senbet Fund (3 Credits)
The Lemma Senbet Fund is a year-long, advanced finance course available to undergraduate finance majors in their senior year. Ten to twelve students will be selected in the spring of their junior year to participate on the fund, two as portfolio managers and eight to ten as equity analysts. The course provides students with the opportunity to apply what they have learned in finance classes to actual investment decisions, through researching real companies and managing a portfolio of real money.
Prerequisite: BMGT343.
Corequisite: BMGT443.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT450 Integrated Marketing Communications (3 Credits)
In-depth study of coordinated marketing activities including advertising, sales promotion, Internet marketing, direct marketing and personal selling. Emphasizes strategic planning to effectively use these promotional tools to communicate with customers and meet marketing goals. Blends theory and current practice to provide managerial orientation.
Prerequisite: BMGT350.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT354 or BMGT450.
Formerly: BMGT354.

BMGT451 Consumer Analysis (3 Credits)
Identifying buyer behavior concepts relevant to a specific marketing problem so that appropriate marketing decisions can be made. Conceptual frameworks are drawn from psychology, sociology, economics, and other social sciences to aid in understanding the behavior of ultimate and industrial buyers.
Prerequisite: BMGT350.
Recommended: PSYC100; and PSYC221.

BMGT452 Marketing Research Methods (3 Credits)
Focuses on aiding marketing decision-making through exploratory, descriptive and casual research. Develops student skills in designing market research studies, including selection of data collection method, development of data collection instrument, sample design, collection and statistical analysis of data and reporting the results.
Prerequisite: BMGT350 and BMGT230.

BMGT454 Global Marketing (3 Credits)
Marketing functions from the global executive's viewpoint, including coverage of global marketing policies relating to product adaptation, data collection and analysis, channels of distribution, pricing, communications and cost analysis. Consideration is given to the cultural, legal, financial and organizational aspects of global marketing.
Prerequisite: BMGT350.

BMGT455 Sales Management (3 Credits)
The roles of the sales executive as a planner, manager of resources and marketing functions and recruiter, trainer, motivator and leader of field sales personnel. Techniques and sequence of problem analysis for selling and sales management decisions and to the practical framework in which these decisions take place. Teaching vehicles feature strong classroom interactions, cases, journal articles, research findings, guest sales managers, debates, and modern company practices.
Prerequisite: BMGT350.

BMGT457 Marketing Policies and Strategies (3 Credits)
This capstone course ties together various marketing concepts using the fundamentals of strategic market planning as the framework. Application of these principles is accomplished by analyzing and discussing cases and by playing a marketing strategy computer simulation game. Analysis of current business articles to understand the link between theory and real-world problem solving.
Prerequisite: BMGT350.

BMGT458 Special Topics in Marketing (1-3 Credits)
Selected advanced topics in marketing.
Repeatable to: 6 credits if content differs.

BMGT461 Entrepreneurship (3 Credits)
Process of creating new ventures, including evaluating the entrepreneurial team, the opportunity and the financing requirements. Skills, concepts, mental attitudes and knowledge relevant for starting a new business.
Restriction: Must not have completed BMGT361.
Credit Only Granted for: BMGT261, BMGT361, BMGT461, ENES460, SMLP470 or HLMN470.

BMGT463 Cross-cultural Challenges in Business (3 Credits)
Examines in depth the nature of international cultural value-differences and their behavioral-related effects in the workplace. Topics include decision-making and leadership styles and reactions to various work assignments and reward structures.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT465 Business Plan For The New Venture (3 Credits)
Each student focuses on the production of a business plan that will be accepted for an annual business plan competition. Business plans of sufficient quality may be submitted to attract financing. Topics include a deep review of business construction and its derivative short forms.
Prerequisite: BMGT461 or BMGT361.

BMGT466 Global Business Strategy (3 Credits)
Focuses on the strategic challenges that directly result from and are associated with the globalization of industries and companies. Topics include drivers of industry globalization, difference between global and multi-domestic industry, global expansion strategies, sources of competitive advantage in a global context, and coordination of a company across a global network.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT467 Strategic Innovation and Entrepreneurship (3 Credits)
Provides an understanding of how innovation affects the competitive dynamics of markets, how firms can strategically manage innovation, and how firms can create and implement strategies to maximize their likelihood of success.
Credit Only Granted for: BMGT467, ENES463 or HLMN472.

BMGT468 Special Topics in Management and Organization (1-3 Credits)
Selected advanced topics in management and organization.
Repeatable to: 6 credits if content differs.

BMGT469 Management and Organization Short-term Study Abroad (3 Credits)
Selected short-term study abroad topics in management and organization.
Repeatable to: 9 credits if content differs.

BMGT471 Supply Chain Consulting Fellows I (3 Credits)
Prepares students for a career in Intermodal/Logistics/and Supply Chain Management. Designed to enhance student analytical skills in tackling issues of direct relevance to the operating efficiency and profitability of individual firms. Student will have direct exchanges with executive leaders in this field through participation in national conferences and in-class visits. Students will participate in a national student case competition that focuses on a critical issue facing the industry leaders. Under the direction of the instructor, students conduct academic research on key topics that represent real-world consulting engagements designed to address critical issues faced by the individual companies and result in research-based solutions to these current challenges.
Prerequisite: BMGT372.

BMGT472 Purchasing and Inbound Logistics (3 Credits)
Analysis of the resupply activities of logistics management, including purchasing policies, transportation planning, and inventory control. Attention is directed toward total cost minimization and the establishment of a sustainable competitive advantage based on procurement.
Prerequisite: BMGT372.

BMGT473 Supply Chain Consulting Fellows II (3 Credits)
This second course of the Supply Chain Consulting Fellows program is designed to build upon the skills and concepts learned in the initial course to produce polished, skilled consultants who can build a consulting project from its initial stages and carry it through to a set of actionable initiatives and conclusive results. The initial component of this course will be to enhance and complete the started projects in the previous semester's course so that each research project can be formally presented to the project sponsor, i.e., the Board of Advisors for the Intermodal Association of North America. Student teams will serve as project consultants and tackle a real-world problem presented by a designated firm. Students will also participate in a national conference devoted to Intermodal/Logistics/Supply Chain issues. The conference will involve individual academic sessions and reports by the students based on the content provided. The class will also include several Executive Leader sessions.
Prerequisite: BMGT370, BMGT372 and BMGT471.
Credit Only Granted for: BMGT478D or BMGT473.
Formerly: BMGT478D.

BMGT475 Supply Chain Strategy and Network Design (3 Credits)
Analysis of the strategic aspects of supply chain management. Emphasis on the creation of end-user value through supply chain cost reductions, service improvements or both. Attention is directed toward the enabling role of technology in support of strategy evaluation and implementation.
Prerequisite: BMGT372.

BMGT476 Technology Applications in Supply Chain Management (3 Credits)
An understanding of the role of technology in managing the supply chain. Provides students with hands-on experience in advanced software systems that build on top of enterprise resource planning systems. Major emphasis is placed on demonstrating that these systems result in supply chain cost reductions and service improvements.
Prerequisite: BMGT372.

BMGT477 International Supply Chain Management (3 Credits)
The study of the importance of the supply chain management within a global context. Topics covered include: the structure, service, pricing and competitive relationships among international carriers and transport intermediaries as well as documentation, location decisions, international sourcing/distribution and management of inventory throughout the international supply chain.

BMGT478 Special Topics in Supply Chain Management (3 Credits)
Selected advanced topics in supply chain management.
Repeatable to: 9 credits if content differs.
Additional Information: Course prerequisites will vary depending on the topic. A maximum of 3 credits of BMGT478 course work can fulfill Supply Chain Management major requirements.

BMGT484 Digital Marketing (3 Credits)
Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services through digital means, including the web, social media, and mobile apps. Both the development and analysis of digital media for marketing will be discussed.
Prerequisite: BMGT350.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT485 Project Management (3 Credits)
Modern project management techniques that are used by modern practicing professionals will be covered. Particular attention is given to the management of technology based systems and projects in a business enterprise. The topics covered include: defining project scope, alignment of projects with enterprise strategy, managing project cost, time and risks using tools such as CPM/PERT, and measuring project performance.
Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT487 Six Sigma Innovation (3 Credits)
Enhances the overall understanding of Six Sigma Strategy, Tools and Methods to positively influence the performance of a business process, a product or service. Highlights the application of Define-Measure-Analyze-Improve-Control (DMAIC),Design For Six Sigma (DFSS), and the pursuit of Critical to Quality criteria (CTQ's) in a collaborative perspective, one that recognizes a balance between efficiency, and effectiveness and between statistical analysis and statistical thinking.
Prerequisite: STAT400, BMGT231, BMGT230, or ENME392.

BMGT488 Special Topics in Logistics, Business, and Public Policy (1-3 Credits)
Selected advanced topics in logistics, business and public policy.
Repeatable to: 6 credits if content differs.

BMGT490 QUEST Capstone Professional Practicum (4 Credits)
The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.
Prerequisite: ENES390 or BMGT390. Cross-listed with: ENES490.
Credit Only Granted for: BMGT490 or ENES490.

BMGT491 Scoping Experiential Learning Projects (3 Credits)
QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.
Prerequisite: BMGT190 or ENES190.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with ENES491.
Credit Only Granted for: BMGT491 or ENES491.

BMGT493 Honors Study (3 Credits)
First semester of the senior year. The course is designed for honors students who have elected to conduct intensive study (independent or group). The student will work under the direct guidance of a faculty advisor and the Assistant Dean of Undergraduate Studies. They shall determine that the area of study is of a scope and intensity deserving of a candidate's attention. Formal written and/or oral reports on the study may be required by the faculty advisor.
Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT494 Honors Study (3 Credits)
Second semester of the senior year. The student shall continue and complete the research initiated in BMGT 493, additional reports may be required at the discretion of the faculty advisor and Assistant Dean of Undergraduate Studies.
Prerequisite: BMGT493.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in the Smith School Honors Fellows program.

BMGT495 Strategic Management (3 Credits)
A case-based course where students learn to play the role of the 'strategic manager' who defines the scope of its business operations and, within the chosen scope, how the firm will compete against rivals. This course focuses on how a firm can both formulate effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits.

BMGT496 Business Ethics and Society (3 Credits)
A study of the standards of business conduct, morals and values as well as the role of business in society with consideration of the sometimes conflicting interests of and claims on the firm and its objectives. Emphasizes a strategic approach by business to the management of its external environment.
Prerequisite: 1 course in BMGT; or permission of BMGT-Robert H. Smith School of Business.

BMGT497 Strategic Management for Non Business Majors (2 Credits)
Focuses on how a firm can both formulate and implement effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits
Restriction: Must be admitted to the Minor in General Business or the Minor in Innovation and Entrepreneurship; and must not be a major in the R.H. Smith School of Business.
Additional Information: Course does not apply toward a Smith School degree.

BMGT498 Special Topics in Business and Management (3 Credits)
Special topics in business and management designed to meet the changing needs and interests of students and faculty.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT499 Advanced Business Topics (1 Credit)
Course will delve deeply into a specific business topic. Based on experience and knowledge from undergraduate core business classes, students will examine a particular subject from various angles.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 3 credits if content differs.

BSCI - Biological Sciences Program

BSCI103 The World of Biology (4 Credits)
An introduction to modern biology for the non-science major. Major themes include molecular biology, cell biology, evolution and organismal biology. Relevance of study of biology to modern human life will be emphasized.
Additional Information: Not acceptable for degree requirements in Biological Sciences, Chemistry, or Biochemistry.

BSCI120 Insects (3 Credits)
A survey of the major groups of insects, their natural history, and their relationships with humans and their environment. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

BSCI121 Beekeeping (2 Credits)
A study of the life history, behavior and seasonal activities of the honeybee, its place in pollination of flowers with emphasis on plants of economic importance and bee lore in literature.
Additional Information: Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

BSCI124 Plant Biology for Non-Science Students (3 Credits)
A basic course in plant biology specifically designed for the non-science student. Emphasis is placed on an evolutionary and ecological approach to studying fundamental concepts and processes of plants, their place in the biosphere, the importance of plants to man, and the manner in which humans impact on plants and their environment. This course will not count toward graduation requirements for any student in Biological Sciences, Chemistry, Biochemistry or the College of Agriculture and Natural Resources.
Restriction: For non-science majors only; and must not have completed BSCI105; and must not have completed BSCI170 or BSCI171.
Additional Information: CORE Life Sciences Lab (LL) Course only when taken concurrently with BSCI 125.

BSCI125 Plant Biology Laboratory (1 Credit)
An introduction to the biology of plants with emphasis on the processes by which plants function, the diversity of plants, and the importance of plants to humans. This course will not count toward graduation requirements for any student in Biological Sciences, Chemistry, Biochemistry or the College of Agriculture and Natural Resources. CORE Lab Science.
Corequisite: BSCI124.
Restriction: For non-science majors only; and must not have completed BSCI105; and must not have completed BSCI170 or BSCI171.
Credit Only Granted for: BSCI105, BSCI170, or BSCI125.
Additional Information: CORE Life Sciences Lab (LL) Course only when taken concurrently with BSCI 125.

BSCI126 Pollinators in Crisis (3 Credits)
We will dissect the pollinator crisis, and in the process learn about insects, about the interaction of organisms in complex ecosystems, and about the human-nature interface. Students will work in groups that specialize in an aspect of pollinator biology and their challenges. Instruction will target methods for collecting information, interpretation of scientific information and the professional presentation of findings.

BSCI133 For the Love of Insects (3 Credits)
Insects and their close relatives play an important role in the environment and human society. They provide many environmental services and their presence influences the rest of life on earth. Their contribution to society is often underestimated and underappreciated. Through a diversity of activities, students will leave with a greater appreciation and understanding of insects vital role to humanity.

BSCI135 Amazing Green: Plants that Transformed the World (4 Credits)
An interactive way to learn about plants and science, focusing on how plants have changed human history, the biology of their growth, and the science behind their use.

BSCI160 Principles of Ecology and Evolution (3 Credits)
Basic principles of biology with special emphasis on ecological and evolutionary biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Recommended: For Science majors.
Credit Only Granted for: BSCI106 or BSCI160.
Formerly: BSCI106.

BSCI161 Principles of Ecology and Evolution Lab (1 Credit)
Basic laboratory principles of biology with special emphasis on ecological and evolutionary biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: BSCI160.
Recommended: For Science majors.

BSCI170 Principles of Molecular & Cellular Biology (3 Credits)
Basic principles of biology with special emphasis on cellular and molecular biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Recommended: For Science majors.
Credit Only Granted for: BSCI105 or BSCI170.
Formerly: BSCI105.

BSCI171 Principles of Molecular & Cellular Biology Laboratory (1 Credit)
Basic laboratory principles of biology with special emphasis on cellular and molecular biology.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: BSCI170.
Recommended: For Science majors.

BSCI201 Human Anatomy and Physiology I (4 Credits)
Anatomy and physiology of the skeletal, muscular, neural, endocrine, and sensory systems. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.
Prerequisite: BSCI170 and BSCI171; or BSCI105; or students who have taken courses with comparable content may contact the department.

BSCI202 Human Anatomy and Physiology II (4 Credits)
Anatomy and physiology of the cardiovascular, respiratory, immune, digestive, urinary and reproductive systems. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.
Prerequisite: BSCI201; or permission of CMNS-Biology department.

BSCI205 Environmental Science (3 Credits)
Basic ecological principles as they relate to the ecological dilemmas of overpopulation, pollution, increasing consumption of natural resources, and deteriorating land use ethics facing mankind today.
Additional Information: Course not acceptable to degree requirements in Biological Sciences, Chemistry, or Biochemistry.

BSCI207 Principles of Biology III - Organismal Biology (3 Credits)
The diversity, structure and function of organisms as understood from the perspective of their common physicochemical principles and unique evolutionary histories.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And must have completed or be concurrently enrolled in CHEM131.

BSCI215 Global Sustainability: A Biologist's Perspective (3 Credits)
An overview of basic ecological and evolutionary principles and how they relate to current global dilemmas such as overpopulation, pollution, preservation of biodiversity, and the ethics involved in these dilemmas.
Credit Only Granted for: BSCI205 or BSCI215.

BSCI222 Principles of Genetics (4 Credits)
Principles and mechanisms of heredity and gene expression. Considers plant, animal, and microbial organisms.
Prerequisite: CHEM131 and CHEM132; and (BSCI160 and BSCI161; or BSCI106); and (BSCI170 and BSCI171; or BSCI105). Or must have completed BSCI105 or (BSCI170 and BSCI171); and two semesters of chemistry.

BSCI223 General Microbiology (4 Credits)
Fundamental concepts in morphology, physiology, genetics, immunology, ecology, and pathogenic microbiology. Applications of microbiology to medicine, the food industry and biotechnology.
Prerequisite: BSCI170 and BSCI171; or BSCI105.

BSCI238 Special Topics in Biology Student Initiated Courses (1 Credit)
Student Initiated Course (STIC) in Biology. Course will be student initiated and taught under close supervision of faculty mentor. Student instructor and faculty mentor must generate proposal and have approval of the Biological Sciences Program to offer a BSCI238 STIC. BSCI238 cannot be applied to the degree requirements of any biological sciences major.
Repeatable to: 5 credits if content differs.

BSCI258 College Park Scholars Internship (1-3 Credits)
Credit to be determined by CPS Director. Must be completed by end of sophomore year.
Restriction: For College Park Scholars - Life Sciences students only.
Repeatable to: 6 credits if content differs.
Additional Information: Course not acceptable towards in Biological Sciences, Chemistry, or Biochemistry.

BSCI279 Supplemental Study (1-3 Credits)
Research or special study to complement a course taken previously which is not fully equivalent to current departmental requirements. Credit according to work done.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 6 credits.

BSCI283 Principles of Microbiology (4 Credits)
Introduction to microorganisms designed for science majors. Genetic principles underlying microbial abilities; microbial structure-function relationships; metabolism, physiology, and ecology of microorganisms; interactions between microorganisms (including pathogens) and their hosts.
Prerequisite: BSCI207 and BSCI222.
Credit Only Granted for: BSCI223 or BSCI283.
Additional Information: Priority given to BSCI, BCHM and CHEM majors.

BSCI289 Off-Campus Internship (1-3 Credits)
Elective credit for formally established off-campus research internship. Permission of Director of Outreach required.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 5 credits if content differs.
Additional Information: Course not acceptable toward major requirements in the Biological Sciences.

BSCI300 Strategies for Success (1 Credit)
Students often face an increased emphasis on critical thinking, pressure from a typically higher credit hour load, and a faster pace of exposure to new material when moving from lower- to upper-level coursework. The Biological Sciences program designed this course to help all transfer students make successful transitions, both academically and socially, to the University of Maryland at Shady Grove.
Restriction: Must be in a major in USG-Universities at Shady Grove; and must be in Biological Sciences: Physiology & Neurobiology program.
Credit Only Granted for: BSCI300 or BSCI339R.
Formerly: BSCI339R.

BSCI328 Special Topics in Entomology (1-4 Credits)
Lectures, seminars, mini-courses and other special instruction in various entomological subjects.
Repeatable to: 6 credits if content differs.

BSCI329 Instructional Assistance Practicum (1-3 Credits)
Students serve as instructional assistants in selected undergraduate biology courses. Roles and responsibilities are determined on a course-specific basis and approved by the College Undergraduate Program Committee.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 3 credits if content differs.
Additional Information: Course not acceptable toward major requirements in the Biological Sciences.

BSCI330 Cell Biology and Physiology (4 Credits)
Biochemical and physiological mechanisms underlying cellular function. Properties of cells which make life possible and mechanisms by which cells provide energy, reproduce, and regulate and integrate with each other and their environment.
Prerequisite: Minimum grade of C- in CHEM131 and CHEM132. And minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in BSCI105.
Restriction: Must not have completed BSCI230.
Credit Only Granted for: BSCI230 or BSCI330.
Formerly: BSCI230.

BSCI333 Principles of Paleontology (4 Credits)
A review of the theory, principles, and applications of Paleontology. A systematic overview of the morphology, evolution, and relationships of the major fossil-producing taxa.
Prerequisite: GEOL102; or (BSCI207 or BSCI392); or permission of CMNS-Geology department. Cross-listed with GEOL331.
Credit Only Granted for: GEOL331 or BSCI333.

BSCI334 Mammalogy (3 Credits)
Introduction to the biology of mammals, including evolution, physiological, and behavioral specializations.
Prerequisite: Minimum grade of C- in BSCI207. And minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106.

BSCI335 Mammalogy Laboratory (1 Credit)
Lab and field techniques for the study of mammals, focusing on their identification, anatomy, histology, spatial distribution, ecology, and behavior.
Prerequisite: Minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106. And minimum grade of C- in BSCI207; and must have completed or be concurrently enrolled in BSCI334.

BSCI337 Biology of Insects (4 Credits)
An overview of the biology, evolution and diversity of insects and their relatives. Insect morphology, physiology, behavior and ecology; the impact of insects on humanity and the management of pest insect populations; assembly of an insect collection is required.
Prerequisite: BSCI160 and BSCI161; or BSCI106; or permission of CMNS-Entomology department.

BSCI338 Special Topics in Biology (1-4 Credits)
Lectures, seminars, mini-courses and other special instruction in various biological subjects.
Repeatable to: 6 credits if content differs.

BSCI339 Selected Topics in Biology (1-4 Credits)
Lectures, seminars, and other selected instruction courses in various biological subject matter.
Prerequisite: Permission of CMNS-Biology department.
Repeatable to: 9 credits if content differs.

BSCI342 Biology of Reproduction (3 Credits)
The biology of the reproductive system with emphasis on mammals and, in particular, on human reproduction. Hormone actions, sperm production, ovulation, sexual differentiation, sexual behavior, contraception, pregnancy, lactation, maternal behavior, and menopause.
Prerequisite: BSCI170 and BSCI171; or BSCI105; or permission of ARHU-Women's Studies department; or permission of CMNS-Biological Sciences UG Program. Cross-listed with WMST326.
Credit Only Granted for: BSCI342 or WMST326.

BSCI348 Special Topics in Cell Biology and Molecular Genetics (1-4 Credits)
Presentation and discussion of special subjects in the field of cell biology and molecular genetics. A maximum of three credit hours of BSCI 348 may be applied to major.

BSCI353 Principles of Neuroscience (3 Credits)
Principles of nervous system function, ranging from molecular and cellular basis of neuron function through nervous system integration.
Prerequisite: 1 course with a minimum grade of C- from (BSCI207, BSCI330).
Corequisite: PHYS122, PHYS142, or PHYS132.

BSCI360 Principles of Animal Behavior (3 Credits)
Study of animal behavior with emphasis on its evolution and function. Topics include genetic basis of behavior, communication, aggression, foraging, cooperation, mate selection, and relevance for conservation.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And BSCI222.

BSCI361 Principles of Ecology (4 Credits)
Basic principles of population, community, and ecosystem ecology. Use of these principles to predict possible consequences of human-caused changes in the environment and to understand the level of uncertainty of those predictions.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And (MATH130, MATH136, or MATH140).

BSCI363 The Biology of Conservation and Extinction (3 Credits)
Ecology, evolutionary biology, and paleontology will be applied to the study of conservation, species invasions, and extinction.
Prerequisite: Minimum grade of C- in BSCI361.

BSCI364 Conservation Biology Lab (1 Credit)
Understanding and applying principles, practices and common tools of conservation biology. Synthesizing and applying ecological and socioeconomic knowledge to conservation issues.
Prerequisite: Must have completed or be concurrently enrolled in BSCI363.
Credit Only Granted for: BSCI 338Q or BSCI 364.
Formerly: BSCI 338Q.

BSCI370 Principles of Evolution (3 Credits)
Understanding evolutionary processes in a natural and human environment, including adaptation; DNA sequence, protein, and genome evolution; evolution of developmental mechanisms; mechanisms of evolutionary change (mutation, natural selection, drift); epidemiology; coevolution and biological control; speciation; comparative methods; extinction and conservation; human evolution.
Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI373 Natural History of the Chesapeake Bay (3 Credits)
Consideration of the major groups of organisms associated with the Chesapeake Bay and current issues that determine humans' present and future uses for the Chesapeake and its biota.Cross-listed with ENST373.
Credit Only Granted for: BSCI373 or ENST373.

BSCI374 Mathematical Modeling in Biology (4 Credits)
Students will learn empowering mathematical techniques through the understanding of biological models. Models are chosen from a variety of biological disciplines. Mathematical skills that will be developed along the way include: solving non-linear difference equations, eigenvector analysis, and the implementation of these algorithms as computer models.
Prerequisite: MATH131, MATH136, or MATH141. Cross-listed with HLSC374.
Credit Only Granted for: BSCI374, BSCI474, or HLSC374.
Formerly: BSCI474.
Additional Information: The HLSC374 version of this course is restricted to students in the Honors College Integrated Life Sciences program.

BSCI378H Cell Biology and Molecular Genetics Department Honors Seminar (1 Credit)
Required seminar for all students participating in departmental honors research program.

BSCI379 Cell Biology and Molecular Genetics Department Research (1-3 Credits)
This course is arranged to provide qualified majors an opportunity to pursue research problems under the supervision of a member of the department.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.

BSCI379H Cell Biology and Molecular Genetics Department Honors Research (1-4 Credits)
Student should consult program guidelines. Research project carried out under guidance of faculty advisor.

BSCI389 Entomology Department Research (1-2 Credits)
Credit to be determined by the department. Should be taken during the junior year. Investigations of assigned entomological problems. No more than 4 credit hours of BSCI389 may be applied to the 120 credit hours needed for the Bachelor's degree.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.

BSCI389H Entomology Department Honors Research (1-2 Credits)

BSCI392 Biology of Extinct Animals (3 Credits)
A survey of extinct animals that have few, if any, direct living descendants. The principles governing the functional design of animals will be used to infer life styles for extinct, and frequently bizarre, organisms.
Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI393 Biology of Extinct Animals Laboratory (1 Credit)
An overview of the techniques used in paleobiological reconstructions of extinct animals.
Prerequisite: Must have completed or be concurrently enrolled in BSCI392.

BSCI394 Vertebrate Form and Function (3 Credits)
Comparative functional anatomy of vertebrates in the context of adaptation to their environments. The vertebrate body and its systems will be considered in terms of structure, physiology, evolution, and embryonic development.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And (BSCI207 or BSCI330).

BSCI398H Biology Department Honors Seminar (1 Credit)
Required seminar for all students participating in departmental honors research program.

BSCI399 Biology Department Research (1-3 Credits)
Research and/or integrated reading in biology under the direction and close supervision of a member of the faculty.
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Restriction: Minimum cumulative GPA of 3.0.
Repeatable to: 8 credits if content differs.

BSCI399H Biology Department Honors Research (1-2 Credits)
A laboratory research problem; required each semester during honors participation and culminating in an honors thesis.

BSCI401 Animal Communication (3 Credits)
Examining the mechanisms by which animal produce and receive signals in each sensory modality; and quantifying the type and amount of information conveyed in signals and how animals attend to such information.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And must have completed one semester of physics; and must have completed one semester of organic chemistry.
Recommended: A course in animal behavior or biopsychology.
Credit Only Granted for: BSCI401, BSCI 338W or BIOL 708W.
Formerly: BSCI338W.

BSCI402 Genomics of Sensory Systems (3 Credits)
An advanced course covering topics on the molecular basis of senses and the application of genomic techniques to studies of sensory systems & sensory ecology.
Prerequisite: BSCI222; or permission of instructor.
Credit Only Granted for: BSCI338C or BSCI402.
Formerly: BSCI338C.

BSCI403 Biology of Vision (3 Credits)
An upper level undergraduate course on the physical, molecular, and neural basis of vision.
Prerequisite: BSCI207.
Recommended: BSCI222.
Credit Only Granted for: BSCI 338V or BSCI 403.
Formerly: BSCI 338V.

BSCI404 Cell Biology from a Biophysical Perspective (3 Credits)
An approach to cell biology by focusing on mechanisms and unifying physical paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think mechanistically and quantitatively.
Prerequisite: BSCI330.
Recommended: PHYS121 and PHYS122; or completion of PHYS131 and PHYS132 recommended. Jointly offered with BIOL704, BIPH7 04.
Credit Only Granted for: BSCI338O, BSCI404, BIOL704, BIOL708O, or BIPH704.
Formerly: BSCI338O.

BSCI405 Population and Evolutionary Genetics (3 Credits)
Genetic variation within a population provides the basis for future evolution as well as a record of past evolution. The genomics revolution provides data on this variation that, together with mathematical models, allow us to read this record to reconstruct evolutionary trajectories. Examples will focus on hominin and pathogen evolution. In the lab, students will use models to explore how genetic variation (allele frequencies) changes over time and space.
Prerequisite: Minimum grade of C- in BSCI222; and 1 course with a minimum grade of C- from (MATH131, MATH136, MATH141). Jointly offered w ith BIOL709.
Credit Only Granted for: BSCI405, BSCI339J, or BIOL709C.
Formerly: BSCI339J.

BSCI407 Behavioral Genetics (3 Credits)
Behavior represents an organism's most dynamic phenotype and allows an animal to respond immediately to both internal and external cues. We will explore the genetic and epigenetic mechanisms that underlie behavioral variation and the associated neurological, hormonal, and developmental pathways. We will examine modern approaches used to study behavioral genetics in model and non-model systems, and in humans. Using case studies, we will explore a range of complex phenotypes including those related to mating, parental care, aggression, circadian rhythm, locomotion, learning, anxiety, and addiction.
Prerequisite: Minimum grade of C- in BSCI222.

BSCI410 Molecular Genetics (3 Credits)
An advanced genetics course emphasizing the molecular basis of gene structure and function in the context of modern approaches to the genetics of humans and model organisms.
Prerequisite: BSCI222. And must have completed CHEM233; or (CHEM231 and CHEM232).

BSCI411 Bioinformatics and Integrated Genomics (4 Credits)
Computational methods for the study of biological sequence data in comparative biology and evolution. Analysis of genome content and organization. Database searching, pairwise and multiple sequence alignment, phylogenetic, methods, pattern recognition, and functional inference. Functional and comparative genomics approaches.
Prerequisite: Minimum grade of C- in BSCI222.
Recommended: BSCI410.
Credit Only Granted for: BSCI380 or BSCI411.
Formerly: BSCI380.

BSCI412 Microbial Genetics (4 Credits)
A laboratory/lecture based course that covers the fundamentals of mutation, mobile genetic elements and transmission genetics of microbial organisms using both classical and molecular approaches.
Prerequisite: BSCI223 and BSCI222.

BSCI413 Recombinant DNA (3 Credits)
An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.
Prerequisite: BSCI330, BSCI223, or BSCI230; and BSCI222.
Formerly: ZOOL452.

BSCI414 Recombinant DNA Laboratory (3 Credits)
An advanced course offering hands-on experience in performing recombinant DNA experiments. All current molecular biology techniques used for cloning prokaryotic genes, analyzing the gene products, and modifying the genes will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.
Prerequisite: BSCI222.

BSCI415 Molecular Genetics Laboratory (3 Credits)
Problem solving laboratory organized around extended projects that employ different approaches toward linking gene and function.
Prerequisite: Must have completed or be concurrently enrolled in BSCI410.
Restriction: Junior standing or higher.
Credit Only Granted for: BSCI348G or BSCI415.
Formerly: BSCI348G.

BSCI416 Human Genetics (3 Credits)
Approaches to human genetics and applications to biology and medicine focusing on specific human genetic topics using primary research papers as the main resource.
Prerequisite: Minimum grade of C- in BSCI410.
Recommended: BSCI330.

BSCI417 Microbial Pathogenesis (3 Credits)
Current research in microbial pathogenesis and the molecular and cellular basis of bacterial disease. Comprehensive overview of the molecular basis of pathogenesis with a focus on model microbial systems to illustrate mechanisms of disease pathogenesis. Topics covered: how microorganisms attach to and enter cells; how host cells are damaged by microbial products; how the host responds to invasion; and host-pathogen evolution.
Prerequisite: BSCI223 and BSCI222.
Restriction: Junior standing or higher.
Credit Only Granted for: BSCI348M or BSCI417.
Formerly: BSCI348M.

BSCI420 Cell Biology Lectures (3 Credits)
Molecular and biochemical bases of cellular organization and function in eukaryotes.
Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.
Credit Only Granted for: BSCI420 or BSCI421.

BSCI421 Cell Biology (4 Credits)
Molecular and biochemical basis of cellular organization and function in eukaryotes.
Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.
Credit Only Granted for: BSCI420 or BSCI421.

BSCI422 Principles of Immunology (3 Credits)
The immune system in health and disease. Presentation and analysis of the cellular and molecular processes that comprise the immune system.
Prerequisite: BSCI223 and BSCI222.
Recommended: BSCI330.
Restriction: Junior standing or higher.

BSCI423 Immunology Laboratory (2 Credits)
Current techniques for assessment of immune status and evaluation of the immune response, including monoclonal antibody production, Western blotting, cytokine assays, ELISA and flow cytometry.
Prerequisite: BSCI223 and BSCI222.
Corequisite: BSCI422.
Restriction: Junior standing or higher.

BSCI424 Pathogenic Microbiology (4 Credits)
The role of bacteria and fungi in the diseases of humans with emphasis upon the differentiation and culture of microorganisms, types of disease, modes of disease transmission, prophylactic, therapeutic, and epidemiological aspects.
Prerequisite: BSCI223.

BSCI425 Advanced Cell Biology Lab Practices (2 Credits)
Experimental techniques used to study the molecular, structural, and spatial organization of plant and animal cells. Using a combination of in vitro assays aimed at analyzing macromolecular and subcellular components and in vivo analyses designed to reveal the inner architecture of a typical eukaryotic cell, students will have an opportunity to: improve some of the basic technical and conceptual skills they acquired in an introductory cell biology course; develop a more sophisticated understanding of the nature of experimental cell manipulation; and tackle the ongoing challenge of articulating their findings in both written and oral communication.
Prerequisite: Must have completed BSCI330, BSCI222, CHEM231, and CHEM232; and must have completed or be concurrently enrolled in BSCI420.
Credit Only Granted for: BSCI421, BSCI425, or BSCI348C.

BSCI427 Principles of Microscopy (2 Credits)
An introduction to optical principles that underlie light and electron microscopic image formation. Brightfield, darkfield, phase contrast, differential interference contrast, fluorescence and polarized light microscopy. Comparison of light and electron microscopy. The application of these techniques to problems in biological research.
Prerequisite: BSCI421.

BSCI430 Developmental Biology (3 Credits)
Structural, functional and regulatory events and mechanisms that operate during development to produce an integrated, multicellular organism composed of a multitude of differentiated cell types.
Prerequisite: BSCI222 and BSCI330.

BSCI433 Biology of Cancer (3 Credits)
Causes and consequences of neoplastic transformations at the biochemical and cellular levels.
Prerequisite: BSCI222 and BSCI330; or permission of CMNS-Biological Sciences UG Program.

BSCI437 General Virology (3 Credits)
Discussion of the physical and chemical nature of viruses, virus cultivation and assay methods, virus replication, viral diseases with emphasis on the oncogenic viruses, viral genetics, and characteristics of the major virus groups.
Prerequisite: BSCI222; or permission of CMNS-Biological Sciences UG Program.
Restriction: Junior standing or higher.

BSCI440 Mammalian Physiology (4 Credits)
A study of the cardiovascular, hemopoietic, gastrointestinal, renal and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals. Course does not count as an upper level lab for BIOL majors (see BSCI441).
Prerequisite: BSCI330; and (CHEM231 and CHEM232; or must have completed CHEM233). Or permission of CMNS-Biological Sciences UG Program.

BSCI441 Mammalian Physiology Laboratory (2 Credits)
Laboratory exercises in experimental mammalian physiology.
Prerequisite: Must have completed or be concurrently enrolled in BSCI440.

BSCI442 Plant Physiology (4 Credits)
A survey of plant physiology and development and responses and adaptation to the environment
Prerequisite: BSCI170 and BSCI171; or BSCI105; or PLSC201. And CHEM231 and CHEM232; or CHEM237; or permission of CMNS-Biological Sciences UG Program; or permission of AGNR-Plant Science & Landscape Architecture department. Cross-listed with PLSC400.
Credit Only Granted for: BSCI442 or PLSC400.

BSCI443 Microbial Physiology (3 Credits)
Microbial cellular and population growth. Fermentation metabolism, physiology of anaerobiosis, and energy conservation and transformation in bacterial membranes. Efficiency of energy utilization for growth. Membrane structure and transport. Bacterial chemotaxis. Regulation of bacterial chromosome replication, RNA and protein synthesis. Control of metabolic pathways.
Prerequisite: Minimum grade of C- in BSCI223. And minimum grade of C- in BCHM461; or minimum grade of C- in BCHM463.

BSCI446 Neural Systems (3 Credits)
Neural development, followed by sensory, motor and integrative system organization in the central nervous system.
Prerequisite: Minimum grade of C- in BSCI330 and BSCI353.

BSCI447 General Endocrinology (3 Credits)
Functions and dysfunctions of the endocrine system with special reference to mammals.
Prerequisite: BSCI330, CHEM241, and CHEM242.

BSCI452 Diseases of the Nervous System (3 Credits)
An advanced course covering the neuroanatomy, function, and organization of the nervous system and its implication for pathology and disease.
Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in BSCI353. Jointly offered with NACS728, BIOL708.
Credit Only Granted for: BSCI452, BSCI338N, BIOL708E, or NACS728N.
Formerly: BSCI338N.

BSCI454 Neurobiology Laboratory (1 Credit)
Basic neuroanatomical techniques, intracellular and extracellular recordings of electrical potentials from nerve and muscle.
Prerequisite: Minimum grade of C- in BSCI330; and must have completed or be concurrently enrolled in BSCI353; and must have completed or be concurrently enrolled in PHYS122, PHYS132, or PHYS142.

BSCI460 Plant Ecology (3 Credits)
The dynamics of populations as affected by environmental factors with special emphasis on the structure and composition of natural plant communities, both terrestrial and aquatic.
Prerequisite: Minimum grade of C- in BSCI361.

BSCI462 Population Ecology (3 Credits)
Theory of population growth and regulation, life tables, and theory of competition and predation, evolution in ecological settings, community structure and dynamics.
Prerequisite: MATH130, MATH136, or MATH140; and BSCI361.

BSCI464 Microbial Ecology (3 Credits)
Interaction of microorganisms with the environment, other microorganisms and with higher organisms. Roles of microorganisms in the biosphere. Microorganisms and current environmental problems.
Prerequisite: BSCI223 and CHEM241. And must have completed CHEM243; or CHEM242.

BSCI465 Behavioral Ecology (3 Credits)
How natural and social environments shape individual behavior. The influence of evolution on patterns of individual adaptation. Use of the evolutionary paradigm to investigate specific problems in animal and human behavior.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI222.

BSCI467 Freshwater Biology (4 Credits)
Biology and ecology of freshwater invertebrates in lotic and lentic habitats, their adaptation to aquatic life, their function in aquatic ecosystems, and their relationship to environmental deterioration. Laboratory will include field trips, demonstrations, and identifications.

BSCI471 Molecular Evolution (3 Credits)
Patterns of DNA sequence variation within and between species, caused by nucleotide changes and the movement of transposable elements. Theories of molecular evolution, such as the neutral theory. Molecular clock hypothesis: its importance as a practical empirical tool in molecular genetics and systematics and its theoretical foundation.
Prerequisite: BSCI222; or permission of CMNS-Biology department.

BSCI472 Evolutionary Biology of Plants (3 Credits)
Evolution in plant populations. The pace, pattern, and mechanisms of evolution will be discussed within a genetic and ecological framework. Some emphasis will be placed on processes that are unique to the evolution of plants.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI222.

BSCI473 Marine Ecology (3 Credits)
Courses in evolution and animal behavior are strongly recommended. A detailed analysis of the evolutionary ecology of marine invertebrates; emphasis on testing of theories and on current literature.
Prerequisite: BSCI207.

BSCI475 Sexual Selection in Nature (3 Credits)
Sexual selection drives some of the most spectacular, if not bizarre, traits in nature. We will explore how organisms select and compete for mates and fertilization success, and how this powerful and pervasive evolutionary force shapes sexual traits and regulates species boundaries. We will focus on the key theories in the field and discuss recent and classic research papers. This is a student-directed class: course topics and materials will be selected based on student interests and involvement. On occasion, experts in the field will be invited to class to discuss their research.
Prerequisite: Minimum grade of C- in BSCI207; or permission of instructor.
Recommended: BSCI360 or BSCI370. Jointly offered with BIOL 708.
Credit Only Granted for: BSCI338X, BSCI475, or BIOL708X. Form erly: BSCI338X.

BSCI480 Arthropod Form and Function (4 Credits)
Survey of the morphological, systematic and physiological diversity of the phylum Arthropoda.
Prerequisite: Permission of CMNS-Entomology (AGNR).

BSCI481 Insect Diversity and Classification (4 Credits)
The techniques of collecting insects in the field and their classification into the latest hierarchical scheme. Field trips will visit habitats throughout the state. An insect collection is required.
Prerequisite: BSCI337.

BSCI482 Insect Physiology and Molecular Biology (4 Credits)
Physiological and biochemical functions of insects. Insect endocrinology, neurobiology, sensory physiology, integument and molting, development and metamorphosis, immunity, metabolism and related topics.
Prerequisite: BSCI337.

BSCI483 Insects, Pathogens, and Public Health (3 Credits)
Mosquito- and tick-borne disease transmission poses significant challenges to human health and well-being globally, and is on the rise in North America. Arthropod parasites and the pathogens they transmit to humans and animals will be introduced, and the public health significance of these arthropods will be examined. The ecology and behavior of vectors in relation to disease transmission will be emphasized.
Prerequisite: BSCI207.

BSCI488 Summer Biology Institutes (1-8 Credits)
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 12 credits if content differs.

BSCI493 Medicinal and Poisonous Plants (3 Credits)
A study of plants important to humans that have medicinal or poisonous properties. Emphasis on plant source, plant description, the active agent and its beneficial or detrimental physiological action and effects.
Prerequisite: (BSCI170 and BSCI171; or BSCI105); and must have completed CHEM233. Or 4 credits in BSCI courses.

BSCI494 Animal-Plant Interactions (3 Credits)
Theoretical, conceptual and applied aspects of evolutionary and ecological interactions between plants and animals. This course gives an overview of major ideas, historical controversies, and current research on animal-plant relationships. We will explore the mechanisms and evolution of plant defenses and animal counter-adaptations, behavioral ecology and interactions across trophic levels, the role of microbial communities in mediating interactions, and how these interactions color human experience through food and medicine. The course will have a blended lecture/discussion format and will include field walks to collect herbivory data and observe animal-plant interactions.
Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI497 Insect Pests of Ornamentals and Turf (4 Credits)
The recognition, biology and management of insects and mites injurious to ornamental shrubs, trees, greenhouse crops, and turf. Emphasis on Integrated Pest Management (IPM).

BSCV - CIVICUS

BSCV181 Civicus Student and the University (1 Credit)
Knowledge and skills designed to utilize CIVICUS to enhance the college experience and preparation for civic engagement.
Restriction: Freshman standing; and must be in the Civicus program.
Credit Only Granted for: BSOS181 or BSCV181.
Formerly: BSOS181.

BSCV182 Civicus and Service-Learning (1 Credit)
Students will examine domestic societal issues and their national, regional, and local dimensions from political, economic, and policy perspectives. Students will work with local direct service non-profit organizations.
Prerequisite: BSCV191 and BSCV181; and must have completed or be concurrently enrolled in SOCY105.
Restriction: Must be in the Civicus program.
Credit Only Granted for: BSOS182 or BSCV182.
Formerly: BSOS182.

BSCV191 Introduction to Civicus (3 Credits)
An introduction to the social and historical foundations of a civil society. An examination of the roles of individuals, groups, social institutions and community services.
Restriction: Must be in the Civicus program.
Credit Only Granted for: BSCV191 or BSOS191.
Formerly: BSOS191.

BSCV301 Leadership in a Multicultural Society (3 Credits)
A study and application of skills, historical context, theories, and concepts for constructive leadership in a pluralistic, multicultural, and diverse society. Social science methodologies and theories will provide the structure for the study of contemporary social problems, civil society issues, and leadership practices.
Prerequisite: BSCV191, SOCY105, and BSCV181.
Restriction: Sophomore standing or higher.
Credit Only Granted for: BSOS301 or BSCV301.
Formerly: BSOS301.

BSCV302 Civicus Capstone (3 Credits)
Capstone course required for CIVICUS citation. Supervised internship, community service, or research project on civil society topic. Application and continued study of skills and concepts, grounded in the social sciences, relevant to understanding and effectively dealing with contemporary social issues.
Prerequisite: BSCV301.
Restriction: Sophomore standing or higher.
Credit Only Granted for: BSOS302 or BSCV302.
Formerly: BSOS302.

BSCV309 Civicus Seminar (1 Credit)
Review and analysis of contemporary social issues.
Repeatable to: 5 credits if content differs.

BSGC - Global Communities

BSGC100 The Student in the University: Global Communities (1 Credit)
Students will develop a sense of community within the program, become familiar with campus resources, gain skills and information to prepare for the Global Experience Semester, and explore the surrounding international community.
Restriction: Must be enrolled in Global Communities Living-Learning Program. By Permission Only (BPO).

BSGC101 Globalization (3 Credits)
An interdisciplinary exploration of the historical evolution and contemporary significance of growing interconnectedness in the world. We debate different perspectives on globalization and its impact on social, political, economic and cultural issues.
Restriction: Must be in Global Communities Living-Learning program.

BSGC102 Global Issues (3 Credits)
A survey of some of the major global challenges facing society today, such as human trafficking, nuclear security, and global health. We explore contending approaches to resolving problems, culminating in a major group project.
Prerequisite: BSGC101.
Restriction: Must be in Global Communities Living-Learning program.

BSGC302 BSGC 302 Capstone: Global Connections (1 Credit)
Final component of the Global Communities curriculum. The course connects the global experience with previous BSGC coursework.
Restriction: Must be in Global Communities Living-Learning program. By permission only (BPO).
Additional Information: This course is limited to second-year students in the Global Communities Living-Learning Program who have completed or are in the midst of completing their Global Experience requirement.

BSGC338 Global Service Abroad (3 Credits)
Community service is a valuable response to social problems faced by marginalized populations. How do we perform valuable and effective service in an international setting? This course is designed to enable students to be thoughtful providers of international service. Students will be introduced to existing responses to social problems and will work to formulate their own individual and collective responses. BSGC 338 was developed with funding from the UMD Stamp Service-Learning Fellowship.
Restriction: Permission of Global Communities Living and Learning Program.
Repeatable to: 6 credits if content differs.
Additional Information: Prior knowledge of the language of the host country is preferred but not required. The course is open to ALL majors, with preference given to Global Communities students.

BSGC386 Experiential Learning in Global Communities: Global Internship (1-3 Credits)
Experiential Learning in Global Communities: Global Internship, will give students an opportunity to connect theory with practice.
Restriction: Must be in Global Communities Living-Learning program.
Credit Only Granted for: BSGC398E or BSGC386.
Formerly: BSGC398E.

BSGC398 BSGC Experiential Learning in Global Communities: Global Service (3 Credits)
Experiential learning is an integral element of the Global Communities program. Students will gain an understanding of social issues in marginalized communities, engage in service-learning, and develop an action plan for civic engagement in a diverse global society.
Restriction: Must be in Global Communities Living-Learning program. By permission only (BPO).
Repeatable to: 6 credits if content differs.
Additional Information: - Open to students enrolled in the Global Communities Living-Learning Program.

BSGC399 Topical Investigations in Global Communities (1-3 Credits)
Variable from 1-3 credits and repeatable up to 6 if content varies.
Restriction: Must be a current student in Global Communities Living and Learning Program; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Contact department for information to register for this course.

BSOS - Behavioral and Social Sciences

BSOS138 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS188 Selected Topics in the Behavioral and Social Sciences (1-3 Credits)
Introductory selected topics course dealing with interdisciplinary issues related to the social sciences.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: EDCP108O or BSOS188A.

BSOS201 Ensuring your Financial Future Through Stock Investing (3 Credits)
Introduces students to investing and trading, with special emphasis on the field of technical analysis. Planning for one's financial future is a critical skill for all students. Students will learn how to evaluate companies using the investors.com website and the TC2000 stock charting program. Students will develop an idea of the risks and benefits of investing, establishing a savings strategy, opening an IRA, and strategically planning for future financial security. In addition to readings, lectures, and online videos, students will participate in virtual stock market trading exercises and manage a virtual account.
Credit Only Granted for: BSOS289I or BSOS201.
Formerly: BSOS289I.
Additional Information: No prior knowledge of the stock market or investing is expected or required.

BSOS230 Introduction to Programming for the Social Sciences: Statistical Computing using R (1 Credit)
R is an open-source programming language, specialized for statistical computing, and provides a variety of statistical and graphical techniques that might be relevant for any BSOS program, such descriptive statistics, linear and non-linear regression, text mining, image processing. The R language is increasingly often employed in advanced statistics and data analytics, offering a wide range of application packages for effective programming. This course introduces the R language and several powerful packages in form of lectures, worked-out examples, and group exercises.
Restriction: Must not have completed BSOS330; and must be enrolled in a BSOS major. Or permission of instructor.
Additional Information: Students do not need any prior experience using R.

BSOS231 Introduction to Programming for the Social Sciences: Python (1 Credit)
Python has become the most powerful programming language in advanced statistics and data analytics. It includes expansive packages for data handling and processing, including the latest developments in machine learning, and offers Integrated Development Environments (IDE) for code development, testing, debugging, and graphical representation. In addition, python is deployed on virtually all high performance computing clusters, taking advantage of multi-processing, large memory, and GPU enhanced computing environments. This course offers a thorough introduction to python and those packages that are fundamental to data processing and analysis, image processing, natural language processing, machine learning.
Restriction: Must not have completed BSOS331; and must be enrolled in a BSOS major. Or permission of instructor.
Additional Information: Students do not need any prior experience using Python.

BSOS238 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS248 Leadership Seminar I (1-6 Credits)
A topics course in the behavioral and social sciences designed to develop student leaders with skills that will address important issues of the college and offers diverse viewpoints intended to challenge common perceptions of leadership, technology programs and communication.
Repeatable to: 9 credits.

BSOS258 Leadership Practicum I (1-6 Credits)
This course puts into practice the elements and skills learned in the seminar series that directly benefit the college.
Repeatable to: 9 credits.

BSOS288 Special Topics in Behavioral and Social Sciences (1-3 Credits)
Introductory special topics course focusing on an interdisciplinary topic related to behavioral and social sciences.
Repeatable to: 6 credits if content differs.

BSOS308 Contemporary Issues: Interdisciplinary Approaches (3 Credits)
An interdisciplinary analysis of current public policy issues of international, national and community import. Senior standing recommended.
Recommended: Must have Senior standing.
Repeatable to: 6 credits if content differs.

BSOS338 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS348 Leadership Seminar II (1-6 Credits)
A topics course in the behavioral and social sciences designed to develop student leaders with advanced skills that will address important issues of the college and offers diverse viewpoints intended to challenge common perceptions of leadership, technology programs and communication.
Repeatable to: 9 credits.

BSOS355 Social Sciences Internship Practicum (3 Credits)
BSOS 355 is an internship course open to all majors. It will enable students to articulate and apply the scholarship from the discipline related to their specific internship placement into a real-work environment.
Restriction: Must have earned a minimum of 60 credits; and minimum cumulative GPA of 2.5; and must have completed at least 1 semester at UMD.
Credit Only Granted for: BSOS388I or BSOS355.
Formerly: BSOS388I.

BSOS358 Leadership Practicum II (1-6 Credits)
This course puts into practice the advanced skills and elements learned in the seminar series that directly benefit the college.
Repeatable to: 9 credits.

BSOS385 Big-Data Analysis on the BSOS HPC Cluster (2 Credits)
Social media are a primary source of information on social interaction and personal interests. High-performance computing (HPC) is employed to search for hidden pattern and unknown correlations using advanced machine-learning algorithms available in python and R packages. The main steps of Natural Language Processing and big-data analysis are being worked out, from examining random samples to analyzing large data sets via in-memory Monte-Carlo applications and neural networks.
Prerequisite: Students must have completed a least one college-level statistics course.
Recommended: A working knowledge of python or R is expected.
Restriction: Students must be enrolled in a BSOS major; or permission of instructor.
Credit Only Granted for: BSOS385, BSOS685, or BSOS688B.

BSOS386 Experiential Learning (3-6 Credits)

BSOS388 Behavioral and Social Sciences Special Topics (1-3 Credits)
Advanced special topics course focusing on an interdisciplinary topic related to the Behavioral and Social Sciences.
Repeatable to: 6 credits if content differs.

BSOS399 Directed Study in Behavioral and Social Sciences (1-6 Credits)
Guidance for the advanced student capable of interdisciplinary study on special projects under the supervision of the Assistant Dean for Student Affairs.

BSOS438 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS448 Teaching Assistant Practicum (1-6 Credits)
Supervised practicum for teaching assistants for BSOS/UNIV courses.
Repeatable to: 9 credits.

BSST - Terrorism Studies

BSST230 Terrorism and the Media (3 Credits)
Student will investigate the interplay between terrorism around the world and mass media content about terrorism. The course will focus both on how news and entertainment media portray terrorism and terrorists, and the effects of terrorism and media portrayal of terrorism on the public and public policy. This course examines terrorism from historical and contemporary perspectives, providing grounds for learning about and discussion of the interplay between terrorism and communication.
Credit Only Granted for: BSOS288T, BSST230, or BSST288T.
Formerly: BSOS288T and BSST288T.

BSST240 Understanding The Principles and Perils of CBRN Weapons (3 Credits)
Explores the 'dark side' of scientific applications. Students will gain an understanding of CBRN Weapons, through the exploration of the scientific method, and certain fundamental principles of chemistry, biology, and physics. Students will also learn how to test hypotheses, use basic statistics, interpret results, and apply their new knowledge through discussions of practical applications in the domains of public health, emergency management, epidemiology, and threat assessment. Bringing these fields together in one class will allow students to better understand the use of and threat from CBRN weapons in terrorism.
Additional Information: If taken in the same term as BSST241 these courses will count for General Education Natural Sciences Lab.

BSST241 Understanding the Principles and Perils of CBRN Weapons (Lab) (1 Credit)
An exploration of the threat of Chemical, Biological, Radiological, and Nuclear (CBRN) weapons aimed to provide students with a basic, multidisciplinary, natural science foundation in chemistry, biology, and physics.
Corequisite: BSST240.
Additional Information: This is an optional 1-credit lab course offered in coordination with BSST240. If taken in the same term as BSST240 these courses will count for General Education Natural Sciences Lab.

BSST258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSST288 Special Topics in Terrorism Studies (3 Credits)
A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.
Repeatable to: 9 credits if content differs.

BSST327 Introduction to Terrorism and the Terrorist Threat (1 Credit)
This course focuses on bringing current events and policy issues related to terrorism and counterterrorism, as they are discussed in mass media, into the dialogue with academic theories and research. Through a discussion-based seminar, students will bring current, terrorism-related events to classroom discussion, where they will consider the media-framed current events in relation to academic research. Students will be continually challenged to draw connections between terrorism-related events in the news and relevant academic research.
Recommended: It is recommended that BSST330 be taken in the same semester as as BSST329.
Restriction: Restricted to students enrolled in the Global Terrorism Minor (#BS07).
Credit Only Granted for: BSST327 OR BSST399K.
Formerly: BSST399K.

BSST330 Terrorist Motivations and Behaviors (3 Credits)
Explores theories explaining the formation of terrorist groups and the motivations behind terrorist behavior, building upon theories from social psychology, sociology, political science, criminology, and history.
Restriction: Must be in the Global Terrorism minor; or special permission available for students in other Global Studies minors.

BSST331 Innovations in Counterterrorism (3 Credits)
Explore the manners in which stats respond to terrorist incidents and the threat of terrorism through counterterrorism approaches and strategies. We will examine counterterrorism responses from law enforcement, military, and the intelligence community. This will include discussions about policy decisions made in response to both terrorist attacks and the threat of terrorism. Counterterrorism strategies this course will cover include deterrence, interdiction, and legal efforts to combat terrorism, including terrorist financing and online recruitment. The course is divided into four general parts. First, we will provide an overview of government counterterrorism options and review key concepts. Second, we will examine law enforcement responses to terrorism including efforts to counter cyberterrorism, social media recruitment, and terrorist financing online. Third, we will focus on military responses to attacks conducted by terrorist groups, including deterrence strategies, targeted strikes, and covert operations. Last, we will review the challenges and complexities of counterterrorism approaches, including the ethical, moral, and legal dilemmas.
Restriction: Must be in the Terrorism Studies minor program.

BSST332 The Practice of Terrorism Studies (5 Credits)
Capstone course for students in the Global Terrorism Minor. Explores in-depth rigorous approaches to conducting research on terrorism and to developing policy on terrorism and counterterrorism. Examines the interplay between terrorism research and counterterrorism policy. All students will participate in an internship or complete a substantive original research project alongside the courses weekly seminar meeting.
Prerequisite: BSST330 and BSST331.
Restriction: Must be in the Terrorism Studies minor program.

BSST334 States of Emergency (3 Credits)
Students will explore the manner in which crises unfold from the perspective of a variety of emergency response disciplines, including: emergency management, law enforcement, intelligence analysis, cyber analysis, risk communication, health and human services, and emergency psychiatry/psychology. Students will participate in a semester-long simulation of an unfolding terrorist attack.

BSST335 Innovations in Countering Violent Extremism (3 Credits)
Develop solutions to community-based radicalization through a blend of entrepreneurial, Design Thinking strategies and terrorist disengagement theories. Students will design original programs targeting real-world, at-risk communities and present their programs to a panel of experts.
Credit Only Granted for: BSST335 or BSST338V.
Formerly: BSST338V.

BSST337 Ideology and Social Conditions in the Making of Terrorism (3 Credits)
This class focuses on the relations of ideology with social conditions in the historical context of the Middle East and North Africa in order to explain the process of the rise and domination of Islamist extremism and suicide terrorism as a dominant oppositional discourse in the region. Resting on a cognitive conception of ideology, this class focuses on the process in which ideological discourses shape the making of the terrorist mind.
Credit Only Granted for: BSST338G or BSST337.
Formerly: BSST338G.

BSST338 Special Topics in Terrorism Studies (3 Credits)
A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.
Repeatable to: 9 credits if content differs.

BSST340 Oral Communication for National Security Careers (3 Credits)
Students will discuss perspectives on strategic communication and national security, while discussing and practicing public speaking skills and developing proficiency in three genres of security-related briefings. Students will work with the technical, scientific, and/or specialized data, vocabularies, processes, and products of the academic disciplines and/or fields of expertise relevant to national and international security careers.
Credit Only Granted for: BSST340 or BSST338E.
Formerly: BSST338E.

BSST358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSST370 Financing Terror and Hate (3 Credits)
This course will discuss terrorist financial activities, initiatives focused on countering those financial activities, and sanctions policy. This course approaches these topics through various techniques including, structured analytic tools, such as weighted ranking methods, scenario trees, causal flow diagramming, hypothesis testing, utility analysis, as well as game theory and logic will be incorporated into the course to provide students a better framework to form analytic judgments. At the end of the course, students will have gained a solid foundational understanding of the financing and counter-financing of terrorists.
Credit Only Granted for: BSST370 or BSST338Z.
Formerly: BSST338Z.

BSST372 Terrorist Hostage Taking (3 Credits)
Examines different forms of hostage taking, drawing on theory and research from across a range of different fields, including international relations, political science, criminology, psychology, sociology and economics. We will consider these events in terms of how they are similar, how they differ and what they are designed to achieve. This course provides insights into the complicated nature of terrorism via hostage taking in order to broaden student understanding of current events. This course also gives students practical experience in finding and coding data, and studying complex human behaviors.

BSST374 Political Assassinations (3 Credits)
Course topics include political assassinations, their consequences, and the possible means for their prevention, from profiling assassins to protection of potential targets. Research on political assassinations has developed from many different disciplines and so we will be drawing on theory and research from across a range of different fields, including international relations, political science, criminology, psychology, sociology and economics. In each lecture we will review the scholarly issues associated with political assassinations as well as considering the practical, counter attack challenges faced by security and law enforcement.

BSST386 Experiential Learning in Terrorism Studies (1-5 Credits)
This course will supplement student's experiential learning experience, or internship in the field of terrorism studies and homeland security with guided reflection on their experiences.

BSST389 Internship in Terrorism Studies (1-6 Credits)
Supplements student's experiential learning experience, or internship in the field of terrorism studies and homeland security, with guided reflection on their experiences.
Restriction: Must have earned a minimum cumulative GPA of 2.5.
Repeatable to: 9 credits.

BSST391 Social Network Analysis of Terrorism (1 Credit)
The concept of networks has become central to many discussions of terrorism and political violence research. However, use of the term is rarely backed with theoretical and empirical analysis of actual networks. This course will instruct students in the basics of social network analysis and how to apply SNA methods in the field of terrorism studies.
Credit Only Granted for: BSST391 or BSST399N.
Formerly: BSST399N.

BSST398 Individual Study in Terrorism Studies II (1-3 Credits)
An independent study course for START Students.
Repeatable to: 9 credits if content differs.

BSST399 Individual Study in Terrorism Studies (1-3 Credits)
An independent study course for students in the Global Terrorism Minor program.
Repeatable to: 9 credits if content differs.

BSST458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS - Criminology and Criminal Justice

CCJS100 Introduction to Criminal Justice (3 Credits)
Introduction to the administration of criminal justice in a democratic society, with emphasis on the theoretical and historical development of law enforcement. The principles of organization and administration for law enforcement; functions and specific activities; planning and research; public relations; personnel and training; inspection and control; direction; policy formulation.

CCJS105 Introduction to Criminology (3 Credits)
Criminal behavior and the methods of its study; causation; typologies of criminal acts and offenders; punishment, correction and incapacitation; prevention of crime.

CCJS158 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS188 Topics in Criminology and Criminal Justice (3 Credits)
Contemporary and emerging crimes and the response to them by criminal justice agencies. Emphasis is on the emergence of new forms of crimes or criminals.
Prerequisite: CCJS100 or CCJS105.
Repeatable to: 6 credits if content differs.

CCJS200 Statistics for Criminology and Criminal Justice (3 Credits)
Introduction to descriptive and inferential statistics, graphical techniques, and the computer analysis of criminology and criminal justice data. Basic procedures of hypothesis testing, correlation and regression analysis, and the analysis of continuous and binary dependent variables. Emphasis upon the examination of research problems and issues in criminology and criminal justice.
Prerequisite: CCJS100 or CCJS105. And 1 course with a minimum grade of C- from (STAT100, MATH107, MATH111, MATH120, MATH130, MATH135, MATH140); or must have completed MATH220 with a minimum grade of C-.
Restriction: Must be in Criminology and Criminal Justice program; or permission of BSOS-Criminology & Criminal Justice department.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

CCJS225 Responses to Violence (3 Credits)
Conflict is unfortunately resolved through violence in a number of settings. It ranges from interpersonal to international in its scope. This course investigates the strengths and weakness of a number of resolutions to reducing violence over the course of history using both state centered and informal control.

CCJS226 Out of Lock Up: Breaking the Cycle (3 Credits)
Offender reentry in the United States. Examination of experiences of prisoners during and after incarceration. Research on the experiences of special offending populations including females, juveniles, and young adults. Exploration of reentry challenges, historical trends, policy, and practice.

CCJS230 Criminal Law in Action (3 Credits)
Law as one of the methods of social control. Criminal law: its nature, sources and types; theories and historical developments. Behavioral and legal aspects of criminal acts. Classification and analysis of selected criminal offenses.
Prerequisite: CCJS100.

CCJS234 Law of Criminal Investigation (3 Credits)
General principles and theories of criminal procedure. Due process. Arrest, search and seizure. Recent developments. Study and evaluation of evidence and proof.
Prerequisite: CCJS100 and CCJS230.

CCJS258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS278 Special Topics in Criminology and Criminal Justice (3 Credits)
Topics of special interest to undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest. May be delivered online.
Repeatable to: 6 credits if content differs.

CCJS288 Special Topics in Law and Justice (3 Credits)
An analysis of recent developments in criminal law and their implications for criminal justice systems and research. Focus will be on Supreme Court decisions and legislative initiatives.
Prerequisite: CCJS105 and CCJS230.
Repeatable to: 6 credits if content differs.

CCJS300 Criminological and Criminal Justice Research Methods (3 Credits)
Introduction to the formulation of research questions covering crime and justice, research designs, data collection, and interpretation and reporting in criminological and justice-system settings.
Prerequisite: CCJS100 and CCJS105; and (PSYC200, CCJS200, ECON321, BMGT230, or SOCY201).

CCJS310 Criminal Investigations (3 Credits)
An introduction to modern methods used in detection, investigation, and solution of crime. Students will be taught basic and advanced investigative techniques utilized by law enforcement agencies. Analysis of actual cases will be used to demonstrate practical uses of these techniques.
Prerequisite: CCJS100 and CCJS230.

CCJS318 Special Topics in Criminology & Criminal Justice (3 Credits)
Special topics in various aspects of the field of criminology and criminal justice will be covered.
Repeatable to: 15 credits if content differs.

CCJS320 Introduction to Criminalistics (3 Credits)
An introduction to modern methods used in the detection, investigation and solution of crimes. Practical analysis of evidence in a crime laboratory, including fingerprints and other impressions, firearms ID and ballistics, hairs and fibers, document examination, and use of polygraph.
Prerequisite: CCJS100 and CCJS230.

CCJS325 Slavery in the Twenty First Century: Combating Human Trafficking (3 Credits)
The trafficking of human beings in its historical, legal, economic, political and social contexts. Scope of the global problem, different forms of human trafficking, and regional trends and practices. Roles of government, the international community and individual actors. Strategies to combat trafficking.
Credit Only Granted for: CCJS325 or CCJS498R.
Formerly: CCJS498R.

CCJS330 Contemporary Criminological Issues (3 Credits)
Topics may include career criminals, prison overcrowding, prediction, ecological studies of crimes, family and delinquency, entrepreneurship in criminal justice and criminology, and similar criminological problems.
Prerequisite: CCJS100 and CCJS105.

CCJS331 Contemporary Legal Policy Issues (3 Credits)
In-depth examination of selected topics. Criminal responsibility. Socio-legal policy alternatives with regard to deviance. Law enforcement procedures for civil law and similar legal problems. Admissibility of evidence. Representation. Indigent's right to counsel.
Prerequisite: CCJS100 and CCJS230.

CCJS332 Major Transitions: From Undergraduate to Professional (1 Credit)
This course is designed to assist criminology and criminal justice students explore career opportunities. Topics will include: graduate school, law school, career opportunities in federal, state, local, and public agencies, resume writing, and internships.
Restriction: Must be in Criminology and Criminal Justice program; and sophomore standing or higher.

CCJS340 Policing (3 Credits)
Critical issues relating to policing. Topics include police discretion, role of police, use of force, misconduct, police research, administration, personnel, and etc.
Prerequisite: CCJS100.

CCJS342 Corrections (3 Credits)
Examination of the American correctional system. Identification of historical and contemporary themes, issues, and trends. Evaluation of correctional policies, practices and research.
Prerequisite: CCJS100.
Restriction: Must be in a major within the BSOS-Criminology & Criminal Justice department.
Credit Only Granted for: CCJS342 or CCJS452.

CCJS345 Courts and Sentencing (3 Credits)
Contemporary issues in the American court system such as prosecution, sentencing and punishment. Theoretical perspectives on courtroom decision-making integrated with empirical research. Courts and sentencing processes, including initial charging, pretrial detention and final sentencing outcomes. Innovations in courts and sentencing.
Prerequisite: CCJS100.
Restriction: Must be in a major within the BSOS-Criminology & Criminal Justice department.

CCJS346 Domestic Violence (3 Credits)
A thorough and critical examination of family violence. Topics include the historical background to family violence, methods of studying this serious issue, elder abuse, child abuse, the cultural factors involved in intimate partner violence, violence in same-sex relationships, and the criminal justice response to family violence. Although the course focuses on the American family, illustrations from other cultures are provided.
Prerequisite: CCJS100.
Credit Only Granted for: CCJS346 or CCJS498Y.
Formerly: CCJS498Y.

CCJS350 Juvenile Delinquency (3 Credits)
Juvenile delinquency in relation to the general problem of crime; analysis of factors underlying juvenile delinquency; treatment and prevention; organization and social responsibility of law enforcement.
Prerequisite: CCJS105.
Credit Only Granted for: CCJS 350 or CCJS 450.

CCJS352 Drugs and Crime (3 Credits)
An analysis of the role of criminal justice in the control of drug use and abuse.
Prerequisite: CCJS100.

CCJS358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS359 Field Training in Criminology and Corrections (1-6 Credits)
Supervised field training in public or private social agencies. Group meetings, individual conferences and written program reports.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.

CCJS360 Victimology (3 Credits)
Overview of the history and theory of victimology. Analysis of victimization patterns with special emphasis on types of victims and crimes. The interaction between victims of crime and the criminal justice system with respect to the role of the victim and the services offered to the victim.
Prerequisite: CCJS105.

CCJS370 Race, Crime and Criminal Justice (3 Credits)
Role and treatment of racial/ethnic minorities in the criminal justice system. Course will provide students with historical and theoretical framework for understanding this dynamic.
Prerequisite: CCJS100.

CCJS386 Experiential Learning (3-6 Credits)
Restriction: Permission of BSOS-Criminology & Criminal Justice department; and junior standing or higher.

CCJS388 Independent Reading Course in Criminology and Criminal Justice (3 Credits)
Designed for the needs of honor students in criminology and criminal justice.
Prerequisite: CCJS100 and CCJS105.
Restriction: Must be in the Honors program.

CCJS389 Independent Research in Criminology and Criminal Justice (1-6 Credits)
Independent Research for CCJS Departmental Honors students.
Prerequisite: CCJS105.
Restriction: Must be in CCJS Honors Program.
Repeatable to: 6 credits if content differs.

CCJS398 Law Enforcement Field Training (1-6 Credits)
Supervised, structured and focused field training in law enforcement agencies.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.

CCJS399 Independent Study in Criminology and Criminal Justice (1-3 Credits)
Integrated reading or research under direction and supervision of a faculty member.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.

CCJS400 Criminal Courts (3 Credits)
Criminal courts in the United States at all levels; judges, prosecutors, defenders, clerks, court administrators, and the nature of their jobs; problems facing courts and prosecutors today and problems of administration; reforms.
Prerequisite: CCJS100 and CCJS300; or permission of BSOS-Criminology & Criminal Justice department.

CCJS418 Seminar in Criminology and Criminal Justice (3 Credits)
Selected topics of interest in the field of Criminology and Criminal Justice will be covered.
Repeatable to: 18 credits if content differs.

CCJS432 Law of Corrections (3 Credits)
A review of the law of criminal corrections from sentencing to final release or release on parole. Probation, punishments, special treatments for special offenders, parole and pardon, and the prisoner's civil rights are also examined.
Prerequisite: CCJS100, CCJS105, CCJS230, and CCJS300.

CCJS440 Security Administration (3 Credits)
Designed to introduce students to the complex issues of Security Administration and the critical terrorism issues facing the nation. Emphasis is placed on understanding the historical and contemporary issues effecting U.S. Counterterrorism Policy. It also explores the challenges facing today's security administrators including: ethics, classified information, intelligence, terrorist organizations and incidents, physical and personnel security, transportation and border security issues.
Prerequisite: CCJS100 and CCJS340.
Credit Only Granted for: CCJS440 or CCJS498Z.
Formerly: CCJS498Z.

CCJS444 Advanced Law Enforcement Administration (3 Credits)
The structuring of manpower, material, and systems to accomplish the major goals of social control. Personnel and systems management. Political controls and limitations on authority and jurisdiction.
Prerequisite: CCJS100 and CCJS340.

CCJS450 Advanced Juvenile Delinquency (3 Credits)
Examination of juvenile delinquency in the United States. Nature and extent of juvenile delinquency, historical approaches, sociological and criminological theories and research, social contexts including the institutions of families, schools, and peers, and social responses. Prevention, punishment, and treatment programs, both within and outside of the juvenile justice and criminal justice systems.
Prerequisite: CCJS105 and CCJS300.
Credit Only Granted for: CCJS350 or CCJS450.

CCJS451 Crime and Delinquency Prevention (3 Credits)
Methods and programs in prevention of crime and delinquency.
Prerequisite: CCJS105 and CCJS300.

CCJS452 Treatment of Criminals and Delinquents (3 Credits)
Processes and methods used to modify criminal and delinquent behavior.
Prerequisite: CCJS105 and CCJS300.
Credit Only Granted for: CCJS 342 or CCJS 452.

CCJS453 White Collar and Organized Crime (3 Credits)
Definition, detection, prosecution, sentencing and impact of white collar and organized crime. Special consideration given to the role of federal law and enforcement practices.
Prerequisite: CCJS300; and (CCJS350 or CCJS105).

CCJS454 Contemporary Criminological Theory (3 Credits)
Examination of the main theoretical accounts that explain the underlying causes of criminal behaviors. Explore how individual choices, socialization experiences, biological factors and social structure affect criminal behaviors.
Prerequisite: CCJS300 and CCJS105.

CCJS455 Dynamics of Planned Change in Criminal Justice I (3 Credits)
An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on the development of innovative ideas using a research and development approach to change.
Prerequisite: CCJS300.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS456 Dynamics of Planned Change in Criminal Justice II (3 Credits)
An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on change strategies and tactics which are appropriate for criminal justice personnel in entry level positions.
Prerequisite: CCJS455; or permission of BSOS-Criminology & Criminal Justice department.

CCJS458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS461 Psychology of Criminal Behavior (3 Credits)
Biological, environmental, and personality factors which influence criminal behaviors. Biophysiology and crime, stress and crime, maladjustment patterns, psychoses, personality disorders, aggression and violent crime, sex-motivated crime and sexual deviations, alcohol and drug abuse, and criminal behavior.
Prerequisite: CCJS105 and CCJS300.

CCJS489 Honors Thesis Research (3 Credits)
Designed for students completing their honors thesis.
Prerequisite: CCJS100 and CCJS105.
Restriction: Limited to CCJS Departmental Honors students.

CCJS498 Selected Topics in Criminology and Criminal Justice (3 Credits)
Topics of special interest to advanced undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest.
Repeatable to: 6 credits if content differs.

CHBE - Chemical and Biomolecular Engineering

CHBE100 Exploring ChBE (1 Credit)
Overview of the specializations and career paths available in chemical and biomolecular engineering. Academic planning, policies and resources will be covered including introduction to undergraduate research, study abroad, internship and co-op opportunities as well as chemical engineering student groups. A peer mentoring program will enable students to interact with successful upper-class chemical engineering students and build their chemical engineering peer network.
Prerequisite: Permission of instructor; and permission of ENGR-Chemical & Biomolecular Engineering department.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.

CHBE101 Introduction to Chemical and Biomolecular Engineering (3 Credits)
Introduction to methods of chemical engineering calculations and analysis. Stoichiometric relations, material and energy balances, and behavior of gases, vapors, liquids and solids. Analytical and computer methods.
Prerequisite: CHEM135; or students who have taken courses with comparable content may contact the department.
Corequisite: MATH141.
Restriction: Must be in Engineering: Chemical program; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE101 or ENCH215.
Formerly: ENCH215.

CHBE250 Computer Methods in Chemical Engineering (3 Credits)
Algorithm development and application of software to the analysis of chemical engineering problems. File management and editing, graphics and numerical methods. Use of spreadsheets, statistics/math software and process simulators for the design of chemical process equipment.
Prerequisite: CHBE101; and must have completed or be concurrently enrolled in MATH241.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE250 or ENCH250.
Formerly: ENCH250.

CHBE301 Chemical and Biomolecular Engineering Thermodynamics I (3 Credits)
Principles of thermodynamics and their application to engineering problems. First and second laws of thermodynamics, properties of gases, liquids and solids, phase equilibrium, flow and non-flow systems, energy conversion, production of work from heat, thermodynamic analysis of processes, equilibrium stage operations and the thermodynamics of chemically reacting systems.
Prerequisite: CHBE101; and must have completed or be concurrently enrolled in CHBE250 and MATH241.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH300 or CHBE301.
Formerly: ENCH300.

CHBE302 Chemical and Biomolecular Engineering Thermodynamics II (3 Credits)
Contemporary trends in chemical engineering thermodynamics that bridge the gap between fundamentals and applications. Thermodynamic analysis of non-ideal and structured systems; such as complex fluids, strongly fluctuating and nanoscale systems, dissipative systems, biosystems, and systems under extreme conditions.
Prerequisite: CHBE301.
Corequisite: CHBE250.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE302 or ENCH400.
Formerly: ENCH400.

CHBE333 Chemical Engineering Seminar (1 Credit)
To develop oral communication skills through a series of class presentations of current chemical engineering topics.
Restriction: Junior standing; and must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE333 or ENCH333.
Formerly: ENCH333.

CHBE369 Teaching Experiences in Chemical Engineering (1-2 Credits)
Students will obtain pedagogical experience by assisting with the teaching of undergraduate courses in Chemical and Biomolecular Engineering.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Repeatable to: 8 credits.

CHBE409 Undergraduate Honors Seminar (1 Credit)
Students will attend and write summaries of departmental seminars, along with professional development activities
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and Permission of ENGR-Chemical & Biomolecular Engineering department; and Must be in the Chemical Engineering Honors Program.
Repeatable to: 2 credits.

CHBE410 Statistics and Design of Experiments (3 Credits)
An introduction to probability, statistics, and design of experiments for chemical engineers.
Prerequisite: Minimum grade of C- in CHBE250, MATH241, and MATH246.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE410 or ENCH476.
Formerly: ENCH476.

CHBE422 Chemical and Biomolecular Engineering Transport Phenomena I (3 Credits)
Principals of fluid dynamics as applied to model development and process design. Mass, momentum and energy conservation. Statics and surface tension. Equation of Continuity and Navier-Stokes Equation with application to laminar flow. Dimensional analysis. Macroscopic balances, Bernoulli Equation and friction factors with application to turbulent flow.
Prerequisite: Minimum grade of C- in CHBE101, CHBE250, MATH241, and MATH246.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE422 or ENCH422.
Formerly: ENCH422.

CHBE424 Chemical and Biomolecular Engineering Transport Phenomena II (3 Credits)
Principles of mass and heat transfer as applied to model development and process design. Species continuity equation with application to diffusion, and convection in laminar flow. Macroscopic balances and mass transfer coefficients with application to turbulent flow. Microscopic equation of energy with application to heat conduction, and convection in laminar flow. Macroscopic energy balance and heat transfer coefficients with application to turbulent flow. Heat exchanger design.
Prerequisite: CHBE422.
Corequisite: CHBE302.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE424 or ENCH424.
Formerly: ENCH424.

CHBE426 Chemical and Biomolecular Separation Processes (3 Credits)
Separation by stages operations. Rate dependent separation processes. Design application in distillation, gas absorption, liquid extraction, drying, adsorption and ion exhange.
Corequisite: CHBE302; and CHBE424.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE426 or ENCH426.
Formerly: ENCH426.

CHBE437 Chemical and Biomolecular Engineering Laboratory (3 Credits)
Application of chemical engineering process and unit operation principals in small-scale semi-commercial equipment. Data from experimental observations are used to evaluate performance and efficiency of operations. Emphasis on correct presentation of results inreport form.
Prerequisite: CHBE424, CHBE426, and CHBE440.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE437 or ENCH437.
Formerly: ENCH437.

CHBE440 Chemical Kinetics and Reactor Design (3 Credits)
Fundamentals of chemical reaction kinetics and their application to the design and operation of chemical reactors. Reaction rate theory, homogeneous reactions and catalysis electrochemical reactions. Catalytic reactor design.
Prerequisite: Minimum grade of C- in CHBE301, MATH241, and MATH246.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE440 or ENCH440.
Formerly: ENCH440.

CHBE442 Chemical and Biomolecular Systems Analysis (3 Credits)
Dynamic response applied to process systems. Goals and modes of control, Laplace transformations, analysis and synthesis of simple control systems, closed loop response, dynamic testing.
Prerequisite: CHBE424 and CHBE426.
Credit Only Granted for: CHBE442 or ENCH442.
Formerly: ENCH442.

CHBE444 Process Engineering Economics and Design I (3 Credits)
Principles of chemical engineering economics and process design. Equipment sizing and costing. Economic evaluation of projects. Flowsheet synthesis. Introduction to flowsheet simulators and concepts of flowsheet optimization. Synthesis of Heat Exchanger Networks and Distillation Sequences.
Prerequisite: CHBE424, CHBE426, and CHBE440.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE444 or ENCH444.
Formerly: ENCH444.

CHBE446 Process Engineering Economics and Design II (3 Credits)
Application of chemical engineering principles for the design of chemical processing equipment. Representative problems in the design of chemical plants will be the focus of this capstone design class. Comprehensive reports are required.
Prerequisite: CHBE442 and CHBE444.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE446 or ENCH446.
Formerly: ENCH446.

CHBE451 Photovoltaics: Solar Energy (3 Credits)
The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH468L or CHBE451.
Formerly: ENCH468L.

CHBE453 Applied Mathematics and Distributive Parameter Systems (3 Credits)
Mathematical techniques applied to the analysis and solution of chemical engineering problems. Use of differentiation, integration, differential equations, partial differential equations and integral transforms. Application of infinite series, numerical and statistical methods.
Credit Only Granted for: CHBE453 or ENCH453.
Formerly: ENCH453.

CHBE454 Chemical Process Analysis and Optimization (3 Credits)
Application of mathematical models to the analysis and optimization of chemical processes. Models based on transport, chemical kinetics and other chemical engineering principles will be employed.
Credit Only Granted for: CHBE454 or ENCH454.
Formerly: ENCH454.

CHBE455 Model Predictive Control (3 Credits)
Empirical model identification from process data. Step and impulse response models. Linearization of nonlinear first principles models. Single variable Model Predictive Control. Robustness with respect to modeling error. MPC based tuning of PID controllers. Feedforward control. Multi-input multi-output processes. Multi-loop decentralized control. Centralized multivariable Model Predictive Control via on-line optimization.
Credit Only Granted for: CHBE455 or ENCH455.
Formerly: ENCH455.

CHBE457 Design and Processing of Polymers for Biomedical Devices (3 Credits)
An overview of the design and processing of polymers used in medical applications. Following a discussion of the physical and mechanical properties of polymers, important classes of polymeric biomaterials will be surveyed, discussing material synthesis, processing techniques and equipment, as well as properties and performance in biomedical applications. Topics will include silicone elastomers, hydrogels, ultra-high molecular weight polyethylene, polyurethanes, polyureas, polyesters, degradable and resorbable polymeric biomaterial designs used in surgery and drug delivery, polymers for ophthalmologic and orthopedic applications, and biopolymers such as silks and collagen. Finally, the design of major industrial polymer processing equipment will be covered, and the fundamentals of extrusion, calendering, coating, fiber spinning, film blowing, and injection molding processes will be presented.
Prerequisite: MATH246; and CHEM231; and (CHBE301, ENMA461, or BIOE232).
Recommended: Knowledge of basic fluid dynamics: CHBE422/BIOE331 or equivalent.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

CHBE468 Research (1-3 Credits)
Investigation of a research project under the direction of a faculty member. Comprehensive reports are required.
Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.
Repeatable to: 6 credits.
Formerly: ENCH468.

CHBE469 Special Projects (1-3 Credits)
Special project under the direction of a faculty member. Comprehensive reports are required.
Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.
Repeatable to: 6 credits if content differs.

CHBE470 Colloid and Interface Science (3 Credits)
Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.
Prerequisite: CHBE424 and CHBE426.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE471 Particle Science and Technology (3 Credits)
Particles are everywhere. We breathe them, eat them, and use them to make many non-particulate materials. Knowledge of particle science and technology is important for manufacturing, for occupational health and safety, as well as environmental considerations. In this multidisciplinary course, the focus will be on the study of science and technology relevant to multiphase systems consisting of solid and/or liquid particles surrounded by a gas. These topics fall loosely under the headings of powder and aerosol technology. Team design projects will be an integral component.
Prerequisite: Knowledge of undergraduate engineering thermodynamics, and transport phenomena; knowledge of numerical methods for solving systems of ordinary differential equations.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE471 or ENCH471.
Formerly: ENCH471.

CHBE472 Control of Air Pollution Sources (3 Credits)
Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE473 Electrochemical Energy Engineering (3 Credits)
The lecture will start from the basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH468K or CHBE473.
Formerly: ENCH468K.

CHBE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)
Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.
Prerequisite: BIOE120; and permission of instructor.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE474, BIOE489T, or ENCH648D.

CHBE475 Ethics in Science and Engineering (3 Credits)
Ethical issues in science and engineering and their resolutions are examined. The main topics will be ethics and scientific truth (including issues of proper data analysis, proper data presentation, and record-keeping), ethics and other scientists and engineers (including issues of attribution, confidentiality, conflicts of interest, mentoring, and inclusion of under-represented groups), ethics and the practice of engineering (including responsibilities of engineers to clients, ecological issues, and conflicts of interest), and ethics and society (including funding priorities, moral issues, and human and animal subjects). Class meetings will be organized around discussions, case studies, and student reports. The course is aimed at postdoctoral students, graduate students and advanced undergraduate students who wish to ponder the important contemporary questions about the ethics of how science and engineering get done.
Credit Only Granted for: CHBE475 or ENCH475.
Formerly: ENCH475.

CHBE476 Molecular Modeling Methods (3 Credits)
Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH468P or CHBE476.
Formerly: ENCH468P.

CHBE477 Mesoscopic and Nanoscale Thermodynamics (3 Credits)
Interdisciplinary course primarily for graduate and senior undergraduate students from engineering or science departments. New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artifical organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.
Prerequisite: A prior course in classical thermodynamics.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE477 or ENCH468Q.
Formerly: ENCH468Q.

CHBE480 Bionanotechnology: Physical Principles (3 Credits)
Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly: protein folding. Nanoscale intermolecular interactions important for biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer structures useful in medicine. Targeted delivery of drugs, genes by nano/micro structures. Cellular assembly in the eye, in insect wings. Cellular assembly at surfaces: gecko feet, duck feathers. Cellular assembly in the presence of crystals: biomineralization.
Prerequisite: BIOE120; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE481 Transport Phenomena in Small and Biological Systems (3 Credits)
Interdisciplinary course primarily for senior undergraduate and graduate students from engineering or science departments. The course's main goal is to make the students familiar with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH468W or CHBE481.
Formerly: ENCH468W.

CHBE482 Biochemical Engineering (3 Credits)
Introduction to biochemical and microbiological applications to commericail and engineering processes, including industrial fermentation, enzymology, ultrafiltration, food and pharmaceutical processing and resulting waste treatment. Enzyme kinetics, cell growth, energetics and mass transfer.
Prerequisite: CHBE440.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE482 or ENCH482.
Formerly: ENCH482.

CHBE483 Bioseparations (3 Credits)
Engineering fundamentals of separations and purification of biological molecules. Case studies and examples illustrate principles and practice of centrifugation, precipitation, crystallization, filtration, membrane separations, chromatography, and affinity separation of recombinant proteins and other biomolecules. Process scale-up and economics of biotechnology products and processes.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH483 or CHBE483.
Formerly: ENCH483.

CHBE484 Metabolic Pathway Engineering (3 Credits)
The state-of-the-art in metabolic engineering, with a focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: (1) overview of biochemistry and metabolism; (2) metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; (3) technologies for engineering metabolic pathways; (4) metabolic control analysis and pathway regulation; (5) applications of metabolic engineering to synthesis of biofuels and therapeutics; (6) specialized and related subjects such as protein engineering and synthetic biology.
Prerequisite: CHBE101 and CHBE440.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH468M or CHBE484.
Formerly: ENCH468M.

CHBE485 Biochemical Engineering Laboratory (3 Credits)
Techniques of measuring pertinent parameters in fermentation reactors, quantification of production variables for primary and secondary metabolites such as enzymes and antibiotics, the insolubilization of enzymes for reactors, and the demonstration of separation techniques such as ultrafiltration and affinity chromatography.
Credit Only Granted for: CHBE485 or ENCH485.
Formerly: ENCH485.

CHBE486 Heterogeneous Catalysis for Energy Applications (3 Credits)
Introduction to heterogeneous catalytic science and technology for energy conversion and hydocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogenious reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO2 utilization will be introduced.
Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE486 or ENCH686.

CHBE487 Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and MATH241.
Recommended: BSCI330 and BIOE340.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: BIOE411, CHBE487, or ENCH468T.
Formerly: ENCH468T.

CHBE490 Polymer Science (3 Credits)
The elements of the polymer chemistry and industrial polymerization, polymer structures and physics, thermodynamics of polymer solutions, polymer processing methods, and engineering applications of polymers.
Credit Only Granted for: CHBE490, ENCH490, or ENMA495.
Formerly: ENCH490.

CHBE495 Nanoparticle Aerosol Dynamics and Particle Technology (3 Credits)
NanoParticles (NA) (< 100 nm), and their science and technology play an important role in nature and industry. From air quality standards, nuclear reactor safety, inhalation therapy, workplace exposure, global climate change, to counterterrorism, aerosols play a central role in our environment. On the industrial side, NA plays an integral part of reinforcing fillers, pigments and catalysts, and the new emerging field of nanotechnology, they are the building blocks to new materials, which encompass, electronic, photonic and magnetic devices, and bio and chemical sensors.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE496 Processing and Engineering of Polymers (3 Credits)
A comprehensive analysis of processing and engineering techniques for the conversion of polymeric materials into useful products. Evaluation of the performance of polymer processes, design of polymer processing equipment.
Credit Only Granted for: CHBE496 or ENCH496.
Formerly: ENCH496.

CHBE497 Protein Engineering (3 Credits)
This course will cover the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.
Prerequisite: BIOE120, CHBE302, and CHBE440; and permission of instructor.
Credit Only Granted for: CHBE497, BIOE489R, or ENCH 648P.

CHEM - Chemistry

CHEM131 Chemistry I - Fundamentals of General Chemistry (3 Credits)
An overview of the Periodic Table, inorganic substances, ionic and covalent bonding, bulk properties of materials, chemical equilibrium, and quantitative chemistry. CHEM131 is the first course in a four-semester sequence for students majoring in the sciences, other than Chemistry and Biochemistry majors.
Prerequisite: Must have math eligibility of MATH120 or higher.
Corequisite: CHEM132.
Recommended: For Science majors.
Credit Only Granted for: CHEM103, CHEM131, CHEM135, CHEM153 or CHEM146.
Formerly: CHEM103.

CHEM132 General Chemistry I Laboratory (1 Credit)
Introduction to the quantification of chemical substances, including the concept of the mole and chemical stoichiometry. Additional work involves the synthesis of ionic substances and their qualitative characterization. Must be taken concurrently with CHEM131.
Corequisite: CHEM131.
Credit Only Granted for: CHEM103, CHEM132, CHEM136, CHEM143, CHEM147 or CHEM177.
Formerly: CHEM103.

CHEM134 Chemical Principles for Engineering (1 Credit)
Basic chemistry for engineering students. Introduction to organic structures and polymers, gas laws, liquids, solids, phase changes, chemical kinetics and electrochemistry.
Prerequisite: Minimum grade of C- in CHEM131; or minimum grade of C- in CHEM146.
Credit Only Granted for: CHEM 134 or CHEM 135.

CHEM135 General Chemistry for Engineers (3 Credits)
The nature and composition of matter, solutions, chemical reactions, equilibria, and electrochemistry, with applications to various fields of engineering.
Prerequisite: Must have math eligibility of MATH120 or higher.
Credit Only Granted for: CHEM103, CHEM113, CHEM131, CHEM135, or CHEM146.

CHEM136 General Chemistry Laboratory for Engineers (1 Credit)
A laboratory course for engineering majors intending to take CHEM231 and CHEM232.
Prerequisite: Must have completed or be concurrently enrolled in CHEM135.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

CHEM146 Principles of General Chemistry (3 Credits)
An overview of the Periodic Table, inorganic substances, ionic and covalent bonding, bulk properties of materials, chemical equilibrium, and quantitative chemistry. CHEM146 is the first course in a four-semester sequence for Chemistry and Biochemistry majors.
Prerequisite: Must have math eligibility of MATH140 or higher.
Corequisite: CHEM177.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry).
Credit Only Granted for: CHEM103, CHEM131, CHEM135, CHEM143, or CHEM146.
Formerly: CHEM143.

CHEM177 Introduction to Laboratory Practices and Research in the Chemical Sciences (2 Credits)
First semester laboratory course required for CHEM and BCHM majors. Introduction to laboratory techniques, including safety practices, scientific ethics, and presentation of current research topics.
Corequisite: CHEM146, CHEM131, or CHEM135.
Restriction: Must be in a major within CMNS-Chemistry & Biochemistry department; or permission of CMNS-Chemistry & Biochemistry department.
Credit Only Granted for: CHEM132, CHEM136, CHEM147, or CHEM177.

CHEM231 Organic Chemistry I (3 Credits)
The chemistry of carbon: aliphatic compounds, aromatic compounds, stereochemistry, arenes, halides, alcohols, esters and spectroscopy.
Prerequisite: CHEM131, CHEM135, or CHEM146; and (CHEM132, CHEM136, CHEM147, or CHEM177); and a grade of C- or better in the prerequisites is required of College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM232.
Credit Only Granted for: CHEM104, CHEM231, CHEM233 or CHEM237.
Formerly: CHEM233.

CHEM232 Organic Chemistry Laboratory I (1 Credit)
Provides experience in developing some basic laboratory techniques, recrystallization, distillation, extraction, chromatography.
Prerequisite: CHEM131 and CHEM132; or (CHEM135 and CHEM136); or (CHEM146 and CHEM147). And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM231.
Credit Only Granted for: CHEM104, CHEM231, CHEM233 or CHEM237.
Formerly: CHEM233.

CHEM237 Principles of Organic Chemistry I (4 Credits)
The chemistry of carbons: aliphatic compounds, aromatic compounds, stereochemistry, arenes, halides, alcohols, esters, and spectroscopy.
Prerequisite: CHEM131, CHEM135, or CHEM146; and (CHEM132, CHEM136, or CHEM147); and a grade of C- or better in the prerequisites is required of College of Computer, Mathematical, and Natural Sciences majors and recommended for all students. Or permission of CMNS-Chemistry & Biochemistry department.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry) ; or must be in a major in ENGR-A. James Clark School of Engineering.
Credit Only Granted for: CHEM233, (CHEM231 and CHEM232), or CHEM237.

CHEM241 Organic Chemistry II (3 Credits)
A continuation of CHEM231 with emphasis on molecular structure; substitution reactions; carbonium ions; aromaticity; synthetic processes; macromolecules.
Prerequisite: CHEM231 and CHEM232; or CHEM237. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Credit Only Granted for: CHEM241, CHEM243 or CHEM247.
Formerly: CHEM243.

CHEM242 Organic Chemistry Laboratory II (1 Credit)
Synthetic organic chemistry through functional group manipulation, introduction to instrumentation essential to analysis and structure elucidation.
Prerequisite: CHEM231 and CHEM232; or CHEM237. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM241.
Credit Only Granted for: CHEM243 or CHEM247.
Formerly: CHEM243.

CHEM247 Principles of Organic Chemistry II (4 Credits)
A continuation of CHEM237 with emphasis on molecular structure, substitution reactions; carbonium ions; aromaticity; synthetic processes; macromolecules.
Prerequisite: Minimum grade of C- in CHEM237; or permission of CMNS-Chemistry & Biochemistry department.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry) ; or must be an honors student.
Credit Only Granted for: CHEM243 or CHEM247.

CHEM271 General Chemistry and Energetics (2 Credits)
An introduction to the physical aspects of chemistry; chemical kinetics, thermodynamics and electrochemistry in the context of current chemistry research.
Prerequisite: CHEM241 and CHEM242; or CHEM247. And a grade of C- or better in the prerequisites for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM272.
Credit Only Granted for: CHEM113, CHEM153, CHEM271 or CHEM276.
Formerly: CHEM113.

CHEM272 General Bioanalytical Chemistry Laboratory (2 Credits)
An introduction to analytical chemistry with an emphasis on bio-analytical instrumentation and techniques.
Prerequisite: CHEM241 and CHEM242; or CHEM247. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: CHEM271.
Credit Only Granted for: CHEM227, CHEM272 or CHEM277.

CHEM276 General Chemistry and Energetics - Majors (2 Credits)
An introduction to the physical aspects of chemistry for Biochemistry and Chemistry majors. Chemical kinetics, thermodynamics and electrochemistry in the context of current chemistry research.
Prerequisite: Minimum grade of C- in CHEM241 and CHEM242; or minimum grade of C- in CHEM247.
Corequisite: CHEM277.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry).
Credit Only Granted for: CHEM113, CHEM153, CHEM271 or CHEM276.
Formerly: CHEM153.

CHEM277 Fundamentals of Analytical and Bioanalytical Chemistry Laboratory (3 Credits)
Quantitative analysis, inorganic analytical chemistry, and an introduction to bio-analytical instrumentation and techniques.
Prerequisite: Minimum grade of C- in CHEM241 and CHEM242; or minimum grade of C- in CHEM247.
Corequisite: CHEM276.
Restriction: Must be in one of the following programs (Chemistry; Biochemistry).
Credit Only Granted for: CHEM153, CHEM227, CHEM272 or CHEM277.

CHEM386 Experiential Learning (3-6 Credits)
Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

CHEM389 Pedagogy and Instruction in Chemistry (1-2 Credits)
Methodologies, theory and educational tools applicable to the field of undergraduate chemistry education. Examples covered will use content from introductory general and organic chemistry courses.
Prerequisite: Permission of instructor; and minimum grade of B- in CHEM231; and must have completed or be concurrently enrolled in CHEM241.
Repeatable to: 6 credits.

CHEM395 Professional Issues in Chemistry and Biochemistry (1 Credit)
Seminar on professional issues. Professional responsibilities, ethics, interview techniques, career opportunities, graduate/professional school, race and gender issues.
Restriction: Junior standing or higher; and must be in one of the following programs (Chemistry; Biochemistry).

CHEM398 Special Projects (2 Credits)
Honors projects for undergraduate students.

CHEM399 Introduction to Chemical Research (1-3 Credits)
Basic (chemical) research conducted under the supervision of a faculty member.
Restriction: Junior standing or higher; and permission of CMNS-Chemistry & Biochemistry department.
Repeatable to: 6 credits.

CHEM401 Inorganic Chemistry (3 Credits)
An overview of basic concepts of the electronic structure of the elements, chemical bonding and reactivity, from simple diatomic molecules to coordination compounds. These are viewed from simple (Lewis) to the most comprehensive molecular orbital theory. Symmetry and group theory are used throughout the course.
Prerequisite: CHEM276 or CHEM271; and (CHEM247 or CHEM241).

CHEM403 Radiochemistry (3 Credits)
Radioactive decay; introduction to properties of atomic nuclei; nuclear processes in cosmology; chemical, biomedical and environmental applications of radioactivity; nuclear processes as chemical tools; interaction of radiation with matter.
Prerequisite: Must have completed one year of college chemistry and one year of college physics.

CHEM425 Instrumental Methods of Analysis (4 Credits)
Modern instrumentation in analytical chemistry. Electronics, spectroscopy, chromatography and electrochemistry.
Prerequisite: CHEM272 and CHEM271; or (CHEM276 and CHEM277).

CHEM441 Advanced Organic Chemistry (3 Credits)
An advanced study of the compounds of carbon, with special emphasis on molecular orbital theory and organic reaction mechanisms.
Prerequisite: Must have completed or be concurrently enrolled in CHEM481; and 1 course with a minimum grade of C- from (CHEM241, CHEM247). Jointly offered with CHEM641.

CHEM460 Structure Determination Using Spectroscopic Methods (3 Credits)
The use of infrared, ultraviolet-visible, proton and carbon-13 nuclear magnetic resonance and mass spectroscopy for structure determination in organic chemistry.
Prerequisite: Must have completed CHEM243; or CHEM247; or (CHEM241 and CHEM242).
Formerly: CHEM660.

CHEM471 Techniques in Pulse NMR (1 Credit)
NMR techniques to operate, adjust, and calibrate the spectrometers and acquire and process NMR data in one and two dimensional NMR applications.
Prerequisite: CHEM241 and CHEM242; or CHEM247.
Recommended: CHEM460.
Restriction: Senior standing or higher.
Additional Information: Persons with heart pacemakers and/or metal implants cannot take the course due to potential health hazards.

CHEM474 Environmental Chemistry (3 Credits)
The sources of various elements and chemical reactions between them in the atmosphere and hydrosphere are treated. Causes and biological effects of air and water pollution by certain elements are discussed.
Prerequisite: CHEM481.

CHEM481 Physical Chemistry I (3 Credits)
Thermodynamics and kinetics of chemical and molecular systems. Topics may include internal energy, heat, work, enthalpy, entropy, free energy, and spontaneity as well as reaction order, differential rate laws, integrated rate laws, and rate laws for multi-step processes.
Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

CHEM482 Physical Chemistry II (3 Credits)
Quantum mechanical nature of atoms and molecules. Topics may include model systems for electronic, vibrational, rotational and translational energies as well as connections to molecular spectroscopy and thermal distributions.
Prerequisite: Minimum grade of C- in CHEM481.

CHEM483 Physical Chemistry Laboratory I (2 Credits)
An introduction to the principles and application of quantitative techniques in physical chemical measurements. Experiments will be coordinated with topics in CHEM481.
Prerequisite: Must have completed or be concurrently enrolled in CHEM481.

CHEM484 Physical Chemistry Laboratory II (2 Credits)
A continuation of CHEM 483. Advanced quantitative techniques necessary in physical chemical measurements. Experiments will be coordinated with topics in CHEM 482.
Prerequisite: CHEM481 and CHEM483; and must have completed or be concurrently enrolled in CHEM482.

CHEM498 Special Topics in Chemistry (3 Credits)
Prerequisite: Prerequisite varies with the nature of the topic being considered.

CHIN - Chinese

CHIN101 Intensive Elementary Chinese I (6 Credits)
Introduction to speaking, reading, and writing Chinese with an emphasis on mastering the essentials of pronunciation, basic characters and structural patterns.
Prerequisite: Must have attained appropriate Foreign Language Placement Test (FLPT) score.

CHIN102 Elementary Spoken Chinese (3 Credits)
Continued study of grammatical patterns and vocabulary buildup with particular emphasis on conversation.
Prerequisite: CHIN101; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN103.
Additional Information: Must be taken in conjunction with CHIN 103.

CHIN103 Elementary Written Chinese (3 Credits)
Continued study of grammatical patterns and buildup of vocabulary with particular emphasis on reading and writing.
Prerequisite: CHIN101; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN102.
Additional Information: Must be taken in conjunction with CHIN102.

CHIN105 Elementary Chinese - Accelerated Track (3 Credits)
Accelerated instruction in Mandarin Chinese at the elementary level for students with prior Chinese language background, either through home use or formal instruction.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed CHIN103, CHIN102, or CHIN101.

CHIN169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CHIN201 Intermediate Spoken Chinese I (3 Credits)
Emphasis on development of conversational skills with vocabulary build-up and controlled conversation.
Prerequisite: CHIN102; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN202.
Additional Information: Must be taken in conjunction with CHIN202.

CHIN202 Intermediate Written Chinese I (3 Credits)
Reading and writing skills with emphasis on grammar and Chinese characters.
Prerequisite: CHIN103; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN201.
Additional Information: Must be taken in conjunction with CHIN201.

CHIN203 Intermediate Spoken Chinese II (3 Credits)
Continuation of CHIN201.
Prerequisite: CHIN201; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN204.
Additional Information: Must be taken in conjunction with CHIN204.

CHIN204 Intermediate Written Chinese II (3 Credits)
Continuation of CHIN202.
Prerequisite: CHIN202; or students who have taken courses with comparable content may contact the department; or must have attained appropriate Foreign Language Placement Test (FLPT) score.
Corequisite: CHIN203.
Additional Information: Must be taken in conjunction with CHIN203.

CHIN205 Intermediate Chinese - Accelerated Track (3 Credits)
Accelerated instruction in Mandarin Chinese at the intermediate level for students with prior Chinese language background, either through home use or formal instruction.
Prerequisite: Must have attained appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed CHIN201, CHIN203, CHIN202, or CHIN204.

CHIN213 Chinese Poetry into English: An Introduction (3 Credits)
Issues in the intercultural and interlingual interpretation of foreign literature through the study of Western translations of and scholarship on selected Chinese poets. No knowledge of Chinese required.

CHIN214 Introduction to Chinese Literature (3 Credits)
Introduction to Chinese literature in its historical context. Readings include different genres of Chinese literatures such as Confucius, Du Fu and Lu Xun, medical texts, sutras, maps, gazettes. Taught in English.

CHIN215 Introduction to Chinese Philosophy (3 Credits)
How should one make moral choices? What is the best way to live a moral life? How should the state be organized to best encourage proper human behavior? And what happens if the state comes to be formed as an empire? What are the proper moral ways to respond? Questions such as these were at the heart of early Chinese philosophical debates (roughly fifth through first centuries BCE). This course will be study of how the early Chinese thinkers wrestled with these questions and what responses they gave. As we will quickly see, the views that arose in early China were among the most powerful and influential in human history. Regardless of whether one agrees with these views or not, they should be studied and taken seriously by anyone who cares about ethics and politics.
Additional Information: Course is taught in English. No previous knowledge of Chinese philosophy and history will be assumed and no prerequisites are required.

CHIN220 Beginning Chinese Calligraphy (3 Credits)
Introduction to techniques, history, and culture of Chinese calligraphy. Extensive hands-on practice. Taught in English.

CHIN269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CHIN301 Advanced Chinese I (3 Credits)
Readings in expository and fictional writing with conversation and composition.
Prerequisite: CHIN202; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN302 Advanced Chinese II (3 Credits)
Continuation of CHIN301.
Prerequisite: CHIN301; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN305 Life in China through TV Plays I (3 Credits)
Using authentic Chinese language material in short TV plays to learn about society and life in China.
Prerequisite: CHIN203 and CHIN204; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN306 Life in China through TV Plays II (3 Credits)
Continuation of CHIN305 using authentic Chinese language material in TV plays to learn about society and life in China.
Prerequisite: CHIN305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN307 Linguistic Landscape of China (3 Credits)
Comprehensive introduction to Chinese and other major languages in the Sino-Tibetan, Altaic, Austroasiatic, and Austronesian families, all of which are spoken in China. Taught in English.
Prerequisite: Must have completed CHIN204 or above; or permission of Chinese Program Advisor.

CHIN313 Chinese Poetry and Prose in Translation (3 Credits)
Writing of the major poets, essayists, and historians from the 10th century B.C. to the 12th century A.D. No knowledge of Chinese is required.

CHIN315 Modern Chinese Literature in Translation (3 Credits)
Major works of fiction and drama from 1920 to the present read in the context of social and literary change. Emphasis on western and traditional Chinese influences on the writers and their works. No knowledge of Chinese required.

CHIN321 Classical Chinese I (3 Credits)
Introductory classical Chinese using literacy and historical sources in the original language.
Prerequisite: CHIN207; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Credit Only Granted for: CHIN321 or CHIN403.
Formerly: CHIN403.

CHIN322 Classical Chinese II (3 Credits)
Further classical studies by various writers from famous ancient philosophers to prominent scholars before the new culture movement.
Prerequisite: CHIN403 and CHIN321; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN331 Chinese Calligraphy: Theory and Practice (3 Credits)
History of the writing system; major scripts, modes, and styles. Intermediate brushwork and lectures on the culture. Characters for practice selected to correspond to lecture topics. Taught in English.
Prerequisite: CHIN220; or permission of instructor.

CHIN332 Chinese Culture through Traditional Chinese Arts (3 Credits)
Study of calligraphy, music, painting, and taichi coupled with critical readings of scholarly and literary texts. Facilitates an understanding of China and Chinese culture through traditional Chinese arts. Taught in English.

CHIN369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CHIN386 Experiential Learning (3-6 Credits)
Prerequisite: Must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

CHIN388 Topics in Chinese Literature in Translation (3 Credits)
Analysis of significant themes and structures in Chinese literature. No knowledge of Chinese required.
Repeatable to: 6 credits if content differs.

CHIN389 Language House Spring Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident of Language House.
Repeatable to: 8 credits.

CHIN401 Readings in Modern Chinese I (3 Credits)
Readings in history, politics, economics, sociology, and literature. Emphasis on wide-ranging, rapid reading, reinforced by conversations and compositions.
Prerequisite: CHIN302; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN402 Readings in Modern Chinese II (3 Credits)
Continuation of CHIN401.
Prerequisite: CHIN401; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN403 Classical Chinese I (3 Credits)
Close readings and discussion of literary, philosophical and historical texts in the original language. The course situates texts in their historical context and also discusses differences between classical and modern Chinese.
Prerequisite: CHIN302 or CHIN306; or permission of instructor.
Additional Information: Texts in Chinese. Class discussion and course work mainly in English.

CHIN408 Selected Readings in Classical Chinese (3 Credits)
Selected readings in Classical Chinese, including important representative works of history, poetry, and parallel prose. Close attention is paid to matters of grammar and phonology in the readings. Content will differ each time this course is offered.
Prerequisite: CHIN321; and must have knowledge of Pinyin.
Repeatable to: 9 credits if content differs.

CHIN411 Business Chinese I (3 Credits)
Conversation, reading, and writing applicable to Chinese business transactions, social meetings, and meetings with government organizations, plus background material in English on professional business practices and social customs associated with business.
Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN412 Business Chinese II (3 Credits)
Continuation of CHIN411.
Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN415 Readings in Current Newspapers and Periodicals (3 Credits)
Reading of periodical literature on selected topics with discussions and essays in Chinese.
Prerequisite: CHIN402; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN418 Special Topics in Contemporary Chinese Fiction and Film (3 Credits)
Various approaches to the most recent textual productions of China and Taiwan. Taught in Chinese.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 12 credits if content differs.

CHIN422 Advanced Chinese Grammar (3 Credits)
Chinese sentence patterns studied and contrasted with English and in terms of current pedagogical as well as linguistic theories. Taught in English and Chinese.
Prerequisite: CHIN302; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN425 Ethnic and Cultural Diversity in China (3 Credits)
This course looks into ethnic and cultural diversity in China. It examines the evolution of the People's Republic of China's (PRC) ethnic policies in relation to nation-state building over the last six decades. Specifically, it studies how the PRC has categorized the Chinese people into 56 ethnic groups, how it has made affirmative action policies to accommodate ethnic diversity, and what problems its approaches have experienced and what solutions it has proposed in its accommodation of ethnicity and diversity in the 21st century. To examine the above issues, the course introduces and applies the concepts of ethnicity, nationality, ethnic nationalism, civic nationalism, identity, social Darwinism, the Soviet model of multinational state building, the Chinese model of inclusive Chinese nation state building, citizenship, individual rights, group rights, equality, and diversity.
Recommended: Any CHIN course or course on China.
Credit Only Granted for: CHIN425 or CHIN429G.
Formerly: CHIN429G.

CHIN428 Selected Topics in Chinese Linguistics (3 Credits)
Undergraduate seminar in Chinese linguistics. Topics may include the ancient writing system, historical phonology, dialectology, prosody and rhyming, grammar and the history of the language as a whole. This course may be repeated with different content, and satisfies the linguistics requirement for the Chinese major. Students are expected to be in at least Third Year Chinese. Taught in English.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Sophomore standing or higher.
Repeatable to: 12 credits if content differs.

CHIN429 Selected Topics in Chinese Studies (3 Credits)
In-depth study of a particular aspect of Chinese cultural, linguistic, literary studies. Specific topic to be announced when course is offered. Taught in English.
Prerequisite: CHIN315.
Repeatable to: 6 credits if content differs.

CHIN441 Traditional Chinese Fiction (3 Credits)
Major works of fiction from the 4th century tales of the marvelous through the 19th century Qing novel. Readings are in classical Chinese and English. Designed for students with advanced language skills. Taught in English.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN443 Cultural Histories of Medicine in China (3 Credits)
Investigates medical knowledge through traditional Chinese approaches to the body and beliefs about healing, including acupuncture, herbal medicine, prayer, ritual and folk medicine. Taught in English.
Restriction: Permission of department, School of Languages, Literatures and Cultures.

CHIN499 Directed Study in Chinese (1-3 Credits)
Readings in Chinese under faculty supervision.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

CLAS - Classics

CLAS169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CLAS170 Greek and Roman Mythology (3 Credits)
An introduction to the mythology of ancient Greece and Rome. This course is particularly recommended for students planning to major in foreign languages, English, history, the fine arts, or journalism. Taught in English.Cross-listed with RELS170.
Credit Only Granted for: CLAS170 or RELS170.
Additional Information: This course cannot be taken for language credit.

CLAS171 Classical Myths in Europe (1 Credit)
The role which Classical Myths have played in the arts, architecture and politics of a major European city. This will only be offered through the study abroad program.

CLAS180 Discovering the World of Ancient Greece (3 Credits)
An exploration of the cultural traits and developments of ancient Greek civilization and its forerunners, from the Bronze Age Mycenaeans and Minoans, through the rise of the classical Greek city-states, to the expansion of Greek cultural influence in the wake of the conquests of Alexander the Great. Drawing upon the evidence of the archaeological remains as well as ancient historical and literary documents, students gain a basic familiarity with the principal monuments and artifacts of classical Greek civilization, the various institutions and values that characterized the Greeks, and the significant historical events that transformed the culture over the course of antiquity.

CLAS269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CLAS275 Why do we laugh? (3 Credits)
An introduction to the breadth and complexity of humor's role in society. Students will explore ancient Greek and Roman comedies side-by-side with contemporary sitcoms and movies, to learn the explanations that various disciplines have offered about why we laugh, and to understand the major impact humor has in how we see ourselves and our world.
Additional Information: All readings will be done in English translation.

CLAS305 Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ANTH305, ARTH305, JWST319Y.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

CLAS308 The Classics in Context (1-3 Credits)
A Study Abroad course which introduces students to the topography, archaeology and culture of the ancient Mediterranean world.
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 9 credits if content differs.

CLAS309 Special Topics in Classical Literature (3 Credits)
Readings in translation.
Repeatable to: 9 credits if content differs.

CLAS310 Ancient Philosophy (3 Credits)
The origins and development of philosophy and science in Ancient Greece, focusing on the pre-Socratics, Socrates, Plato and Aristotle.
Prerequisite: 6 credits in CLAS courses; or 6 credits in PHIL courses.
Credit Only Granted for: CLAS310 or PHIL310.

CLAS311 Inventing Ancient Greek Culture (3 Credits)
Who were the ancient Greeks, and were they the founders of Western civilization' The course examines the foundations of ancient Greece. Through an analysis of the historical, archaeological, and linguistic evidence, it sheds light on the so-called Black Athena Controversy, which raised doubts about the ancient Greek contribution to Western culture. The course also focuses on the impact of modern identity politics on scholarly discussions of antiquity and the ways in which the Culture Wars of the 1980s and 1990s have influenced analyses of the ancient Greek world.Cross-listed with: HIST328D.
Credit Only Granted for: CLAS311 or HIST328D.

CLAS312 The Modernity of Athenian Democracy (3 Credits)
Examines the question of how Ancient Greek thought can be a tool for facing the challenges of the modern world. Topics such as political participation and engagement in politics, lawfulness and justice, freedom and autonomy, democracy and civic responsibility are found at the core of Ancient Greek thought. In addition to these topics, the course explores, through the teachings of ancient Greek philosophers, historians, and poets, the questions of virtue and happiness at a personal level and the pursuit of happiness at the societal level. Love and friendship are necessary virtues to shape a harmonious and prosperous polis. By studying selected excerpts from the primary sources of Ancient Greek literature in translation, the course defines the core values of democratic society from the viewpoint of the Greeks.

CLAS315 Greek and Roman Athletics (3 Credits)
The origin and evolution of athletics in ancient Greece and Rome studied as recreation, as play, as education, as a profession and as mass entertainment.

CLAS320 Women in Classical Antiquity (3 Credits)
A study of women's image and reality in ancient Greek and Roman societies through an examination of literary, linguistic, historical, legal, and artistic evidence; special emphasis in women's role in the family, views of female sexuality, and the place of women in creative art. Readings in primary sources in translation and modern critical writings.Cross-listed with: HIST328W, WMST320.
Credit Only Granted for: CLAS320, WMST320, or HIST328W.

CLAS330 Ancient Greek Religion: Gods, Myths, Temples (3 Credits)
Survey of Greek religious ideas and practices as they evolve from the Bronze Age to the early Christian period.Cross-listed with RELS370.
Credit Only Granted for: CLAS330 or RELS370.

CLAS331 Roman Religion: From Jupiter to Jesus (3 Credits)
Survey of the major institutions of Roman state and private religion and of the diverse religions, including Judaism and Christianity, practiced in the Roman empire.
Formerly: CLAS309J.

CLAS369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CLAS369A Ancient Greece and the Athletic Spirit (3 Credits)
From the time of the poems of Homer to the end of the Roman Empire, exercise of the body and physical competition played an essential role in ancient Greece. Athletics was regarded as both a sphere of excellence and a form of exciting entertainment. Students will travel around Greece and study firsthand the sites, monuments, and objects that defined the ancient experience of athletics, with the aim of understanding its principal forms, the spirit and values that guided it, and its interrelationship with other aspects of society and culture.

CLAS374 Greek Tragedy in Translation (3 Credits)
Study and analysis of the tragedies of Aeschylus, Sophocles and Euripides with special attention to the concepts of character and of thought as conceived by Aristotle in The Poetics.

CLAS375 Ancient Comedy (3 Credits)
Representative plays by Aristophanes, Menander, Plautus and Terence in translation; examination of Greek tradition in Roman and postclassical periods.

CLAS380 Archaeological Fieldwork in Greece (4 Credits)
Students will learn about the archaeology, history and culture of Greece by participating in the archaeological investigations at Kenchreai, the eastern port of ancient Corinth. Students will learn about data analysis, artifact processing, and conservation, all important components in archaeological fieldwork. This program also gives students a rare chance to live and to learn in one of the most archaeologically rich, historically important, and naturally beautiful regions in Greece, the northeastern Peloponnese. Students will visit sites and museums throughout this region, attend seminars, and experience life in a small village. In this way they will learn not only about the practice of archaeological field research, but also about Greek history and culture from ancient to modern times. While the course focuses on southern Greece during the Roman Empire and Late Antiquity, a period of prosperity and diversity at Kenchreai and in its broader area, students will also explore cultural and historical developments that influenced other regions and longer periods, from the Bronze Age to the Modern era, including religion and cult-practice, art and iconography, settlement and the environment, and the construction of identity.
Credit Only Granted for: CLAS369K or CLAS380.
Formerly: CLAS369K.

CLAS386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

CLAS409 Classics Capstone Seminar (3 Credits)
Comparative study of selected central aspects of both ancient Greek and Roman cultures as viewed from the standpoints of literary study, history, art history, and other fields as appropriate. Seminar format involving intensive student research.
Restriction: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

CLAS419 The Classical Tradition (3 Credits)
Examination of the role of Greek and Roman civilization in shaping the arts and ideas of western culture.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: CLAS419 or CLAS420.
Formerly: CLAS420.

CLAS470 Approaches to Greek Mythology (3 Credits)
Ancient and modern approaches to understanding Greek myth as expression of human experience, including interpretations drawn from psychology, anthropology, and comparative mythology.
Prerequisite: CLAS170; or permission of ARHU-Classics department.

CLAS488 Independent Study in Classical Civilization (3 Credits)
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

CLAS499 Independent Study in Classical Languages and Literatures (1-3 Credits)
Prerequisite: Permission of ARHU-Classics department.

CMLT - Comparative Literature

CMLT235 Black Diaspora Literature and Culture (3 Credits)
Examination of key works by writers of the African Diaspora. Relationship among black people across multiple geographic spaces; Africa, the Caribbean, the United States, Europe, Latin America, and Asia. Specific historical, cultural, and literary contexts; themes such as gender, sexuality, migration, slavery, freedom, and equality. Readings may include literary texts (fiction, poetry, drama), music and film. All readings in English, but drawn from multiple languages of the black diaspora, including English, Spanish, French and Portuguese.

CMLT242 Introduction to Jewish Literature (3 Credits)
A survey of Jewish literature and introduction to methods of reading literature in general and Jewish literature in particular. Concern with what makes a literary corpus Jewish and other issues of canonicity. All texts in English translation.Cross-listed with: JWST272, ISRL249G.
Credit Only Granted for: JWST272, CMLT242, or ISRL249G.

CMLT269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CMLT270 Global Literature and Social Change (3 Credits)
Comparative study of literature through selected literary works from several non-Western cultures, viewed cross-culturally in light of particular social, political, and economic perspectives.

CMLT275 World Literature by Women (3 Credits)
Comparative study of selected works by women writers of several countries, exploring points of intersection and divergence in women's literary representations.Cross-listed with WMST275.
Credit Only Granted for: CMLT275 or WMST275.

CMLT277 Literatures of the Americas (3 Credits)
Comparative study of several North, South, and Central American cultures with a focus on the specificities, similarities, and divergences of their literary and cultural texts.

CMLT280 Film Art in a Global Society (3 Credits)
Comparative study of a variety of film traditions from around the world, including cinema from Hollywood, Europe, Asia and developing countries, with a stress on different cultural contexts for film-making and viewing.

CMLT298 Topics in Comparative Studies (3-6 Credits)
Repeatable to: 9 credits if content differs.

CMLT369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CMLT386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and permission of ARHU-English department.

CMLT398 Special Topics in Comparative Studies (3 Credits)
Special topics in comparitive studies.
Repeatable to: 9 credits if content differs.

CMLT469 The Continental Novel (3 Credits)
The novel in translation from Stendhal through the existentialists, selected from literatures of France, Germany, Italy, Russia, and Spain.

CMLT479 Major Contemporary Authors (3 Credits)

CMLT488 Genres (3 Credits)
A study of a recognized literary form, such as tragedy, film, satire, literary criticism, comedy, tragicomedy, etc.
Repeatable to: 6 credits if content differs.

CMLT489 Major Writers (3 Credits)
Each semester two major writers from different cultures and languages will be studied. Authors will be chosen on the basis of significant relationships of cultural and aesthetic contexts, analogies between their respective works, and the importance of each writer to his literary tradition.

CMLT498 Selected Topics in Comparative Studies (3 Credits)

CMLX - Comparative Literature Education Abroad

CMLX300 Leonardo da Vinci: Renaissance Man and Modern Myth (3 Credits)
Leonardo da Vinci (1452-1519) is the last great figure of Western history that masterfully fills the role of both artist and scientist. In light of this achievement, the course will discuss the artistic and scientific endeavors of Leonardo and the impact he had on the shaping of modernity.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

CMSC - Computer Science

CMSC100 Bits and Bytes of Computer Science (1 Credit)
Students are introduced to the field (and disciplines) of computer science within a small classroom setting. They will learn to make a successful transition from high school to the university, while exploring study skills, student success plans and research opportunities.
Restriction: For first time freshmen and first time transfer computer science majors.

CMSC106 Introduction to C Programming (4 Credits)
Design and analysis of programs in C. An introduction to computing using structured programming concepts. Intended for students with no or minimal programming experience.
Prerequisite: MATH115.
Restriction: Must not be in Computer Science program; and must not have completed any courses from CMSC131-499 course range.
Credit Only Granted for: CMSC106, CMSC122, or INST126.

CMSC122 Introduction to Computer Programming via the Web (3 Credits)
Introduction to computer programming in the context of developing full featured dynamic web sites. Uses a problem solving approach to teach basics of program design and implementation using JavaScript; relates these skills to creation of dynamic web sites; then explores both the potential and limits of web-based information sources for use in research. Intended to help relate a student's major to these emerging technologies.
Restriction: Must not have completed any courses from CMSC131-499 course range; and must not be concurrently enrolled in CMSC131.
Credit Only Granted for: CMSC106, or CMSC122.

CMSC131 Object-Oriented Programming I (4 Credits)
Introduction to programming and computer science. Emphasizes understanding and implementation of applications using object-oriented techniques. Develops skills such as program design and testing as well as implementation of programs using a graphical IDE. Programming done in Java.
Corequisite: MATH140.

CMSC132 Object-Oriented Programming II (4 Credits)
Introduction to use of computers to solve problems using software engineering principles. Design, build, test, and debug medium -size software systems and learn to use relevant tools. Use object-oriented methods to create effective and efficient problem solutions. Use and implement application programming interfaces (APIs). Programming done in Java.
Prerequisite: Minimum grade of C- in CMSC131; or must have earned a score of 5 on the A Java AP exam; or must have earned a satisfactory score on the departmental placement exam. And minimum grade of C- in MATH140.

CMSC198 Special Topics in Computer Science for Non-Majors (1-4 Credits)
A course designed to allow non-computer science majors and non-computer engineering majors to pursue a specialized topic or project.
Restriction: Must not be in Computer Science program.
Repeatable to: 6 credits if content differs.

CMSC216 Introduction to Computer Systems (4 Credits)
Introduction to the interaction between user programs and the operating system/hardware. Major topics include C programming, introductory systems programming, and assembly language. Other concepts covered include UNIX, machine data representation, thread management, optimization, and virtual memory. Programming is done in the Linux Environment.
Prerequisite: Minimum grade of C- in CMSC132; and minimum grade of C- in MATH141.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program.

CMSC250 Discrete Structures (4 Credits)
Fundamental mathematical concepts related to computer science, including finite and infinite sets, relations, functions, and propositional logic. Introduction to other techniques, modeling and solving problems in computer science. Introduction to permutations, combinations, graphs, and trees with selected applications.
Prerequisite: Minimum grade of C- in CMSC131; and minimum grade of C- in MATH141.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program.
Formerly: CMSC150.

CMSC298 Special Topics in Computer Science (1-4 Credits)
A course designed to allow a lower level student to pursue a specialized topic or project.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.

CMSC320 Introduction to Data Science (3 Credits)
An introduction to the data science pipeline, i.e., the end-to-end process of going from unstructured, messy data to knowledge and actionable insights. Provides a broad overview of several topics including statistical data analysis, basic data mining and machine learning algorithms, large-scale data management, cloud computing, and information visualization.
Prerequisite: Minimum grade of C- in CMSC216 and CMSC250.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: STAT426 or CMSC320.

CMSC330 Organization of Programming Languages (3 Credits)
A study of programming languages, including their syntax, semantics, and implementation. Several different models of languages are discussed, including dynamic, scripting (e.g., Ruby, Python) functional (e.g., OCaml, Haskell, Scheme), and memory safe systems programming (e.g., Rust). Explores language features such as formal syntax, scoping and binding of variables, higher-order programming, typing, and type polymorphism. Introduces finite automata, context free grammar, parsing, lambda calculus, and basics of security attacks and software security.
Prerequisite: Minimum grade of C- in CMSC250 and CMSC216.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in the Computer Science Minor program; or must be in Engineering: Computer program.

CMSC351 Algorithms (3 Credits)
A systematic study of the complexity of some elementary algorithms related to sorting, graphs and trees, and combinatorics. Algorithms are analyzed using mathematical techniques to solve recurrences and summations.
Prerequisite: Minimum grade of C- in CMSC250 and CMSC216.
Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program.
Credit Only Granted for: CMSC251 or CMSC351.
Additional Information: CMSC351 may not count as one of the required upper level CMSC courses for students who are required to have 24 upper level CMSC credits for graduation, i.e. for students who became computer science majors prior to Fall, 2002.

CMSC388 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.

CMSC389 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science; course may be used as electives for the undergraduate degree and minor.
Repeatable to: 6 credits if content differs.

CMSC390 Honors Paper (3 Credits)
Special study or research directed toward preparation of honors paper.
Restriction: Must be admitted to the Computer Science Honors Program.

CMSC396 Computer Science Honors Seminar (1 Credit)
Overview of computer science research activities, techniques, and tools. Diverse research areas will be covered, including systems, networks, artificial intelligence, human-computer interaction, software engineering, graphics, vision, and theory.
Prerequisite: Must have admission into Computer Science Departmental Honors Program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC297 or CMSC396.
Formerly: CMSC297.

CMSC402 Bioinformatic Algorithms and Methods for Functional Genomics and Proteomics (3 Credits)
An introduction to the fundamental concepts in the computational analysis of biological systems with applications to: functional genomics, population genetics, proteomics and epigenetics. Computational concepts covered: network and graph algorithms, combinatorial algorithms, machine learning, large data/network visualization, statistical modeling and inference, probabilistic graphical models, sparse methods in data analysis, numerical optimization. No prior knowledge of biology required.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department.

CMSC411 Computer Systems Architecture (3 Credits)
Input/output processors and techniques. Intra-system communication, buses, caches. Addressing and memory hierarchies. Microprogramming, parallelism, and pipelining.
Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: ENEE446 or CMSC411.

CMSC412 Operating Systems (4 Credits)
A hands-on introduction to operating systems, including topics in: multiprogramming, communication and synchronization, memory management, IO subsystems, and resource scheduling polices. The laboratory component consists of constructing a small kernel, including functions for device IO, multi-tasking, and memory management.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457).
Restriction: Permission of CMNS-Computer Science department; or must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)).
Credit Only Granted for: CMSC412 or ENEE447.

CMSC414 Computer and Network Security (3 Credits)
An introduction to the topic of security in the context of computer systems and networks. Identify, analyze, and solve network-related security problems in computer systems. Fundamentals of number theory, authentication, and encryption technologies, as well as the practical problems that have to be solved in order to make those technologies workable in a networked environment, particularly in the wide-area Internet environment.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC414, ENEE459C, or ENEE457.

CMSC417 Computer Networks (3 Credits)
Computer networks and architectures. The OSI model including discussion and examples of various network layers. A general introduction to existing network protocols. Communication protocol specification, analysis, and testing.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC420 Advanced Data Structures (3 Credits)
Description, properties, and storage allocation functions of data structures including balanced binary trees, B-Trees, hash tables, skiplists, tries, KD-Trees and Quadtrees. Algorithms for manipulating structures. Applications from areas such as String Processing, Computer Graphics, Information Retrieval, Computer Networks, Computer Vision, and Operating Systems.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC421 Introduction to Artificial Intelligence (3 Credits)
Introduces a range of ideas and methods in AI, varying semester to semester but chosen largely from: automated heuristic search, planning, games, knowledge representation, logical and statistical inference, learning, natural language processing, vision, robotics, cognitive modeling, and intelligent agents. Programming projects will help students obtain a hands-on feel for various topics.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC422 Introduction to Machine Learning (3 Credits)
Machine Learning studies representations and algorithms that allow machines to improve their performance on a task from experience. This is a broad overview of existing methods for machine learning and an introduction to adaptive systems in general. Emphasis is given to practical aspects of machine learning and data mining.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH461); and permission of CMNS-Computer Science department.

CMSC423 Bioinformatic Algorithms, Databases, and Tools (3 Credits)
An introduction to the main algorithms, databases, and tools used in bioinformatics. Topics may include assembly and analysis of genome sequences, reconstructing evolutionary histories, predicting protein structure, and clustering of biological data. Use of scripting languages to perform analysis tasks on biological data. No prior knowledge of biology is assumed.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC424 Database Design (3 Credits)
Students are introduced to database systems and motivates the database approach as a mechanism for modeling the real world. An in-depth coverage of the relational model, logical database design, query languages, and other database concepts including query optimization, concurrency control; transaction management, and log based crash recovery. Distributed and Web database architectures are also discussed.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC425 Game Programming (3 Credits)
An introduction to the principles and practice of computer game programming and design. This includes an introduction to game hardware and systems, the principles of game design, object and terrain modeling, game physics, artificial intelligence for games, networking for games, rendering and animation, and aural rendering. Course topics are reinforced through the design and implementation of a working computer game.
Prerequisite: Minimum grade of C- in CMSC420.

CMSC426 Computer Vision (3 Credits)
An introduction to basic concepts and techniques in computervision. This includes low-level operations such as image filtering and edge detection, 3D reconstruction of scenes using stereo and structure from motion, and object detection, recognition and classification.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC427 Computer Graphics (3 Credits)
An introduction to 3D computer graphics, focusing on the underlying building blocks and algorithms for applications such as 3D computer games, and augmented and virtual reality (AR/VR). Covers the basics of 3D image generation and 3D modeling, with an emphasis on interactive applications. Discusses the representation of 3D geometry, 3D transformations, projections, rasterization, basics of color spaces, texturing and lighting models, as well as programming of modern Graphics Processing Units (GPUs). Includes programming projects where students build their own 3D rendering engine step-by-step.
Prerequisite: MATH240; and minimum grade of C- in CMSC420; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC430 Introduction to Compilers (3 Credits)
Topics include lexical analysis, parsing, intermediate representations, program analysis, optimization, and code generation.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC433 Programming Language Technologies and Paradigms (3 Credits)
Programming language technologies (e.g., object-oriented programming), their implementations and use in software design and implementation.
Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC434 Introduction to Human-Computer Interaction (3 Credits)
Assess usability by quantitative and qualitative methods. Conduct task analyses, usability tests, expert reviews, and continuing assessments of working products by interviews, surveys, and logging. Apply design processes and guidelines to develop professional quality user interfaces. Build low-fidelity paper mockups, and a high-fidelity prototype using contemporary tools such as graphic editors and a graphical programming environment (eg: Visual Basic, Java).
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC435 Software Engineering (3 Credits)
State-of-the-art techniques in software design and development. Laboratory experience in applying the techniques covered. Structured design, structured programming, top-down design and development, segmentation and modularization techniques, iterative enhancement, design and code inspection techniques, correctness, and chief-programmer teams. The development of a large software project.
Prerequisite: 1 course with a minimum grade of C- from (CMSC412, CMSC417, CMSC420, CMSC430, CMSC433); and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC436 Programming Handheld Systems (3 Credits)
Fundamental principles and concepts that underlie the programming of handheld systems, such as mobile phones, personal digital assistants, and tablet computers. Particular emphasis will be placed on concepts such as limited display size, power, memory and CPU speed; and new input modalities, where handheld systems differ substantially from non-handheld systems, and thus require special programming tools and approaches. Students will apply these concepts and principles in the context of an existing handset programming platform.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC451 Design and Analysis of Computer Algorithms (3 Credits)
Fundamental techniques for designing efficient computer algorithms, proving their correctness, and analyzing their complexity. General topics include graph algorithms, basic algorithm design paradigms (such as greedy algorithms, divide-and-conquer, and dynamic programming), network flows, NP-completeness, and other selected topics in algorithms.
Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC452 Elementary Theory of Computation (3 Credits)
Techniques are developed to determine the difficulty of a problem relative to a model of computation. Topics include Finite Automata, P, NP, decidability, undecidability, and communication complexity.
Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC454 Algorithms for Data Science (3 Credits)
Fundamental methods for processing a high volume of data. Methods include stream processing, locally sensitive hashing, web search methods, page rank computation, network and link analysis, dynamic graph algorithms as well as methods to handle high dimensional data/dimensionality reduction.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (STAT400, STAT410); and permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC454 or CMSC498U.
Formerly: CMSC498U.

CMSC456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses). Or permission of instructor. Also offered as: MATH456, ENEE456.
Credit Only Granted for: MATH456, CMSC456, or ENEE456.

CMSC457 Introduction to Quantum Computing (3 Credits)
An introduction to the concept of a quantum computer, including algorithms that outperform classical computation and methods for performing quantum computation reliably in the presence of noise. As this is a multidisciplinary subject, the course will cover basic concepts in theoretical computer science and physics in addition to introducing core quantum computing topics.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, PHYS274); and 1 course with a minimum grade of C- from (CMSC351, PHYS373).
Restriction: Permission of CMNS-Computer Science department.
Additional Information: No previous background in quantum mechanics is required.

CMSC460 Computational Methods (3 Credits)
Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246. Also offered as: AMSC460.
Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

CMSC466 Introduction to Numerical Analysis I (3 Credits)
Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410. Also offered as: AMSC466.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

CMSC470 Introduction to Natural Language Processing (3 Credits)
Introduction to fundamental techniques for automatically processing and generating natural language with computers. Machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of natural language. Application of these techniques in a series of assignments designed to address a core application such as question answering or machine translation.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH461).
Restriction: Permission of CMNS-Computer Science department.

CMSC474 Introduction to Computational Game Theory (3 Credits)
Game theory deals with interactions among agents (either human or computerized) whose objectives and preferences may differ from the objectives and preferences of the other agents. It will also provide a comprehensive introduction to game theory, concentrating on its computational aspects.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Credit Only Granted for: CMSC474, ECON414, GVPT390 or GVPT399A.

CMSC475 Combinatorics and Graph Theory (3 Credits)
General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340). And permission of CMNS-Computer Science department; or permission of CMNS-Mathematics department. Cross-listed with MATH475 .

CMSC488 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.
Additional Information: Course may be used as electives for the undergraduate degree and minor.

CMSC498 Selected Topics in Computer Science (1-3 Credits)
An individualized course designed to allow a student or students to pursue a selected topic not taught as a part of the regular course offerings under the supervision of a Computer Science faculty member. In addition, courses dealing with topics of special interest and/or new emerging areas of computer science will be offered with this number. Selected topics courses will be structured very much like a regular course with homework, project and exams. Credit according to work completed
Restriction: Permission of CMNS-Computer Science department.

CMSC499 Independent Undergraduate Research (1-3 Credits)
Students are provided with an opportunity to participate in a computer science research project under the guidance of a faculty advisor. Format varies. Students and supervising faculty member will agree to a research plan which must be approved by the department. As part of each research plan, students should produce a final paper delineating their contribution to the field.
Restriction: Must be in one of the following programs (Computer Science; Engineering: Computer) ; and permission of CMNS-Computer Science department.

COMM - Communication

COMM100 Foundations of Oral Communication (3 Credits)
Prerequisite for advanced communication courses. A study of oral communication principles, including verbal and nonverbal language, listening, group dynamics, and public speaking. Emphasis in this course is upon the application of these principles to contemporary problems and upon the preparation of different types of oral discourse.
Restriction: Must not have completed COMM107.
Credit Only Granted for: COMM100 or COMM107.

COMM107 Oral Communication: Principles and Practices (3 Credits)
A study of and practice in oral communication, including principles of interviewing, group discussion, listening, informative briefings, and persuasive speeches.
Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130 or THET285.

COMM130 Professional Communication and Writing (1 Credit)
Designed to enhance the clarity and grace of students' writing. Students will acquire knowledge of writing based on principles of style and grammar as well as argument and organizational structure across a diversity of professional writing contexts. Students will also engage in peer review of one another's writing.
Restriction: Must be in the Communication major.

COMM170 Foundations of Listening (3 Credits)
Role, process, and levels of listening behavior and the development of listening skills.

COMM200 Critical Thinking and Speaking (3 Credits)
Theory and practice of persuasive discourse analysis and composition. Research techniques, logical and rhetorical conceptions of argument, and technical principles for persuading in public venues.
Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130, OR THET285.

COMM201 Introduction to Public Relations (3 Credits)
Basic concepts and principles of public relations. Roles in organizations and society; history; skills and practices of public relations; theories and models of effective and ethical public relations.

COMM207 Oral Communication for Engineers (1 Credit)
An exploration of oral communication skills which prepares engineers to engage in interpersonal communication in professional and international settings, communicate effectively in group environments, and deliver listenable presentations.
Prerequisite: ENES100.

COMM230 Argumentation and Debate (3 Credits)
A study of the fundamental principles of reasoning, analysis, and evidence preparation of debate briefs and presentation of standard academic debate.

COMM250 Introduction to Communication Inquiry (3 Credits)
An introduction to the field of communication. Definitions, models, and contexts of communication; rhetorical theory and rhetorical criticism of discourse.

COMM269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

COMM288 Communication Internship (1-6 Credits)
An individual experience arranged by the student with the instructor. Does not satisfy communication major requirements. 45 hours of supervised internship per credit hour with communication professional. Not a substitute for COMM386.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 6 credits if content differs.

COMM298 Selected Topics in Communication (3 Credits)
Special topical study of contemporary issues in communication.
Repeatable to: 6 credits if content differs.

COMM301 Rhetorical Theories (3 Credits)
Explores the idea of rhetoric, from antiquity to digitality. Rhetoric, as an art of moving bodies, is central to democratic self-governance: only through persuading each other can we develop a shared vision of a just and desirable future. This course tracks the genesis of rhetorical theory in the ancient world, 20th-century struggles against fascist rhetoric, and contemporary extensions of rhetoric in digital media ecologies.
Prerequisite: COMM130, COMM250, and COMM304; and one course from STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one course from COMM107, COMM200, or COMM230.
Restriction: Must be in the Communication major.
Credit Only Granted for: COMM301 or COMM401.

COMM302 Communication Science Theories (3 Credits)
This class introduces students to the principles of theory construction and offers a critical overview of how communication theories can be applied to solving problems in diverse social contexts, including interpersonal, intercultural, organizational, health, and/or political issues. The ultimate goal of this course is to put students in an intellectual position to understand theories more logically and critically and use them appropriately and effectively in conducting academic research and addressing social issues.
Prerequisite: COMM130, COMM250, and COMM304; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200, or COMM230.
Restriction: Must be in the Communication major.
Credit Only Granted for: COMM302 or COMM402.

COMM303 Media Theory (3 Credits)
Provides students with an introduction to media theory from multiple perspectives. We will begin by understanding how the history of mediated communication has been connected to ideology and lived experiences. Through readings, discussions, and activities, you will understand how technical, historical, economic social, and political forces have helped shape media content and the media themselves. You should also become familiar with the debate over how much influence the media have over their audiences, and what types of influences are present. The course will introduce issues relevant to consideration of media and historically underrepresented and marginalized groups, as well as individual and societal functions of the media.
Prerequisite: COMM130 and COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200, or COMM230.
Restriction: Must be in the Communication major.

COMM304 Communication Research Literacy (3 Credits)
Explores the different research traditions in the Communication discipline. This 'literacy' course will develop students' ability to locate and fully comprehend Communication research and to understand how that research is conducted, reported, analyzed, and critiqued in Communication literature.
Prerequisite: Must have completed or be concurrently enrolled in COMM130; and COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200 or COMM230.
Restriction: Must be in the Communication program.

COMM305 Qualitative Communication Research Methods (3 Credits)
Introduces undergraduate students to the methods used in qualitative communication research. Topics covered in class include ethics, field research, reflexivity, data collection, and data analysis. Over the course of the semester, students will develop a research prospectus, engage in field research (interviews and observations), analyze qualitative data, and write/present their research.
Prerequisite: COMM130 and COMM304.
Restriction: Must be in the Communication major.

COMM306 Rhetorical Methods in Communication (3 Credits)
Equips students with skills for conducting research using rhetorical-critical methods. Such methods are crucial for scholars studying all kinds of public rhetoric: speeches, popular culture, photojournalism, digital media, public monuments, laws, and more. They are also instrumental for citizens engaging with elected officials, other citizens, and democratic institutions, as well as professionals who seek to create and understand persuasive discourse. This course will equip you with critical interpretive skills important to your work as a scholar, citizen, and professional.
Prerequisite: COMM130 and COMM304.
Restriction: Must be in the Communication major.

COMM307 Quantitative Methods in Communication (3 Credits)
Designed to introduce students to the basics of quantitative communication research methods. As such, it covers the basic principles of scientific inquiry, the process for generating research questions and hypotheses, the concept of variables, sampling methods, research designs, basics of data analyses, as well as ethics in scientific research. This course prepares students to become informed consumers of quantitative communication research.
Prerequisite: COMM130 and COMM304.
Restriction: Must be in the Communication major.
Credit Only Granted for: COMM400 or COMM307.
Formerly: COMM400.

COMM324 Communication and Gender (3 Credits)
The creation of images of male and female, and masculine and feminine, through communication, the differences in male and female communication behaviors and styles, and the implications of those images and styles for male-female transactions.

COMM330 Argumentation and Public Policy (3 Credits)
Contemporary theories of argumentation with special emphasis on methods of formulating and critiquing public policy argument.

COMM331 News Writing and Reporting for Public Relations (3 Credits)
Writing and researching news and information media for public relations; laboratory in news-gathering tools and writing techniques for public relations.
Prerequisite: COMM201; and must have completed or be concurrently enrolled in JOUR181.
Restriction: Must be in Communication program; and (sophomore standing; or junior standing). Or permission of ARHU-Communication department.
Credit Only Granted for: JOUR201, COMM231, or COMM331.
Formerly: COMM231.

COMM332 News Editing for Public Relations (3 Credits)
Copy editing, graphic principles and processes, news and information technologies for public relations.
Prerequisite: Minimum grade of C- in COMM331; or students who have taken courses with comparable content may contact the department. And permission of ARHU-Communication department.
Restriction: Must be in Communication program.
Credit Only Granted for: JOUR202, COMM232, or COMM332.
Formerly: COMM232.

COMM340 Communicating the Narrative (3 Credits)
The role of narratives in communicating messages and development of strategies to effectively communicate the narrative form through storytelling, oral reading, and anecdotes.

COMM350 Public Relations Theory (3 Credits)
The historical development and contemporary status of public relations in business, government, associations and other organizations. Application of communication theory and social science methods to the research, planning, communication and evaluation aspects of the public relations process.
Prerequisite: COMM231 or COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM350 or COMM430.

COMM351 Public Relations Techniques (3 Credits)
The techniques of public relations, including news releases, publications and printed materials, audio-visual techniques, speeches and special events. Application of these techniques in laboratory and field projects.
Prerequisite: COMM332.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM351 or JOUR331.
Formerly: JOUR331.

COMM353 New Media Writing for Public Relations (3 Credits)
Students learn the uses and influence of new media on public relations practice and expand their ability to write using new and traditional media platforms and tools
Prerequisite: Minimum grade of C- in COMM351.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM352 or COMM353.
Formerly: COMM352.

COMM354 Public Relations Programs (3 Credits)
Analysis of eight major programs typically carried out by public relations professionals: employee relations, media relations, financial relations, member relations, governmental relations, community relations, fundraising and dealing with activist public.
Prerequisite: COMM350.

COMM360 The Rhetoric of Black America (3 Credits)
An historical-critical survey of the rhetoric of Black Americans from the colonial period to the present.

COMM369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

COMM370 Mediated Communication (3 Credits)
Analysis and critique of structure, performance, content, effects, and future of mediated communication.
Prerequisite: COMM250.
Restriction: Junior standing or higher.

COMM371 Communication and Digital Media (3 Credits)
A basic introduction to communication in the digital age. Through class lectures, assignments and projects, students will learn to effectively use new media for the purpose of strategic message creation and management used in the field of communication. Students will apply the basics of visual layout skills and the principles of visual design to create messages using words and images.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM371 or COMM398V.
Formerly: COMM398V.

COMM372 Communication, Meaning, and Digital Media (3 Credits)
An exploration of visual communication and meaning creation. A theoretical and practical application of communication concepts and techniques in the production of visual content.
Restriction: Must be in Communication program.

COMM373 Communication and Digital Visual Narrative (3 Credits)
Examination of the traditional style of visual communication, its practices and theoretical underpinnings juxtaposed against contemporary digital media aesthetics and techniques. Utilizing a variety of communication skills and new media tools, students will plan, write, shoot, edit, and upload digital visual narratives.
Restriction: Must be in Communication program.

COMM374 Communicating Visually: Message Production and Digital Media (3 Credits)
Focus on the interplay between technology, images and sound in the creation of digital content. This is a communication process by which a digital visual message evolves from conception to completion, incorporating the creative, financial and marketing tools. Students will conceive, plan, recruit and supervise digital video projects, developing a familiarity with production management technique and execution.
Restriction: Restricted to Communication Majors at the Universities at Shady Grove.

COMM375 Documentary Theory and Practice (3 Credits)
A historical and theoretical introduction to documentary films and videos. Students will explore the power of documentaries to address socially significant issues.
Restriction: Must be in Communication program.

COMM376 Communication through Advocacy Short Film (3 Credits)
Explores the theory and practice of contemporary communication and advocacy short form video.
Restriction: Must be in Communication program.

COMM382 Essentials of Intercultural Communication (3 Credits)
Introduction of major theories and concepts of intercultural communication; examination of processes that make up cultural differences; and use of intercultural communication competence skills.
Credit Only Granted for: COMM382 or COMM482.

COMM385 Influence (3 Credits)
Explores contemporary theories of influence and their implications for communication practice. Topics include power and influence, logical theory, rhetorical theory, persuasion theory, framing theory, social influence theory, and propagation of influence in mediated social networks.
Credit Only Granted for: COMM385 or COMM498I (Spring 2014).
Formerly: COMM498I (Spring 2014).

COMM386 Experiential Learning (3-6 Credits)
Supervised internship experience with communication professionals. Relation of academic training to professional experience.
Prerequisite: Permission of ARHU-Communication department.
Restriction: Junior standing or higher; and must be in Communication program.

COMM388 Communication Practicum (1-3 Credits)
Supervised professional-level practice in communication.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 3 credits if content differs.

COMM398 Selected Topics in Communication (3 Credits)
Topical study of contemporary issues in communication.
Repeatable to: 6 credits if content differs.

COMM399 Honors Thesis (3 Credits)
Prerequisite: Permission of ARHU-Communication department.
Restriction: Must be in Communication program.
Repeatable to: 6 credits if content differs.

COMM400 Research Methods in Communication (3 Credits)
Philosophy of scientific method; role of theory; research ethics; empirical research methods (measurement, sampling, design, analysis).
Prerequisite: COMM250; and must have an introductory course in statistics.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM400 or COMM307.

COMM401 Interpreting Strategic Discourse (3 Credits)
Principles and approaches for practical analysis of discourse designed to shape audience opinion.
Prerequisite: COMM250.
Restriction: Must be in Communication program.

COMM402 Communication Theory and Process (3 Credits)
Philosophical and conceptual analysis of communication theories.
Prerequisite: COMM250.
Restriction: Must be in Communication program.

COMM420 Theories of Group Discussion (3 Credits)
Current theory, research and techniques regarding small group process, group dynamics, leadership and decision-making.

COMM421 Communicating Leadership (3 Credits)
Examines the nature of leadership, theories of leadership from a communication perspective, relationships between leadership, authority, power, and ethics. Explores leadership responsibilities, commitments, and actions.

COMM422 Communication Management (3 Credits)
Communication policies, plans, channels, and practices in the management of the communication function in organizations.

COMM423 Communication Processes in Conferences (3 Credits)
Group participation in conferences, methods of problem solving, semantic aspects of language, and the function of conferences in business, industry and government settings.

COMM424 Communication in Complex Organizations (3 Credits)
Structure and function of communication within organizations: organizational climate and culture, information flow, networks and role relationships.

COMM425 Negotiation and Conflict Management (3 Credits)
Role of communication in shaping negotiation and conflict processes and outcomes.

COMM426 Conflict Management (3 Credits)
Role of communication in managing conflict processes.
Recommended: COMM425; and COMM250; and COMM402.

COMM427 Crisis Communication (3 Credits)
Explores theories and research related to communication before, during, and after a crisis. Students examine the fundamentals of organizational communication, crisis management, and strategic and crisis communication planning before examining case studies of a number of real-life crises: organizational crises, natural disasters, accidents, terrorism incidents, health crises, and major crises of credibility.
Credit Only Granted for: COMM398C or COMM427.
Formerly: COMM398C.

COMM435 Theories of Interpersonal Communication (3 Credits)
Major theoretical approaches and research trends in the study of interpersonal communication.
Prerequisite: COMM400; or permission of ARHU-Communication department.

COMM436 Interpersonal Arguing (3 Credits)
An examination of face to face arguing.
Prerequisite: COMM400 and COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM436 or COMM498I.
Formerly: COMM498I.

COMM450 Ancient and Medieval Rhetorical Theory (3 Credits)
A survey of rhetorical theory in the ancient and medieval periods. Emphasis is placed on the theoretical problems that gave rise to its development within both periods. Authors include Isocrates, Plato, Aristotle, Cicero, Quintilian, Hermogenes, Martianus Capella, Aurelius Augustine, Alberic of Monte Cassino, Geoffrey of Vinsauf and Robert of Basevorn.
Prerequisite: COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM450 or COMM650.

COMM454 Rhetoric of the 1960s (3 Credits)
Study of key rhetoric of the 1960s. Treats rhetoric of relevant Presidents and several protest movements including civil rights, anti-war, and women's liberation. Contrasts traditional modes of argument with alternative rhetorical forms.
Prerequisite: COMM401; or permission of ARHU-Communication department.
Restriction: Must not have completed COMM453 (Spring2003).

COMM455 Speechwriting (3 Credits)
The study of message strategies in order to research and develop effective speech texts appropriate to speakers and their audiences in various public contexts.

COMM458 Seminar in Political Communication (3 Credits)
The examination of special topics for and theories of political communication.
Prerequisite: COMM250.
Repeatable to: 6 credits if content differs.

COMM460 Public Life in American Communities, 1634-1900 (3 Credits)
Ways that Americans have used their voice to create public life. Focus is on the diverse social communities that have characterized American life and the place and characteristics of oral discourse in each.

COMM461 Voices of Public Leadership in the Twentieth Century (3 Credits)
Study of the use of speaking in the power struggles of the twentieth century. Focus is on important speakers of the century, their social and policy influence, and the struggle to expand the diversity of voices with power in the public sphere.

COMM468 Seminar in Mediated Communication (3 Credits)
The examination of special topics related to the study of mediated communication.
Prerequisite: COMM402, COMM450, COMM350, or JOUR350.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

COMM469 The Discourse of Social Movements (3 Credits)
Study of key social movements that have influenced American social and political life. In alternate years the Civil Rights Movement and the Rhetoric of Women's Suffrage and Abolitionism. Consideration of how groups excluded from or marginalized in American political life affect social change.
Recommended: COMM401.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

COMM470 Listening (3 Credits)
The principles of listening behavior.

COMM471 Public Communication Campaigns (3 Credits)
Diffusion theory and its implications for public communication campaigns.
Prerequisite: COMM200; or permission of ARHU-Communication department.

COMM472 Nonverbal Communication (3 Credits)
Nonverbal communication in human interaction theory and research on proxemics, kinesics and paralanguage as expression of relationship, affect and orientation within and across cultures.

COMM475 Persuasion (3 Credits)
Bases of persuasion, with emphasis on recent experimental developments in persuasion.

COMM476 Language, Communication, and Action (3 Credits)
Communication as symbolic action through the study of communication ethics. Emerging ethical principles and decision-making in public discourse, interpersonal communication, organizational communication, public relations, health communication, and crisis communication.

COMM477 Discourse Analysis (3 Credits)
Concepts of textual and discourse analysis applied to speech situations.

COMM478 Communication Colloquium (1 Credit)
Current trends and issues in the field of communication, stressing recent research methods. Recommended for senior and graduate student majors and minors in communication.
Repeatable to: 4 credits if content differs.

COMM482 Intercultural Communication (3 Credits)
The major variables of communication in an intercultural context: cultural, racial and national differences; stereotypes; values; cultural assumptions; and verbal and nonverbal channels.

COMM483 Senior Seminar in Public Relations (3 Credits)
Integration of theory, techniques and research methods into the planning and execution of public relations campaigns for specific organizations. Analysis of research on the case studies of public relations.
Prerequisite: COMM351 and COMM400.
Credit Only Granted for: COMM483 or JOUR483.
Formerly: JOUR483.

COMM488 Communication Portfolio Project (1 Credit)
Preparation of the professional communication portfolio.
Restriction: Senior standing; and must be in Communication program.
Repeatable to: 3 credits if content differs.

COMM489 Topical Research (1-3 Credits)
Individualized research projects conducted with a faculty sponsor.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 6 credits if content differs.

COMM498 Seminar (3 Credits)
Present-day communication research.
Restriction: Permission of instructor; and senior standing.

CPBE - College Park Scholars-Business, Society, and Economy

CPBE100 College Park Scholars: Business, Society & the Economy First-Year Colloquium (1 Credit)
Introductory colloquium: Examination of issues related to business, society and the economy.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE225 Enterprise Communications (3 Credits)
Examines basic interpersonal communication processes within written and oral channels, with practical applications for the business environment.
Prerequisite: CPBE100.
Restriction: Must be enrolled in College Park Scholars' Business, Society and the Economy (CPBE) program.
Formerly: CPSP220.

CPBE230 College Park Scholars: Business, Society & the Economy Internship Practicum (1-3 Credits)
Supervised internship project in an area related to business, society and the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE240 College Park Scholars: Business, Society & the Economy Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to business, society and the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE250 College Park Scholars: Business, Society & the Economy Research Practicum (1-3 Credits)
Supervised research project in an area related to business, society and the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE270 College Park Scholars: Business, Society & the Economy Education Abroad Practicum (1-3 Credits)
Education-abroad experience with content in areas related to business, society and/or the economy.
Prerequisite: CPBE100.
Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPET - College Park Scholars-Environment, Technology & Economy

CPET100 College Park Scholars: Environment, Technology & Economy First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to the convergence of the environment, technology and the economy.
Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET101 College Park Scholars: Environment, Technology & Economy First-Year Colloquium II (1 Credit)
Introductory colloquium II: Continued examination of issues related to the convergence of the environment, technology and the economy. Group projects in sustainable development.
Prerequisite: CPET100.
Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET200 College Park Scholars: Environment, Technology & Economy Second-Year Colloquium (1 Credit)
Advanced colloquium: Continued examination of issues related to sustainable development.
Prerequisite: CPET101.
Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET230 College Park Scholars: Environment, Technology & Economy Internship Practicum (1-3 Credits)
Supervised internship project in an area related to the environment, technology and the economy.
Prerequisite: CPET200.
Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET) program.

CPET240 College Park Scholars: Environment, Technology & Economy Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to the environment, technology and the economy.
Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET), Science, Technology & Society (CPSS), Arts (CPSA) and Business, Society, & Economy (CPBE) programs.

CPET250 College Park Scholars: Environment, Technology & Economy Research Practicum (1-3 Credits)
Supervised research project in an area related to the environment, technology and the economy.
Prerequisite: CPET200.
Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET) program.

CPGH - College Park Scholars-Global Public Health

CPGH100 College Park Scholars: Global Public Health First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of factors that determine the health status of populations around the world.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH101 College Park Scholars: Global Public Health First-Year Colloquium II (1 Credit)
Using case studies, students will examine necessary components to design successful public health interventions.
Prerequisite: CPGH100.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH200 College Park Scholars: Global Public Health Second-Year Colloquium (1 Credit)
Building on knowledge and skills gained from the first-year colloquia, students will develop public health interventions that address a public health issue of a particular community.
Prerequisite: CPGH101.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH230 College Park Scholars: Global Public Health - Internship Practicum (1-3 Credits)
Supervised internship project in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH240 College Park Scholars: Global Public Health Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH250 College Park Scholars: Global Public Health Research Practicum (1-3 Credits)
Supervised research project in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH270 College Park Scholars: Global Public Health Education Abroad Practicum (1-3 Credits)
Education abroad experience in an interest area related to global public health.
Prerequisite: CPGH200.
Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPJT - College Park Scholars-Justice and Legal Thought

CPJT100 College Park Scholars: Justice & Legal Thought: First-Year Colloquium (1 Credit)
Students will gain an experiential understanding of law and justice by investigating concepts and frameworks of justice and apply them to real-world experience.
Restriction: Students must be enrolled in the College Park Scholars Justice & Legal Thought (CPJT) program.

CPJT101 Colloquium in Justice and Legal Thought (1 Credit)
An exploration of contemporary issues related to justice and legal thought.

CPJT200 Justice and legal Thought Second Year Colloquium (1 Credit)
Advanced colloquium for second year students related to research skill development
Restriction: Students must be enrolled in the College Park Scholars Justice and Legal Thought (CPJT) program.
Additional Information: When combined with the first year CPJT colloquia, students will learn how to research issues discussed and debated throughout year one.

CPJT230 Capstone for Justice and Legal Thought: Internship (2-3 Credits)
The capstone of the four-semester College Park Scholars Justice and Legal thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform practicum internships in professional law related settings. In all settings, students must interact directly with legal professionals in law related fields and through law-related institutions under the supervision of legal professionals and program staff. In conjunction with the experiential component, students will synthesize their experience within the learning outcomes of the Justice and Legal Thought Program through an innovative final project culminating in a poster presentation.

CPJT240 Capstone for Justice and Legal Thought: Service-Learning (2 Credits)
The capstone of the four-semester College Park Scholars Justice and Legal Thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform practicum volunteer experiences in professional law related settings. In all settings, students must interact directly with legal professionals in law related fields and through law-related institutions under the supervision of legal professionals and program staff. In conjunctions with the experiential component, students will synthesize their experience within the learning outcomes of the Justice and Legal Thought program through an innovative final project culminating in a poster presentation.

CPJT250 Capstone for Justice and Legal Thought: Research (2 Credits)
The capstone of the four-semester College Park Scholars Justice and Legal Thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform applied research in a law related setting. Students must interact directly with legal professionals under the supervision of program staff. Students will synthesize their experience within the learning outcomes of the Justice and Legal Thought Program through an innovative final research project culminating in a poster presentation.

CPMS - College Park Scholars-Media, Self and Society

CPMS100 College Park Scholars: Media, Self & Society First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to the media.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS101 College Park Scholars: Media, Self & Society First-Year Colloquium II (1 Credit)
Examination of the media's coverage of topical issues.
Prerequisite: CPMS100.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS225 Analyzing Media Practice through Theory (3 Credits)
Media analysis investigating patterns of ownership, the working of media organizations, patterns of coverage and the nature of audiences.
Prerequisite: CPMS100.
Restriction: Must be in the Scholars Media, Self & Society Program.
Formerly: CPSP222.

CPMS230 College Park Scholars: Media, Self & Society - Internship Practicum (1-3 Credits)
Supervised internship project in an area related to media, self and society.
Prerequisite: CPMS101.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS240 College Park Scholars: Media, Self & Society - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an area related to media, self and society.
Prerequisite: CPMS101.
Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPPL - College Park Scholars-Public Leadership

CPPL100 College Park Scholars: Public Leadership First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to public leadership.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL101 College Park Scholars: Public Leadership First-Year Colloquium II (1 Credit)
Continued examination of issues related to public leadership. Development of team, community-based learning project proposals.
Prerequisite: CPPL100.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL200 College Park Scholars: Public Leadership - Applied Leadership Capstone I (1 Credit)
Planning and initiation of team, community-based-learning projects.
Prerequisite: CPPL101.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL201 College Park Scholars: Public Leadership - Applied Leadership Capstone II (2 Credits)
Implementation and evaluation of team, community-based-learning projects.
Prerequisite: CPPL200.
Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPSA - College Park Scholars-Arts

CPSA100 College Park Scholars: Arts First-Year Colloquium I (1 Credit)
Introductory colloquium: Aesthetic, intellectual and personal examination of the arts.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA101 College Park Scholars: Arts First-Year Colloquium II (1-2 Credits)
Introductory colloquium II: Arts workshops and Arts Festival.
Prerequisite: CPSA100.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA149 College Park Scholars: Arts Service-Learning Outreach (2 Credits)
Service-Learning outreach to Prince George's County schools and non-profit agencies.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Repeatable to: 6 credits.

CPSA200 College Park Scholars: Arts Second-Year Colloquium I (1 Credit)
Advanced colloquium I: Examination of the arts in society; and preparation for 'Scholarship-in-Practice' project.
Prerequisite: CPSA101.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 240, 250 or 260, students will earn General Education Scholarship-in-Practice credit.

CPSA201 College Park Scholars: Arts Second-Year Colloquium II (1-2 Credits)
Advanced colloquium II: Arts workshop and Arts Festival.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA240 College Park Scholars: Arts Service-Learning Practicum (2 Credits)
Supervised Service-Learning project in an area related to the arts.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSA250 College Park Scholars: Arts Research Practicum (2 Credits)
Supervised research project in an area related to the arts.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSA260 College Park Scholars: Arts Peer-Teaching Practicum (2 Credits)
Supervised peer-teaching project in an area related to the arts.
Prerequisite: CPSA200.
Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.
Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSD - College Park Scholars-Science, Discovery & the Universe

CPSD100 College Park Scholars: Science, Discovery & the Universe First-Year Colloquium A (1 Credit)
Introductory colloquium: Examination of issues related to science, discovery and the universe.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.
Additional Information: Both freshman colloquia (CPSD 100 and 101) are required for students to earn their College Park Scholars citations; however, they can be taken in any order during a student's first year.

CPSD101 College Park Scholars: Science, Discovery & the Universe First-Year Colloquium B (1 Credit)
Introductory colloquium: Examination of the intersection of astronomy and culture; and the roles of science, exploration and communication in the process of discovery.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.
Additional Information: Both freshman colloquia (CPSD 100 and 101) are required for students to earn their College Park Scholars citations; however, they can be taken in any order during a student's first year.

CPSD200 College Park Scholars: Science, Discovery & the Universe Second-Year Colloquium (1 Credit)
Advanced colloquium: Continued examination of issues related to science, discovery and the universe.
Prerequisite: CPSD100 and CPSD101.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD230 College Park Scholars: Science, Discovery & the Universe - Internship Practicum (1-3 Credits)
Supervised internship project in an interest area related to science, discovery and the universe.
Prerequisite: CPSD200.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD240 College Park Scholars: Science, Discovery & the Universe - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning project in an interest area related to science, discovery and the universe.
Prerequisite: CPSD200.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD250 College Park Scholars: Science, Discovery & the Universe - Research Practicum (1-3 Credits)
Supervised research project in an interest area related to science, discovery and the universe.
Prerequisite: CPSD200.
Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSF - College Park Scholars-Life Sciences

CPSF100 College Park Scholars: Life Sciences First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to the life sciences.
Restriction: Students must be enrolled in the College Park Scholars Life Sciences (CPSF) program.

CPSF101 College Park Scholars: Life Sciences First-Year Colloquium II (1 Credit)
Further examination of issues related to the life sciences.
Prerequisite: CPSF100.
Restriction: Students must be enrolled in the College Park Scholars Life Sciences (CPSF) program.

CPSG - College Park Scholars-Science and Global Change

CPSG100 College Park Scholars: Science & Global Change First-Year Colloquium I (1 Credit)
Introductory colloquium: Examination of issues related to science and global change.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG101 College Park Scholars: Science & Global Change First-Year Colloquium II (1 Credit)
Introductory colloquium II: Continued examination of issues related to science and global change.
Prerequisite: CPSG100.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG200 College Park Scholars: Science & Global Change Second-Year Colloquium (1 Credit)
Advanced colloquium: Continued examination of issues related to science and global change.
Prerequisite: CPSG101.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG230 College Park Scholars: Science & Global Change - Internship Practicum (1-3 Credits)
Supervised internship in an interest area related to science and global change.
Prerequisite: CPSG200.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG240 College Park Scholars: Science & Global Change - Service-Learning Practicum (1-3 Credits)
Supervised Service-Learning experience in an interest area related to science and global change.
Prerequisite: CPSG200.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG250 College Park Scholars: Science & Global Change - Research Practicum (1-3 Credits)
Supervised research experience in an interest area related to science and global change.
Prerequisite: CPSG200.
Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSN - College Park Scholars-International Studies

CPSN100 College Park Scholars: International Studies First-Year Colloquium I (2 Credits)
Introductory colloquium: Examination of issues related to international studies.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN101 College Park Scholars: International Studies First-Year Colloquium II (1 Credit)
Introductory colloquium II: Continued examination of issues related to international studies.
Prerequisite: CPSN100.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.
Additional Information: When paired with the successful completion of CPSN 100, students will earn Diversity/Cultural Competence General Education credits.

CPSN230 College Park Scholars: International Studies - Internship Practicum (3 Credits)
Supervised internship project in an area related to international studies.
Prerequisite: CPSN101.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN240 College Park Scholars: International Studies - Service-Learning Practicum (3 Credits)
Supervised Service-Learning project in an area related to international studies.
Prerequisite: CPSN101.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN250 College Park Scholars: International Studies - Research Practicum (3 Credits)
Supervised research in an area related to international studies.
Prerequisite: CPSN101.
Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSP - College Park Scholars Program

CPSP118 College Park Scholars First-Year Colloquium I (1-3 Credits)
Introductory colloquium for specific College Park Scholars Program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP119 College Park Scholars First-Year Colloquium II (1-3 Credits)
Intermediate colloquium for specific College Park Scholars Programs.
Prerequisite: CPSP118.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP218 College Park Scholars Second-Year Colloquium I (1-3 Credits)
Colloquium for specific College Park Scholars Program.
Prerequisite: CPSP118.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP219 College Park Scholars Second-Year Colloquium II (1-3 Credits)
Intermediate colloquium for specific, second year, College Park Scholars Program.
Prerequisite: CPSP218.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits if content differs.

CPSP229 Practicum: Online Communication (1-3 Credits)
Supervised practicum in Website development.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits if content differs.

CPSP239 Practicum: Internship (1-3 Credits)
Supervised internship in interest area related to the theme of the students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP249 Practicum: Service-Learning (1-3 Credits)
Supervised Service-Learning project in area related to the theme of the students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP259 Practicum: Research (1-3 Credits)
Supervised research project in interest area related to the students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP269 Practicum: Peer Teaching (1-3 Credits)
Supervised peer teaching in students' College Park Scholars program.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP279 Practicum: Study Abroad (1-3 Credits)
Supervised international experience that satisfies students' College Park Scholars practicum requirement.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits if content differs.

CPSP318 College Park Scholars Special Topics (1-3 Credits)
Special Topics learning opportunities in College Park Scholars.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP339 Advanced Practicum: Internship (1-3 Credits)
Independent study designed for students who wish to extend in greater depth and detail projects begun in sophomore year. Subject varies. Overseen by faculty director or mentor.
Prerequisite: CPSP239.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP349 Advanced Practicum: Service Learning (1-3 Credits)
Advanced supervised Service-Learning project.
Prerequisite: CPSP249.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP359 Advanced Practicum: Research (1-3 Credits)
Advanced supervised internship experience.
Prerequisite: CPSP259.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 3 credits.

CPSP369 Advanced Practicum: Peer Teaching (1-3 Credits)
Supervised advanced practicum in peer instruction.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 6 credits.

CPSP379 Advanced Practicum: Study Abroad (1-3 Credits)
Advanced, supervised study-abroad experience.
Restriction: Must be in the College Park Scholars Program; or permission of UGST-College Park Scholars.
Repeatable to: 3 credits if content differs.

CPSP386 Experiential Learning (3-6 Credits)

CPSP388 Advanced Special Topics in College Park Scholars (1-3 Credits)
Interdisciplinary topics of special interest to College Park Scholars, such as legacies of the cold war, environmental ethics, women in leadership, and other timely issues. Projects build on previous work in College Park Scholars.
Restriction: Must be in the College Park Scholars Program.
Repeatable to: 6 credits if content differs.

CPSS - College Park Scholars-Science, Technology and Society

CPSS100 College Park Scholars: Science, Technology & Society First-Year Colloquium I (2 Credits)
Introductory colloquium: Examination of issues related to science, technology and society.
Restriction: Students must be enrolled in the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS101 College Park Scholars: Science, Technology & Society First-Year Colloquium II (1 Credit)
Continued examination of issues related to science, technology and society.
Prerequisite: CPSS100.
Restriction: Students must be enrolled in the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS220 The Future of Science Communication (3 Credits)
How can scientists communicate their work effectively? The field of science communication ventures that the answer is not simply a matter of improving capacity (e.g., because people lack scientific information, scientists lack communication skills, or both). Rather, it calls for sustained collaboration and empathy between laypersons and experts. In this hands-on, experiential course, we use a model of cultural competency to put forth solutions to bridge the expert-lay divide. We investigate typical venues in which science is communicated (museums, YouTube videos, federal agency websites, and much much more) and study best practices for communication. Then we explore emerging venues that support sustained contact between so-called 'lay citizens' and scientific or technical experts (dance/improv techniques, ethnographic methods and citizen science). Students learn to use cross-cultural perspectives as a basis to pilot and test ways of strengthening relationships and improving communication.
Restriction: Must be in the College Park Scholars Science, Technology or Society program or have permission of the program.

CPSS225 College Park Scholars Capstone: Science, Technology, and Society (3 Credits)
Exploration and understanding of ways science and technology shape and are shaped by society.
Prerequisite: CPSS100.
Restriction: Must be in the College Park Scholars Science, Technology & Society (CPSS) program.
Formerly: CPSP227.

CPSS230 College Park Scholars: Science, Technology & Society - Internship Practicum (1 Credit)
Supervised internship in an area related to science, technology and society.
Prerequisite: CPSS101.
Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS240 College Park Scholars: Science, Technology & Society - Service-Learning Practicum (3 Credits)
Supervised Service-Learning practicum in issues related to science, technology and society.
Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program; or permission of instructor.

CPSS260 College Park Scholars: Science, Technology & Society - Peer-Teaching Practicum (1 Credit)
Supervised peer teaching in science, technology and society.
Prerequisite: CPSS101.
Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program.

DANC - Dance

DANC109 Choreography I: Improvisation (3 Credits)
An introduction to the process of spontaneous movement discovery involving solo and group movement experiences.
Restriction: Must be in Dance program; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC118 Beginning Tap (2 Credits)
Introduction to tap for the beginning student.
Repeatable to: 4 credits.

DANC119 Introduction to American Social Dance (2 Credits)
Social dance forms of North America.
Repeatable to: 4 credits.

DANC128 Fundamentals of Ballet (2 Credits)
Introduction to ballet technique and terminology for the beginning student.
Restriction: Must not be in Dance program.
Repeatable to: 4 credits.

DANC138 Global Dance Forms (2 Credits)
Movement course. Traditional dances and music of selected cultures.
Repeatable to: 6 credits if content differs.

DANC148 Fundamentals of Modern Dance (2 Credits)
Introduction to modern dance with emphasis on the development of fundamental movement skills.
Restriction: Must not be in Dance program.
Repeatable to: 4 credits.

DANC149 Fundamentals of Modern Dance II (2 Credits)
Continuation of the development of axial and locomotor movement skills with emphasis on the development of functional alignment, musicality, range of movement, coordination, and movement memory.
Prerequisite: DANC148.
Repeatable to: 4 credits.

DANC158 Fundamentals of Jazz (2 Credits)
Introduction to the jazz style in dance for the beginning student.
Restriction: Must not be in Dance program.
Repeatable to: 4 credits.

DANC179 Movement Integration (2 Credits)
Conditioning and re-patterning techniques for achieving integrated movement.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 4 credits if content differs.

DANC199 Practicum in Choreography, Production and Performance I (1-3 Credits)
Choreography, production, and performance of student works, both on and off campus.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC200 Introduction to Dance (3 Credits)
A study of dance as a form of communication and as an art form; a survey of the theories and styles of dance, and their relationships to other art forms.

DANC207 Choreography II: The Creative Process (3 Credits)
Explorations in movement, music, words, objects, and environments through improvisation and choreographic problem solving.
Prerequisite: DANC109.
Restriction: Permission of ARHU-Dance department.

DANC208 Choreography I (3 Credits)
Basic principles of dance composition: space, time, dynamics, and movement invention. The development of critical awareness.
Prerequisite: DANC109 and DANC102.
Repeatable to: 6 credits.

DANC209 Dance Composition (3 Credits)
Exploration of the structural elements of dance composition.
Prerequisite: DANC207.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC218 Modern Dance I (3 Credits)
Development of heightened body awareness, breath support, dynamic alignment, and spatial awareness. Focus on rhythmic clarity and musicality.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC219 Modern Dance II (3 Credits)
Continuation of the elements addressed in DANC218 with an added focus on momentum, the use of counter-tension, stability/mobility, suspension, and dynamic range.
Prerequisite: DANC218.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC228 Ballet I (2 Credits)
Barre and center work for alignment, strength, flexibility and coordination. Introduction to ballet terminology.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC229 Ballet II (2 Credits)
Continuation of DANC228.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC248 Modern Dance I (3 Credits)
Body alignment, rhythm, dynamics, space and dance phrases.
Restriction: Must be in Dance program; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC249 Modern Dance II (3 Credits)
Continuation of DANC248.
Prerequisite: DANC248; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC258 Jazz I (2 Credits)
Jazz warm-ups and combinations emphasizing rhythm and movement isolations.
Prerequisite: DANC158.
Restriction: Must be in Dance program.
Repeatable to: 4 credits.

DANC259 Jazz II (2 Credits)
Continuation of the principles of Jazz I. Emphasis on style and execution of movement.
Prerequisite: DANC258.
Repeatable to: 4 credits.

DANC269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC299 Practicum in Choreography, Production and Performance II (1-3 Credits)
Continuation of DANC199.
Prerequisite: DANC199; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC304 Dance Education I: Foundations (3 Credits)
Organization and content of the studio dance class. Structuring developmentally appropriate dance experiences for students ages 3-18.
Restriction: Permission of ARHU-Dance department.

DANC308 Choreography II (3 Credits)
Exploration of the formal elements of choreography; theme, development, repetition, contrast, transition, continuity and structure.
Prerequisite: DANC208.
Repeatable to: 6 credits.

DANC309 Choreography III: Dance Composition (3 Credits)
Exploration of the structural elements of dance composition.
Prerequisite: DANC207.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: DANC209 or DANC309.
Formerly: DANC209.

DANC310 Dance Lighting (3 Credits)
Two lectures and two laboratory periods per week. Theory and practice of stage lighting with specific reference to designing for dance.
Prerequisite: DANC210.

DANC318 Modern Dance III (3 Credits)
Continuation of the elements addressed in DANC219 with an added focus on off-verticality, spirals, complex level changes, more complex and extended phrasing, responsiveness to accompaniment, vocalization.
Prerequisite: DANC219.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC319 Modern Dance IV (3 Credits)
Continuation of the elements addressed in DANC318 with an added focus on movement subtlety and complexity, and stylistic demands.
Prerequisite: DANC318.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC328 Ballet III (2 Credits)
Execution of the vocabulary of ballet movement with technical accuracy.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC329 Ballet IV (2 Credits)
Continuation of DANC328.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC338 Global Movement Practices (2 Credits)
Movement course. Intermediate level of dances and music of selected world cultures.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits if content differs.

DANC348 Modern Dance III (3 Credits)
The body as an instrument of expression; techniques for increasing kinesthetic sensitivity.
Prerequisite: DANC249; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC349 Modern Dance IV (3 Credits)
Continuation of DANC348.
Prerequisite: DANC348; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC371 Somatics (3 Credits)
Current ideas and trends in dance technique, with a focus on the incorporation of dance science and somatics into dance training.
Prerequisite: DANC179.
Restriction: Permission of ARHU-Dance department.

DANC379 Practicum in Dance (1-3 Credits)
Performing experience for the student dancer who has developed a professional level of competence.
Repeatable to: 12 credits.

DANC383 Dance History & Theory (3 Credits)
With a primary focus on Western concert dance from the 20th and 21st centuries, this course proposes an understanding of dance as it is situated in historical and cultural contexts. Rather than proposing a canon of 'masterworks', this course interrogates choreography and other dance practices from multiple perspectives such as feminist theories, race, gender, and sexuality studies.
Restriction: Permission of ARHU-Dance department.
Credit Only Granted for: DANC283 or DANC383.
Formerly: DANC283.

DANC386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC398 Directed Studies in Dance (1-6 Credits)
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC399 Practicum in Choreography, Production and Performance III (1-3 Credits)
Continuation of DANC299.
Prerequisite: DANC299; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC405 Dance Education II: Education & Policy (3 Credits)
Curricula in dance in K-12 settings, classroom management, assessment/grading, and best practices in dance education in public schools. Current research and policy issues are included. This course counts towards teacher certification in the State of Maryland.
Restriction: Permission of ARHU-Dance department.

DANC409 Contact Improvisation (2 Credits)
Discovery and cultivation of the principles and skills of Contact Improvisation dance technique.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.
Credit Only Granted for: DANC489C or DANC409.

DANC410 Technical Theater Production for Dance (3 Credits)
A study of the theoretical principles of production and the practical application of those principles to the presentation of dance works.
Prerequisite: DANC210; or students who have taken courses with comparable content may contact the department; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC420 Partnering (2 Credits)
Elements of contemporary partnering including weight sharing, counter balancing, momentum/leverage, lifting and moving responsively.
Restriction: Permission of ARHU-Dance department.

DANC429 Advanced Ballet Technique II (1 Credit)
Intensive work in ballet technique for the professionally-oriented dancer.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 3 credits.

DANC448 Modern Dance V (3 Credits)
Complex phrases of modern dance movement with emphasis on articulation and expression.
Prerequisite: DANC349; and must audition.
Repeatable to: 6 credits.

DANC449 Modern Dance VI (3 Credits)
Continuation of DANC448.
Prerequisite: DANC448; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC466 Laban Movement Analysis (3 Credits)
Introduction to Rudolf Laban's system of qualitative movement analysis in relation to understanding personal movement style. Application to dance performance, teaching, composition and research.

DANC468 Dance Repertory (3 Credits)
Form, content, music, design and performance of modern dance works.
Prerequisite: DANC349; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC469 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC479 Advanced Practicum in Dance (1-3 Credits)
Advanced level performing experience for the student dancer who has developed an advanced professional level of competence.
Repeatable to: 6 credits.

DANC485 Seminar in Dance (3 Credits)
Individual research leading to a presentation with written documentation of the process, serving as a culmination of undergraduate study for dance majors.
Prerequisite: DANC483.
Restriction: Must be in Dance program; and senior standing.

DANC488 Project-Based Learning (3 Credits)
A specific project, is addressed, in dance from the perspectives of the investigator, the creator/choreographer, and the performer. Projects are cross-disciplinary and/or cross-cultural, and may involve both on- and off-campus experiences.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC489 Special Topics in Dance (1-3 Credits)
Theoretical, choreographic, pedagogic, or performance study.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC499 Practicum in Choreography, Production and Performance IV (1-6 Credits)
Advanced workshop in dance presentation, including performing, production and planned field experiences.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

EALL - East Asian Languages and Literatures

EALL269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

EALL300 The Languages of East Asia (3 Credits)
A survey of Chinese, Japanese, and Korean, and the languages of other East Asian nationalities. Provides a basic understanding of the structures of these languages. Topics covered include the characterizing features; the relationships of the languages to each other; the geographical, social, and historical settings. No knowledge of Asian languages is required. Taught in English.

EALL369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ECON - Economics

ECON111 Thinking Like an Economist (3 Credits)
An introduction to the modes of thought of economics. Use of simple standard tools of economics to analyze important problems that arise frequently in public policy, the news media, and in daily life. An emphasis on how economists predict what choices societies make and how economists analyze whether those are good choices. Practical application of a variety of economic tools leading to a focus on the essential unity underlying these analytical tools, viewing economics as a discipline that applies a core methodology in different ways in different situations.
Restriction: Sophomore standing or lower; or permission of BSOS-Economics department.

ECON155 Economics & the College Affordability Crisis (3 Credits)
Why have tuition and fees increased substantially over the past 30 years at almost all institutions of higher education in the US? How can quality and productivity be measured in schools? Why do most students pay considerably less than the actual cost of service provision? What is society's interest in devoting considerable resources to education beyond the high school level? How do existing and proposed governmental policies impact both the number of students pursuing a college education and the cost of this education? ECON155 uses tools from economics to examine and explore answers to these and other related questions.
Additional Information: No background in economics is required, although this course could be a nice complement for ECON200 and ECON201.

ECON175 Inequality: Determinants and Policy Remedies (3 Credits)
History shows that the gap between the rich and the poor has varied over time within and between countries, most recently seeming to increase within many countries while somewhat decreasing between countries. This course challenges students to investigate why people make different amounts of money, why income inequality has changed dramatically in recent years, what public policy tools exist to counter inequality increases, and what different institutional arrangements different countries use to lower inequality. This course will introduce students to theoretical tools used by economists to understand the sources of inequality and will also examine various empirical measures of inequality.

ECON181 Putting a Price on the Environment: An Economist's Perspective on Sustainability (3 Credits)
How does society balance the benefits of environmental protection and preservation against the costs? Though some might say that the environment is priceless, economists recognize that every action involves trade-offs. This course investigates sustainability through comparing costs and benefits. From this perspective, other questions arise: How can we design policies that incentivize sustainable choices? Why might usual market functioning fail to achieve sustainability? Do we need to put a price on the environment in order to protect it? How do we measure an economy's 'success'? This course explores the answers to these and other related questions from an economist's perspective.

ECON185 Energy: Crisis or Breakthrough? (3 Credits)
Will we face an energy crisis in the near future, or will technological breakthroughs solve problems? Will we destroy the environment by careless use of polluting energy, or we will find new and clean sources of energy that resolves the environmental issue once and for all? Will politicians and governments succeed in agreeing on a coherent strategy to deal with global issues related to energy, or do we expect individual countries to move in different directions and exacerbate the problems? Students will explore the demand and supply sides of the energy market and their relationships with government policies and environmental concerns. Students will also analyze empirical evidence to better understand the factors affecting energy production and consumption in the past and possible directions in the future. By examining past situations when technological change mitigated problems in energy markets, we can make informed predictions about what could happen next.

ECON200 Principles of Microeconomics (3 Credits)
Introduces economic models used to analyze economic behavior by individuals and firms and consequent market outcomes. Applies conceptual analysis to several policy issues and surveys a variety of specific topics within the broad scope of microeconomics.
Prerequisite: MATH107 or MATH110; or must have math eligibility of MATH113 or higher.
Credit Only Granted for: ECON200, AREC240, or AREC250.
Additional Information: It is recommended that students complete ECON200 before taking ECON201.

ECON201 Principles of Macroeconomics (3 Credits)
An introduction to how market economies behave at the aggregate level. The determination of national income/output and the problems of unemployment inflation, will be examined, along with monetary and fiscal policy.
Prerequisite: MATH107 or MATH110; or must have math eligibility of MATH113 or higher.
Recommended: ECON200.
Credit Only Granted for: ECON201 or ECON205.

ECON230 Applied Economic Statistics (3 Credits)
Introductory course to develop understanding of statistical concepts used in applied economics. Students will acquire skills needed to calculate and interpret statistical concepts, including descriptive statistics, probability, discrete and continuous distributions, sampling, point and interval estimations, hypothesis testing, basic analysis of variance, and simple linear regression models. Students will apply these concepts to data using both handheld calculators and spreadsheets(Excel), and students will be introduced to an econometric software package such as SPSS or SAS or R.
Prerequisite: Must have math eligibility of MATH113 or higher; or 1 course with a minimum grade of C- from (MATH107, MATH110). And minimum grade of C- in ECON200 and ECON201.
Recommended: Students should already have basic familiarity with Microsoft Excel or similar spreadsheet software.
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

ECON258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ECON300 Methods and Tools for Economic Analysis (3 Credits)
Covers several mathematics techniques and demonstrates their application to a wide variety of models and problems in both microeconomic and macroeconomic analysis. Reviews concepts from algebra and elementary calculus and introduces components of multivariable calculus, linear algebra and differential equations.
Prerequisite: Minimum grade of C- in ECON201 and ECON200. And 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140); or must have completed MATH220 with a minimum grade of C-.
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed MATH240 or MATH241.

ECON305 Intermediate Macroeconomic Theory and Policy (3 Credits)
Analysis of the determination of national income, employment, and price levels. Discussion of consumption, investment, inflation, and government fiscal and monetary policy.
Prerequisite: Minimum grade of C- in ECON201 and ECON200. And 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140); or must have completed MATH220 with a minimum grade of C-.
Credit Only Granted for: ECON305 or ECON325.

ECON306 Intermediate Microeconomic Theory & Policy (3 Credits)
Analysis of the theories of consumer behavior, producer behavior, different market structures, and various sources of inefficient outcomes. Analysis of microeconomic policies designed to improve market outcomes.
Prerequisite: 1 course with a minimum grade of C- from (ECON200, AREC250); and minimum grade of C- in ECON201. And 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140); or must have completed MATH220 with a minimum grade of C-.
Credit Only Granted for: ECON306, ECON326, AREC489M, or AREC326.

ECON310 European Economic History (3 Credits)
The evolution of the capitalist system from its medieval origins to the present. Emphasis on dynamic forces of cumulative change in capitalism, including capital accumulation, technology, expansion of markets, the corporate form of private property in the means of production, and the relation of capitalism to war and revolution.
Prerequisite: ECON201 and ECON200.

ECON311 American Economic History Before the Civil War (3 Credits)
Economic concepts are used to analyze various aspects of the founding and early history of the U.S., including the British settlement of the North American colonies, the economics of the American Revolutionary war, the writing of the Constitution, the development of financial markets, policies on public lands and the spread of western agriculture, slavery, banking, and early industrialization.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON312 American Economics After the Civil War (3 Credits)
Topics include: the economics of the Civil War, the performance of southern agriculture in the late 19th century, the rise of large corporations, industrialization, the development of financial markets, the creation of the Federal Reserve Board, the economics of the Great Depression and the New Deal, the economic impact of World War II, and the rise of the modern service economy in the late 20th century.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON314 Economic History, Development and Policy (3 Credits)
Study abroad in the economic history, institutional development, and recent economic policy problems of selected areas.
Prerequisite: ECON200 and ECON201.

ECON315 Economic Development of Underdeveloped Areas (3 Credits)
Analysis of the economic and social characteristics of underdeveloped areas. Recent theories of economic development, obstacles to development, policies and planning for development.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Credit Only Granted for: ECON315 or ECON416.

ECON317 Global Economic Policies (3 Credits)
Analysis of policy options and debates on fostering economic growth and development in a global economy where national boundaries are no longer relevant. Topics covered will include real loanable funds markets in both local and international contexts during normal conditions and during financial crises, the design of trade and industrial policies, and the role of the World Bank, IMF, WTO, and other international agencies as well as regional and bilateral trade agreements. Emerging economies will be emphasized.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Must be in Economics Bachelor of Arts program.

ECON321 Economic Statistics (3 Credits)
Introduction to the use of statistics in economics. Topics include: Probability, random variables and their distributions, sampling theory, estimation, hypothesis testing, analysis of variance, regression analysis and correlation.
Prerequisite: Minimum grade of C- in ECON201 and ECON200; and minimum grade of C- in MATH141.
Recommended: STAT100.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

ECON325 Intermediate Macroeconomic Analysis (3 Credits)
Analysis of macroeconomic behavior and policy with emphasis on theoretical rigor. Topics include the determinants of economic growth, unemployment, inflation, and international economic flows.
Prerequisite: Minimum grade of C- in ECON200, ECON201, and MATH141.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON305 or ECON325.

ECON326 Intermediate Microeconomic Analysis (3 Credits)
Analysis of economic decision-making by individual buyers and sellers, and resulting market outcomes, with emphasis on theoretical rigor. The efficient properties of perfect competition are examined, followed by consideration of market power, externalities, and asymmetric information.
Prerequisite: Minimum grade of C- in ECON200, ECON201, and MATH141.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON306, ECON326, AREC326, or AREC489M.

ECON330 Money and Banking (3 Credits)
The structure of financial institutions and their role in the provision of money and near money. Analysis of the Federal Reserve System, the techniques of central banks, and the control of supply of financial assets in stabilization policy. Relationship of money and credit to economic activity and the price level.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON340 International Economics (3 Credits)
Introduces economic models of international trade and finance. Analyzes policies designed to promote and restrict international trade and to manage exchange rates and impact international capital flows.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Credit Only Granted for: ECON340 or ECON441.

ECON358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Prerequisite: At least one principles level course.
Repeatable to: 15 credits if content differs.

ECON375 Economics of Poverty and Discrimination (3 Credits)
Examination of various issues, including: the causes of persistent poverty over time for some groups within society; the relationship of poverty to technological change, to economic growth, and to education and training; economic results of discrimination; proposed remedies for poverty and discrimination.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON386 Experiential Learning (3 Credits)
See Department Advising Office for course eligibility, course requirements, and application information.
Prerequisite: ECON201 and ECON200.
Restriction: Permission of BSOS-Economics department; and must be in a major within the BSOS-Economics department; and minimum cumulative GPA of 2.5; and junior standing or higher.

ECON387 Career Preparation for Economics Majors (2 Credits)
Increase student knowledge of career paths, job search tools, and strategies for successfully obtaining a job with a BA or BS in economics. Students will engage in a range of different activities which build their understanding of job opportunities in economics and hone their abilities to find positions they want. Students will reflect on specific skills employers seek from economics graduates and incorporate that knowledge in their own individual job search and career plan.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science) ; and must have earned a minimum of 60 credits.
Additional Information: This course is intended for juniors or first semester seniors who are beginning their job search. Students who have already secured an employment opportunity for after graduation should not register.

ECON396 Independent Honors Study (3 Credits)
First semester of the departmental honors sequence. Students will develop and apply research skills required to carry out original research. By the end of the semester students will have produced a complete draft of an honors thesis resembling a scholarly journal article.
Restriction: Permission of BSOS-Economics department.

ECON397 Honors Thesis (3 Credits)
General supervision will be provided through assembled meetings with the professor in charge of the course.
Prerequisite: ECON396.
Restriction: Must be a candidate for honors in economics.

ECON398 Topics in Economics (3 Credits)
This course is designed to meet the changing interests of students and staff. Topics vary in response to those interests. Students are advised to seek information about the coverage and prerequisites during the registration period.
Prerequisite: ECON201 and ECON200.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON399 Independent Study in Economics (1-3 Credits)
Integrated readings and independent study under direction and supervision of a faculty member. Contact department for additional information.
Prerequisite: Minimum grade of C- in ECON200 and ECON201.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON401 Current Issues in American Economic Policy (3 Credits)
Analysis of current economic problems and public policies. Topics could include poverty, income inequality, social insurance, education, environmental sustainability, immigration, and innovation. Other issues may be substituted depending on current events.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422).
Restriction: Must be in Economics Bachelor of Arts program.

ECON402 Macroeconomic Models and Forecasting (3 Credits)
Analysis of the fluctuations in economic activity and the formulation and use of forecasting models of the economy. Illustrations of computer macro models and forecasting problems.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON406 Advanced Microeconomics (3 Credits)
Expands on the assumptions of rational decision-making used in intermediate microeconomics and develops more complicated, more realistic models which address uncertainty, intertemporal choices, strategic interactions, social preferences and considerations of what is fair.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON407 Advanced Macroeconomics (3 Credits)
An in-depth analysis of current issues in macroeconomic theory and policy. Topics covered include: 1. alternative perspectives on macroeconomics including monetarism, new classical equilibrium models, rational expectations, and real business cycle models; 2. long term growth, the slowdown in productivity growth, and concerns about U.S. competitiveness; 3. the effectiveness of macroeconomic policy in an open economy; 4. the effects of finance on the real sector.
Prerequisite: Minimum grade of C- in ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON410 Comparative Economic Institutions (3 Credits)
Institutions are the sets of rules that constrain the decisions and interactions of economic agents. The course uses economic analysis to understand both formal institutions (e.g. laws) and informal institutions (e.g. cultural norms). Practical examples are drawn from economics, law, and politics, and reflect the experience of many different countries.
Prerequisite: Minimum grade of C- in ECON325 and ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON412 Economic History and Modern Development (3 Credits)
Analysis of major economic, political, and social change in the developed world since 1800. This includes factors contributing to increases in economic performance, changes in the form of government, technological change (including industrialization), and integration and disintegration of the global economy. Emphasis is on institutional changes in how societies organize economic and political activities.
Prerequisite: Minimum grade of C- in ECON325 and ECON326.
Restriction: Must be in Economics Bachelor of Science program.

ECON414 Game Theory (3 Credits)
Studies the competitive and cooperative behavior that results when several parties find that their individual outcomes are jointly determined. Students will learn how to use game theory to analyze situations of potential conflict. Applications are drawn from economics, business, and political science.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: CMSC474, ECON414, GVPT399A or GVPT390.

ECON415 Market Design (3 Credits)
Focuses on recent developments in the design of markets to improve economic performance and to open new economic opportunities. It is divided into three main segments -- auction design, the design of matching mechanisms, and antitrust theory and policy.
Prerequisite: Minimum grade of C- in ECON414.
Restriction: Must be in Economics Bachelor of Science program.

ECON416 Analysis of Economic Development (3 Credits)
Analysis of the determinants and influences on economic development. Emphasis on both theoretical models and econometric methods of explaining why some countries are poor, along with examination of policies to promote development.
Prerequisite: Minimum grade of C- in ECON325, ECON326, and ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON315 or ECON416.

ECON418 Economic Development of Selected Areas (3 Credits)
Economic and institutional characteristics of a specific geographic area are identified and discussed, and alternate strategies and policies for development are analyzed.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Repeatable to: 6 credits if content differs.

ECON422 Econometrics I (3 Credits)
Emphasizes the interaction between economic problems and the assumptions employed in statistical theory. Formulation, estimation, and testing of economic models, including single variable and multiple variable regression techniques, theory of identification, and issues relating to inference.
Prerequisite: 1 course with a minimum grade of C- from (ECON325, ECON326); and 1 course with a minimum grade of C- from (STAT400, ECON321).
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON422, ECON424, or AREC422.

ECON423 Econometrics II (3 Credits)
Interaction between economic problems and specification and estimation of econometric models. Topics include issues of autocorrelation, heteroscedasticity, functional form, simultaneous equation models, qualitative choice models, and other computational methods.
Prerequisite: Minimum grade of C- in ECON422.
Restriction: Must be in Economics Bachelor of Science program.

ECON424 Applied Econometrics (3 Credits)
Provide the knowledge and skills necessary to accomplish and utilize basic applied econometric analysis utilized by many business service providers, government agencies, and nonprofits engaged in policy analysis. Topics include simple and multiple regressions using cross section, time series, and panel data, issues of heteroskedasticity, serial correlation, and multicollinearity, models with binary dependent variable, and program evaluation. Course emphasizes application of knowledge using software packages but still covers essential theoretical background.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON422, ECON424 or AREC422.

ECON425 Mathematical Economics (3 Credits)
Covers mathematical tools and skills utilized in upper undergraduate and master's level coursework in Economics and Public Policy. Reviews calculus and math of finance and growth. Introduces techniques of optimization, linear algebra, and differential equations and connects them to micro and macro theory and applications. Topics will also include coverage of probability theory to explore how economists model uncertainty, as well as economic applications of integration.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Restriction: Must be in Economics Bachelor of Arts program.

ECON426 Economics of Cost-Benefit Analysis (3 Credits)
Study of how to use cost benefit analysis and other similar tools of applied microeconomics to conduct policy analyses. Cost-benefit analysis is an empirical method of identifying an optimal choice from a set of policy alternatives, where optimal is defined in terms of economic efficiency. Real world examples are addressed, so that students understand limitations of the methods and also interactions of economic analysis with political and administrative processes.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON427 Experimental Economics (3 Credits)
An introduction to the methodology of experimental economics and its application to issues such as decision-making under uncertainty, auctions, and public goods. Also an introduction to behavioral economics as a relatively new area of economic research.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON434 The Economics of Information and Uncertainty (3 Credits)
How do rational agents make decisions when faced with uncertainty? How do markets and other institutions deal with risks? How do markets behave when some actors are better informed than others? What incentives influence whether economic decision-makers hide or reveal information? Topics include the value of information, the purchase of warranties, agency problems in management, adverse selection and moral hazard in insurance, and signaling in education.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON498U or ECON434.
Formerly: ECON498U.

ECON435 Financial Markets and the Macroeconomy (3 Credits)
The different types of financial assets that exist, the markets that they trade in, and the determination of their prices and rates of return are examined. Specific topics that will be covered include the Markowitz portfolio selection model, the capital asset pricing model, the arbitrage pricing theory, the efficient markets hypothesis, the term structure of interest rates, and options. There will be almost no emphasis on issues in corporate finance.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed BMGT343.
Credit Only Granted for: BMGT343 or ECON435.
Additional Information: Finance majors will not receive credit for ECON435.

ECON436 Financial Econometrics (3 Credits)
An introduction to financial econometrics, which is data science applied to understanding the financial system. Students will learn modern techniques in financial econometrics with an emphasis on the interaction between modeling (theory) and empirical analysis. Topics include relevant economic theory, optimization techniques, probability models, statistical analysis, and use of statistical software.
Prerequisite: Minimum grade of C- in ECON325 and ECON422.
Restriction: Must be in Economics Bachelor of Science program.

ECON441 Theory of International Economics (3 Credits)
Theoretical treatment of international trade and international finance. Includes Ricardian and Heckscher-Ohlin theories of comparative advantage, analysis of tariffs and other trade barriers, international factor mobility, balance of payments adjustments, exchange rate determination, and fiscal and monetary policy in an open economy.
Prerequisite: Minimum grade of C- in ECON326 and ECON325.
Restriction: Must be in a major within the BSOS-Economics department; and must not have completed ECON340, ECON442, or ECON443.
Credit Only Granted for: ECON340, ECON441, ECON442, or ECON443.

ECON442 Globalization and Capital Markets (3 Credits)
Uses models of open-economy macroeconomics to explain the causes and consequences of international capital flows. Analysis is made of private consumption, investment, the government sector, current accounts, the labor market, and the money and foreign exchange markets in small open economies. This framework is then used to study examples of how speculative attacks on currencies, sudden reversals of capital inflows, and the effects of the lack of credibility of economic policy affect economic development.
Prerequisite: Minimum grade of C- in ECON326 and ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program; and must not have completed ECON441.
Credit Only Granted for: ECON441 or ECON442.

ECON443 International Trade and Trade Policy in the New Global Economy (3 Credits)
Examines the economics of international economic integration, including the theory of customs unions and free trade areas, the role of GATT and the WTO, changes in individual countries' foreign trade policies during the new era of globalization, the special role of multinational firms in world trade, and recent controversies about the benefits and costs of globalized trade.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed ECON441.
Credit Only Granted for: ECON441 or ECON443.

ECON444 Research in Globalization (3 Credits)
As globalization continues, individual countries must confront a variety of related issues including rising inequality, decline of domestic industries, climate change, and disputes over intellectual property rights. Various economic models and research methods will be covered to develop the analytic and empirical skills needed to perform independent research in globalization. Students will prepare literature reviews, conduct preliminary empirical investigations using STATA, and produce well-designed research proposals.
Prerequisite: Minimum grade of C- in ECON326 and ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON498G or ECON444.
Formerly: ECON498G.

ECON451 Public Choice (3 Credits)
Analysis of collective decision making, economic models of government, program budgeting, and policy implementation; emphasis on models of public choice and institutions which affect decision making.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON453 Natural Resources and Public Policy (3 Credits)
Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.
Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics). Cross-listed with AREC453.
Credit Only Granted for: AREC453 or ECON453.

ECON454 Public Finance and Public Policy (3 Credits)
The role of the the public sector in a market economy constitutes the over-arching topic of this course. Emphasis lies on analyzing government expenditure programs and the microeconomics of tax policy.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON455 Economics of Education Policy (3 Credits)
Examines the role that government plays in providing and financing education. Analyzes why people invest in education. Considers the effects of education on long-term social and economic outcomes, the behavior of institutions that produce education, and how to design and implement public policies affecting the level and distribution of educational resources. Uses microeconomic models and empirical findings to analyze current issues in education policy.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON468E or ECON455.
Formerly: ECON468E.

ECON456 Law and Economics (3 Credits)
Relationship of the exchange process to the system of institutions and rules that society develops to carry out economic transactions. Topics covered include: Property rights; torts, negligence, and liability; contracts and exchanges; criminal control and enforcement; equity and efficiency issues .
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Prerequisite: At least one intermediate theory course and/or statistics.
Repeatable to: 15 credits if content differs.

ECON460 Industrial Organization (3 Credits)
Examines different theoretical models of firm behavior in markets with varying amounts of market power. Relates theory to specific industries and examines how market structure evolves over time.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON461 Economics of Regulation and Anti-trust (3 Credits)
Considers government intervention in economic activity of three types: antitrust policy, regulation of natural monopolies, and health safety regulation. Covers theoretical models, real-world policy applications, and empirical studies relevant to the impact of regulation.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON462 Economics of Entrepreneurship (3 Credits)
Economic theory highlights the role of entrepreneurs in fueling economic growth and accomplishing reallocation of resources in response to changes in preferences, technology, demographics, and resource. This course uses empirical evidence to examine the extent to which these predictions are valid. To more fully understand the motivations and constraints relevant to entrepreneurs, student will write a business plan as if s/he were starting a new business.
Prerequisite: Minimum grade of C- in ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON398O or ECON462.
Formerly: ECON398O.

ECON463 Economics of Sports (3 Credits)
The application of theoretical and empirical economic tools to the sports industry, including competition at professional,collegiate, and international levels. Microeconomic models from labor, industrial organization and public finance will be applied to the sports industry and combined with data from sports markets, providing students with opportunities to produce and interpret economic analysis. The topic of discrimination will also be explored in the context of this particular economic activity.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Arts program.

ECON465 Health Economics (3 Credits)
Analyze markets for health care and related products by understanding the incentives and constraints for various participants, including individuals, family units, doctors, pharmaceutical companies, hospitals, and insurance providers. Analysis will combine both theoretical models and empirical tools.
Prerequisite: Minimum grade of C- in ECON406 and ECON422; or students who have completed ECON321 or STAT400 with an A- or better and are concurrently enrolled in ECON422, may seek permission to enroll in ECON465 from an ECON advisor. No exceptions will be made for the ECON406 prerequisite.
Restriction: Must be in Economics Bachelor of Science program.

ECON468 Special Topics in Applied Economics (3 Credits)
Selected topics in applied economics. Designed to meet the changing interests of students and staff.
Prerequisite: 1 course with a minimum grade of C- from (BMGT230, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON306).
Restriction: Must be in Economics Bachelor of Arts program.
Repeatable to: 15 credits if content differs.

ECON470 Labor Economics:Theory and Evidence (3 Credits)
An analytical treatment of theories of labor markets, and an examination of empirical findings, evidence and conclusions. Topics covered will include some or all of the following: labor demand; labor supply and labor market participation; theory of human capital; earnings differentials; and if time allows, market structure and the efficiency of labor markets; and unemployment.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Science program.

ECON471 Labor Markets (3 Credits)
Central topics include the determinants of firms' demand for labor and households' decision making about whether to work, how much to work, and where to work. We will then study the equilibrium amount of labor hired in society and the wages paid to workers. The course will also include the measurement of the labor market, human capital, discrimination, incentives, and current changes in the American economic landscape. Various economic policies impacting labor markets will be analyzed.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum grade of C- in ECON424.
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON470 or ECON471.

ECON472 Economics of Social Safety Nets (3 Credits)
Analysis of the economic issues associated with social safety nets. Topics to be covered include the cash transfer programs for breaking the cycle of poverty, labor market policies aimed at combating unemployment, childhood interventions to improve human capital development, and the challenges faced by pension systems over the world. The approach is based on a life-cycle perspective. Evidence and experiences from developed and developing countries will covered.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum grade of C- in ECON424.
Restriction: Must be in Economics Bachelor of Arts program.

ECON481 Environmental Economics (3 Credits)
An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Environmental Science & Policy-Env Economics; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts program). Cross-listed with: AREC481.
Credit Only Granted for: ECON481 or AREC481.

ECON484 The Economics of Climate Change (3 Credits)
The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC454.
Credit Only Granted for: AREC454 or ECON484.

ECON485 Economics of Land Use (3 Credits)
Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC455.
Credit Only Granted for: AREC455 or ECON485.

ECON486 Energy and Environmental Economics (3 Credits)
Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation , climate change, and transportation policies.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC456.
Credit Only Granted for: AREC456 or ECON486.

ECON488 Applied Research Practicum (1-3 Credits)
Students gain experience applying economic knowledge and producing research valued by businesses, non-profits, and/or government agencies. Students engage in activities similar to what an intern or entry-level employee would perform. Students work in small groups to find different kinds of data and facts, analyze and interpret this information, and use research findings to develop and present recommendations for simulated clients.
Prerequisite: 1 course with a minimum grade of B- from (BMGT230, ECON321, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Recommended: ECON422, ECON402, or ECON424.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON489 Applied Economics Practicum (1-3 Credits)
Students gain experience explaining economic knowledge to people who have not studied economics. Students engage in activities preparing them for careers in banking, business consulting, financial education, wealth management, and related services.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON490 Urban & Regional Economics: Issues and Policies (3 Credits)
Exploration of urban and regional economics and policies, including economic forces leading to formation of city and regional networks. Conceptual and empirical analysis of policies affecting land use, housing, transportation and other aspects of sub-national economic development.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON321, BMGT230, ECON230).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON398I or ECON490.
Formerly: ECON398I.

ECON498 Special Topics in Economic Analysis (3 Credits)
Selected topics in economic analysis. Designed to meet the changing interests of students and staff.
Prerequisite: 1 course with a minimum grade of C- from (ECON321, STAT400); and 1 course with a minimum grade of C- from (ECON325, ECON326).
Restriction: Must be in Economics Bachelor of Science program.
Repeatable to: 15 credits if content differs.

ECON499 Independent Research in Economics (1-3 Credits)
Directed research under the supervision of a faculty member. Contact department for additional information.
Prerequisite: 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230, STAT400); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum of 3 credits from ECON400-499 course range.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

EDCI - Curriculum and Instruction

EDCI243 Attitudes and Beliefs about the 'Other' in Literature, Film and the Media (3 Credits)
An examination of the ways various media represent dominant and non-dominant identities and the parameters for acceptable social behavior, and how these sociocultural forces shape personal identities, cultural competence and interpersonal power dynamics.

EDCI288 Special Topics in Teacher Education (1-3 Credits)
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.
Repeatable to: 6 credits if content differs.

EDCI342 Curriculum and Instruction in Elementary Education: Language Arts (3 Credits)
Listening, oral communication, functional writing, creative writing, spelling, handwriting, and creative expression. Includes laboratory/field experiences.
Prerequisite: EDCI397.
Corequisite: EDCI352, EDCI362, EDCI372, and EDCI322.
Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Elementary Education program.

EDCI355 Field Experience in Secondary Mathematics Education (1 Credit)
Practical experience as an aide to two secondary mathematics teachers (middle grades and high school); assigned responsibilities and participation in a variety of teaching/learning activities.
Prerequisite: Minimum of 6 credits from MATH400-499 course range.
Corequisite: EDCI 455.
Restriction: Must be in Secondary Educ: Mathematics program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI360 Field Experience in Middle School (1 Credit)
A Middle-school field experience that precedes student teaching.
Prerequisite: EDCI457 and EDCI411; or permission of instructor.
Corequisite: EDCI413 and EDCI424.
Restriction: Minimum cumulative GPA of 2.5; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in the Middle School Teacher Education Program.
Credit Only Granted for: EDCI355, EDCI360 or EDCI375.

EDCI362 Materials and Instruction for Creating Skilled and Motivated Readers, Part 2 (3 Credits)
Selecting, evaluating, and using a variety of materials and instructional techniques to create skilled and motivated readers in the elementary grades, particularly in diverse classroom settings; Topics include word analysis, spelling, writing, reading comprehension strategies, directed reading lessons and explicit instruction.
Corequisite: EDCI322, EDCI397, TLPL306, and EDCI489.
Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI375 Field Experience in Science Education (1 Credit)
This field experience course is designed to provide prospective teachers with knowledge of theory and best school practice relevant to effective pedagogy, current educational goals, and trends in educational assessment in a public school environment. Topics includes planning, instructional delivery, diversity and individual differences, classroom management, technology, and inclusion of students with special needs.
Corequisite: EDCI470.
Restriction: Must be in Secondary Educ: Science program.

EDCI386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and junior standing or higher.

EDCI420 Student Teaching Seminar in Secondary Education: Social Studies (1 Credit)
An analysis of teaching theories, strategies, and techniques in the student teaching experience.
Prerequisite: EDCI426 and EDCI427.
Corequisite: EDCI421 and EDCI422.
Restriction: Minimum cumulative GPA of 2.75.

EDCI421 Student Teaching in Secondary Schools: Social Studies/History (12 Credits)
Prerequisite: Admission to teacher education program.
Corequisite: EDCI420.
Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Social Studies program.

EDCI422 Student Teaching in Secondary Schools: Social Studies/ Geography (12 Credits)
Prerequisite: EDCI321.
Corequisite: EDCI420.

EDCI428 Field Experience in Secondary Social Studies Teaching (1 Credit)
Practical experience as an aide to a regular social studies teacher; assigned responsibilities and participation in a variety of teaching/ learning activities. Students must reserve one full day per week for internship placement.
Corequisite: EDCI427.
Restriction: Must be in Secondary Educ: Social Studies program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI430 Student Teaching Seminar in Secondary Education: World Language (1 Credit)
An analysis of teaching theory, strategies and techniques in the internship experience.
Prerequisite: EDCI410 and EDCI433.
Corequisite: EDCI431 and EDCI474.
Restriction: Must be in Secondary Educ: Foreign Languages program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI431 Teaching Internship in Secondary Schools: World Language (12 Credits)
Practical experience as a full-time intern with a fully licensed World Language teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences.
Prerequisite: EDCI410 and EDCI433.
Corequisite: EDCI430 and EDCI474.
Restriction: Minimum cumulative GPA of 2.75; and must be in Secondary Educ: Foreign Languages program. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.
Additional Information: Internship lab fee applies. See current program description for details.

EDCI438 Field Experience in Second Language Education (1 Credit)
Practical experience as an aide to a regular foreign language teacher; assigned responsibilities and participation in a variety of teaching/ learning activities.
Corequisite: EDCI330.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Foreign Languages program.
Repeatable to: 3 credits if content differs.

EDCI440 Internship Seminar in Secondary Education: English (1 Credit)
A review and analysis of current instructional theories, strategies and best practice in relation to the teaching internship. Meets at area high school; location provided before first meeting.
Prerequisite: EDCI447 and EDCI467.
Corequisite: EDCI441 and EDCI474.
Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI441 Internship in Secondary Schools: English (12 Credits)
Practical experience as a full-time intern with a fully licensed English teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences. Internship lab fee applies. See current program description for details.
Prerequisite: EDCI447 and EDCI467.
Corequisite: EDCI440 and EDCI474.
Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI447 Field Experience in English Teaching (1 Credit)
Practical experience as a part-time intern working with a fully licensed English teacher in a diverse school setting. Students must reserve one full day or two half days per week for the part-time internship.
Corequisite: EDCI467.
Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI448 Student Teaching in Secondary Schools: Theatre/English (12 Credits)
Practical experience as an aide to a regular English, speech or drama teacher; assigned responsibilities and participation in a variety of teaching/learning activities.
Prerequisite: EDCI417.
Corequisite: EDCI440.
Restriction: Must be in Secondary Educ: English Language Arts program.

EDCI450 Internship Seminar in Secondary Education: Mathematics (1 Credit)
Strategies and techniques in the internship experience. Structured work on teaching portfolio (requirement for graduation and certification). Place, day, and time to be arranged.
Prerequisite: EDCI457 and EDCI455.
Corequisite: EDCI451 and EDCI474.
Restriction: Must be in Secondary Educ: Mathematics program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI460 Student Teaching: Middle School (12 Credits)
A Middle-school student teaching experience in two content areas.
Prerequisite: EDCI413.
Corequisite: EDCI414 and EDCI425.
Restriction: Minimum cumulative GPA of 2.5; and permission of EDUC-Teaching, Learning, Policy and Leadership department; and for Middle School Education majors only.

EDCI464 Assessment for Reading (3 Credits)
Examination of reading assessment theory, materials and procedures; Topics include validity and reliability in reading assessment, formal and informal assessment, reading instruction that is informed by ongoing assessment, and the effects of assessment on students and schooling in a diverse society.
Prerequisite: EDCI362.
Restriction: Senior standing. And must be in Elementary Education program; or must be in Early Childhood Education program.

EDCI471 Internship in Secondary Schools: Science (12 Credits)
Practical experience as a full-time intern with a fully licensed science teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences. Internship lab fee applies. See current program description for details.
Prerequisite: EDCI470.
Corequisite: EDCI480 and EDCI474.
Restriction: Must be in Secondary Educ: Science program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI474 Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Education (2 Credits)
Multi-disciplinary capstone course for Secondary Education majors. Discussion of pedagogical and content issues relevant for teaching academically, culturally, and linguistically diverse students with particular emphasis on students with special educational needs and English language learners. Students develop and use curriculum-based assessments and/or lessons with these groups of students.
Corequisite: Enrolled in internship/certification area.
Restriction: Must be in one of the following programs (Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Mathematics; Secondary Educ: Foreign Languages; Secondary Educ: Social Studies; Secondary Educ: Art) ; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI481 Student Teaching: Elementary (12 Credits)
Prerequisite: EDCI352, EDCI362, EDCI342, EDCI372, and EDCI322.
Corequisite: EDCI464.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Elementary Education program; and minimum cumulative GPA of 2.75.

EDCI497 The Study of Teaching (3 Credits)
Identification and examination of learner and teacher outcome variables related to teaching systems, methods, and processes. Methods of conducting classroom research.
Prerequisite: EDCI481.
Corequisite: EDCI489.

EDCI498 Special Problems in Teacher Education (1-6 Credits)
Individual study of approved problems.
Restriction: Must be in a major within EDUC-Teaching, Learning, Policy and Leadership department; or must be in Curriculum and Instruction (Doctoral) program; or must be in Curriculum and Instruction (Master's) program; or permission of EDUC-Teaching, Learning, Policy and Leadership department.
Repeatable to: 6 credits.

EDCI499 Workshops, Clinics, and Institutes (1-6 Credits)
The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits.

EDCP - Education Counseling and Personnel Services

EDCP100 Academic Success Strategies (1 Credit)
Empower students to become more active learners in college and in life. Examine prior and current learning strategies. Create new pathways for growth now and in the future.
Restriction: Junior standing or lower; or permission of instructor.
Credit Only Granted for: EDCP108B or EDCP100.
Formerly: EDCP108B.

EDCP101 The Transfer Student in the University (1 Credit)
Support transfer students in making a successful transition to the University. By making students aware of themselves as learners, introducing students to campus resources, and teaching research-based learning strategies, this course empowers students to become active and effective learners.
Credit Only Granted for: EDCP108G or EDCP101.
Formerly: EDCP108G.

EDCP102 Math Study Skills and Building Confidence (1 Credit)
Empower students to take charge of their math learning and utilize effective strategies for math success.
Restriction: Sophomore standing or lower; or permission of instructor.
Credit Only Granted for: EDCP108M or EDCP102.
Formerly: EDCP108M.
Additional Information: This course is recommended for freshmen and sophomore students enrolled in a math class who would like to increase their math confidence and learn how to study math efficiently. This hybrid course includes two in-person meetings (to be arranged) and weekly online assignments.

EDCP108 College and Career Advancement: Concepts and Skills (1 Credit)
Knowledge and skills designed to enhance college as a learning experience or preparation for life.
Repeatable to: 3 credits if content differs.

EDCP210 Peer Counseling Skills and Mental Health Advocacy (3 Credits)
Introduction to core helping skills in peer counseling settings and three predominant theoretical approaches used in the counseling field (humanistic, psychodynamic, cognitive-behavioral). The course also explores mental health stigma and advocacy. Students will build an understanding of the practical application of underlying principles and theory in counseling and the helping professions, while exploring their own, and societal, biases, assumptions, and attitudes toward mental health.
Restriction: Must not have completed EDCP310; and must not have completed PSYC433.
Credit Only Granted for: EDCP210, EDCP310, or PSYC433.

EDCP217 Introduction to Student Leadership (3 Credits)
Introduction to leadership theories, concepts, and skills. Completion of personal and leadership self-assessments, values exploration, and small group application.
Restriction: Freshman standing; or sophomore standing.
Credit Only Granted for: EDCP217 or EDCP317.
Formerly: EDCP317.

EDCP220 Introduction to Human Diversity in Social Institutions (3 Credits)
This highly-interactive format focuses on individual and social identities in the U.S., group differences and intergroup relations, systems of privilege and oppression, and advocacy for social justice. Topics will include diversity related to race, ethnicity, gender, sexual orientation, social class, (dis)ability, and religion. Course fulfills CORE requirements in diversity, social/behavioral bases, and interdisciplinary study. Some sections restricted.

EDCP230 The Science and Practice of Happiness and Psychological Well-Being (3 Credits)
An introduction to theory and research on positive psychology, subjective well-being, and the psychology of happiness. This will include examination of hedonic and eudaimonic models of well-being and sociocultural understandings of happiness, together with how it relates to health, relationships, money, religion, work, and social media. Students will also explore common misconceptions and myths about happiness and well-being and will engage in a variety of activities designed to deepen their understanding of happiness in their own lives and broader societal trends related to well-being.

EDCP298 Special Problems in Counseling and Personnel Services (1-3 Credits)
Individual instruction in special problems related to counseling, student leadership, and college student development.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP310 Peer Counseling Theory and Skills (3 Credits)
The theories and skills of peer helping relationships. Counseling theories and skills at a level appropriate for students seeking basic level training for use in peer counseling settings.
Credit Only Granted for: EDCP210, EDCP310, or PSYC433.

EDCP312 Multi-Ethnic Peer Counseling (3 Credits)
Knowledge, skills, and attitude to function as peer helpers of Multi- Ethnic students.
Restriction: Sophomore standing or higher.
Formerly: EDCP310A.

EDCP325 Substance Use and Abuse in American Society (3 Credits)
Incidence, etiology, effects and management of substance use and abuse from perspective of the individual, the family, and society.

EDCP386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and sophomore standing or higher.

EDCP411 Principles of Mental Health (3 Credits)
Mechanisms involved with personal adjustment, coping skills, and the behaviors that lead to maladjustment.
Prerequisite: 9 semester hours in the behavioral sciences; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP418 Special Topics in Leadership (3 Credits)
The special topics and leadership course will address a single topic related to leadership through the semester. In-depth study and analysis on the topic will be the basis for the course. Topics include gender and leadership, ethics and leadership, and culture and leadership. Leadership will serve as the foundation in the course.
Repeatable to: 6 credits if content differs.

EDCP420 Advanced Topics in Human Diversity and Advocacy (3 Credits)
This course will build upon students' knowledge of diversity in American society and will examine contemporary topics related to multiculturalism in educational and community contexts as well as strategies for advocacy in such venues. This course fulfills CORE requirements in diversity.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP462 Disability in American Society (3 Credits)
Critical examination of the history of discrimination and analysis of current policies toward people with severe physical and mental disabilities.
Restriction: Must have earned a minimum of 30 credits; and sophomore standing or higher.

EDCP489 Field Experiences in Counseling and Personnel Services (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP498 Special Problems in Counseling and Personnel Services (1-3 Credits)
Available only to major students who have formal plans for individual study of approved problems.
Prerequisite: Available only to major students who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP499 Workshops, Clinics, Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Department of Counseling and Personnel Services (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing; clinical experiences in counseling and testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups.
Repeatable to: 6 credits.

EDHD - Education, Human Development

EDHD200 Paradigms and Perspectives in Human Development (3 Credits)
An introduction to the paradigms and perspectives that guide the study of human development across the lifespan in cognitive, social, physical and emotional domains. Topics of study include overlying principles, concepts, assumptions, theoretical frameworks, and research methods that influence ways in which development is conceptualized. The course is designed to provide insight into major questions of the day in human development and how these prevailing perspectives have evolved over time. This course will also help students understand how knowledge of theory and research is translated into practice in a variety of professional settings.
Restriction: Must have 45 or fewer credits; or must be in the Human Development program or Human Development minor.

EDHD201 Learning How to Learn (3 Credits)
Immerses students in the theoretical and empirical study of learning by engaging them in orchestrated experiences and activities drawn directly from the disciplinary research. Students achieve deep understanding of their own learning, as well as the means of enhancing that learning both in school and out-of-school contexts.

EDHD210 Foundations of Early Childhood Education (3 Credits)
Students explore historical and current research in early childhood education, primary models of curriculum and pedagogy in the field, and the relationship between critical aspects of young children's development and the creation of inclusive learning opportunities for all children, including children at risk. The concept of developmentally appropriate practice and its application across different developmental levels and early childhood classrooms will be introduced and connected with discussion in EDHD220 and EDSP211. Students examine issues in developing and implementing high quality early childhood education experiences for young children with and without disabilities, including the influence of family, culture, and community, the needs of children at risk (e.g., poverty, immigrant status, English Language Learners), and the role of assessment in early learning.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD220 Exploring Early Childhood General and Special Education (3 Credits)
Students who are considering a career in education will consider information about the teaching profession. Students reflect on their personal strengths, identify areas of growth, and examine their predisposition to work with young children with and without disabilities. They will discuss the nature of teaching, the moral and philosophic underpinnings that influenced their decision to enter into the teaching professions, as well as the roles and responsibilities of teachers and the characteristics and qualities for effective teachers (teaching styles and teacher's primary role in the classroom).
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD221 Aggression and Violence in Everyday Life: Can Violence Be Prevented? (3 Credits)
History of aggression and violence in the world and in the United States. Examines the extent to which various forms are prevalent today and scientifically supported prevention strategies. Methods of studying aggression are reviewed, as are theories and methods of preventing aggression and violence.

EDHD228 Research Experiences in Human Development (3 Credits)
Provides students with hands-on participation in faculty-supervised laboratory research activities in the Department of Human Development & Quantitative Methodology. Students will learn about the purpose of scientific research and engage in activities that advance their knowledge and skills with regard to its ethical practice.
Restriction: Permission of instructor.
Repeatable to: 6 credits.

EDHD230 Human Development and Societal Institutions (3 Credits)
Development of the individual in the context of relationships with the formal and informal institutions of society. An examination of various aspects of development from the broad perspective of the social sciences.

EDHD231 Inside 21st Century Creativity: How Creative Ideas, Concepts, and Products are Generated (3 Credits)
Mechanisms of the creative mind. Psychological, social, sociological, developmental, cultural, educational, genetic and neural based roots of creativity.

EDHD306 Research Methods in Human Development (3 Credits)
Addresses the scientific concepts and principles central to the study of human behavior and development. Students will learn about basic research methods in studying human behavior in developmental context and will participate in experiential activities, such as conducting observations and collecting self-report data. Major themes: goals of developmental research, fundamental research designs, types of measurement, elements of good scientific writing, and ethical issues in the study of human development.

EDHD310 Your Brain on Education: The Neuroscience of Learning and Development (3 Credits)
Investigation linking research in the brain science of learning and development, including the neural basis of academic skills, to achievement, disability, and broader applications to classroom learning. This course will focus on areas of education including language (spoken and written), conceptual change, numerical/quantitative processing, and social cognition as well as burgeoning areas of neuroscientific research in general cognitive processes such as attention, memory, and executive processing. These topics will be discussed with respect to typical and atypical development with some focus on developmental disabilities including autism, specific language impairment, reading and math impairment, and attention deficit disorders among others. This course will focus on both the theoretical perspectives and pragmatic issues of how evidence regarding brain development can or may be translated into useful or misleading information for educators, professionals, and parents/guardians of our children.
Prerequisite: PSYC100.

EDHD313 Creative Experiences for Young Children (3 Credits)
Provides preservice teachers with an understanding of the current research on the development of creativity and integration of the arts into an early childhood classroom.
Restriction: Must be in Early Childhood Education program.
Credit Only Granted for: EDHD313 or EDCI313.
Formerly: EDCI313.

EDHD314 Reading in the Early Childhood Classroom (3 Credits)
Early childhood students introduced to current research/methods on teaching language arts. Focus on development of linguistic and cognitive processes in emergent literacy and beginning reading and writing. Application to models for the instruction and assessment of reading/writing in preschool-aged children. Also includes material on classroom-based interventions for young children at risk of reading failure due to learning difficulties. Includes Field Experiences.
Prerequisite: EDHD210, EDHD220, and EDSP211.
Corequisite: EDHD425; and corequisite: EDHD419 or EDSP420.
Restriction: Must be enrolled in Professional Early Childhood/Early Childhood Special Education Program; and minimum cumulative GPA of 2.75.

EDHD315 Reading in Early Childhood Classroom: Instruction and Materials Part II (3 Credits)
This course builds on the theories and teaching strategies of EDHD314. Students will focus on teaching of reading and writing to primary grade students.
Prerequisite: EDHD314.
Restriction: Must be in Early Childhood Education program.

EDHD319 Selected Topics in Human Development (3 Credits)
Selected topics in human development in relation to contemporary culture.
Repeatable to: 6 credits if content differs.

EDHD320 Human Development Through the Life Span (3 Credits)
Central concepts related to parameters of human development, individual and social, which arise throughout the life span. Continuity and change within the developing individual.

EDHD321 The Young Child as Scientist (2 Credits)
Provides theoretical and practical knowledge for teaching science in early childhood classrooms. Appropriate teaching strategies and materials of instruction are presented for diverse settings. Includes field experience.
Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD435, and EDHD427.
Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD322 The Young Child as Mathematician (3 Credits)
Provides a theoretical and instructional framework for mathematics instruction in early childhood classrooms. Development of understanding of early childhood mathematics that emphasizes how and in what environment young children learn mathematics. Current thinking about both content and instructional strategies for mathematics curriculum, including identification and review of standards and expectations for learning outcomes for all children. Assessment strategies for evaluating all children will be addressed. Includes Phase 1 Field Experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP 430, EDSP 433; OR Track 2: Must have completed EDHD415, EDHD 424.
Corequisite: EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and senior standing or higher; and minimum cumulative GPA of 2.75.

EDHD323 Children Study their World (3 Credits)
Provides theoretical and instructional framework for social studies instruction in inclusive early childhood classrooms. Course will reflect current thinking about content and instructional strategies for social studies curriculum; identification and review of standards/expectations for learning outcomes for all children; assessment strategies for evaluating of social studies objectives; use of data driven instruction to support all children; observation of children's understanding of their social world in field placements; opportunities to explore these understandings through interviews with children and the implementation of activities. Includes Phase 1 Field Experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430, EDSP433; or Track 2: Must have completed EDHD415, EDHD424.
Corequisite: EDHD322, EDSP417, EDHD441, EDHD443, EDHD442, EDHD444, and EDSP321.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and senior standing or higher; and minimum cumulative GPA of 2.75.

EDHD386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department; and junior standing or higher.

EDHD400 Introduction to Gerontology (3 Credits)
Multidisciplinary survey of the processes of aging. Physiological changes, cultural forces, and self-processes that bear on quality of life in later years. Field study of programs, institutions for elderly, individual elders, their families and care providers.

EDHD401 Promoting Optimal Aging (3 Credits)
Theoretical, research, and applied issues related to optimal aging from psychological, biological, and societal perspectives. Group or individual projects involving direct field experiences.
Prerequisite: EDHD320; or EDHD400; or permission of EDUC-Human Development and Quantitative Methodology department.
Credit Only Granted for: EDHD401 or EDHD641.

EDHD402 Social Development (3 Credits)
Social Development. Critical concepts and ideas of the study of child and adolescent social development. Focus on changes in interpersonal relationships, emotions, achievement-related behavior and competence, and functioning within the broader social context.
Recommended: EDHD411.

EDHD411 Child Growth and Development (3 Credits)
Theoretical approaches to and empirical studies of physical, psychological and social development from conception to puberty. Implications for home, school and community.

EDHD412 Infant Development (3 Credits)
Infant development across domains, including perceptual, motor, cognitive, language, social and emotional functioning from pre-natal through third year of life.

EDHD413 Adolescent Development (3 Credits)
Adolescent development, including special problems encountered in contemporary culture. Observational component and individual case study.

EDHD414 Development of the Scientific Mind Across the Lifespan (3 Credits)
Study of the educational, cognitive, social, and cultural factors that underlie the development of the scientific mind across the lifespan.
Recommended: EDHD320.

EDHD415 Promoting the Social-Emotional Competence of Young Children in Inclusive Classrooms (3 Credits)
Teachers must have knowledge and skill regarding how to appropriately manage the classroom so that all children, those with and without disabilities, will be able to learn from their school experiences. Classroom management extends beyond responding to student misbehavior to include a comprehensive approach to addressing the social/emotional competence of typically and atypically developing children. The goal of this course is to prepare early childhood teachers who are able to sensitively, responsively, and effectively manage a classroom of young students who are typically developing and those who have disabilities. Includes Field Experience.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP423, EDSP424, and EDHD431.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD420 Cognitive Development and Learning (3 Credits)
Current developmental theories of cognitive processes such as language, memory, and intelligence and how differences in cognitive level (infancy through adolescence) mediate learning of educational subject matters.
Prerequisite: EDHD320, EDHD411, PSYC341, or PSYC355; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD421 Peer Relations (3 Credits)
Historical and theoretical underpinnings to contemporary research on peer interactions, relationships, and groups. Focus on (1) inter-dependencies of individual characteristics, social behaviors, social relationships; (2) relations between familial factors and extra-familial peer interactions and relationships; (3) normal and abnormal peer relationships; and (4) cross cultural universals and differences.
Recommended: EDHD411.

EDHD424 Culture, School & Community: Contexts for Learning (PreK-3rd) (3 Credits)
Explores the development of the young child (with and without disabilities, as well as those at environmental risk) in the context of the family and community, with emphasis on the impact of state, federal and school system policy on the child's world. Course will consider issues within the family, and the wider socio-cultural ecology that relate to the child's ability to develop and learn. In addition, students will develop strategies for respectful and culturally responses approaches to actively engage families in their children's development and learning. Includes Field Experience.
Prerequisite: EDHD425 and EDHD314; and (EDHD419 or EDSP420).
Corequisite: EDSP315, EDHD431, EDHD415, and EDSP423.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD425 Language Development and Reading Acquisition (3 Credits)
This course focuses on young children's language development and the relationship between language and reading acquisition. Students will learn: concepts central to language development; language achievements at different ages; concepts of emergent literacy; models of reading acquisition and skilled reading.

EDHD426 Cognitive and Motivational Literacy Content (3 Credits)
Students preparing for secondary teaching will learn about the cognitive and motivational aspects of literacy and learning from text for the content areas of literature, science, history and mathematics. Different evidenced-based literacy approaches appropriate for content learning are presented. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.

EDHD427 Constructing and Integrating the Early Childhood Curriculum (3 Credits)
Explores the world from the child's perspective and constructs curriculum based on cognition, learning, and children's experiences. The integrated curriculum is the overarching framework for this course. Includes field experience.
Prerequisite: EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD435.
Restriction: Must be in Early Childhood Education program; and senior standing.

EDHD430 Adolescent Violence (3 Credits)
Examines the roots of violence among adolescents and the extent to which this constitutes a problem in various settings. Research studies on its origins, prevention and intervention and implications for social policy are examined.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD431 Child Development and Learning, Three to Eight Years (3 Credits)
Provides a basic understanding of child development theory and research, as well as specific knowledge about the development of children during the early and middle childhood 'stages,' specifically from ages 3 years to 8 years. A major emphasis will be the application of theory and research from the field of educational psychology to an understanding of how young children learn and achieve academically. Because the course will address the developmental and academic functioning of children with and without disabilities, a particular focus will be on individualization.
Prerequisite: Minimum grade of C- in EDHD314 and EDHD425; and 1 course with a minimum grade of C- from (EDHD419, EDSP420).
Corequisite: EDSP423 and EDSP315; and TRACK I: Must be concurrently enrolled in EDSP430, EDSP433; or TRACK 2: Must be concurrently enrolled in EDHD415, EDHD424.

EDHD432 Internship in EC/ECSE (12 Credits)
Interns spend five days per week in the classroom/home-based setting (under the mentorship of a certified teacher) where they gradually assume full responsibility for the planning, delivery and assessment of instruction or an intervention. Track I students will have an Infant/Toddler placement with special educator, Track II students will be in a Pre-K/K or Grade 1,2,3 classroom with general or special educator (must be opposite grade level and mentor from Phase I/fall of the senior year).
Prerequisite: EDHD323, EDHD322, EDSP417, EDHD441, EDHD442, EDHD443, EDHD444, and EDSP321.
Corequisite: EDHD437.
Restriction: Must be in Early Childhood and Early Childhood Special Education program; and senior standing or higher.

EDHD434 Child Development, Birth to Three Years (3 Credits)
Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.
Prerequisite: EDHD210, EDHD220, and EDSP211.
Corequisite: EDHD314 and EDHD425. Cross-listed with EDSP420.
Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.
Formerly: EDHD419A.

EDHD435 Effective Components of the Early Childhood Classroom (3 Credits)
Explores three topics integral to effective, child-centered early childhood classrooms: assessment, classroom management and parent involvement. Includes field experience.
Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD427.
Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD436 Cognition and Motivation in Content Area Literacy for Middle-School Students (3 Credits)
Cognitive and motivational processes of literacy and learning from texts across subjects. Structured approaches to using reading, writing, and speaking for content learning based on approaches to knowledge, motivation, and strategies. Classroom contexts that enable middle-school students to engage with diverse texts and Internet resources are provided

EDHD437 EC/ECSE Teachers as Researchers and Reflective Practitioners (3 Credits)
Students use action research to improve instructional delivery or familial interactions in an effort to enhance the overall educational experiences/outcomes of children in classrooms or home-based contexts. Students will design and implement an action research project in an effort to meet a goal articulated in an applicable Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP) as the basis of their project.
Prerequisite: Minimum grade of C- in EDHD322, EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.
Corequisite: EDHD432.

EDHD440 Adult Development (3 Credits)
Major conceptual approaches to the study of adult development including physical, cognitive, social, emotional and self processes that take place within individuals as they progress from emerging adulthood through middle age.
Prerequisite: EDHD320; or permission of EDUC-Human Development and Quantitative Methodology department.
Recommended: EDHD413.

EDHD441 Data Driven Decision Making in EC/ECSE (1 Credit)
Students will be exposed to formative (e.g., classroom based, ongoing) and summative (e.g., standardized testing) assessments. Students will collect and analyze formative assessment data from their internship classrooms as the bases of planning and delivering instruction to meet the diverse needs of all learners. They will also analyze standardized assessment data to gain an understanding of measures used to determined cross-school and cross-teacher effectiveness. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP433 or TRACK 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP321, EDSP417, EDHD442, EDHD443, and EDHD444.

EDHD442 Interventions for Children with Behavioral Challenges (1 Credit)
Students will expand knowledge of and develop skills to address challenging behaviors in inclusive early childhood classrooms. Students examine the causes underlying challenging behaviors during the early childhood years, and identify appropriate resources and support services for working with families to develop a unified approach when responding to behavioral challenges. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.
Corequisite: EDSP321, EDSP417, EDHD322, EDHD323, EDHD441, EDHD443, and EDHD444.

EDHD443 Interventions for Children with Social and Communication Challenges (1 Credit)
Students will learn about the characteristics of children with autism spectrum disorder, pervasive developmental disorder, social communication disorder, and other related challenges and will be equipped to meet the needs of this group of children in the early childhood classroom. The utilization of Universal Design for Learning (UDL), Response to Intervention (RTI) and other early childhood special education approaches, as they apply to this specific group of children, will be addressed. Interventions designed to improve the functioning of children with autism spectrum disorders and related disorders will be reviewed. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.
Corequisite: EDHD322, EDSP321, EDSP417, EDHD323, EDHD441, EDHD442, and EDHD444.

EDHD444 Action Research in EC/ECSE (1 Credit)
Students will become familiar with the EC/ECSE research process, literature and how teachers use action research to improve pedagogy and the experiences of children in classrooms or home-based contexts. Students will utilize this knowledge, as well as either a goal in an Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP), to develop an action research study commenced during the following semester. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDHD441, EDHD442, EDHD443, EDSP417, and EDSP321.

EDHD445 Guidance of Young Children (3 Credits)
Practical aspects for helping and working with children, drawing on research, clinical studies, and observation. Implications for day care and other public issues.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD460 Educational Psychology (3 Credits)
Application of psychology to learning processes and theories. Individual differences, measurement, motivation, emotions, intelligence, attitudes, problem solving, thinking and communicating in educational settings.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD489 Field Experiences in Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 4 credits.

EDHD498 Special Problems in Education (1-3 Credits)
Available only to students who have definite plans for individual study of approved problems.
Prerequisite: Available only to students who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD499 Workshops, Clinics, and Institutes (1-6 Credits)
The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits.

EDHI - Education Leadership, Higher Ed and International Ed

EDHI288 Special Problems in Education (1-6 Credits)
Available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.
Formerly: EDPL288.

EDHI338 Teaching and Learning about Cultural Diversity through Intergroup Dialogue (1-3 Credits)
Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on difficult topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.
Prerequisite: Completion of on-line registration form.
Repeatable to: 6 credits if content differs.
Formerly: EDPL288.

EDHI488 Special Topics in Education Policy and Administration (1-3 Credits)
Special and intensive treatment of current topics and issues in education policy and administration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits.
Formerly: EDPL488.

EDHI489 Field Experiences in Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL489.

EDHI498 Special Problems in Education (1-3 Credits)
Available only to students who have definite plans for individual study of approved problems.
Prerequisite: Available only to students who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL498.

EDHI499 Workshops, Clinics, and Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: Workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals, and supervisors.
Repeatable to: 6 credits.
Formerly: EDPA499.

EDMS - Measurement, Statistics, and Evaluation

EDMS410 Classroom Assessment (3 Credits)
Developing and using classroom assessments, including tests, performance assessments, rating scales, portfolios, observations and oral interactions; basic psychometric statistics; standard setting; grading; communicating assessment information; testing ethics; locating and evaluating measures; program evaluation and classroom research; assessments used for educational policy decisions.
Restriction: Junior standing or higher.

EDMS451 Introduction to Educational Statistics (3 Credits)
Introduction to statistical reasoning; location and dispersion measures; computer applications; regression and correlation; formation of hypotheses tests; t-test; one-way analysis of variance; analysis of contingency tables.
Restriction: Sophomore standing or higher.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

EDMS489 Field Experiences in Measurement and Statistics (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 4 credits.

EDMS498 Special Problems in Measurement and Statistics (1-3 Credits)
Available only to education majors who have formal plans for individual study of approved problems.
Prerequisite: Available only to education majors who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits.

EDPS - Education Policy Studies

EDPS310 Foundations of Education (3 Credits)
Social context of education and conflicts over philosophies, values, and goals that are reflected in educational institutions in our pluralistic society. Helps teachers become reflective, critical thinkers about the social and philosophical issues they face and the choices they make.
Credit Only Granted for: EDPL301 or EDPS301.
Formerly: EDPL301.

EDPS401 Educational Policy, and Social Change (3 Credits)
An examination of education policy in relation to the social environment and change. Contemporary education and social issues are examined, including technology as a complex force which influences social change. This is a Social Foundations course.
Credit Only Granted for: EDPL401 or EDPS401.
Formerly: EDPL401.

EDSP - Education, Special

EDSP210 Introduction to Special Education (3 Credits)
Characteristics and needs of individuals receiving special education and related services. Current issues and practices in special education.
Restriction: Sophomore standing or lower.
Credit Only Granted for: EDSP210 or EDSP470.

EDSP211 Introduction to Special Education (3 Credits)
An introduction to the field of special education. Students examine historical foundations, including legislation; review components necessary for effective service delivery; and develop an understanding of the role of collaboration and consultation with parents, school personnel and other professionals. In addition, students are introduced to the nature and characteristics of various disabilities and review current issues in the field including overrepresentation of minority students in special education, inclusion, and federal and state assessment mandates. Current topics are addressed including evidence-based practices, universal design for learning, and individualization and differentiation of instruction..
Restriction: Sophomore standing or lower; and permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDSP210 or EDSP470.

EDSP220 Disability in Community: Access, Accommodation, and Adaptation (3 Credits)
Examines the concept of disability in a variety of community settings. Drawing on classic and contemporary readings in psychology, sociology and special education, the course will couple conceptual and historical understanding of disability with first-hand service-learning experiences in the community. Students will develop a plan in several phases that encompasses principles of Universal Design for Living/Learning (UDL) to study and participate in community-based activities.

EDSP288 Special Topics in Teacher Education (1-3 Credits)
Restriction: Must be in a major in EDUC-College of Education; or permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits if content differs.

EDSP298 Special Problems in Teacher Education (1-6 Credits)
Available only to freshmen and sophomore education majors who have definite plans for individual study of approved problems relative to their preparation for teaching. Credit according to extent of work.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and available only to freshmen and sophomore education majors who have definite plans for individual study of approved problems relative to their preparation for teaching.

EDSP315 Inclusive Instruction: Reading Methods II (3 Credits)
Focus on current research and methods of teaching reading in the primary grades. Examination of development of a balanced literacy program of children of all reading levels in inclusive early childhood classrooms. Students will learn to select and use a variety of evidence-based reading strategies and assessment tools for reading and writing instruction. Includes field experiences.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP423 and EDHD431; and track 1: Must be concurrently enrolled in EDSP430 and EDSP433; OR Track 2: Must be concurrently enrolled in EDHD415 and EDHD424.

EDSP321 The Young Child As Scientist (3 Credits)
A theoretical and pedagogical framework for evidence-based inclusive science instruction in inclusive early childhood classrooms. Examination of principles of inquiry-based science learning and develop strategies for helping children acquire fundamental problem-solving skills that may be applied to understanding a wide array of science content. Assessment strategies for evaluating the achievement of science objectives, and the achievement for all children will be addressed. Includes field experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP376 Fundamentals of Sign Language (3 Credits)
Receptive and expressive skills in American Sign Language. Examination of the causes of deafness, characteristics of deaf education, and aspects of the culture of the deaf community.

EDSP386 Experiential Learning (3-6 Credits)
Prerequisite: Learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

EDSP400 Instruction of Students with Severe Disabilities I (3 Credits)
Functional assessment procedures and instructional methods for students with severe disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP602.
Credit Only Granted for: EDSP400 or EDSP602.

EDSP401 Teaching Students with Disabilities in Elementary Classrooms (3 Credits)
This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.
Restriction: Permission of EDUC-Special Education department.
Credit Only Granted for: EDSP401 or EDSP499F.
Formerly: EDSP499F.

EDSP402 Field Placement: Severe Disabilities I (2-5 Credits)
Practicum experience in settings serving students with severe disabilities.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP403 Instruction of Students with Physical Disabilities (3 Credits)
Assessment, curriculum, and instruction for students with physical disabilities. Focus on etiology, environmental and learning adaptations, and assistive technology.
Prerequisite: EDSP400 or EDSP602. Jointly offered with EDSP603.
Credit Only Granted for: EDSP403 or EDSP603.

EDSP404 Education of Students with Autism Spectrum Disorders (3 Credits)
Characteristics, needs, assessment, and educational methods for students with autism spectrum disorders.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with EDSP604. Credit onl y granted for: EDSP404 or EDSP604.

EDSP410 Instruction of Students with Severe Disabilities II (3 Credits)
Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP614.
Credit Only Granted for: EDSP410 or EDSP614.

EDSP411 Universal Design for Learning (3 Credits)
Universal Design for Learning addresses a foundation framework for teacher candidates to learn how to design and implement instruction for a broad range of students with diverse needs rather than rely exclusively on accommodations to instruction for some students.
Prerequisite: EDSP210 or EDSP470.
Restriction: Must be in Special Education program.

EDSP413 Behavior and Classroom Management in Special Education (3 Credits)
Use of applied behavior analysis for assessment of behavior and learning environments. Design of behavior and classroom management of students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP613.
Credit Only Granted for: EDSP413, or EDSP613.

EDSP415 Assessment in Special Education (3 Credits)
Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and program planning.
Recommended: STAT100; or SOCY201.
Restriction: Must be in Special Education program. Jointly offered with EDSP615. Credit only granted f or: EDSP415, or EDSP615.

EDSP416 Reading and Writing Instruction in Special Education I (3 Credits)
Assessment and instruction of reading and writing skills for students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP616.
Credit Only Granted for: EDSP416 or EDSP616.

EDSP417 Reading Diagnosis and Assessment (3 Credits)
Reading Diagnosis and Assessment prepares teacher candidates to assess children in general and special early childhood educations settings in the areas of reading and writing in order to plan for instruction. The course will focus on diagnostic, screening, progress monitoring, and outcome assessments in early and beginning literacy. The course is designed to provide participants with the knowledge and skills necessary to collect and use a wide range of assessment data in general education and special education settings. Includes field experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP321, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP420 Child Development, Birth to Three Years (3 Credits)
Child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.
Prerequisite: EDHD210 and EDHD220.
Corequisite: EDHD425 and EDHD314.
Restriction: Must be in Special Education program. Cross-listed with ED HD434.
Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.

EDSP421 Field Placement in Special Education: Early Childhood I (2-4 Credits)
Field experience I in early childhood special education.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)).

EDSP422 Curriculum and Instruction: Early Childhood Special Education (3 Credits)
Curriculum and instruction for young children with mild and moderate disabilities, preschool through primary grades.
Restriction: Must be in Special Education program. Jointly offered with EDSP627.
Credit Only Granted for: EDSP422 or EDSP627.

EDSP423 Assessment in Early Childhood Special Education (3 Credits)
Assessment procedures for infants and young children with disabilities, birth through grade 3.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP423 or EDSP624.

EDSP424 Field Placement in Special Education: Early Childhood II (2-4 Credits)
Field experience in early childhood special education.
Restriction: Must be in Special Education program.

EDSP425 Pre-Internship I (1 Credit)
This required EDSP field placement is a 3-hour per week seminar and field placement that meets across 15 weeks. Opportunities are provided to observe and participate in instructional experiences under the guidance of an assigned Host Teacher (HT) in a four-week experience in a high incidence placement AND a four-week experience in a low incidence (LI) placement. The purpose is to provide each special education teacher candidate (TC) with practical experience to complete field-based requirements and begin to meet the CEC Initial Preparation Standards (2012). Furthermore, since EDSP 425 is the first internship experience in the Special Education Program in the College of Education at University of Maryland, teacher candidates will become familiar with the Special Education Program, College of Education, Maryland State Department of Education (MSDE), Counsel for Accreditation of Educator Preparation (CAEP), and Council for Exceptional Children (CEC) expectations and requirements for graduation and teacher licensure.
Corequisite: EDSP451 and EDSP400.
Restriction: Must be in the Special Education major.

EDSP426 Pre-Internship II (1 Credit)
A 3-hour per week seminar and field placement that meets across 15 weeks. Teacher candidates will assess and provide instruction for first grade students at a local public elementary school. The field experience is also supported through content delivered in EDSP 415/615 (Assessment in Special Education) and EDSP 416/616 (Reading and Writing Instruction in Special Education). The tutoring program is meant to provide an opportunity for teacher candidates to practice the assessment and instructional skills they are learning, while also providing a needed service to the community. Teacher candidates will work one-on-one with select first graders whose teachers have determined to be in need of extra support in reading and writing.
Corequisite: EDSP415 and EDSP416.
Restriction: Must be in the Special Education major.

EDSP430 Early Intervention: Early Childhood Special Education (3 Credits)
Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP430 or EDSP631.

EDSP433 Families and Culture in Early Intervention (Birth-5) (3 Credits)
Provides students with the skills and information they need to work effectively with families of young children (birth to age 5) who have or are at risk for disabilities in early childhood or early intervention programs. Students will review current local, state and federal policies establishing the rights of families of infants and young children with disabilities to participate in decision making for their child. We will discuss relevant theoretical and research literature as well as the cultural and contextual issues involved in working with families of very young children. Includes field experiences.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP430, EDSP315, and EDHD431.

EDSP434 Field Placement in Special Education: Secondary Middle I (2-4 Credits)
Field experience in secondary middle special education.
Restriction: Must be in Special Education program.

EDSP435 Field Placement in Special Education: Secondary Middle II (2-4 Credits)
Field experience in secondary middle special education.
Restriction: Must be in Special Education program.

EDSP443 Language and Literacy Acquisition in Children with Disabilities (3 Credits)
Language and literacy acquisition and characteristics of typical and atypical language development in supporting students with reading and writing disabilities.
Restriction: Must be in Special Education program.
Additional Information: This course is the first of four reading courses required by the Maryland State Department of Education for teacher certification in Special Education.

EDSP450 Inclusive Practices in the Schools (3 Credits)
Educational practices regarding inclusive education in the schools for students with and without disabilities.Jointly offered with EDSP606.
Credit Only Granted for: EDSP450 or EDSP6 06.

EDSP451 Curriculum and Instruction: Elementary/Middle Special Education (3 Credits)
Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included.
Restriction: Must be in Special Education program. Jointly offered with EDSP652.
Credit Only Granted for: EDSP451 or EDSP652.

EDSP452 Internship I: Elementary/Middle Special Education (2-4 Credits)
Field experience in elementary/middle school special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP692.
Credit Only Granted for: EDSP452 or EDSP692.

EDSP453 Methods and Models of Instruction: Elementary Special Education (3 Credits)
Focus on models and methods of instruction responsive to the cognitive, linguistic, and cultural characteristics of elementary students in special education.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP453 or EDSP653.

EDSP454 Field Placement in Special Education: Elementary II (2-4 Credits)
Field experience in elementary special education.
Restriction: Must be in Special Education program.

EDSP455 Assessment in Elementary Special Education (3 Credits)
Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP654.
Credit Only Granted for: EDSP455 or EDSP654.

EDSP466 Issues and Models of Instruction: Middle/Secondary Special Education (3 Credits)
Issues, legislation, and service models in middle/secondary special education. Emphasis on career and vocational education, self-determination, and transition.
Restriction: Must be in Special Education program. Jointly offered with EDSP664.
Credit Only Granted for: EDSP466 or EDSP664.

EDSP470 Introduction to Special Education (3 Credits)
Designed to give an understanding of the needs of all types of exceptional children.
Restriction: Must not have completed EDSP210.
Credit Only Granted for: EDSP210 or EDSP470.

EDSP474 Assessment in Middle/Secondary Special Education (3 Credits)
Cognitive, vocational, and social assessment for students with disabilities. Emphasis on interpretation of assessment results and case management practices.
Restriction: Must be in Special Education program. Jointly offered with EDSP674.
Credit Only Granted for: EDSP474 or EDSP674.

EDSP476 Communicating with Sign Language (3 Credits)
Intermediate level receptive/expressive skills in American Sign Language. Aspects of the culture, history, and research perspectives of the deaf community.
Prerequisite: EDSP376.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP477 Curriculum, Assessment, and Instruction: Middle/Secondary Special Education (3 Credits)
Methods and assessment practices for effective instruction in middle and secondary content areas for students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP677.
Credit Only Granted for: EDSP477 or EDSP677.

EDSP481 Cultural Diversity and Disability (3 Credits)
A study of diversity issues within special education, with attention to uses of race, culture, and disability as they pertain to teaching, learning, and social justice.
Restriction: Must be in Special Education program. Jointly offered with EDSP681.
Credit Only Granted for: EDSP481, EDSP499C, EDSP678C, or EDSP681.
Formerly: EDSP499C.

EDSP482 Literacy Approaches for At-Risk Adolescents (3 Credits)
Provides approaches to teaching reading in the content areas for secondary students with disabilities.
Prerequisite: Must have completed or be concurrently enrolled in EDHD426.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with EDSP682.
Credit Only Granted for: EDSP482 or EDSP682.

EDSP484 Reading and Writing Instruction in Special Education II (3 Credits)
Focus on the development of reading and writing programs for students in special education. Builds on foundations established in EDSP416.
Prerequisite: EDSP416.
Restriction: Must be in Special Education program. Jointly offered with EDSP684.
Credit Only Granted for: EDSP48 4 or EDSP684.

EDSP485 Assessment and Instruction in Mathematics in Special Education (3 Credits)
Instructional methods and assessment in mathematics in special education.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with EDSP683.
Credit Only Granted for: EDSP485 or EDSP683.

EDSP486 Promoting Prosocial Behavior in Special Education (3 Credits)
Focus on social development among students with and without disabilities, the relationship between pedagogy and student behavior, and classroom, school, and community approaches for developing prosocial behavior.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP486 or EDSP686.

EDSP487 Family Partnerships in Special Education (3 Credits)
Strategies for communicating and working with families of students with disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP687.
Credit Only Granted for: EDSP487 or EDSP687.

EDSP488 Selected Topics in Teacher Education (1-3 Credits)
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; or must be in a major in EDUC-College of Education.
Repeatable to: 6 credits if content differs.

EDSP489 Field Experiences in Special Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP490 Teacher Candidate Research Seminar in Special Education (3 Credits)
Study of current issues and research concerning the education of students in special education.
Restriction: Must be in Special Education program.

EDSP494 Internship: Early Childhood Special Education (6-12 Credits)
Student teaching, full-time for twelve weeks, with infants or preschool children with disabilities.
Restriction: Must be in Special Education program.

EDSP495 Internship II: Elementary/Middle Special Education (6-12 Credits)
Student teaching, full-time for 15 weeks, with elementary or middle school students with disabilities.
Corequisite: EDSP490.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with EDSP695 .
Credit Only Granted for: EDSP 495 or EDSP 695.

EDSP496 Internship: Middle/Secondary Special Education (6-12 Credits)
Student teaching, full-time for twelve weeks, with middle or high school age students with disabilities.
Restriction: Must be in Special Education program.

EDSP498 Special Problems in Special Education (1-6 Credits)
Available only to education majors who have definite plans for individual study of approved problems. Credit according to extent of work.
Prerequisite: Available only to education majors who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP499 Workshops, Clinics, and Institutes in Special Education (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the special education department (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing. Laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits if content differs.

EDUC - Education

EDUC386 Experiential Learning (3-6 Credits)
Restriction: Permission of EDUC-College of Education; and junior standing or higher.

EDUC388 Special Topics in Education (1-3 Credits)
Restriction: Permission of EDUC-College of Education.
Repeatable to: 6 credits if content differs.

EDUC478 Using Information Technology in Schools (1-3 Credits)
Strategies, resources, tools and organizational concepts for using technology to facilitate classroom learning and school administrative functions.
Restriction: Permission of EDUC-College of Education; and junior standing or higher.
Repeatable to: 6 credits if content differs.

EDUC498 Selected Topics in Education (1-3 Credits)
Current topics and issues in education.
Restriction: Permission of EDUC-College of Education.
Repeatable to: 9 credits if content differs.

EDUC499 Honors Thesis (1-6 Credits)
Individual thesis work under supervision of faculty advisors; includes periodic seminar meetings with other honors students engaged in thesis work.
Prerequisite: Admission to College Honors Program.
Restriction: Permission of EDUC-College of Education.

ENAE - Engineering, Aerospace

ENAE100 The Aerospace Engineering Profession (1 Credit)
Overview of salient aspects of professional practice of Aerospace Engineering. Introduction to the range of technical expertise needed to succeed in the profession and the objectives of the various parts of the Aerospace Engineering program at UMCP in supporting students' efforts in gaining the required knowledge and skills. Familiarization with departmental faculty and their areas of research, creation of links with other students, professional society student chapters, and available resources. Discussion of ethical issues, business requirements, and their interactions with technical developments.
Recommended: ENES100 and MATH140.

ENAE200 Aerospace Engineering Profession II (1 Credit)
Overview of the engineering profession as it pertains to the role of the engineer in society, professional practice and ethical standards, career development, opportunities and need for lifelong learning, importance of safety and standards, effective written, visual, and oral communications, and the impact of the engineering profession on global issues.
Recommended: ENAE100.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE202 Computing Fundamentals for Engineers (3 Credits)
Introduction to computational tools for the solution of engineering problems. C++ & MATLAB programming including branching and loops, functions, file handling, arrays, and data structures. Students will be introduced to object-oriented programming, basic computing, algorithms, and principles of software engineering.
Corequisite: Must be concurrently enrolled in MATH141.
Restriction: Permission of ENGR-Aerospace Engineering department.
Credit Only Granted for: ENAE202 or ENME202.

ENAE283 Introduction to Aerospace Systems (3 Credits)
Introduction to airplanes and space vehicles as aerospace systems. Fundamentals that describe these systems. Elements of aerodynamics, airfoils and wings. Airplane performance, stability and control. Aircraft and rocket propulsion. Fundamentals of orbital motion. Aspects of vehicle conceptual design.
Prerequisite: PHYS161, MATH141, and ENES102.
Corequisite: PHYS261 and PHYS260.
Restriction: Must be in Engineering: Aerospace program.
Credit Only Granted for: (ENAE281 and ENAE282) or ENAE283.
Formerly: ENAE281 and ENAE282.

ENAE301 Dynamics of Aerospace Systems (3 Credits)
Kinematics and dynamics of three dimensional motion of point masses and rigid bodies with introduction to more general systems. Primary emphasis on Newtonian methods. Practice in numerical solutions and computer animation of equations of motion using MATLAB.
Prerequisite: PHYS271, MATH461, PHYS270, MATH246, ENAE283, ENAE202, ENES102, and MATH241.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE311 Aerodynamics I (3 Credits)
Fundamentals of aerodynamics. Elements of compressible flow. Normal and oblique shock waves. Flows through nozzles, diffusers and wind tunnels. Elements of the method of characteristics and finite difference solutions for compressible flows. Aspects of hypersonic flow.
Prerequisite: PHYS271, MATH461, PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And junior standing or higher.

ENAE324 Aerospace Structures (4 Credits)
Analysis of torsion, beam bending, plate bending, buckling and their application to aerospace.
Prerequisite: ENES220.
Restriction: Must be in Engineering: Aerospace program.

ENAE362 Aerospace Instrumentation and Experimentation (3 Credits)
Basic instrumentation electronics including DC electronics, AC electronics, semiconductors, electro-optics and digital electronics. Sensing devices used to carry out experiments in Aerospace Engineering includes metrology, machine tool measurements, bridge circuits, optical devices, and introduction to computer based data acquisition. Topics chosen to support measurements in aerodynamics, flight structures and flight control.
Prerequisite: MATH246 and ENAE283.
Restriction: Must be in Engineering: Aerospace program; and junior standing or higher.

ENAE380 Flight Software Systems (3 Credits)
Avionics using advanced sensor and computing technologies are at the heart of every modern Aerospace vehicle. Advanced software systems to improve cockpit safety and enable unmanned and deep-space missions. Object-oriented programming and software engineering concepts required to design and build complex flight software systems. Software validation, verification and real-time performance analysis to assess flight software system reliability and robustness. Human-machine interface design for piloted systems. Automatic onboard data acquisition and decision-making for unmanned air and space vehicles.
Prerequisite: ENAE283 and ENAE202.
Restriction: Must be in Engineering: Aerospace program; and junior standing or higher.

ENAE398 Honors Research Project (1-3 Credits)
Planned sequence of steps in aerospace honors research in which students take three (3) consecutive semesters of this course in partial fulfillment of aerospace engineering honors program requirements. The first semester consists of a series of seminars and meetings with faculty mentors on honors research; two semesters consist of undergraduate honors research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference.
Prerequisite: Must be accepted into Aerospace Honors Program.
Restriction: Must be in Engineering: Aerospace program.
Repeatable to: 3 credits if content differs.

ENAE403 Aircraft Flight Dynamics (3 Credits)
Study of motion of aircraft, equations of motion, aerodynamic force representation, longitudinal and lateral motions, response to controls and to atmospheric disturbances, handling qualities criteria and other figures of merit.
Prerequisite: ENAE414 and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE404 Space Flight Dynamics (3 Credits)
Three-dimensional motion under central fields. Solutions to orbital motion, orbital elements, time elements. Kepler's laws. Orbital maneuvering, rendezvous and station-keeping. Rigid-body attitude dynamics, spacecraft attitude dynamics.
Prerequisite: ENAE301.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE414 Aerodynamics II (3 Credits)
Aerodynamics of inviscid incompressible flows. Aerodynamic forces and moments. Fluid statics/buoyancy force. Vorticity, circulation, the stream function and the velocity potential. Bernoulli's and Laplace's equations. Flows in low speed wind tunnels and airspeed measurement. Potential flows involving sources and sinks, doublets, and vortices. Development of the theory of airfoils and wings.
Prerequisite: ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And junior standing or higher.

ENAE415 Helicopter Theory (3 Credits)
Elementary exposition on the theory and practice of aerodynamics applied to helicopters and other rotary wing aircraft.
Prerequisite: ENAE414.
Restriction: Must be in Engineering: Aerospace program.

ENAE420 Computational Structural Mechanics (3 Credits)
Introductory of finite element methods for aerospace engineering modeling and analysis; equips students with ability to understand manuals of commercial finite element analysis software.
Prerequisite: ENES220 and MATH241; and must have completed a course in linear algebra.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE423 Vibration and Aeroelasticity (3 Credits)
Dynamic response of single and multiple degrees of freedom systems, finite element modeling, wing divergence, aileron reversal, wing and panel flutter.
Prerequisite: ENAE324.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE425 Mechanics of Composite Structures (3 Credits)
Introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.
Prerequisite: MATH246, ENAE324, ENES220, and MATH241.

ENAE432 Control of Aerospace Systems (3 Credits)
An introduction to the feedback control of dynamic systems. Laplace transforms and transfer function techniques; frequency response and Bode diagrams. Stability analysis via root locus and Nyquist techniques. Performance specifications in time and frequency domains, and design of compensation strategies to meet performance goals.
Prerequisite: Minimum grade of C- in ENAE301 and ENAE283.
Restriction: Junior standing or higher; and must be in Engineering: Aerospace program.

ENAE441 Space Navigation and Guidance (3 Credits)
Principles of navigation. Celestial, radio, and inertial navigation schemes. Navigational and guidance requirements for orbital, planetary, and atmospheric entry missions. Fundamentals of communications and information theory. Link budgets, antennas and telemetry systems.
Prerequisite: ENAE404 and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE455 Aircraft Propulsion and Power (3 Credits)
Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of piston, turbojet, fanjet, and other variations of airbreathing aircraft power units.
Prerequisite: ENES232, ENAE414, and ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE457 Space Propulsion and Power (3 Credits)
Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of rocket, ion, and other exoatmospheric power units.
Prerequisite: PHYS271, ENES232, PHYS270, and ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And senior standing.

ENAE464 Aerospace Engineering Laboratory (3 Credits)
Application of fundamental measuring techniques to measurements in aerospace engineering. Includes experiments in aerodynamics, structures, propulsion, flight dynamics and astrodynamics. Correlation of theory with experimental results.
Prerequisite: ENAE324, ENAE362, ENAE311, and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE471 Aircraft Flight Testing (3 Credits)
Provides basic instruction to aircraft flight testing and demonstrates need for systematic, well-proven technique to allow for accurate airplane performance. Concepts of aerodynamics, airplane performance, and stability and control. Emphasis on single-engine general aviation type aircraft.
Prerequisite: ENAE414.
Corequisite: ENAE403.
Restriction: Must be in Engineering: Aerospace program.

ENAE481 Principles of Aircraft Design (3 Credits)
Aircraft design principles blending both synthesis and analysis. The iterative nature of the design process. Applied aerodynamics. Elements of aircraft performance calculation and optimization. Design of aircraft including payload, crew and avionics provisions, propulsion selection and sizing, aerodynamic configuration optimization, mass properties, stability and control characteristics, and vehicle subsystems. Individual student projects in aircraft design.
Prerequisite: ENAE324, ENAE362, and ENAE432.
Corequisite: ENAE414.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE482 Aeronautical Systems Design (3 Credits)
Senior capstone design course in the aeronautics track. Introduction of computerized methods for sizing and performance analysis. More comprehensive methods to predict weight, aerodynamics and propulsion system characteristics. Consideration in design disciplines such as vulnerability, maintainability, produceability, etc. Groups of students will complete, brief and report on a major design study to specific requirements.
Prerequisite: ENAE455, ENAE423, ENAE403, and ENAE481.
Restriction: Must be in Engineering: Aerospace program; and senior standing or higher.

ENAE483 Principles of Space Systems Design (3 Credits)
Principles of space systems analysis and vehicle design. Launch vehicle performance analysis and optimization. Design of vehicle systems including avionics, power, propulsion, life support, human factors, structures, actuator and mechanisms, and thermal control. Design processes and design synthesis. Individual student projects in vehicle design.
Prerequisite: ENAE404, ENAE324, ENAE362, and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE484 Space Systems Design (3 Credits)
Senior capstone design course in the space track. Group preliminary design of a space system, including system and subsystem design, configuration control, costing, risk analysis, and programmatic development. Course also emphasizes written and oral engineering communications.
Prerequisite: ENAE423, ENAE483, ENAE441, and ENAE457.
Restriction: Must be in Engineering: Aerospace program.

ENAE488 Topics in Aerospace Engineering (1-4 Credits)
Technical elective taken with the permission of the student's advisor and instructor. Lecture and conference courses designed to extend the student's understanding of aerospace engineering. Current topics are emphasized.
Prerequisite: Permission of student's advisor required.
Restriction: Permission of instructor.

ENAE499 Elective Research (3 Credits)
Undergraduate research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference or competition.
Prerequisite: Permission from student's advisor required.
Restriction: Senior standing or higher; and must be in Engineering: Aerospace program; and permission of instructor; and permission of ENGR-Aerospace Engineering department.
Repeatable to: 6 credits if content differs.

ENCE - Engineering, Civil

ENCE100 Introduction to Civil and Environmental Engineering (1 Credit)
An overview of the department of Civil and Environment Engineering. Students are introduced to the undergraduate curriculum and will be exposed to other undergraduate and graduate students at various points in their program. The course blends panel presentations by seniors and graduate students, faculty and practitioners with a project and book review to be performed by the students.

ENCE200 Civil Engineering Computation (3 Credits)
Development of knowledge and skills in managing, analyzing, interpreting, and communicating spatial information. Computer Aided Drawing (CAD) and Geographic Information Systems (GIS) are introduced in the context of civil and environmental engineering applications.
Prerequisite: ENES100, MATH141, and ENES102; and permission of ENGR-Civil & Environmental Engineering department.
Credit Only Granted for: ENCE200 or ENCE202.
Formerly: ENCE202.

ENCE201 Engineering Information Processing (3 Credits)
Exploration of algorithms for solving problems in several important areas of numerical computing: roots of equations; matrix algebra and the systems of linear equations; function approximation, numerical differentiation and integration; and ordinary differential equations. Issues of solution accuracy, robustness, and efficiency are also considered. Numerical techniques are presented in the context of engineering applications, and example problems are solved using a variety of computer-based tools (primarily MATLAB).
Prerequisite: ENES220 and MATH241; and permission of ENGR-Civil & Environmental Engineering department.
Corequisite: MATH246.
Credit Only Granted for: ENCE201 or ENCE203.

ENCE204 How Cities Work (3 Credits)
Have you ever wondered where the electricity and gas that lights and heats your house comes from? Or where your trash goes? Or who looks after the parks? In this course students will examine the inner workings of cities, from the basic infrastructure to how decisions are made about infrastructure. Students will examine how city budgets are formed and where taxes are spent. In this course, students will wander through neighborhoods and meet members of various city departments; learn about transportation; why scooters and bikes compete with cars for road space; and how the interaction between a city's infrastructure and its decision-making can impede equitable access to healthy food or essential services.

ENCE215 Engineering for Sustainability (3 Credits)
Engineers have a key role to play in planning, designing, building, and ensuring a sustainable future. In this class, a problem-based approach is used to examine fundamentally-based analyses and approaches for engineering as sustainable society, with a focus on sustainable use of energy and materials, sustainable infrastructure solutions, atmospheric sustainability and sustainable water supply, and human population growth and resource consumption and its implications for sustainability.
Prerequisite: CHEM135; and permission of ENGR-Civil & Environmental Engineering department.

ENCE300 Fundamentals of Engineering Materials (3 Credits)
Behavior, physical, mechanical and chemical properties, design and performance of civil engineering materials, including aggregates, cement, concrete, asphalt binders and mixtures, plastics and geosynthetics, timber, metals and alloys. Modified and advanced highway materials (polymer and rubber modified mixtures, high performance concrete, composites, smart materials). Laboratory testing with hands-on experience on aggregates, Portland cement concrete, asphalt mixtures, timber and metals as per SUPERAVE, ACI design methods, and ASTM standards and specifications.
Prerequisite: ENES220; and permission of ENGR-Civil & Environmental Engineering department.

ENCE302 Probability and Statistics for Civil and Environmental Engineers (3 Credits)
Statistics is the science of data. Civil Engineers must often make decisions based on incomplete, variable or uncertain information. In addition, modern methods of design and analysis need to account for variability in natural, engineered and human systems. After successful completion of this class, a student should have facility and familiarity with established basic techniques for managing data, modeling variability and uncertainty, communicating about data and decisions, and supporting or defending a decision or judgment based on uncertain or incomplete data.
Prerequisite: MATH246 and ENCE201; and permission of ENGR-Civil & Environmental Engineering department.

ENCE305 Fundamentals of Engineering Fluids (3 Credits)
The theoretical bases for fluid statics and dynamics, including the conservation of mass, energy and momentum. Modeling of hydraulic systems are introduced. Emphasis on pipe flow and open-channel hydraulics, with real-world applications.
Prerequisite: ENES220, PHYS260, and PHYS261; and permission of ENGR-Civil & Environmental Engineering department.
Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENCE310 Introduction to Environmental Engineering (3 Credits)
Introduction to the physical, chemical and biological systems relating to the quality of water, land and air environments. Fundamental principles will be emphasized, current environmental pollution problems will be examined and methods of pollution abatement discussed.
Prerequisite: PHYS260 and ENCE215; and permission of ENGR-Civil & Environmental Engineering department.

ENCE320 Introduction to Project Management (3 Credits)
Learn the fundamentals of project management and the analytical skills for the management side of engineering projects.Topics include economic analysis, project screening and selection, organizational and project structure, scheduling, budgeting, resource management, life cycle costing, and project control.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering or in the Project Management Minor.
Credit Only Granted for: ENCE320 or ENCE325.

ENCE325 Introduction to Construction Project Management (3 Credits)
Learn the basic topics in sourcing, planning, financing, designing, contracting, constructing and operating buildings and other facilities in the built infrastructure. Topics include construction economics, design constructability reviews, construction process planning, contracts and procurement strategies, project scheduling and resource utilization, site layout planning, project cost and quality controls, temporary structures, environmental sustainability, project handover procedures, facility operation and management, IT-based tools for construction project and resource management.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in a major in ARCH-School of Architecture, Planning, & Preservation; or must be in the Construction Project Management minor. And permission of ENGR-Civil & Environmental Engineering department.
Credit Only Granted for: ENCE 320 or ENCE 325.

ENCE340 Fundamentals of Geotechnical Engineering (3 Credits)
Introductory study of soils in civil engineering. Soil origin, phase relationships and classification schemes. Soil hydraulics: capillary, effective stress, permeability and seepage considerations. Basic stress distribution theories and soil consolidation-settlement analysis. Integration of shear strength evaluation with slope stability analysis. If time permits, topics such as applications in geoenvironmental engineering will be covered.
Prerequisite: ENES220; and permission of ENGR-Civil & Environmental Engineering department.

ENCE353 Introduction to Structural Analysis (3 Credits)
The basic tools of structural analysis and design. Design loads. Equilibrium of external and internal forces. Shear and moment diagrams in beams and frames. Truss analysis. Influence line diagrams. The slope-deflection method and method of consistent deformation. Matrix stiffness methods for beams, frames and trusses.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department; and (MATH246 and ENES220).

ENCE360 Analysis of Civil Engineering Systems (3 Credits)
Introduction to systems approach and systems analysis in civil and environmental engineering. Introduction to systems analysis tools that facilitate engineering management decision making including optimization and computer simulation. Introduction to linear and nonlinear mathematical optimization including linear and integer programming, elementary nonlinear programming and dynamic programming.
Prerequisite: ENCE201 and MATH140; and permission of ENGR-Civil & Environmental Engineering department.

ENCE370 Introduction to Transportation Engineering and Planning (3 Credits)
Engineering problems of transportation by highways, airways, pipelines, waterways, and railways. Transportation modes and technologies, vehicle dynamics, basic facility design, traffic stream models, capacity analysis, transportation planning, evaluation and choice, and network analysis.
Prerequisite: ENCE201, PHYS260, and PHYS261; and permission of ENGR-Civil & Environmental Engineering department.

ENCE386 Experiential Learning (3-6 Credits)
Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENCE398 Honors Research Project (1-3 Credits)

ENCE402 Simulation and Design of Experiments for Engineers (3 Credits)
Review of statistics and hypothesis testing, sample design and design of experiments, generation of discrete and continuous distributions and their applications. Introduction of simulation languages and simulation of discrete and continuous engineering systems. Output analysis, model validation and sensitivity and reliability analysis.
Prerequisite: ENCE302; and permission of ENGR-Civil & Environmental Engineering department.

ENCE411 Environmental Engineering Science (3 Credits)
Introduces the analytical techniques available to assess performance of engineering processes as they relate to water, soil, and air treatment and quality. The basic principles of environmental management, economics of waste treatment, by-product reutilization, and energy cycles are introduced and discussed. Alternative technologies are introduced and evaluated mostly by assessing their potential to reduce waste, minimize energy use, and promote sustainability. Students' activities include, a weekly lab to provide hands-on experience with environmental quality measurements and treatment techniques; on-site visits to regional industries that undertake sustainable practices; and a final research project where experimental design and laboratory techniques are used to assess interactions between technologies and natural systems and their potential for reducing environmental impacts.
Prerequisite: ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE412 Environmental Engineering Unit Operations (3 Credits)
Examination of unit operations and processes encountered in environmental engineering field. Fundamental principles learned from previous classes will be applied into the design and operation of unit operations and processes, particularly in the area of water and wastewater treatment. Similar processes will be applied to air pollution control, solid waste disposal and hazardous waste treatment.
Prerequisite: ENCE305 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE420 Selection and Utilization of Construction Equipment (3 Credits)
Learn to evaluate and select construction equipment with a focus on mechanized equipment for earthwork and building construction.Learn about the parties involved in procurement, operation and maintenance, and how to cost-effectively plan, select, and utilize equipment for earthmoving, paving, formwork, trenching, rock excavation, tunneling, site preparation, and steel and concrete construction. Explore trends in equipment design, construction automation, and robotics.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor.

ENCE421 Legal Aspects of Architectural and Engineering Practice (3 Credits)
Learn the basic structure of the US legal system and court procedures and legal principles relevant to architectural and engineering design and construction contracts including principles of ethical, legal and professional conduct of engineers and architects.Topics include: contracts for design and construction, sales and warranties, torts and product liability, business agency and government agencies, professional liability of architects and engineers, labor laws, expert testimony, mediation and arbitration, tangible property including real estate, intellectual property including trademarks, patents and copyrights, insurance and sureties.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE422 Project Cost Accounting and Economics (3 Credits)
Learn: the fundamentals of accounting; project cost accounting principles as they apply to project management; project cost accounting; and the fundamentals of engineering economics.Topics include: project feasibility analysis; reading and analyzing financial statements; cash management; cash flow analysis; depreciation and taxes; and impact on profitability; the principles of activity based costing; net present value analysis; the framework for project performance measurement, cost performance indices, and earned value analysis.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE423 Project Planning, Estimating & Scheduling (3 Credits)
Learn the fundamentals of project planning, estimating, and scheduling. Understand the concepts of planning; to reduce uncertainty, improve efficiency of the operation, to set and meet objectives, and to provide a basis for monitoring and controlling the work. Be introduced to: the concepts of resource definition, assignment and management, and; the basics of project estimating (pricing) methods including global pricing strategies, types of estimates, pricing processes, overhead and profit, and project financing.Learn the basics of project scheduling including; bar charts, network-based methodologies, and linear scheduling techniques. Emphasis is placed on Critical Path Method (CPM) scheduling, a network based methodology. Be exposed to the use of scheduling software and will actually develop a CPM schedule for an actual construction project as part of a semester project.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE424 Communication for Project Managers (3 Credits)
Learn the fundamentals of communications for project managers. Emphasis is on interpersonal and group communications; through voice, electronic, and written messages; project cycle and reports and presentations during this cycle; and communications for employment.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE426 Construction Documentation and BIM Applications in Engineering and Construction (3 Credits)
Learn the basics of construction documentation methods, with particular emphasis on Building Information Modeling (BIM). Topics include: the fundamentals of assembly, coordination, and maintenance of construction documents and implementation of BIM techniques in the design and construction processes, and; a review of Autodesk, Revit, and Navisworks and other leading BIM software. Lectures from project management faculty supplemented by guest lecturers from the construction industry.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE431 Hydrologic Engineering (3 Credits)
An introduction to basic principles of hydrologic science including the hydrologic cycle, rainfall, surface runoff and streamflow. Special emphasis is placed on hydrologic engineering design of stormwater management and flood control facilities. Design projects are used to illustrate design practices.
Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE432 Ground Water Hydrology (3 Credits)
Concepts related to the development of the ground water resources, hydrology, hydrodynamics of flow through porous media, hydraulics of wells and basin-wide ground water development. Fundamentals of ground water pollution are introduced.
Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE441 Foundation Design (3 Credits)
Critical review of classical lateral earth pressure theories, analysis of retaining walls and reinforced earth walls, subsurface explorations, bearing capacity and settlement of shallow foundations, design of deep foundations that includes both pile foundations and drilled shafts.
Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE444 Experimental Methods in Geotechnical Structural Engineering (3 Credits)
In the geotechnical engineering part of the course, major soils testing and their interpretation including classification, compaction, strength, and compressibility will be undertaken. The structural engineering part of this course covers test planning, loading apparatus, instrumentation, data acquisition and data analysis, as well as basic aspects of structural testing techniques and shake-table test.
Prerequisite: ENCE353 and ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE447 Pavement Engineering (3 Credits)
Fundamental principles underlying the design, construction, maintenance and repair, and management of highway and airfield pavement systems. Pavement performance (functional/structural; evaluation); pavement mechanics (multi-layered elastic theory; slab theory); pavement materials (properties and characterization); environmental effects; current rigid and flexible design methods (new/rehabilitation); construction (new construction; maintenance/repair; rehabilitation); economic evaluation; pavement management.
Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE453 Computer-Aided Structural Analysis (3 Credits)
Computer-aided analysis of structural systems. Unified matrix formulation of stiffness and flexibility methods. Slope deflection method. Evaluation of truss, frame, and grid systems. Non-prismatic and curved elements. Error analysis and determination of ill-conditions. Introduction to finite element methods; formulation of simple two-dimensional elements. In laboratory, use and development of CAD software.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE454 Design of Concrete Structures (3 Credits)
Combined bending and compression, development and anchorage of reinforcement, deflections, design of slabs including one-way and two-way, design of footings, retaining walls, introduction to prestressed concrete, design of multi-story buildings.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.
Formerly: ENCE451.

ENCE455 Design of Steel Structures (3 Credits)
Behavior and design of members subjected to fatigue, and combined bending and compression; plate girders, composite beams, open-web joists and connections. Methods of allowable stress design, and load and resistance factor design. Elements of plastic analysis and design. Framing systems and loads for industrial buildings and bridges.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE466 Design of Civil Engineering Systems (3 Credits)
A major civil engineering design experience that emphasizes development of student creativity, development and use of design methodologies, evaluation of alternate solutions, feasibility considerations, and detailed system descriptions. Realistic design constraints including economic factors, safety, aesthetics, and reliability will be imposed. Students will work in design project groups and be required to exercise oral and written communication skills.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.
Additional Information: Must be taken in the semester in which the student graduates.

ENCE470 Highway Engineering (3 Credits)
Highway location and design, highway engineering economics, traffic engineering, traffic measurement devices and technologies. Includes discussion of technological advances in traffic flow and capacity, such as signal systems, corridor control, automatic driver information, incident detection and autonomous vehicle operation.
Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE472 Transportation Engineering (3 Credits)
Transportation engineering concepts including transportation systems analysis, airport systems, airline and airport operations, marine transportation and urban public transportation systems.
Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE488 Senior Thesis (3 Credits)
Advanced study in civil engineering problems with special emphasis on mathematical modeling and experimental methods.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.

ENCE489 Special Problems in Civil Engineering (1-4 Credits)
A course arranged to meet the needs of exceptionally well prepared students for study in a particular field of civil engineering.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.

ENEB - Embedded Systems & Internet of Things

ENEB302 Analog Circuits (4 Credits)
Foundations of circuits, focusing on applications including signal amplification, power amplification, instrumentation and filters. Fundamental concepts of analog circuits including analysis methods in time and complex domains, with emphasis on circuit topologies relevant in embedded systems. Intensive application of simulations and hands-on laboratory exercises.
Prerequisite: Minimum grade of C- in PHYS260 and PHYS261; and 1 course with a minimum grade of C- from (MATH246, MATH241, MATH240); and permission from the Embedded Systems & Internet of Things program required.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB304 Microelectronics and Sensors (3 Credits)
An overview of basic Internet of Things (IOT) architecture, core IOT hardware enablers, and IOT sensors and their implementation. This course covers commonly used analog amplifier designs and biasing, as well as characterization in the frequency and time domains. In addition, this course discusses the physical principles in RF communications as it relates to wireless personal and local networks (WPAN/WLAN) and short-range communication systems.
Prerequisite: Minimum grade of C- in ENEB302; and permission from the Embedded Systems & Internet of Things program required.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB340 Intermediate Programming Concepts and Applications for Embedded Systems (2 Credits)
Principles of programming for embedded systems development. Includes principles of software development in Unix, C and other high level languages, input/output, data types and variables, operators and expressions, program selection, repetition, functions, arrays, strings, introduction to algorithms, software projects, debugging, documentation. Includes hands-on applications in microprocessor environments.
Prerequisite: Completion of approved introductory programming course with a minimum grade of a 'C-'; and permission of the Embedded Systems & Internet of Things program required.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB341 Introduction to Internet of Things (3 Credits)
An introduction to the foundations of Internet of Things (IoT), including IoT devices, communications, connection considerations, back-end services/applications, and business models. This course looks at the IoTs as the general theme of physical/real-world things becoming increasingly visible and actionable via Internet and Web technologies. It also covers networking protocols and gateways, security and privacy, data analytics and cloud computing platforms.
Prerequisite: Permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB344 Digital Logic Design for Embedded Systems (4 Credits)
Hands on approach on foundations of digital logic for embedded systems applications; including input/output, logic gates, Karnaugh maps, latches, flip-flops and state-machines. This course also covers design and analysis of synchronous sequential systems, implementation with PLA's, multiplexers, decoders, encoders, binary arithmetic units such as adders and subtractors, conversions between decimal and arbitrary radix numbers, especially octal, hexadecimal, and binary representations, radix and diminished radix arithmetic, and character codes.
Corequisite: ENEB340; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB352 Introduction to Networks and Protocols (3 Credits)
An introduction to the principles of computer networking and covers the architecture and operation of the TCP/IP protocol stack. Topics will include fundamental networking concepts, the layers of the TCP/IP protocol stack, the packet structure and operation of each layer with detailed discussion on reliable data transfer, flow control, congestion control, routing algorithms, error detection, Local Area Networks (LANs), and multiple access protocols. The course will also cover wireless protocols relevant to Internet of Things (IoT) such as WLAN (IEEE 802.11), Zigbee (IEEE 802.15.4), and Bluetooth as well as some popular IoT application-layer and network-layer protocols including CoAP, AMQP, MQTT, XMPP and 6LoWPAN. As a part of the course work, the students will attend lab sessions where they will learn how to capture and analyze network traffic, how to configure networking functions on Linux systems, and how to operate and configure routers using Juniper Networks devices in a real-world lab environment.
Prerequisite: Minimum grade of C- in ENEB341; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB353 Computer Organization for Embedded Systems (3 Credits)
Overview of the basic principles of computer organization and design with emphasis on low resource microcontrollers common in IoT applications. The topics include assembly and machine instructions, data-path and controller design, pipelining and memory hierarchy.
Prerequisite: Minimum grade of C- in ENEB344 and ENEB354; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB354 Discrete Mathematics for Information Technology (3 Credits)
Foundations of discrete mathematics for information technology and embedded computing. Topics include sets, relations, functions and algorithms, proof techniques and induction, number theory, counting and combinatorics, and Graph theory.
Prerequisite: Minimum grade of C- in MATH141.
Restriction: Must be in the Embedded System and Internet of Things program.

ENEB355 Algorithms in Python (3 Credits)
A study of fundamental algorithmic problem-solving techniques in Python for today's large-scale computer systems as well as microcontrollers. Algorithms are instructions for solving problems and data structures are strategies for organizing information on computers. Efficient algorithms require appropriate data structures, and vice versa. Students will learn about the algorithms and data structures that form the building blocks of Python programming language. Student will also learn to analyze the cost of algorithms, according to how their running time or space requirements grows as data size grows.
Prerequisite: Minimum grade of C- in ENEB340 and ENEB354; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB443 Hardware/Software Security for Embedded Systems (3 Credits)
This course will provide an in-depth understanding of systems level software and hardware in designing industry-standard secured embedded systems. It aims to provide a comprehensive systems view of security, including hardware, platform software such as operating systems and integrated development environments, software development process, data protection protocols, and some aspects of cryptography. To goal is to expose students on how to develop embedded software and properly utilize platform components to ensure the highest levels of security.
Prerequisite: Permission from the Embedded Systems & Internet of Things program; and minimum grade of C- in ENEB454.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB444 Operating Systems for Embedded Systems (3 Credits)
Theory, design, implementation and analysis of low-resource computer operating systems for IoT applications. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and real-time operating systems. Optional topics may include communications protocols and computer security.
Prerequisite: Minimum grade of C- in ENEB340 and ENEB344; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB452 Advanced Software for Connected Embedded Systems (3 Credits)
Hardware and software foundations, evaluations and validation, application mapping, optimization and testing of cyber-physical systems, namely, embedded systems and communication technologies.
Prerequisite: Minimum grade of C- in ENEB454; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program; and senior standing.

ENEB454 Embedded Systems (3 Credits)
This course will provide students with the essential knowledge base that will enable them to tackle complex problems encountered in embedded systems design. The course will provide an overview of associated hardware components and software methodologies as well as the tools used in the development of modern embedded systems. Student will be exposed to the theoretical foundations which will be reinforced with carefully selected hands-on laboratory exercises, thereby getting a sense of how the theoretical concepts connect with the real-world embedded systems applications.
Prerequisite: Minimum grade of C- in ENEB353; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB455 Advanced FPGA System Design using Verilog for Embedded Systems (3 Credits)
A project-oriented course on digital system design using Verilog hardware description language (HDL) in an industry-standard design environment appropriate for embedded systems. Students will implement real-world designs in field programmable gate arrays (FPGAs) as well as test and optimize the FPGA. Students will also work in teams on multiple, medium-scale digital system design projects and make oral presentations and written reports.
Prerequisite: Minimum grade of C- in ENEB344 and ENEB340; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB457 Foundations of Databases for Web Applications (3 Credits)
An introduction to database systems and its applications to the Internet. It develops the database approach as a means to model the real world. The course will cover the fundamentals of the relational model, structured query language (SQL), data modeling, and database administration. This will cover an in-depth coverage of the relational model, logical database design, query languages, and other DB concepts including query optimization, concurrency control, transaction management, and log based crash recovery. In addition, students will be exposed to web-based database processing, data warehouse structures and fundamental concepts of nonrelational structured data storage (Big Data). Concepts will be illustrated with well-known Database Management System (DBMS) products such as MS Access, MS SQL Developer, Oracle Database XE, and MySQL Community Server.
Prerequisite: Minimum grade of C- in ENEB345, ENEB352, and ENEB355; and permission from the Embedded Systems & Internet of Things program.
Restriction: Must be in the Embedded Systems & Internet of Things program.

ENEB499 Senior Research Projects in Embedded Systems & Internet of Things (1-5 Credits)
Provides students in the Embedded Systems & Internet of Things (ESIOT) program with an opportunity to engage in independent research projects on advanced embedded systems topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing an ENEB499 project, the focus is to conduct an independent investigation of a technical theme by the student.
Prerequisite: Permission of the Embedded System and Internet of Things program.
Restriction: Must be in the Embedded System and Internet of Things program.
Repeatable to: 5 credits if content differs.

ENEE - Electrical & Computer Engineering

ENEE101 Introduction to Electrical & Computer Engineering (3 Credits)
An exploration of topics within Electrical & Computer Engineering (ECE). Students will be introduced to key elements of both the Electrical Engineering and Computer Engineering curriculum, including: circuits, computing systems and software, communications and controls, electrodynamics and waves, microelectronics, signal processing, and power systems.
Corequisite: MATH140. And corequisite: ENEE140 or CMSC131; or a score of 5 on the A Java AP exam; or a score of 4 or 5 on the AB Java AP exam; or satisfactory performance on the department's placement exam.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and students cannot enroll in ENEE101 and ENES100 in the same semester.

ENEE131 Technology Choices (3 Credits)
An exploration of the positive and negative effects of technology on society, via diverse criteria to assess the relative well being of individuals and society; an examination of how society can help shape the future of technology and the tools that can be used to make wise technology choices.

ENEE140 Introduction to Programming Concepts for Engineers (2 Credits)
Introduction to the programming environment: editing, compiling, UNIX, data types and variable scope; program selection, formatted/unformatted input/output, repetition, functions, arrays and strings.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in Engineering: Electrical program; or must be in Engineering: Materials Science program.

ENEE142 Programming Elements for pre-service STEM teachers (3 Credits)
An introduction to programming concepts and computational thinking with STEM applications for preservice teachers with little or no previous programming experience. Python 3 programming is introduced in the context of simple STEM applications and elements of engineering hardware that are needed to design, build, and run STEM experiments and applications are taught.
Restriction: Must be in a major in EDUC-College of Education.

ENEE148 Special Topics in Electrical Engineering (1-3 Credits)
Introductory Electrical Engineering topic selected as announced every semester.
Restriction: Must be in Engineering: Electrical program; and permission of ENGR-Electrical & Computer Engineering department.
Repeatable to: 6 credits if content differs.

ENEE150 Intermediate Programming Concepts for Engineers (3 Credits)
Advanced programming concepts: coding conventions and style; pointers; dynamic memory allocation and data structures; linked lists; graphs; abstract data types; object-oriented design. There will be team-based software projects and group presentations.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department. And ENEE140 or CMSC131; or score of 5 on the A Java AP exam; or score of 4 or 5 on the AB Java AP exam; or satisfactory performance on the department's placement exam.
Corequisite: MATH140.
Restriction: Must be in Engineering: Electrical program.
Credit Only Granted for: ENEE114 or ENEE150.
Formerly: ENEE114.

ENEE159 Introductory Topics in Computer Engineering (1-4 Credits)
Selected introductory level topics in computer engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 8 credits if content differs.

ENEE181 Explore Electronics (1 Credit)
A highly structured introduction to electronics and circuitry with a hands-on approach to learning. Students will build electronic devices (some of which they can keep) and test them. Among the topics covered are AC and DC circuits, BJTs, op-amps and special projects involving communication and sensing.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department.
Corequisite: MATH140.

ENEE200 Technology and Consequences: Engineering, Ethics, and Humanity (3 Credits)
What makes a technology socially responsible? At UMD, the Fearless Ideas campaign asks us to aim our enthusiasm for technology at big real problems. At the same time, we are coming to appreciate the increasingly complex nature of technological systems as they become integrated into all forms of infrastructure, we realize they may be unpredictable, interdependent on social and biological systems, and have unintended consequences. In this midst of this complexity, people make decisions with far reaching impacts. How then do we follow our passion for technology and innovation but also stay skeptical in a way that allows us to consider the potential and shortcomings of technology? Designed for both engineering and non-engineering students wishing to explore and assess the impact of engineering technology on society and the role of society in generating that technology.

ENEE205 Electric Circuits (4 Credits)
Design, analysis, simulation, construction and evaluation of electric circuits. Terminal Relationships. Kirchoff's laws. DC and AC steady state analysis. Node and mesh methods. Thevenin and Norton equivalent circuits. Transient behavior of first- and second-order circuits. Frequency response and transfer functions. Ideal op-amp circuits. Diode and transistor circuits.
Prerequisite: Minimum grade of C- in PHYS260; and minimum grade of C- in PHYS261; and permission of ENGR-Electrical & Computer Engineering department.
Corequisite: MATH246.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE204 or ENEE205.
Formerly: ENEE204.

ENEE222 Elements of Discrete Signal Analysis (4 Credits)
Discrete-time and continuous-time signals, sampling. Linear transformers, orthogonal projections. Discrete Fourier Transform and its properties. Fourier Series. Introduction to discrete-time linear filters in both time and frequency domains.
Prerequisite: Minimum grade of C- in MATH141; and permission of ENGR-Electrical & Computer Engineering department. And minimum grade of C- in ENEE140; or minimum grade of C- in CMSC131.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE222, ENEE241, or MATH242.
Formerly: ENEE241.

ENEE244 Digital Logic Design (3 Credits)
The design and analysis of combinational and synchronous sequential systems comprising digital logic gates and flip-flop memory devices; underlying tools such as switching and Boolean algebras and Karnaugh map simplification of gate networks; design and use of decoders, multiplexers, encoders, adders, registers, counters, sequence recognizers, programmable logic arrays (PLAs), read-only memories (ROMS, PROMS), and similar devices. Arbitrary radix conversion.
Prerequisite: Must have completed or be concurrently enrolled in CMSC132 or ENEE150; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Sophomore standing or higher; and must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE245 Digital Circuits and Systems Laboratory (2 Credits)
Introduction to basic measurement techniques and electrical laboratory equipment (power supplies, oscilloscopes, voltmeters, etc.). Design, construction, and characterization of digital circuits containing logic gates, sequential elements, oscillators, and digital integrated circuits. Introduction to digital design and simulation with the Verilog Hardware Description Language (HDL).
Prerequisite: Minimum grade of C- in ENEE244. And minimum grade of C- in ENEE150; or minimum grade of C- in CMSC132. And permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE299 Introductory Research Projects in Electrical and Computer Engineering (1-5 Credits)
The purpose is to provide first and second year students with an opportunity to engage in independent research projects on electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 299 project, the focus is to conduct an independent investigation of a technical theme by the student.
Prerequisite: Permission of the Department of Electrical & Computer Engineering.
Restriction: Must be in one of the following programs: Electrical Engineering (09090) or Computer Engineering (09991).
Repeatable to: 5 credits.
Additional Information: Credits may not be used for major requirements in either Electrical Engineering (09090) or Computer Engineering (09991).

ENEE303 Analog and Digital Electronics (3 Credits)
Conceptual operation of transistors and diodes. Large and small signal operation of BJTs and MOSFETs. Basic transistor configurations. Logic circuits and semiconductor memory. Multi-transistor circuits including differential amplifiers and current mirrors. Frequency response.
Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE307 Electronic Circuits Design Laboratory (2 Credits)
Students will design and test analog and digital circuits at the transistor level. FETs and BJTs will be covered. The laboratory experiments will be tightly coordinated with ENEE303 materials.
Prerequisite: Minimum grade of C- in ENEE303; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE313 Introduction to Device Physics (3 Credits)
Basic physics of devices including fields in solids, crystal structure, properties of electrons and holes. Current flow in Si using drift-diffusion model. Properties of the pn junction. Properties of devices including BJTs, FETs and their physical characteristics.
Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE312 or ENEE313.

ENEE322 Signal and System Theory (3 Credits)
Concept of linear systems, state space equations for continuous systems, time and frequency domain analysis of signals and linear systems. Fourier, Laplace and Z transforms. Application of theory to problems in electrical engineering.
Prerequisite: Minimum grade of C- in MATH246; and minimum grade of C- in ENEE222; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE324 Engineering Probability (3 Credits)
Axioms of probability; conditional probability and Bayes' rules; random variables, probability distribution and densities: functions of random variables: weak law of large numbers and central limit theorem. Introduction to random processes; correlation functions, spectral densities, and linear systems. Applications to noise in electrical systems, filtering of signals from noise, estimation, and digital communications.
Prerequisite: Minimum grade of C- in MATH246 and ENEE222; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: BMGT231, STAT400 or ENEE324.
Additional Information: Electrical Engineering majors may NOT substitute STAT400 for ENEE324.

ENEE350 Computer Organization (3 Credits)
Structure and organization of digital computers. Registers, memory, control and I/O. Data and instruction formats, addressing modes, assembly language programming. Elements of system software, subroutines and their linkages.
Prerequisite: Minimum grade of C- in ENEE244; and 1 course with a minimum grade of C- from (ENEE150, CMSC132); and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Formerly: ENEE250.

ENEE351 Algorithms and Data Structures (4 Credits)
Introduction to fundamental concepts in computer engineering, including topics in discrete math, data structures and algorithms. The course will also include a hands-on programming component. This course will provide students with the tools to design modular, time and space-efficient algorithms for real-world problems.
Prerequisite: Minimum grade of C- in ENEE150 and ENEE244.
Restriction: Permission of ENGR-Electrical & Computer Engineering department; and must be in the Computer Engineering Minor.
Credit Only Granted for: ENEE351 or CMSC351.

ENEE359 Intermediate Topics in Computer Engineering (1-3 Credits)
Selected intermediate level topics in computer engineering.
Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 100- and 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 6 credits if content differs.

ENEE380 Electromagnetic Theory (3 Credits)
Introduction to electromagnetic fields. Coulomb's law, Gauss's law, electrical potential, dielectric materials capacitance, boundary value problems, Biot-Savart law, Ampere's law, Lorentz force equation, magnetic materials, magnetic circuits, inductance, time varying fields and Maxwell's equations.
Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in MATH241, PHYS270, and PHYS271; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in Engineering: Electrical program.

ENEE381 Electromagnetic Wave Propagation (3 Credits)
The electromagnetic spectrum: Review of Maxwell's equations; the wave equation potentials, Poynting's theorem, relationship between circuit theory and fields; propagation of electromagnetic waves in homogeneous media and at interfaces; transmission line theory, waveguides, radiation and antennas.
Prerequisite: Minimum grade of C- in ENEE380; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in Engineering: Electrical program.

ENEE407 Design & Testing of RF and Microwave Devices (2 Credits)
An introduction to state of the art design, and testing techniques of RF and microwave devices. Designs, simulations and layout of different devices are performed using the software package ADS (Advance Design System). The course highlights wide range of engineering applications including terrestrial microwave links, satellite communications, broadcasting, mobile communications and radar.
Prerequisite: Minimum grade of C- in ENEE381; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE408 Capstone Design Project (3 Credits)
Culmination of prior course work in electrical and computer engineering. Utilization of modern design tools and methodologies for the design of components or systems under realistic constraints, with particular emphasis on teamwork and oral/written communication. Areas in which projects are currently offered include: microprocessor-based systems, digital systems, VLSI design (both digital and mixed-signal), and optical systems.
Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 6 credits if content differs.

ENEE411 Advanced Analog and Digital Electronics (3 Credits)
Examination of analog and digital device models for analysis, design, and simulation of transistor level electronic circuits, emphasizing Metal Oxide Silicon Field Effect Transistors (MOSFETs); fundamental single transistor configurations; frequency response, feedback, and stability of multi-transistor circuits, such as current mirrors, differential amplifiers, voltage references, operational amplifiers and data converters; complementary Metal Oxide Silicon (CMOS) implementations of static and clocked digital as well as mixed signal circuits.
Prerequisite: Minimum grade of C- in ENEE303.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and must have permission of the department.
Credit Only Granted for: ENEE411 or ENEE419A.
Formerly: ENEE419A.

ENEE413 Advanced Electronic Devices (3 Credits)
Advanced devices and their physical operation, providing a thorough description of those parts not usually covered in introductory electronics courses. These include Schottky and tunnel junctions, negative resistance devices used in wireless communication, homo-structure compound semiconductor transistors, hetero-structure (quantum effect) transistors, non-volatile memory devices, photonic devices such as LEDs and solid-state lasers, solar cells, photo-detectors and camera imagers, as well as bio-related components. Special consideration will be given to achieve an understanding of noise processes that limit electronic device performance. In all cases, system-level applications will be illustrated.
Prerequisite: Minimum grade of C- in ENEE303.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE413 or ENEE480.
Formerly: ENEE480.

ENEE416 Integrated Circuit Fabrication Laboratory (3 Credits)
Characterization of wafers and fabrication steps. Oxide growth, lithography, dopant diffusion, and metal deposition and patterning will be discussed in the lectures and carried out in the lab in fabricating NMOS transistor circuits. The transistor characteristics will be measured and related to the fabrication parameters.
Prerequisite: Minimum grade of C- in ENEE303; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Formerly: ENEE419J.

ENEE417 Microelectronics Design Laboratory (2 Credits)
Students design and build fairly sophisticated circuits, mainly composed of discrete transistors and integrated circuits. Many of the projects are designed to require that students synthesize from what they have learned in many of the disciplines in electrical engineering. Students learn they can actually use their knowledge to build something very practical, which may include a high-fidelity amplifier, a radio, a memory cell, a transmitter, etc.
Prerequisite: Minimum grade of C- in ENEE303; and minimum grade of C- in ENEE307; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE419 Topics in Microelectronics (1-3 Credits)
Selected topics of current importance in microelectronics.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 99 credits if content differs.

ENEE420 Communication Systems (3 Credits)
Fourier series, Fourier transforms and linear system analysis; random signals, autocorrelation functions and power spectral densities; analog communication systems: amplitude modulation, single-sideband modulation, frequency and phase modulation, sampling theorem and pulse-amplitude modulation; digital communication systems pulse-code modulation, phase-shift keying, differential phase shift keying, frequency shift keying; performance of analog and digital communication systems in the presence of noise.
Prerequisite: ENEE324; and completion of all lower-division technical courses in the EE curriculum.

ENEE425 Digital Signal Processing (3 Credits)
Sampling as a modulation process; aliasing; the sampling theorem; the Z-transform and discrete-time system analysis; direct and computer-aided design of recursive and nonrecursive digital filters; the Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT); digital filtering using the FFT; analog-to-digital and digital-to analog conversion; effects of quantization and finite-word-length arithmetic.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.

ENEE426 Communication Networks (3 Credits)
The main design issues associated with computer networks, satellite systems, radio nets, and general communication networks. Application of analytical tools of queuing theory to design problems in such networks. Review of proposed architectures and protocols.
Prerequisite: ENEE324; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.

ENEE428 Communications Design Laboratory (2 Credits)
EE capstone design course. Exploring the signal processing and communication systems theoretical concepts presented in ENEE 420 Communication Systems and ENEE 425 Digital Signal Processing by implementing them on actual DSP based hardware in real time.
Prerequisite: ENEE324; and completion of all lower-division technical courses in the EE curriculum.
Corequisite: ENEE425 or ENEE420.
Restriction: Must be in Engineering: Electrical program.

ENEE429 Topics in Communications (1-3 Credits)
Selected topics of current importance in communications.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 99 credits if content differs.

ENEE436 Foundations of Machine Learning (3 Credits)
A a broad introduction to the foundations of Machine Learning (ML), as well as hands-on experience in applying ML algorithms to real-world data sets. Topics include various techniques in supervised and unsupervised learning, as well as applications to computer vision, data mining, and speech recognition.
Prerequisite: 1 course with a minimum grade of C- from (ENEE324, STAT400); and 1 course with a minimum grade of C- from (ENEE150, CMSC216); and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Permission of ENGR-Electrical & Computer Engineering department. And must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; or must be in the ECE Department's Machine Learning notation program.
Credit Only Granted for: ENEE436, ENEE439M, or CMSC422.
Formerly: ENEE439M.

ENEE439 Topics in Signal Processing (1-3 Credits)
Selected topics of current importance in signal processing.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE440 Microprocessors (3 Credits)
Microprocessor architectures, instruction sets, and applications. Bus structures, memory, I/O interfacing. Assembly language programming, LSI device configuration, and the embedding of microprocessors in systems.
Prerequisite: ENEE350; and completion of all lower division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE445 Computer Laboratory (2 Credits)
This laboratory course focuses on the hardware/software interface in computer systems. Hand-on experiments are used to teach design, construction, analysis, and measurement of both hardware and software for embedded systems. Projects emphasize using microcontrollers for control, sensing, and communication through various I/O devices.
Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206. And minimum grade of C- in ENEE350; and must have earned a minimum grade of regular (letter) C- in all 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE446 Digital Computer Design (3 Credits)
Hardware design of digital computers. Arithmetic and logic units, adders, multipliers and dividers. Floating-point arithmetic units. Bus and register structures. Control units, both hardwired and microprogrammed. Index registers, stacks, and other addressing schemes. Interrupts, DMA and interfacing.
Prerequisite: ENEE350; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE446 or CMSC411.

ENEE447 Operating Systems (4 Credits)
The course will present the theory, design, implementation and analysis of computer operating systems. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and protection and security in operating systems. Optional topics may include communications protocols, computer security, and real-time operating systems. The lectures will be complemented with a significant level of programming, bringing up a simple operating system from scratch, concurrently as the topics are discussed in lecture. A weekly recitation section will provide TA support and an informal laboratory atmosphere. Each student will have their own board, so development will be done largely outside the classroom at each student's pace.
Prerequisite: 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457); and permission of ENGR-Electrical & Computer Engineering department; and (ENEE350, CMSC330, and CMSC351).
Restriction: Must be in Engineering: Computer program; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE447, CMSC412, or ENEE459S.
Formerly: ENEE459S.

ENEE456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses). Or permission of instructor. Also offered as: CMSC456, MATH456.
Credit Only Granted for: MATH456, CMSC456 or ENEE456.

ENEE457 Computer Systems Security (3 Credits)
Theoretical and practical aspects of computer systems security. Topics covered include symmetric/asymmetric encryption, message authentication, digital signatures, access control, as well as network security, web security and cloud security. Students acquire tools necessary for designing secure computer systems and programs and for defending against malicious threats (e.g., viruses, worms, denial of service).
Prerequisite: Minimum grade of C- in ENEE350; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: CMSC414, ENEE459C or ENEE457.
Formerly: ENEE459C.

ENEE459 Topics in Computer Engineering (1-3 Credits)
Selected topics of current importance in computer engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE460 Control Systems (3 Credits)
Mathematical models for control system components. Transform and time domain methods for linear control systems. Introductory stability theory. Root locus, bode diagrams and Nyquist plots. Design specifications in the time and frequency domains. Compensation design in the time and frequency domain. Introduction to sampled data systems.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.

ENEE461 Control Systems Laboratory (3 Credits)
Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control and familiarize them with the characteristics and limitations of real control devices. They will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.
Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in ENEE322; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE461, ENME461, or ENME489N.

ENEE463 Digital Control Systems (3 Credits)
Introduction to techniques for the analysis and design of linear control systems and implementation of control systems using digital technology. Topics include linearization, solution of linear equations, z-transforms and Laplace transforms, design of linear controllers, optimal control, and digital implementation of control designs. Students will use MATLAB for the solution of problems and the design of control systems.
Prerequisite: ENEE322; and completion of lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Formerly: ENEE469E.

ENEE469 Topics in Controls (1-3 Credits)
Selected topics of current importance in controls.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Repeatable to: 99 credits if content differs.

ENEE473 Electrical Machines Laboratory (2 Credits)
Experiments involving single and three phase transformers, induction machines, synchronous machines and D.C. machines.
Prerequisite: Minimum grade of C- in ENEE205; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Recommended: ENEE322.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE474 Power Systems (3 Credits)
Interconnected power systems, transmission lines, load flow studies, unit commitment and economic dispatch. Three phase networks, machine models. Symmetrical components, fault analysis and unbalanced operation. Power system transients, stability and numerical methods in power system analysis.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.

ENEE475 Power Electronics (3 Credits)
This course is suitable for undergraduate and graduate students who want to learn the basic principles of power electronics and its applications. Special emphasis is placed on interdisciplinary nature of power electronics. Strong and intimate connections between power electronics and circuit theory, electronic circuits, semiconductor devices, electric power, magnetic, motor drives and control are stressed.
Prerequisite: Minimum grade of C- in ENEE303; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE476 Renewable Energy (3 Credits)
Solar Energy Conversion Systems: History of Photovoltaic (PV) Systems, PV Cell, Module and Array Models and Equivalent Circuits, Characteristic Resistance, Fill Factor, Effects of Parasitic Resistances, Mismatch Effects, Shading, Bypass Diodes, Sun Tracking Systems, Maximum Power Point Tracking (MPPT) Techniques, Isolated and Non-isolated Switch-mode DC/DC for PV Systems, Inverter Design and Control, Sizing the PV Panel and Battery Pack in PV Applications. Wind Energy Conversion Systems: Introduction to Wind Energy Harvesting, Horizontal and Vertical Wind Systems, Fundamentals of Wind Energy Harvesting Systems, Variable Speed and Fixed Speed Wind Energy Conversion Systems (WECS), Wind Turbines and Different Electrical Machines in Wind Applications, Induction Machine and Dynamic Model of Induction Machines, Synchronous Generators and Dynamic Model of SG, Control of Wind Energy Conversion Systems.
Prerequisite: Minimum grade of C- in ENEE303; and completion of all lower-divisions ENEE courses with a C- or better.
Restriction: Permission of ENGR-Electrical & Computer Engineering department; and must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Credit Only Granted for: ENEE419R or ENEE476.
Formerly: ENEE419R.

ENEE486 Optoelectronics Lab (2 Credits)
Hands-on experience in performing measurements in optics and electro-optics. Basics of optics, light detectors, Fourier optics, gratings and spectrometers, pulsed dye lasers, fiber optics, electro-optics, and acousto-optics.
Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206. And minimum grade of C- in PHYS271 and PHYS270; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE488 Independent Study in Electrical and Computer Engineering (1-3 Credits)
The purpose is to provide students with an opportunity for independent study projects on advanced electrical and computer engineering topics. These projects typically involve academic investigations of technical themes that are not addressed in the established elective and special topics courses taught by the department on a regular basis. Study plans are tailored to students educational goals but are approved and supervised by faculty.
Prerequisite: Must have completed and earned a minimum grade of regular (letter) C- in all lower-division EE or CP tech electives; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 9 credits if content differs.
Additional Information: A total of 5 credits combined of ENEE488 and ENEE499 can count towards a degree in electrical and computer engineering.

ENEE489 Topics in Electrophysics (1-3 Credits)
Selected topics of current importance in electrophysics.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE490 Physical Principles of Wireless Communications (3 Credits)
Prerequisite: ENEE381.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE490 or ENEE498B.
Formerly: ENEE498B.

ENEE496 Lasers and Electro-optic Devices (3 Credits)
Modern physical optics: Gaussian beams, optical resonators, optical waveguides; theory of laser oscillation, rate equations; common laser systems. Selected modern optoelectronic devices like detectors and modulators. Role of lasers and optoelectronics in modern technology.
Prerequisite: ENEE381; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE498 Topics in Electrical Engineering (1-3 Credits)
Selected topics of current importance in electrical engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.
Repeatable to: 99 credits if content differs.
Formerly: ENEE488.

ENEE499 Senior Projects in Electrical and Computer Engineering (1-5 Credits)
The purpose is to provide students with an opportunity to engage in independent research projects on advanced electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 499 project, the focus is to conduct an independent investigation of a technical theme by the student. The project may be used to satisfy the advanced lab requirement if it is approved as a primarily - experimental research project. In that case, the student will enroll in ENEE499L.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.
Repeatable to: 9 credits if content differs.
Formerly: ENEE418.
Additional Information: A total of 5 credits combined of ENEE448 and ENEE499 can count toward a degree in electrical or computer engineering.

ENES - Engineering Science

ENES100 Introduction to Engineering Design (3 Credits)
Students work as teams to design and build a product using computer software for word-processing, spreadsheet, CAD, and communication skills.
Corequisite: MATH140.

ENES102 Mechanics I (3 Credits)
The equilibrium of stationary bodies under the influence of various kinds of forces. Forces, moments, couples, equilibrium, trusses, frames and machines, centroids, moment of inertia, beams, friction, stress/strain, material properties. Vector and scalar methods are used to solve problems.
Corequisite: MATH140.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Formerly: ENES110.

ENES104 Introduction to Materials and their Applications (3 Credits)
Creating a new technology, nanotechnology, biotechnology, or plastic electronics requires developing the materials first. In this class we'll explore materials science and engineering where engineers change the properties and/or behavior of a material to make them more useful. The course covers the chemical composition, phase transformations, corrosion and mechanical properties of materials as well as their electrical, thermal, magnetic and optical properties. Learn about the unlimited possibilities for innovation and adaption through the exciting field of nanotechnology.
Restriction: Must be in the Young Scholars Program.

ENES106 Achieving Success in Mathematics (3 Credits)
An exploration of the skills and habits needed to successfully complete introductory mathematics courses.
Restriction: Permission of ENGR-A. James Clark School of Engineering.

ENES107 Achieving College Excellence (1-3 Credits)
An exploration of the skills and habits needed to successfully complete the introductory chemistry course for engineering students. Course will also include strategies for a successful first year experience.
Restriction: Permission of ENGR-A. James Clark School of Engineering.

ENES108 Achieving College Success: First Year Transition (1 Credit)
An exploration of the skills and habits needed to successfully complete the first year of study for Science, Technology, Engineering, and Mathematics (STEM) majors. This course is an extension of the college success seminars taught during the Summer Bridge Program.
Restriction: Permission of ENGR-A. James Clark School of Engineering.
Repeatable to: 2 credits if content differs.

ENES113 Virtus Living and Learning Community Seminar I (1 Credit)
The seminar focuses on personal and professional development related to the field of engineering with a strong emphasis on clarifying career goals and decisions. Additional topics include an introduction to basic tools, undergraduate research opportunities, and campus and engineering resources.
Restriction: Must be in first year Virtus program.

ENES114 Virtus Seminar II (1 Credit)
Focus on personal and professional development with engineering with a strong emphasis on career development. Learn to employ strategies and skills for academic and professional success.
Prerequisite: ENES113.
Restriction: Students must be participants in the Virtus Living and Learning Community.

ENES115 FLEXUS Living and Learning Community Seminar I (1 Credit)
The seminar focuses on personal and professional development related to the field of engineering with a strong emphasis on clarifying career goals and decisions. Additional topics include an introduction to campus and engineering resources, basic tools, and undergraduate research opportunities. Students will discuss issues of concern through a variety of book readings, self-reflections, and panel discussions with practicing women engineers.
Restriction: Must be a first year FLEXUS Participant.

ENES116 FLEXUS Living and Learning Community Seminar II (1 Credit)
The seminar focuses on personal and professional development by enhancing technical ability, understanding educational options through minors and student projects in engineering, identifying and employing strategies and skills for academic and professional success, and developing career commitment through networking and mentoring. Students develop professional portfolios in preparation for a future internship or job.
Prerequisite: ENES115.

ENES140 Discovering New Ventures (3 Credits)
Students explore dynamic company startup topics by working in teams to design a new venture. This multi-disciplinary course helps students to learn the basic business, strategy, and leadership skills needed to launch new ventures. Topics include learning how to assess the feasibility of a startup venture, as well as how to apply best practices for planning, launching, and managing new companies. Students discuss a wide range of issues of importance and concern to entrepreneurs and learn to recognize opportunities, assess the skills and talents of successful entrepreneurs, and learn models that help them navigate uncertainty.
Additional Information: This course may count as an elective for a student at the University of Maryland, depending on the student's specific degree program. It cannot be counted towards the requirements for the Smith School of Business Entrepreneurship Fellow Program.

ENES150 Transfer LEAD Seminar I (2 Credits)
This seminar focuses on personal and professional development for transfer students in the A. James Clark School of Engineering. Transfer LEAD is a program for Engineering transfer students with four main outcomes: Learn, Educate, Adapt, Direct. Topics covered in this course include campus resources, student identity development, leadership development, and student outreach. Students will learn educational theory in order to develop a sense of leadership as students in the Clark School of Engineering.
Restriction: Eligible external transfer students in the A. James Clark School of Engineering; and permission of instructor.

ENES181 Engineering & The Grand Challenges (1 Credit)
Introduction to the various fields of engineering and the necessary context for students to fully engage in selected National Academy of Engineering's Grand Challenges such as economical solar energy, carbon sequestration, access to clean water, engineering better medicines, restoring urban infrastructure and personalized learning. The lectures and activities will provide an introduction to the engineering disciplines, NAE Grand Challenges, STEM cultures, and research.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; and must be a new freshman or transfer student.

ENES190 Introduction to Design and Quality (4 Credits)
QUEST students learn and apply design practices to design new products and services. Working in multidisciplinary teams, students use quality and process improvement methods to identify, analyze, and recommend solutions to real-world problems.
Prerequisite: Must be in the Quest program. Cross-listed with BMGT190.
Credit Only Granted for: BMGT190 or ENES190.

ENES192 Engineering For Us All (3 Credits)
Students are challenged to uncover hidden valuable connections among a variety of disciplines, while creatively seeking and solving problems as a team. Students learn and practice skills for how groups function and identify innovation while addressing the tensions between our inherent drives to seek and solve, to share, and to sell.
Prerequisite: MATH107.
Additional Information: Recommended for non-engineering majors.

ENES206 Introducing Safety into the Design Process (3 Credits)
The development of any object or infrastructure (from a chair to a bridge) requires a design process. The design process takes all the variables of functionality, aesthetics, cost, etc. and determines an optimized solution. Some of the variables are quantitative but some are subjective. Depending on the object or infrastructure, some variables will take more importance than others will. The design of an ornament or jewelry will require an emphasis on aesthetics. The design of a vehicle or a bridge will emphasize its functionality or strength. Independent of the optimization process followed the use of all objects or infrastructure has to be safe. Safety is a social responsibility that needs to be guaranteed. This course will address how safety is introduced into the design process, how technology advancements and complexity challenge safety and how the social responsibility of safety is embedded in regulatory frameworks and in professional practice.
Restriction: Sophomore standing or lower.

ENES210 Entrepreneurial Opportunity Analysis and Decision-Making in 21st Century Technology Ventures (3 Credits)
This multi-disciplinary course helps students learn the principles of entrepreneurial opportunity analysis and decision-making in an increasingly dynamic and technically-inclined society. Emphasis is placed on how aspiring technology entrepreneurs can develop their entrepreneurial perspectives to develop winning entrepreneurial plans for their future ventures.
Credit Only Granted for: ENES210 or ENES461.

ENES211 Introduction to Global Entrepreneurship (1 Credit)
Examines the opportunities and challenges of entrepreneurship and innovation from an international perspective through lectures, case studies, instructors, and guest speakers with international experiences and other relevant activities. Focuses on the benefit for every entrepreneur and innovator to understand the cultural, strategic and operational aspects related to conducting entrepreneurial ventures in an international context.

ENES213 Virtus Living and Learning Community Seminar III (1 Credit)
The seminar focuses on personal, academic and professional success by cultivating leadership skills, developing academic and technical ability and encouraging self awareness, identifying and employing strategies for academic and professional success, further enhancing career development through networking and mentoring and developing awareness of diversity issues.
Prerequisite: ENES113.
Restriction: Must be a participant in the second year of the Virtus program.

ENES214 Virtus Seminar IV (1 Credit)
Students continue to develop their leadership and mentoring skills, participate in networking opportunities and explore their interest in special engineering topics.
Prerequisite: Students must have completed ENES213.
Restriction: Students must be participants in the Virtus Living and Learning Community.

ENES215 FLEXUS Living and Learning Community Seminar III (1 Credit)
The seminar focuses on personal, academic and professional success by cultivating leadership skills, developing self-confidence and self-efficacy in academic and technical ability and encouraging self awareness, identifying and employing strategies for academic and professional success, further enhancing career development through networking, mentoring and role modeling, and developing awareness of diversity issues, specifically gender diversity.
Prerequisite: ENES115 and ENES116.
Restriction: Must be a second year FLEXUS participant.

ENES216 FLEXUS Living and Learning Community Seminar IV (1 Credit)
The seminar focuses on gender diversity and its cross-sections with culture. Students continue to enhance their leadership and mentoring skills, participate in networking opportunities with women in leadership roles and careers in engineering, and engage in opportunities for outreach and service-learning. Students will also complete a culminating semester project.
Prerequisite: ENES115, ENES116, and ENES215.
Restriction: Restricted to second year FLEXUS participants.

ENES220 Mechanics II (3 Credits)
Stress and deformation of solids-rods, beams, shafts, columns, tanks, and other structural, machine and vehicle members. Topics include stress transformation using Mohr's circle; shear and moment diagrams; derivation of elastic curves; and Euler's buckling formula. Design problems related to this material are given in lab.
Prerequisite: Minimum grade of C- in ENES102; and (MATH141 and PHYS161).
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; and must not be in Engineering: Electrical program.

ENES221 Dynamics (3 Credits)
Systems of heavy particles and rigid bodies at rest and in motion. Force-acceleration, work-energy and impulse-momentum relationships. Motion of one body relative to another in a plane and in space.
Prerequisite: Minimum grade of C- in ENES102; and (MATH141 and PHYS161).
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENES232 Thermodynamics (3 Credits)
Introduction to thermodynamics. Thermodynamic properties of matter. First and second laws of thermodynamics, cycles, reactions, and mixtures.
Prerequisite: PHYS261 and PHYS260.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Credit Only Granted for: BIOE232, CHBE301, ENCH300, ENES232, ENME320, or ENME232.
Formerly: ENME232 and ENME320.

ENES259 Study Abroad Special Topics in Engineering II (1-6 Credits)
Special topics course in engineering science taken as part of an approved study abroad program.
Repeatable to: 6 credits if content differs.

ENES269 Topics in Grand Challenges for Engineering in a Global Context (3 Credits)
Special topics course that explores the grand engineering challenges facing the world from a technical, cultural, political, and economic perspective, as well as solutions developed through innovation and technology. Topics can include energy, environment, urban infrastructure, health, safety and security, and engineering the tools of discovery.
Repeatable to: 6 credits if content differs.
Additional Information: Course includes a study abroad component. No engineering background is required.

ENES288 Engineering Leadership Seminar (1-4 Credits)
Engineering leadership will be examined at the individual, team and organizational levels.
Corequisite: ENES100; or permission of instructor.

ENES304 RISE Seminar (1 Credit)
This is the first semester of a two semester sequence taken by RISE students in their first semester in the program. T he purpose of ENES 304 is for RISE students to learn about leadership, acquire leadership skills, and understand how to integrate leadership theories and concepts in engineering practice. There will be a mix of formal lectures by course faculty and lectures by distinguished speakers who can provide their own experience of what leadership means and how it is acquired. Students will explore their own leadership philosophy and leadership capacities in the context of group practice. Students will make meaning of general leadership theories and concepts and understand how to apply them to engineering industry. Students will also gain understanding of leadership through the stories shared by distinguished speakers with industrial, governmental and academic experience.
Restriction: Must be in the Engineering RISE Leadership Program; and permission of ENGR-A. James Clark School of Engineering.

ENES305 RISE Leadership Seminar (1 Credit)
This is the second semester of a two semester sequence taken by RISE students in their final semester in the program. The purpose of ENES 305 is for RISE students to learn about leadership, acquire leadership skills, and understand how to integrate leadership theories and concepts in engineering practice. There will be a mix of formal lectures by course faculty and lectures by distinguished speakers who can provide their own experience of what leadership means and how it is acquired. Students will explore their own leadership philosophy and leadership capacities in the context of group practice. Students will make meaning of general leadership theories and concepts and understand how to apply them to engineering industry. Students will also gain understanding of leadership through the stories shared by distinguished speakers with industrial, governmental and academic experience.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and ENES304.

ENES316 Global Leadership in Engineering, Business, & Technology (3 Credits)
An introduction to global leadership research, theories, and practice with an emphasis on applied dimensions of global leadership in the engineering, business, and technology sectors. This course prepares students to further their knowledge and capacities for global leadership to be successful in industry.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or permission of instructor.
Additional Information: Students will be required to participate in off-campus industry visits outside of the formal class meeting time.

ENES317 Introduction to Engineering Leadership (3 Credits)
Focus is placed on general leadership theories in addition to real-world applications of leadership in engineering education, industry, and government.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering.

ENES388 Engineering Honors Seminar (1 Credit)

ENES389 Selected Topics (3 Credits)
Repeatable to: 6 credits if content differs.

ENES390 Designing Innovative Systems (3 Credits)
QUEST students develop an understanding of complex systems that incorporate elements of business and technical design and analyze how these systems evolve over time and may be shaped by technology disruptions, internal decisions, and external forces. Students apply these concepts to real-world complex systems in a team environment.
Prerequisite: ENES190 or BMGT190.
Restriction: Must be in the QUEST program. Cross-listed with BMGT390.
Credit Only Granted for: BMGT390 or ENES390.

ENES397 Mentoring Multidisciplinary Teams (3 Credits)
QUEST students practice essential skills for mentoring and coaching multidisciplinary teams. These include effective communications, facilitation, conflict resolution, and the ability to motivate. Students will practice these skills as mentors for student teams from BMGT/ENES 190H. In the process, they will strengthen their knowledge of design and quality techniques.
Restriction: Restricted to QUEST Program (TQMP) students. Also offered as: BMGT397.
Credit Only Granted for: BMGT397 or ENES397.

ENES424 Engineering Leadership Capstone (3 Credits)
The work initiated in the Introduction to Engineering Leadership course brings together further exploration of leadership styles and concepts.
Prerequisite: ENES472, ENCE320, and ENES317; and permission of ENGR-A. James Clark School of Engineering.
Recommended: ENES100.

ENES440 Science, Technology and Society: Certificate Program Capstone (3 Credits)
Capstone research seminar for students in the Science, Technology and Society certificate program.
Restriction: Must be in the Science, Technology and Society certificate program; or permission of ENGR-A. James Clark School of Engineering.
Credit Only Granted for: ENES440 or UNIV401.
Formerly: UNIV401.

ENES458 Topics in International Engineering (1-4 Credits)
A variety of topics related to engineering in a global context are discussed including cultural aspects, cross-cultural communication, international standards and law, and engineering and technology issues, business behavior, attitudes and values of selected countries and regions.
Prerequisite: ENES100.
Repeatable to: 12 credits if content differs.

ENES459 Study Abroad Special Topics in Engineering IV (1-6 Credits)
Special topics course in engineering science taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENES460 Fundamentals of Technology Start-Up Ventures (3 Credits)
Fundamental aspects of creating, organizing, funding, managing, and growing a technology startup venture. This multidisciplinary course will draw on management, business, legal, financial, as well as technical, concepts. Students form teams and develop a business plan for a technology company, based on each team's own business idea and then present the plan to a panel of outside experts.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES460, BMGT461, SMLP470 or HLMN470.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES461 Advanced Entrepreneurial Opportunity Analysis in Technology Ventures (3 Credits)
Explores the factors that influence entrepreneurial opportunity analysis in technology-based ventures. Uses a cognitive theoretical framework to examine the integration of motivation, emotions and information processing modes to make complex entrepreneurial decisions in technology venture environments.
Credit Only Granted for: ENES210 or ENES461.

ENES462 Marketing High-Technology Products and Innovations (3 Credits)
Examines the opportunities and challenges of marketing high-technology products in turbulent environments requiring rapid decision making with incomplete information. Explores how innovations are introduced at frequent intervals, research-and-development spending is vital, and there are high mortality rates for both products and businesses.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES463 Strategies for Managing Innovation (3 Credits)
Emphasizes how the technology entrepreneur can use strategic management of innovation and technology to enhance firm performance. Examines the process of technological change, the ways that firms come up with innovations, the strategies that firms use to benefit from innovation, and the process of formulating technology strategy. Provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES463, BMGT467, SMLP473 or HLMN472.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES464 International Entrepreneurship and Innovation (3 Credits)
Focuses on the need for every entrepreneur and innovator to understand the global market in today's hypercompetitive world, and to appreciate how to compete effectively in domestic markets by managing international competitors, suppliers, and influences. Explore how the distinction between foreign and domestic markets is becoming less pronounced. Develop skills to identify and manage opportunities on a global basis.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES466 Leading and Financing the Technology Venture (3 Credits)
Focuses on the challenges of leading and financing new technology ventures. Leadership topics include team selection and formation, aligning rewards with relative contributions of team members, and how early decisions can enable or prevent founders from achieving results that align with their individual motivations for becoming an entrepreneur. Essential tools and methods for building a strong financial foundation for a new technology venture are examined. Includes important accounting principles as well as methods for keeping financial control of the technology venture. Insights are shared on navigating the multitude of financial barriers that may block your entrepreneurial success, as well as how to grow the technology venture from concept through launch.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES466, BMGT365, SMLP471 or HLMN471.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES467 Engineering for Social Change (3 Credits)
Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.
Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering. Cross-listed with ENME467.
Credit Only Granted for: ENES467 or ENME467.

ENES471 Legal Aspects of Entrepreneurship (3 Credits)
Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES472 International Business Cultures in Engineering and Technology (3 Credits)
The goal is to provide students with an understanding of cultural aspects pertaining to global business and engineering and develop the cultural understanding, attitudes, and communication skills needed to function appropriately within an increasingly global and multicultural working environment.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering.
Restriction: Sophomore standing or higher.
Credit Only Granted for: ENES472, SLLC471, or SLLC473.

ENES474 Global Perspectives of Engineering (3 Credits)
Faculty supervised research on aspects of engineering in a foreign country including leading fields of research, key world markets, and the culture of the engineering workplace. Students will produce a comprehensive report exhibiting their expertise in their chosen country and the field of engineering within.
Prerequisite: ENES100; or permission of ENGR-A. James Clark School of Engineering.
Restriction: Must be in the International Engineering Minor.
Credit Only Granted for: ENES458M or ENES474.
Formerly: ENES458M.

ENES478 Topics in Engineering Education (1 Credit)
Topics related to teaching engineering courses, particularly project-based courses. Topics can include learning styles, student development theory, multicultural issues in teaching, facilitating team experiences, assessment, and academic integrity.
Restriction: Must be in the Engineering Teaching Fellow program.
Repeatable to: 3 credits if content differs.

ENES480 Engineering Honors Seminar I (1 Credit)
Introduction to engineering leadership, professionalism, and ethics. Discussions of leadership style, elements of success, professional communication, codes of ethics, handling of ethical dilemmas, and the characteristics of a professional.
Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES481 Engineering Honors Seminar II (1 Credit)
Introduction to engineering creativity and innovation in engineering. Application of methods of creativity to topics in communication, conducting research, and leadership.
Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES489 Special Topics in Engineering (3-6 Credits)
Special topics in engineering.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering.
Repeatable to: 6 credits if content differs.

ENES490 QUEST Capstone Professional Practicum (4 Credits)
The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.
Prerequisite: ENES390 or BMGT390. Cross-listed with: BMGT490.
Credit Only Granted for: BMGT490 or ENES490.

ENES491 Scoping Experiential Learning Projects (3 Credits)
QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.
Prerequisite: BMGT190 or ENES190.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with BMGT491.
Credit Only Granted for: BMGT491 or ENES491.

ENES498 Special Topics in Entrepreneurship (3 Credits)
This entrepreneurship seminar and case study-based course will explore technology entrepreneurship with a focus on leadership, marketing, team-building, and management of new technology ventures and assumes baseline knowledge of entrepreneurship. Students will learn skills needed to succeed as a technology entrepreneur and how to apply best practices for planning, launching, and growing new companies. This course is a requirement of the Hinman CEOs program.
Restriction: Must be in Hinman CEOs Program.
Repeatable to: 12 credits if content differs.

ENES499 Senior Projects in Engineering (3 Credits)
Students will work in large teams to solve a multidisciplinary research/design problem. The course will begin with students identifying opportunities, brainstorming project concepts to address these opportunities, applying lean startup and design thinking strategies, and then selecting/proposing a project for the semester. Acceptable projects will require the multidisciplinary design, construction and testing of a project within limited budget and time constraints.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and completion of all 1XX and 2xx level (lower-division) technical courses in engineering major with a C- or better.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Repeatable to: 6 credits if content differs.

ENFP - Engineering, Fire Protection

ENFP101 Introduction to Fire Protection Engineering (1 Credit)
This course will introduce students to the impact of fire on people, property and the environment and methods to mitigate the threat of fire. Student teams will apply the principles of fire behavior and fire safety systems covered in the first half of the course to design, build and test a fire safe, small-scale apartment. A final experiment will be conducted to provide an assessment of the complete designs of each team.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP108 or ENFP101.
Formerly: ENFP108.

ENFP102 Fire Safe Building Designs (3 Credits)
Students are introduced to Fire Protection Engineering (FPE). Discussions on contemporary fire safety topics are designed to raise your interest and understanding of fire, its impact on people, property and the environment and methods to mitigate the threat of fire. Students will have hands-on experiences through a set of demonstrations and a final experiment to explore fire behavior and the performance of fire safety systems. The final experiment will apply the principles of fire behavior and fire safety systems to build and test a fire safe, small-scale residence.

ENFP201 Numerical Methods with MatLab (3 Credits)
A broad range of numerical methods are illustrated and applications related to engineering problems are implemented using Mat Lab thus providing a working knowledge of this computational tool. The topics covered in the course include: finding roots of equations with bracketing and open methods; solving linear systems of equations with matrices, Gauss elimination, LU decomposition, and iterative methods; linear regression, polynomial interpolation; numerical integration and numerical differentiation; ordinary and partial differential equations. Additional topics such as optimization, eigenvalues, Fourier analysis, splines, and Romberg integration may be included as time allows.
Prerequisite: MATH141.
Restriction: Must be in Engineering: Fire Protection program.

ENFP250 Introduction to Life Safety Analysis (3 Credits)
Introduction to fire protection engineering and building regulation, building safety systems, and egress system design. Evacuation modeling. Human behavior in fires. Tenability Analysis.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP250 or ENFP251.
Formerly: ENFP251.

ENFP300 Fire Protection Fluid Mechanics (3 Credits)
Presents students with the fundamental properties of fluids and fluid movement. Both static and dynamic fluid problems will be considered with an emphasis on fire protection systems.
Prerequisite: MATH246 and ENFP201; and must have completed or be concurrently enrolled in PHYS260, PHYS261, and ENES232.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENFP310 Water Based Fire Protection Systems Design (3 Credits)
Introduction to aqueous fire suppression. Discussion of key fluid dynamics and heat transfer processes in aqueous fire suppression. System design and performance analysis based on national standards, hydraulic theory and elementary fluid dynamics and heat transfer.
Prerequisite: ENFP300.
Corequisite: ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP312 Heat and Mass Transfer (3 Credits)
Fundamentals of heat and mass transfer. Conduction, convection, and radiation modes of heat transfer. Diffusion concepts and evaporation phenomena. Problem solving techniques with application to fire problems.
Prerequisite: ENES232 and ENFP300.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP312 or ENME332.

ENFP350 Professional Development Seminar (1 Credit)
An integrative, upper level professional development seminar covering topics such as engineering ethics, professional licensing, codes and standards, intellectual property, career selection and various contemporary issues in fire protection engineering.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Junior standing or higher.

ENFP405 Structural Fire Protection (3 Credits)
Effects of elevated temperature on structural materials; steel, concrete, wood, gypsum, glass and reinforced plastics. Experimental evaluation of fire resistance of building assemblies. Analytical methods to evaluate fire resistance of structural members.
Prerequisite: ENES220.
Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP405 or ENFP621.

ENFP410 Special Hazard Suppression Systems (3 Credits)
Analysis of application and theory of fire suppression systems. The key elements of fire suppression systems will be discussed along with how they interact for effective fire suppression design. Physical mechanisms for a variety of fire suppression approaches will be discussed including hose streams, sprinklers, water mist, foam, clean agents, and chemical agents.
Prerequisite: ENFP310 and ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP410 or ENFP653.

ENFP411 Risk-Informed Performance Based Design (3 Credits)
Appraisal and measurement of fire safety. Application of systems analysis, probability theory, engineering economy and risk management in the identification and synthesis of components of fire protection engineering. Methods for the development of criteria for the design, evaluation and assessment of fire safety or component hazards.
Restriction: Senior standing; or permission of ENGR-Fire Protection Engineering department.

ENFP413 Human Response to Fire (3 Credits)
Fractional effective dose (FED) methods for predicting time to incapacitation and death of fires for use in fire safety calculations. Physiology and toxicology of the fire effluent components, decomposition chemistry of common materials, standard experimental approaches. Predictive models of material production rates. People movement characteristics related to building evacuation. Formulation and application of evacuation models. Human behavior factors affecting response of people to fire situations.
Prerequisite: ENFP250.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP613. Credit only gran ted for: ENFP413 or ENFP613.

ENFP415 Fire Dynamics (3 Credits)
Designed to give students a quantitative understanding of fire behavior. The fundamentals of physics and chemistry of combustion are presented and used to derive key analytical relationships that describe fire growth. Application of these relationships to the analysis of common fire scenarios is emphasized.
Prerequisite: ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP651. Credit only gran ted for: ENFP415 or ENFP651.

ENFP420 Fire Assessment Methods and Laboratory (4 Credits)
Experimental evaluation of ignition, flame spread, rate of heat release and smoke production of flammable gases, liquids, solids, and interior finish materials. Analytical and computer methods for the design, performance, and analysis of fire experiments. Preparation of laboratory reports.
Prerequisite: Student must have senior standing; and minimum grade of C- in ENFP312.
Restriction: Must be in Engineering: Fire Protection program.
Credit Only Granted for: ENFP320 or ENFP420.
Formerly: ENFP320.

ENFP425 Enclosure Fire Modeling (3 Credits)
An introduction to enclosure fire dynamics through the development of fire modeling algorithms and the application of computer-based fire modeling techniques. The objectives of the course are: to provide a basic understanding of enclosure fire dynamics with an emphasis on a system-level viewpoint (i.e., a global description of the coupling between combustion dynamics, smoke filling, vent flows and heat transfer); and to provide an introduction to the zone modeling approach. Topics covered include a review of the mathematical formulation of zone models, a discussion of numerical integration of the zone modeling equations (using MATLAB), and an introduction to zone modeling software used by professional engineers (e.g., CFAST).
Prerequisite: ENES232, ENFP300, and ENFP312.
Restriction: Must be in Engineering: Fire Protection program; and senior standing; and permission of ENGR-Fire Protection Engineering department.

ENFP426 Computational Methods in Fire Protection (3 Credits)
Introduction to computer-based fire modeling: zone modeling and Computational Fluid Dynamics (CFD); documentation of input data, validation and verification tests.
Prerequisite: ENFP425.
Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP429 Independent Studies (1-3 Credits)
For students who have definite plans for individual study of approved problems, or study of an advanced topic selected in conjunction with the faculty.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Must be in Engineering: Fire Protection program.
Repeatable to: 6 credits if content differs.

ENFP440 Smoke Management and Fire Alarm Systems (3 Credits)
Analysis of hazard posed by smoke in buildings. Performance characteristics of smoke management systems. Review of analytical design aids. Functional analysis and design of fire detection and alerting systems. Examination and evaluation of code criteria, performance specifications and research.
Prerequisite: Must have completed with a C- or better or concurrently be enrolled in ENFP300.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP627. Credi t only granted for: ENFP440 or ENFP627.

ENFP464 Industrial Fire Safety (3 Credits)
Designed to introduce students to the basics of process safety with a focus on the methods and techniques that may be utilized when evaluating the existing or proposed safety protection solutions in industrial facilities. An emphasis is placed on properly identifying the hazards that are present, the risk exposure, and how best to address the risk. The foundation is laid by presenting the necessary background information on industrial processes and integrating this information with applicable fire/explosion safety science.
Prerequisite: Students must be of senior standing.
Restriction: Permission of ENGR-Fire Protection Engineering department. Also offered as: ENFP664.
Credit Only Granted for: ENFP464, ENFP489I, ENFP629I OR ENFP664..
Formerly: ENFP489I.
Additional Information: The course will be taught as a dual senior-level undergraduate course and graduate course.

ENFP465 Fire and Explosion Investigations (3 Credits)
Presents an overview of fire and explosion investigation and reconstruction. Information on field techniques, applicable standards and best practices will be presented along with how fire science and fire dynamics can be applied to forensic analysis. Additionally laboratory work will be conducted to illustrate the application of fire dynamics to forensic scenes to assist in the determination of cause and evaluation of potential fire growth scenarios. Sample experiments include 2nd item ignition tests, ignition delay tests, and the course culminates with a series of 1:12 reduced scale house burns to allow the students to investigate and document a fire. This course also qualifies the student to sit for the NAFI Certified Fire Investigator test.
Prerequisite: Student should have senior standing.
Restriction: Permission of ENGR-Fire Protection Engineering department. Also offered as: ENFP665.
Credit Only Granted for: ENFP489N, ENFP629N OR ENFP665.
Formerly: ENFP489N.
Additional Information: The course will be taught as a dual senior-level undergraduate course and graduate course.

ENFP467 Wildland Fires: Science and Applications (3 Credits)
Introduction to the global problem of wildland fires with an overview of the social, political and environmental issues posed as well as detailed coverage of the science, technology and applications used to predict, prevent and suppress wildland fires.
Prerequisite: ENFP312.
Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP489W, ENFP629W, or ENFP667.
Formerly: ENFP489W.

ENFP489 Special Topics (3 Credits)
Selected topics of current importance to fire protection.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Repeatable to: 6 credits.

ENGL - English

ENGL101 Academic Writing (3 Credits)
An introductory course in expository writing.
Additional Information: Any student who has not successfully completed this course by Fall 2017 must complete this course with a minimum grade of C- in order to fulfill the General Education Fundamental Studies Academic Writing requirement.

ENGL120 Acting Human: Shakespeare and the Drama of Identity (3 Credits)
Shakespeare's ideas of dramatic realism studied through close examination of literary and dramatic techniques. How Shakespeare generates the fiction of a living, thinking person in the space of five acts, and how readers participate in the making of that fiction. Some attention to Shakespeare on film and what the playwright can teach us about different media.
Credit Only Granted for: ENGL120 or ENGL289I.
Formerly: ENGL289I.

ENGL121 The Power of Song: Renaissance Lyric and Its Afterlives (3 Credits)
Examines the power that song has over its audiences. Drawing on literary, performance, and sound studies, we will investigate how song takes hold of its listeners in uniquely moving ways. We will examine the special appeal of song in early modern England, including works by William Shakespeare, John Milton, and William Byrd. And we will compare the song culture of the English Renaissance to the power of song in contemporary life, from Kendrick Lamar to CocoRosie.

ENGL125 Why Poetry Matters (3 Credits)
Introduction to the formal fundamentals of poetry and exploration of the role poetry plays in how we think about the human condition; what constitutes knowledge and wisdom, interior subjectivity and communal identity; and how this knowledge is to be used in confronting new challenges and the perennial questions: how to live with oneself, and as oneself; in time, and with others; here, where we reside; and elsewhere, where we imagine ourselves going.
Credit Only Granted for: ENGL125 or ENGL289P.
Formerly: ENGL289P.

ENGL130 Race and the Cultural Politics of Blood: A Historical Perspective (3 Credits)
Exploration of race, as term and concept, at three different historical times and from three different perspectives, through the reading of three stories: William Shakespeare's drama Othello, Aphra Behn's novella Oroonoko, and the short story Benito Cereno by Herman Melville. Exploration of the importance of context in interpretation. Study of how a concept for rationalizing human difference appears and adapts, fuses and fades away, relocates and is repurposed. How understanding of the particular situation of the concept, its context, changes our reading of the story.

ENGL132 Aliens, Exiles, and Immigrants (3 Credits)
Exploration of ideas, beliefs, and aspirations that immigrants carry from one nation to another. Different ways of understanding national and cultural identities, and ways the experiences of immigration have changed significantly over time. Readings examine historical and contemporary immigrant writing, including post-9/11 poetry and fiction; memoirs of nineteenth-century British emigrants to South Africa, Australia, and Canada; literature by emigrants from Asia, the Middle East, and Latin America now living in the United States; and writing by individuals displaced by war, famine, and political conflict. Politics of immigration and citizenship; historical and contemporary arguments for and against immigration and assimilation.

ENGL134 The Rites of Discovery: Science, Law, and Literature, 1492-1992 (3 Credits)
History of idea of 'discovery' from sixteenth-century debate about European 'rights of discovery' to 500th anniversary, in 1992, of Columbus' landfall in New World. Evolution of modern concept of discovery, both as part of history of science and in legal context of history of European colonialism and cultural encounter with Native peoples of Americas, Africa, and Asia. Exploration of primary and secondary sources relating to international law, science, and literature.

ENGL140 American Fictions: U.S. Literature, History, Politics, and Constitutional Law (3 Credits)
Works of American literature explored in the context of major texts and developments of U.S. history, culture, politics, and constitutional law. We begin with the Declaration of Independence and the U.S. Constitution, and survey the course of American literature and history, from 1776 to the present, in relation to defining political and constitutional issues. Readings of canonical works like 'Huckleberry Finn' and 'The Grapes of Wrath' coupled with special attention to minority authors and issues, and horizons of constitutional contemplation opened up by minority, immigrant, and women's voices and experiences. Key historical and political issues include human rights; equal protection; religious tolerance; democratic principles; republican structures of government; independence; revolution; slavery; removal; immigration; free speech; labor rights; civil rights; feminism; environmentalism; international law and flows of people; economic globalization; technology and digital innovation; and the role that literature and the humanities play in fostering various forms of civil society, multiculturalism, and a globally accountable citizenship.

ENGL142 Literary Maryland (3 Credits)
What does the literature of Maryland teach us about our state's past, present, and future? 'Literary Maryland' explores this question by taking students on a tour of our state's prose, poetry, and drama from colonization to the present. In addition to reading fascinating writing and visiting interesting places, you'll learn how the Chesapeake was formed; why nobody sings the entire national anthem; and what led Baltimore to name its football team after a poem written by a Virginian.
Credit Only Granted for: ENGL142 or ENGL289M.
Formerly: ENGL289M.

ENGL143 Visualizing Knowledge: From Data to Images (3 Credits)
Explores how technology and people shape our current age of information through the various forms of visually representing information. Visualizations do not show us things that are evident--visualizations make things evident. We will thus examine the history of visualization practices, the theories of image-making that guide their production, and the current state of the art. Students will engage critically with a wide range of information visualization practices to gain an understanding of the work involved in producing them and their histories. Students will also seek out contemporary visualizations, interact with the practitioners who produce them, and produce their own visualization as a response or critique.

ENGL146 Seeing the Present: Graphic Storytelling in the Age of Social Media (3 Credits)
We increasingly live in a world dominated by digital images: graphic narratives, data visualizations, tweets, GIFs, and computer animation. Students will learn how to critically analyze this digital visual rhetoric and how to become a skilled user of visual discourse. By examining a range of science fiction, graphic novels, photography, and films, we will develop a critical vocabulary for understanding the possibilities and perils of our digital image culture. We will apply this vocabulary to analyzing visual representations of contemporary political questions including: climate change, criminal justice, bio-technological transformations of the human, and the incorporation of algorithm-based platforms into everyday life.

ENGL152 What is Justice?: Literature and the Invention of Ethical Imagination (3 Credits)
Exploration of literature's unique ability to animate human passions underlying ethical dilemmas. How literary texts shape understanding of justice; how plays, novels, and films define, critique, challenge, and even alter society's comprehension of equity and inequity, crime and punishment, pardon and torture, and ideas about civil liberties and human rights. Attention to how writers have described just and unjust within their historical moment; crucial role of imagination in formation of ethical citizens across time.

ENGL181 English Grammar (1 Credit)
The basic structure of formal written English, including parts of speech, sentence patterns, standard punctuation, diction, and usage.
Restriction: Must not have completed JOUR181 or ENGL181.
Credit Only Granted for: ENGL181 or JOUR181.

ENGL201 Inventing Western Literature: Ancient and Medieval Traditions (3 Credits)
Wide range of texts, genres, and themes from ancient and medieval Western traditions. Study of cultural, historical, and artistic forces shaping traditions, and the influence and relevance of those traditions to life in twenty-first century.

ENGL202 Inventing Western Literature: Renaissance to Modern (3 Credits)
Wide range of texts from the Renaissance to the 21st century. Themes and literary techniques in the evolution of Western literature. Print publication, industrialization, questioning of religious, political, intellectual, and cultural authority.

ENGL211 English Literature: Beginnings to 1800 (3 Credits)
Surveys medieval and early modern literary works written in England. Readings may include Beowulf, Chaucer, Spenser, Mary Wroth, Milton; eighteenth-century satire, drama, novels.

ENGL212 English Literature: 1800 to the Present (3 Credits)
Surveys the major literary movements of the period, from Romantic to Victorian to Modern. Such authors as Wordsworth, Keats, Bronte, Tennyson, Browning, Yeats, Joyce, Woolf.

ENGL221 American Literature: Beginning to 1865 (3 Credits)
Surveys American writing from the founding of the colonies through the Civil War. Authors such as Taylor, Cooper, Poe, Dickinson.

ENGL222 American Literature: 1865 to Present (3 Credits)
Surveys American writing from the Civil War through the Cold War. Authors such as Clemens, Frost, Hurston, Bellow.

ENGL233 Introduction to Asian American Literature (3 Credits)
A survey of Asian American literatures with an emphasis on recurrent themes and historical context.Cross-listed with AAST233.
Credit Only Granted for: ENGL233 or AAST233.

ENGL234 African-American Literature and Culture (3 Credits)
An exploration of the stories black authors tell about themselves, their communities, and the nation as informed by time and place, gender, sexuality, and class. African American perspective themes such as art, childhood, sexuality, marriage, alienation and mortality, as well as representations of slavery, Reconstruction, racial violence and the Nadir, legalized racism and segregation, black patriotism and black ex-patriots, the optimism of integration, and the prospects of a post-racial America.Cross-listed with: AASP298L.
Credit Only Granted for: ENGL234 or AASP298L.

ENGL235 U.S. Latinx Literature and Culture (3 Credits)
Examines the poetry, prose, and theater of Latinx communities in the United States from their origins in the Spanish colonization of North America to their ongoing development in the 21st century. Considers how authors use literary form to gain insight into human experience, including mortality, religious belief, gender and sexuality, war and peace, family, language use, scientific inquiry, cultural tradition, ecology, and labor. Also studies how Latinx literary traditions have shaped and been shaped by broader currents in American literature, as well as what connections exist between Latinx literature and social and artistic developments in other parts of the world, particularly Latin America and the Caribbean. Authors may include Alvar Nunez Cabeza de Vaca, Eulalia Perez, Juan Nepomuceno Seguin, Maria Amparo Ruiz de Burton, Jose Marti, Arthur A. Schomburg, Jesus Colon, Julia de Burgos, Cesar Chavez, Ariel Dorfman, Gloria Anzaldua, Junot Diaz, and Cristina Garcia.Cross-listed with: AMST298Q.
Credit Only Granted for: ENGL235 or AMST298Q.

ENGL240 Introduction to Fiction, Poetry, and Drama (3 Credits)
Readings in the novel, short story, poetry and drama.

ENGL241 What the Novel Does (3 Credits)
An exploration of what the novel does that cannot be done by film, by television, by cell-phone screens, by any stream of images, or by textual excerpts pulled up for a quick read. The different ways of the novel, with particular focus on the process of thinking and the developed consciousness. The novel as a machine to think with and an irreplaceable model of complex human thought. Study of how thought is presented in radically different ways in novels that cross lines of class, gender, chronology, and nationality.

ENGL243 What is Poetry? (3 Credits)
An exploration of arguably the most complex, profound, and ubiquitous expression of human experience. Study through close reading of significant forms and conventions of Western poetic tradition. Poetry's roots in oral and folk traditions and connections to popular song forms.

ENGL244 The Play's the Thing (3 Credits)
Exploration of drama through a consideration of plot, narrative flow, analytical flow, staging, performance, manuscript and printing history, text and textual change over time, and interpretation. Plays will be approached as public attempts to understand what it means to be alive.

ENGL245 Film Form and Culture (3 Credits)
Introduction to film as art form and how films create meaning. Basic film terminology; fundamental principles of film form, film narrative, and film history. Examination of film technique and style over past one hundred years. Social and economic functions of film within broader institutional, economic, and cultural contexts.Cross-listed with FILM245.
Credit Only Granted for: ENGL245 or FILM245.

ENGL246 Introduction to the Short Story (3 Credits)
A survey of the genre, with a focus on significant elements, such as plot, character, description, style, and theme. Readings will be drawn from a range of cultures and communities.

ENGL250 Reading Women Writing (3 Credits)
Explores literary and cultural expressions by women and their receptions within a range of historical periods and genres. Topics such as what does a woman need in order to write, what role does gender play in the production, consumption, and interpretation of texts, and to what extent do women comprise a distinct literary subculture. Interpretation of texts will be guided by feminist and gender theory, ways of reading that have emerged as important to literary studies over the last four decades.Cross-listed with WMST255.
Credit Only Granted for: ENGL250 or WMST255.

ENGL255 Literature of Science and Technology (3 Credits)
Examines science and technology through the lens of British and American literature, primarily between 1800 and the present. Readings from early natural and experimental philosophers of the Scientific Revolution and Enlightenment. How literary works represent the ethics of science and technology; beneficial developments of science, and also heavy toll of industrialization. Writers studied may include Francis Bacon, Mary Shelley, Charles Darwin, H.G. Wells, Albert Einstein, Aldous Huxley, Richard Feynman, Philip K. Dick, Octavia Butler, Michael Frayn, and Tom Stoppard.

ENGL256 Fantasy Literature (3 Credits)
How fantasy employs alternate forms of representation, such as the fantastical, estranging, or impossible, which other genres would not allow. Through novels, short stories, graphic novels, and film, traces fantasy's roots in mythology and folklore, then explores how modern texts build upon or challenge these origins. Examination of literary strategies texts use to represent the world through speculative modes. How to distinguish fantasy from, and relate it to, other genres such as science fiction, horror, fairly tales, and magical realism. Fantasy's investment in world-building, history, tradition, and categories of identity such as race, class, and gender. How fantasy, as a genre, form, and world-view, is well-suited to our contemporary reality.

ENGL257 Children's Literature (3 Credits)
Literature of the nineteenth through the twenty-first century concerned with, and written for, children and young adults. How such narratives speak to themes of changing social, religious, political, and personal identity. Through poetry, novels, graphic novels, and film, explores how children's tales encapsulate and reflect on human existence, while pushing boundaries of what constitutes 'children's literature' and what exactly defines the 'child.' Considers questions of literary classification through investigation of political and religious issues, gender politics, animal rights, social justice, race, war, and what it means to 'grow up.'

ENGL262 Introduction to the Hebrew Bible/Old Testament (3 Credits)
Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.Cross-listed with: JWST262, HEBR298B.
Credit Only Granted for: JWST262, HEBR293B, or ENGL262.

ENGL265 LGBTQ+ Literatures and Media (3 Credits)
A study of literary and cultural expressions of queer and trans identities, positionalities, and analytics through an exploration of literature, art, and media. We will examine historical and political power relations by considering the intersections of sexuality and gender with race, class, nation, and disability. Topics include the social construction and regulation of sexuality and gender, performance and performativity, intersectionality, and the relationship between aesthetic forms and queer/trans subjectivity. Our interpretations will be informed by queer and trans theories.
Restriction: Must not have completed LGBT265. Cross-listed with LGBT265 .
Credit Only Granted for: ENGL265 or LGBT265.

ENGL269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL269M Morocco: In the Footsteps of the Beat Generation (3 Credits)
Educates students about the history, culture and socio-political situation in Morocco through the reading of fiction related to this country. The focus will be on the intersection of American and Moroccan culture and will cover film, music and literature. The American perception of the 'orient' has historically been channeled through the French characterization of Arab societies in North Africa. This course aims to disentangle this western mythology from reality in Morocco. Some of the themes addressed will be globalization, colonialism, racism, orientalism, and women's oppressionCross-listed with: ARHU269A.
Credit Only Granted for: ARHU269A or ENGL269M.

ENGL271 Writing Poems and Stories: An Introductory Workshop (3 Credits)
Introduction to theory and practice of writing fiction and poetry. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL272 Writing Fiction: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing fiction. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL273 Writing Poetry: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing poetry. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL274 Creative Writing Through The Eyes of African Americans: A Beginning Workshop (3 Credits)
Introduction to theory and practice of writing fiction, drama and poetry, with an emphasis on African American literary models. Critical reading, exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.
Restriction: Must not have completed ENGL271, ENGL274, ENGL294,or AASP274. Cross-listed with AASP274.
Credit Only Granted for: ENGL274 or AASP274.

ENGL275 Scriptwriting for Theater, Film, and Television (3 Credits)
Introduction to the theory and practice of scriptwriting with an opportunity to read, view, evaluate, write, and revise texts meant to be performed. Students will practice writing for the stage, film, and television and also examine selected scripts, performances, and film and television clips as models for their own creative work. Students will complete frequent writing exercises, participate in workshops, and learn to apply scholarship to the analysis and critique of scripts.Cross-listed with: ARHU275.
Credit Only Granted for: ENGL275 or ARHU275.

ENGL278 Special Topics in Literature (3 Credits)
Repeatable to: 9 credits if content differs.

ENGL280 The English Language (3 Credits)
Introduction to the structure of English and its historical development, with a focus on techniques of linguistic analysis. Major topics include the sound systems of English and its patterns of word formation and sentence structure, and the ways these have changed over time and vary around the world.

ENGL281 Standard English Grammar, Usage, and Diction (3 Credits)
Study of the structures and patterns of English grammar. The focus is on the standard dialect and contemporary usage, but we will also explore variation over time and across dialects. Includes word formation, sentence elements and structures, and conventions of punctuation, as well as the social aspects of grammatical choices.

ENGL282 How Rhetoric Works: Persuasive Power and Strategies (3 Credits)
Examines how persuasion functions and influences our lives and perception, focusing on a variety of contexts: business, politics, media, law, and entertainment. Students learn persuasive and argumentative principles to understand what rhetoric is, how it works, and what it does, and to apply the knowledge to produce effective communication appropriate for their purpose, audience, and context. A wide range of persuasive media, genres, and forms will be studied to help students sharpen how they interpret and practice persuasion.

ENGL289 Special Topics in English (3 Credits)
Introduces students to notable themes and approaches in English studies. Topics vary by section and semester.
Repeatable to: 12 credits if content differs.

ENGL289C Introduction to Humanities, Health, and Medicine (3 Credits)
An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with: ARHU230.
Credit Only Granted for: ARHU230 or ENGL289C.

ENGL290 Introduction to Digital Studies (3 Credits)
Introductory course in digital studies. Surveys contemporary humanities work in digital technologies, including the web and social media and their historical antecedents. Explores design and making as analytical tools alongside reading and writing. Situates digital media within power and politics and develops critical awareness of how media shape society and ethics. Interdisciplinary approaches to creativity, analysis, and technology. While the course will include hands-on practice, no prior experience of programming, designing, or making required other than a willingness to experiment and play.

ENGL291 Writing, Revising, Persuading (3 Credits)
Intermediate-level, writing-intensive course for students who have successfully satisfied the Fundamental Studies Academic Writing requirement but wish to hone skills in analyzing and producing rhetorically attuned, well-styled prose. Deeper study of rhetorical theory and its application to a wide variety of arguments and situations. Additional writing practice, techniques of revision, study of effect of stylistic choices. Topics may include argumentation theory, visual rhetoric, stylistic theory, and writing theory.
Prerequisite: Must have satisfied Fundamental Studies Academic Writing requirement.

ENGL292 Writing for Change (3 Credits)
Service learning in collaboration with students at area high schools. Explores how writing can be a tool for social change. Participants serve as mentors, create a performance event concerning a pressing social issue, and compose reflections, literacy narratives, publicity materials, and a multimodal project. Focus on developing critical self-awareness.
Prerequisite: Permission of ARHU-English department.
Recommended: ENGL101.
Restriction: Requires application and references.

ENGL293 Writing in the Wireless World (3 Credits)
A hands-on exploration of writing at the intersection of technology and rhetoric. Students will learn to read, analyze, and compose the kinds of multimodal documents--documents combining text, image, and sound--that constitute communication in our digital world.
Recommended: ENGL101.

ENGL294 Persuasion and Cleverness in Social Media (3 Credits)
Exploration of various persuasive media encountered in daily life through the lens of rhetorical and critical theories. Principles of rhetoric and analysis of how persuasion functions across media. Invention of effective multimedia works appropriate to purpose, audience, and context. Concepts from cultural studies used to develop critical awareness about power and ideology and how they influence the way people produce and understand messages. By integration of technology, rhetoric, and cultural studies, students become more critically-rhetorically informed thinkers, authors, and audiences of arguments and culture in the digital age. Writing intensive course. No prior multimedia experience is expected.
Prerequisite: Must have satisfied Fundamental Studies Academic Writing requirement.

ENGL296 Reading and Writing Disability (3 Credits)
Locates and analyzes disability in various settings, modes, and texts. Investigates the material and cultural effects of the language, stories, and myths of disability. Explores the many definitions and frameworks of disability: as dynamic lived experiences, as a political identity, as a rich culture, as socially constructed barriers, and as an oppressed minority group. Examines how disability is portrayed, controlled, stereotyped, and celebrated across social, medical, political, cultural, and personal networks.

ENGL297 Introduction to Professional Writing (3 Credits)
Introduction to the rhetorical principles and professional practices of professional writing, particularly the research, writing, communication, analytical, and technological skills needed for the Professional Writing minor. How culture and technology relate to the work of professional writing; design principles and rhetorical moves; digital tools, research skills, and writing strategies of professional writers. Develops skills needed to publish a writing portfolio that showcases students' professional writing competencies and projects your professional writer identities.
Prerequisite: ENGL101.

ENGL301 This is English: Fields and Methods (3 Credits)
English' means a lot of things. Are you looking for literature, or linguistics? For writing--creative, critical, or professional? For theater, or debate? For film, or even videogames? This gateway course for the English major introduces you to all of these areas and more, as well as to our discipline's unique resources for studying and enjoying them. The English discipline includes three main interpretive fields: Literary and Cultural Studies; Language, Writing, and Rhetoric; and Media Studies. This course brings together the fundamental concepts and methods for reading, viewing, and researching practiced in these fields, launching you into English studies and and helping you to choose the major track that is right for you.
Restriction: Must be in English Language and Literature program; or must be in Secondary Educ: English Language Arts program.

ENGL302 Medieval Literature in Translation (3 Credits)
Surveys major works of English and continental Middle Ages. Readings may include romance, lyric and drama, Germanic epic, works of Dante, Chretien de Troyes, Jean de Meun, Christine de Pisan, Malory, English and continental mystics.

ENGL305 Early Drama (3 Credits)
Explore medieval and Renaissance drama and performance, placing the Shakespearean stage in its cultural and historical contexts.

ENGL308 Special Topics in Shakespeare (3 Credits)
A topical exploration of William Shakespeare's plays and poems as well as their cultural contexts, performance history, and the roles they play in modern and contemporary culture
Repeatable to: 12 credits if content differs.

ENGL310 Medieval and Renaissance British Literature (3 Credits)
Detailed study of selected major medieval and Renaissance works written in England. Cultural attitudes and historical contexts. May include Beowulf, Anglo-Saxon lyric, drama, sonnets; works of women writers, Chaucer, Spenser, Sidney. Some readings in Middle English.

ENGL311 British Literature from 1600 to 1800 (3 Credits)
The culture of seventeenth and eighteenth-century Britain seen through detailed study of selected major texts. Drama, poetry, political writings, and early novels by men and women. Authors may include Donne, Milton, Jonson, Behn, Swift, Pope, Montagu, and Wollstonecraft.

ENGL312 Romantic to Modern British Literature (3 Credits)
Detailed study of selected major texts from the 19th and 20th centuries. Transitions from Romanticism to Victorian age to Modernism. Historical, social, literary contexts. Issues such as rise of democracy; industrial revolution; the 'woman question'; revolutions in literary form. Authors might include Wordsworth, Austen, Dickens, Arnold, T.S. Eliot, and Woolf.

ENGL313 American Literature (3 Credits)
A detailed study of selected major texts of American literature from the 17th century to the 20th century. Issues such as race, gender, and regionalism. Authors such as Franklin, Hawthorne, Dickinson, Hemingway, and Morrison.

ENGL316 Native American Literature (3 Credits)
Examines literature that explores the experiences and cultures of America's Indigenous peoples from the sixteenth century to the contemporary moment. We will analyze poetry, historical accounts, oral narratives, short stories, and novels by Native American writers in order to explore key concerns in Native American Studies, such as dilemmas of Indigenous sovereignty, settler colonialism, the settler state, stolen land, and the natural environment.

ENGL317 African American Literature (3 Credits)
Consideration of key texts in African American literature that explore the experiences of people of African descent in America from the mid-nineteenth century to the contemporary moment. Relationship between literary texts, historical events and cultural formations. Examines a range of texts and genres (autobiography, slave narrative, travel narrative, poetry, essays, fiction), and their contribution to national literary tradition.

ENGL319 Special Topics in Science, Literature, and Media (3 Credits)
A topical investigation of the ways that science, art, and technology provoke ideas and innovation across their disciplinary boundaries within specific historical moments and locations.
Repeatable to: 12 credits if content differs.

ENGL321 Comics and the Graphic Novel (3 Credits)
Comics has become one of the most globally popular art forms of the twenty-first century, but it also has a rich history that stretches back to the eighteenth century, and arguably much earlier. This course will introduce students to the unique formal properties of comics and will survey the history of comics across national traditions, including texts drawn from the American, Franco-Belgian, and Japanese traditions. We will read across a range of genres and cultural registers--including newspaper strips, superhero comics, Underground comix, manga, the graphic memoir, and alternative comics. You will learn to analyze and write about the form and history of the medium.

ENGL327 The Suburbs in American Literature and Film (3 Credits)
Explores through written expression and through cinema the diverse and changing world of US suburbia. Premised on two arguments: (1) the suburbs embody many of the contours and contradictions of American life; and (2) the suburbs are far more racially, ethnically, culturally, sexually, economically diverse than mass media suggests. Investigation via prose, poetry, drama, and cinema, as well as secondary sources in sociology, women's studies, ethnic studies, history, cultural studies, psychology, anthropology, and the history of science and technology.

ENGL329 Special Topics in Film Studies (3 Credits)
Studies in various periods and genres of film.
Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL331 American Jewish Literature (3 Credits)
An exploration of the role played by literature in the development of American Jewish ethnic identity. Primary materials include essays, poetry, plays, short stories, novels, films and music.Cross-listed with JWST341.
Credit Only Granted for: ENGL331 or JWST341.

ENGL334 The Bible as Literature (3 Credits)
The Bible as a major source of contemporary Western religious symbolism and culture. Exploration of how this literary legacy appears in our own cultural experience. Historical critical and literary critical method and theory introduced and applied to the texts.

ENGL344 Nineteenth-Century Fiction (3 Credits)
Major British, American, and other fiction writers of the nineteenth century studied in the context of the broad global, intellectual, and artistic interests of the century.

ENGL345 Twentieth Century Poetry (3 Credits)
Major British and American poets of the twentieth century.
Restriction: Must not have completed ENGL446 or ENGL445.

ENGL346 Twentieth Century Fiction (3 Credits)
Major British, American, and other fiction writers of the twentieth century studied in the context of the broad global, intellectual, and artistic interests of the century.

ENGL348 Literary Works by Women (3 Credits)
The context, form, style and meaning of literary works by women.
Repeatable to: 6 credits if content differs. Cross-listed with WMST348.
Credit Only Granted for: ENGL348 or WMST348.

ENGL349 Asian American Literatures (3 Credits)
Study of selected writers, particular themes, or genres in Asian American literatures.
Repeatable to: 9 credits if content differs.

ENGL352 Intermediate Fiction Workshop (3 Credits)
A class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and the fiction of colleagues, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.
Prerequisite: Minimum grade of A- in ENGL271 or ENGL272; or permission of ARHU-English department.

ENGL353 Intermediate Poetry Workshop (3 Credits)
A class in the making of poetry. Intensive discussion of students' own poems. Readings in both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, memorization, and attendance at poetry readings.
Prerequisite: Minimum grade of A- in ENGL271 or ENGL273; or permission of ARHU-English department.

ENGL354 Intermediate Scriptwriting for Theater, Film, and Television (3 Credits)
Demystifies the art of dramatic writing. Students will come to understand that a play or screenplay is never a lecture, and that we write scripts to find out something about ourselves and the subjects we tackle. Students will analyze plays and screenplays, as well as workshop each others' scripts, to help them produce their own successful plays and screenplays written for the stage, screen, or box.
Prerequisite: 1 course with a minimum grade of A- from (ENGL275, ARHU375, THET340).

ENGL355 Digital Fictions (3 Credits)
Explores literary fiction composed and delivered in digital forms from the origins of computers in the mid-twentieth century to the present day. The course places equal emphasis on a historical survey of the intersection between the digital and the literary; on the enterprise of digital fiction as a dynamic and living form with new work appearing online almost every day; and on offering students the opportunity to experiment with digital platforms for fiction writing of their own. No technical expertise (or experience in creative writing) is expected or assumed.
Credit Only Granted for: ENGL355 or ENGL378C.
Formerly: ENGL378C.

ENGL358 Special Topics in U.S. Latinx Literature (3 Credits)
Topical study of selected works by U.S. Latinx writers.
Repeatable to: 9 credits if content differs.

ENGL359 Special Topics in LGBTQ+ Literatures and Media (3 Credits)
Selected study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.
Repeatable to: 9 credits if content differs. Cross-listed with LGBT359.

ENGL359F Lesbian, Gay, Bisexual, and Transgender Film and Video (3 Credits)
Comparative analysis of forms, themes, and the politics of representation in film and video by and/or about LGBT people.
Restriction: Junior standing or higher. Cross-listed with: LGBT327.
Credit Only Granted for: LGBT327 or ENGL359F.

ENGL360 African, Indian and Caribbean Writers (3 Credits)
Selected writers from countries formerly colonies of Britain, France, Denmark, etc. Attention to ways regions have developed distinctive political and aesthetic values resulting from indigenous traditions and foreign influences.

ENGL361 Recovering Oral Histories (3 Credits)
Service-learning course that gives students an opportunity to develop writing, interviewing, and communication skills as they contribute to the work of a community organization. In the classroom, students will reflect on the process and do background research to understand the particular context of the organization's work. In the field, students will interview (or have informal discussions with) young people helped by the organization in order to construct a narrative about their lives, their perceptions of themselves, and their experiences.
Prerequisite: Students must have completed one course in English, Latin American Studies, or Education.

ENGL362 Caribbean Literature in English (3 Credits)
Political and literary traditions that intersect in the fiction, poetry, and drama written in English by Caribbean writers, primarily during the 20th century.Cross-listed with: LASC348E.
Credit Only Granted for: ENGL362 or LASC348E.

ENGL368 Special Topics in African American, African, and African Diaspora Literatures (3 Credits)
Topical study of selected literature by African American and Black Diaspora writers from Africa, the Caribbean, North and South America, and beyond.
Repeatable to: 9 credits if content differs.

ENGL369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL369D Australian Literature and Culture (3 Credits)
An immersion into Australian culture and history, this course will explore the literature, music, theater, and arts of Indigenous and contemporary Australia. Students will engage directly with matters of political and social concern, developing both awareness of cultural issues important to modern-day Australians and the skills needed to navigate those issues. Along the way, we will look back to the colonial founding of Australia as a British outpost and consider how modern Australia has emerged from a mixing of Western and Indigenous cultures.
Additional Information: This is an Education Abroad course.

ENGL369N New Zealand Literature and Culture (3 Credits)
An immersion into the literature, history, and culture of New Zealand, this course will look back to the colonial founding of New Zealand as a British outpost, and to the strong Maori culture the British encountered when they arrived. Students will engage directly with matters of political and social concern, developing both awareness of cultural issues important to modern-day New Zealanders and the skills needed to navigate those issues. Along the way, we will consider how modern New Zealand has emerged from a mixing of Western and Indigenous cultures.
Additional Information: This is an Education Abroad course.

ENGL370 Junior Honors Conference (1 Credit)
Preparation for writing the senior honors project.
Restriction: Candidacy for honors in English.

ENGL373 Senior Honors Project (2 Credits)
Research and writing of senior honors project. Strongly recommended for students planning graduate work.
Prerequisite: ENGL370.
Restriction: Must be in English Language and Literature program.

ENGL375 J.R.R. Tolkien: Middle-earth and Beyond (3 Credits)
An in-depth look at major themes and ideas spanning Tolkien's well-known and lesser-known works across a variety of genres and styles. We will study 'The Hobbit' and 'The Lord of the Rings' in connection with Tolkien's back-story mythology expressed in 'The Silmarillion.' We will also consider film adaptations and other popular fantasy influenced by Tolkien. And we will explore lesser-known works such as 'Farmer Giles of Ham,' and Tolkien's essays on fairy stories and on 'Beowulf.

ENGL376 The Speculative Imagination: Science Fiction on Page and Screen (3 Credits)
Examines a global cross-section of science fiction in literature, film, television, comics, and other media. Studies the unique formal qualities of science fiction and traces its history from its origin in the eighteenth century to the present. Explores how the twenty-first century has brought new prominence to science fiction by creators of color, women creators, and queer creators, as well as intersections of these. Considers how science fiction addresses a range of phenomena--from environmental destruction to surveillance to imperialism and militarism. Students learn how to analyze and write about the formal and historical dimensions of the genre.
Credit Only Granted for: ENGL379Y or ENGL376.
Formerly: ENGL379Y.

ENGL377 Medieval Myth and Modern Narrative (3 Credits)
Literary patterns characteristic of medieval myth, epic, and romance; their continuing vitality in modern works; and links between Medieval works like 'The Prose Edda', 'Beowulf', 'The Morte D'Arthur', 'The Volsunga Saga', and 'Grettis Saga' and modern narratives like Tolkien's 'The Lord of the Rings'.
Formerly: ENGL361.

ENGL378 Special Topics in English (3 Credits)
Offers sustained attention to notable current themes and approaches in English studies. Topics vary by section and semester.
Repeatable to: 12 credits if content differs.

ENGL379 Special Topics in Literature (3 Credits)
Repeatable to: 12 credits if content differs.

ENGL381 MGA Legislative Seminar (3 Credits)
Prepares students to intern for the Maryland General Assembly. Introduces standard legislative genres and assigns extended practice in researching legislative issues.
Prerequisite: Students who have taken courses with comparable content may contact the department; or ENGL101.
Restriction: Permission of ARHU-English department.
Additional Information: Application required. Contact english@umd.edu for more information.

ENGL383 Language in Its Social Contexts (3 Credits)
Exploration of the social and political aspects of language use, including interactional behavior, the structure of conversation, persuasive uses of language, social dialects, language use within speech communities, and language and identity. We will examine and compare analytical approaches to pragmatics and discourse analysis.

ENGL384 Concepts of Grammar (3 Credits)
Introduction to the basic units of grammatical description; motivation for and nature of constituent structure and syntactic categories; fundamental grammatical concepts employed in the teaching and learning of languages.

ENGL385 English Semantics (3 Credits)
The study of meaning in language and language use. Examines how the senses of words and other linguistic constructions are mentally represented, and how they contribute to the construction of meanings in linguistic communication.

ENGL386 Experiential Learning (3-6 Credits)
Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENGL387 Visual Rhetoric (3 Credits)
Investigation of the persuasive power of visuals based on how they construct and communicate their content and predispose viewers to an interpretation or attitude. 'Iconic' images and other modes of visual representation including diagrams, graphs, and page or screen design. Most attention given to a grammar and rhetoric of visuals. Also the elements of images and their arrangement and consideration of historical and generic contexts and the 'affordances' of various media. Not a course in 'high art' or in video, TV, or film. Emphasis on visuals that accompany or replace verbal texts.

ENGL388 Writing, Research, and Media Internships (1-6 Credits)
Field work in English studies.
Restriction: Permission of ARHU-English department.
Repeatable to: 12 credits.

ENGL388M Maryland General Assembly Writing Internship (6 Credits)
Experiential learning at the Maryland General Assembly (early January through early April). Interns participate in standard office tasks, research legislative issues, and draft legislative texts such as constituent letters, notes on bills, newsletters, policy memos, and testimony. Specific assignments vary according to the host legislator's needs and the intern's schedule.
Prerequisite: ENGL381 or HONR369A.
Restriction: Minimum cumulative GPA of 3.0; and must have earned a minimum of 60 credits; and must be admitted to the MGA program.

ENGL388P English Careers Internship (1-6 Credits)
Students receive credit for an internship of their choice that focuses at least half of its work on core English skills such as writing, editing, and research. Students secure their own internship placements. Course assignments include, for instance, an activity log, reflection papers, a supervisor evaluation, and a final portfolio of work.Repeatable to 12 credits. Each enrolled credit equals 45 hours of on-site internship work.
Prerequisite: Permission of ARHU-English department.
Repeatable to: 12 credits if content differs. 12 credits. Each enrolled credit equals 45 hours of on-site internship work.
Additional Information:

ENGL388V Undergraduate Teaching Assistants in English (1-6 Credits)
A weekly teaching practicum and concurrent internship as an undergraduate teaching assistant in an English course. Students will explore the theories and best practices of teaching and learning in the various fields of the English discipline, particularly writing and literary studies. The emphasis is on creating inclusive classrooms and working with diverse learners and is grounded in theories of critical pedagogy. Students will apply principles of learning theory to develop and facilitate learner-centered lessons and discussions. They will also study composition pedagogy in preparation for responding to student writing in the course for which they are an assistant.
Prerequisite: Permission of the ARHU-English department.
Repeatable to: 12 credits. Students taking the course for the first time should register for section 0101 or 0401. Students should enroll for section 2001 or 3001 if they are a returning intern. Students should consult with the UTA Coordinator to determine the number of enrollment credits.
Additional Information:

ENGL388W Writing Center Internship (1-6 Credits)
Examines face-to-face and online writing center theory and practice through readings, exercises, and supervised tutoring. Students investigate the writing process and help other writers to negotiate it.
Prerequisite: Permission of the Writing Center (1205 Tawes Hall).
Repeatable to: 12 credits. Students taking the course for the first time should register for section 0101 for 4 credits. Returning tutors should consult the instructor about the number of enrollment credits and should register for section 2001.
Additional Information:

ENGL390 Science Writing (3 Credits)
Specifically designed for students interested in further study in the physical and biological sciences. Exposes students to the conventions of scientific prose in the genres of research articles and proposals. Students also learn to accommodate scientific information to general audiences.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits; and junior standing or higher.
Credit Only Granted for: ENGL390 or ENGL393S.
Formerly: ENGL393S.

ENGL391 Advanced Composition (3 Credits)
An advanced composition course which emphasizes constructing written arguments accommodated to real audiences.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL392 Legal Writing (3 Credits)
Conventions of legal writing and research. Students learn how to read and write about cases, statutes, or other legislation; how to apply legal principles to fact scenarios; and how to present a written analysis for readers in the legal profession. Assignments may include the law-school application essay, case briefs, legal memos, and client letters.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL393 Technical Writing (3 Credits)
Focuses on the writing of technical papers and reports.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL394 Business Writing (3 Credits)
Intensive practice in the forms of written communication common in the business world: letters, memos, short reports, and proposals. Focus on the principles of rhetoric and effective style.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL395 Writing for Health Professions (3 Credits)
Focus on accommodating health-related technical material and empirical studies to lay audiences, and helping writers to achieve stylistic flexibility and correctness.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398 Topics in Professional Writing (3 Credits)
Professional writing courses that focus on the audiences, conventions, and genres of particular disciplines, professions, or organizations. Examples include writing for the arts, writing case studies and investigative reports, writing about economics, and writing for non-profit organizations.
Prerequisite: ENGL101; or students who have taken courses with comparable content may contact the department.
Restriction: Must have earned a minimum of 60 credits; and junior standing or higher.
Repeatable to: 6 credits if content differs.

ENGL398A Writing for the Arts (3 Credits)
Examines the situations and genres in which working professionals (practitioners, advocates, administrators, and educators) write about art, culture, and artists. The course covers the complex process that writers need to learn, including how to accommodate information to specific audiences, how to use stylistic and visual devices to make information more accessible, and how to edit their own work as well as that of their peers. Assignments parallel the writing demands that students will face in the workplace, including analyzing and composing artist statements, an arts manifesto, art education guides, press releases about artists and their work, critical reviews of exhibits and performances, and proposals to funding agencies and foundations.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398B Writing for Social Entrepreneurship (3 Credits)
Designed for students who want to develop the skills needed to start a successful social venture--a start-up business with a social mission or a new nonprofit program. The course centers on a major writing project such as a business plan, a website design plan, a fundraising proposal, or a concept paper for a new nonprofit organization. Students produce other communication projects that social entrepreneurs use to develop their businesses and nonprofits, such as presentations or pitches to prospective investors/donors, marketing materials, and a job announcement. Students will learn from local social entrepreneurs who share their experiences of using writing to succeed in the field.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398C Writing Case Studies and Investigative Reports (3 Credits)
Designed for students interested in becoming police investigators, educators, case workers, insurance adjusters, nurses, or program evaluators, or in entering branches of the social sciences that investigate cases and value reports based on accurate descriptions and compelling narratives. Such reports must be factual and yet useful to decision makers, unbiased and yet focused. Students study genres and language skills from careful summarizing to convincing storytelling.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398E Writing About Economics (3 Credits)
Examines the characteristic genres of writing in modern economics, including theoretical and empirically based journal articles, reports for government and commercial clients, and economic information presented to a variety of non-professional audiences, such as citizen-oriented and public policy organizations. Students learn how to analyze these documents rhetorically and how to communicate economic information using the content, arrangement, style, and visual graphics best suited to the purposes and standards of particular audiences. Core assignments include a genre-based journal and document analysis, presentations on economics-related topics for both economists and non-professional audiences, and a major research-based writing project for an audience outside of the classroom.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398L Scholarly Writing in the Humanities (3 Credits)
Examines scholarship in the humanities as a genre of professional writing and investigates the norms and procedures of advanced academic writing. Assignments parallel the writing demands that students will face in the academic workplace, including a graduate school application essay, a genre review, an annotated bibliography, a journal article, and an oral presentation of article subject matter.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398N Writing for Non-Profit Organizations (3 Credits)
Examines professional writing and communication work in the non-profit sector. Students will analyze the audiences and document genres that they may encounter in real-world non-profit work and will learn how to compose many of these documents, from press releases and other public relations material to position papers, reports, and grant proposals. Students may also have the opportunity to add a service-learning component to the course by working with and for an area non-profit.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398R Writing Non-Fictional Narratives (3 Credits)
Approaches nonfiction narrative-a kind of writing influenced by fiction, magazine journalism, memoir, and personal essay--as a form of professional writing used in publishing and a range of careers involving proposal writing, work documentation, lobbying, social marketing, and political commentary, among others. Students learn to use many of the same tools as fiction writers, such as dialogue, vivid description, developing characters, nonlinear structure, and shifts in tense, time, and points of view. They also learn how to edit their own work as well as that of their peers, doing multiple revisions of the major assignments for a final portfolio. Major assignments include essays targeted to specific publications, query letters, audience analysis, and a publisher analysis.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL398V Writing About the Environment (3 Credits)
Designed for those aspiring to work in a variety of fields that influence and are influenced by environmental science, including public policy, advocacy, science, and industry. Students learn to apply principles of technical writing to a range of scenarios and issues particular to the intersection of scientific knowledge and environmental policy. Writing audiences range from the public to decision-makers. The course emphasizes writing both within and across disciplines to enlist research for practical contexts.
Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.
Restriction: Must have earned a minimum of 60 credits.

ENGL402 Chaucer (3 Credits)
Works read in Middle English. Readings may include Canterbury Tales, Troilus and Criseyde, dream visions, lyrics.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL403 Shakespeare: The Early Works (3 Credits)
Close study of selected works from the first half of Shakespeare's career. Generic issues of early histories, comedies, tragedies. Language, theme, dramatic technique, sources, and early modern English social-historical context.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL404 Shakespeare: The Later Works (3 Credits)
Close study of selected plays from the second half of Shakespeare's career. Generic issues of later tragedies, later comedies, romances. Language, theme, dramatic technique, sources, and early modern English social-historical context.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL407 Non-dramatic Literature of the Sixteenth Century (3 Credits)
Poetic and prose genres--utopia, epic, narrative, lyric, sonnet, oration, epistle, sermon, apologia--in context of the literary and intellectual life of the sixteenth century. Writers such as More, Wyatt, Surrey, Sidney, and Spenser.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL408 Literature by Women Before 1800 (3 Credits)
Selected writings by women in the medieval and early modern era.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs. Cross-listed with WMST408.
Credit Only Granted for: ENGL408 or WMST408.

ENGL409 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL410 Edmund Spenser (3 Credits)
Selected works of Edmund Spenser in their literary, social, and historical contexts. Special attention to The Faerie Queene; also sonnets and lyric poetry.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL412 Literature of the Seventeenth Century, 1600-1660 (3 Credits)
Works from early Stuart through Interregnum period. Major literary genres in historical contexts. Writers such as Donne, Jonson, Mary Wroth, Bacon, Browne, and Marvell.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL414 Milton (3 Credits)
Poetry and major prose in their social, political, and literary-historical contexts. Special attention to Paradise Lost. Other works may include Samson Agonistes and shorter poems.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL415 Literature of the Seventeenth Century, 1660-1700 (3 Credits)
English poetry, drama, fiction, and non-fiction written from the Restoration of Charles II to 1700. Attention to increasing literacy and publication and greater involvement by women in literary production. Authors include Milton, Dryden, Congreve, and Behn.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL416 Literature of the Eighteenth Century, 1700-1750 (3 Credits)
British literary traditions, including the poetry of Pope, the prose of Swift, the correspondence of Montagu, the drama of Gay, and early novels by Defoe, Richardson, and Fielding.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL417 Literature of the Eighteenth Century, 1750-1800 (3 Credits)
British poetry, drama, fiction, and nonfiction, emphasizing innovative forms and attitudes in genres such as the gothic novel and political writings, as well as more traditional works. Authors include Johnson, Burney, Sterne, Burke, and Wollstonecraft.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL420 English Romantic Literature (3 Credits)
British poetry, drama, fiction, and criticism c.1790 to c.1830, a period of dramatic social change and revolution in literature, philosophy, the arts, industry, and politics. Authors include Austen, Wordsworth, Coleridge, Keats, Byron, Percy, and Mary Shelley.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL422 English Victorian Literature (3 Credits)
A survey of English literature of the Victorian period. Writers may include Arnold, Browning, Tennyson, Dickens, George Eliot, Carlyle, Ruskin, Newman, and Wilde.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL425 Modern British Literature (3 Credits)
Major Modernist writers in English prose and poetry since 1900. Such writers as Eliot, Larkin, Forster, Burgess, Durrell, Henry Green, Golding, Auden, Malcolm Lowry, Joyce, and Yeats.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL428 Seminar in Language and Literature (3 Credits)
Topics will vary each semester. The course will provide a seminar experience in material or methodologies not otherwise available to the major.
Restriction: Junior standing or higher; and must be in the English Honors program or gain permission from the department.
Repeatable to: 12 credits if content differs.

ENGL429 Independent Research in English (1-6 Credits)
An advanced independent research project for qualified students, supervised by an English faculty member, on a topic not ordinarily covered in available courses.
Prerequisite: ENGL301; and two English courses (excluding fundamental studies requirement); and permission of ARHU-English department.
Restriction: Sophomore standing or higher.
Repeatable to: 9 credits if content differs.

ENGL430 Literature of the Americas from First Contact to Revolution (3 Credits)
Examines the literature of the cultural encounters, colonialisms, empires, and independence movements in the early Americas from 1492 through the eighteenth century. Writers typically include Christopher Columbus, John Smith, Anne Bradstreet, Jonathan Edwards, William Byrd, Olaudah Equiano, Phillis Wheatley, and Benjamin Franklin.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL431 American Literature: Revolution to Civil War (3 Credits)
An examination of nationalism, sentimentalism, and romanticism, with writings focusing on such topics as slavery and democracy during the 1770s to 1860s. Authors typically include Ralph Waldo Emerson, Margaret Fuller, Emily Dickinson, Walt Whitman, Frederick Douglass, Harriet Beecher Stowe, Edgar Allan Poe, Nathaniel Hawthorne, and Herman Melville.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL432 American Literature: 1865 to 1914, Realism and Naturalism (3 Credits)
Reconstruction, Realism, Naturalism. Representative writers such as Dickinson, James, Dreiser.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL433 American Literature: 1914 to the Present, the Modern Period (3 Credits)
Modernism, Postmodernism. Writers such as Stevens, Stein, Ellison.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL435 American Poetry: Beginning to the Present (3 Credits)
Selections of American poetry, from Bradstreet to contemporary free verse. Authors such as Whitman, Dickinson, Bishop, Hughes, Rich, and Frost.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL437 Contemporary American Literature (3 Credits)
Prose, poetry, drama of living American writers. Current cultural and social issues.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL439 Spotlight on Major Writers (3 Credits)
An intensive study of a single writer, or a handful of writers, to understand the shifts in the writer's craft and cultural influence, both past and present.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL440 The Novel in America to 1914 (3 Credits)
Survey of the American novel to World War I. Cultural and philosophical contexts; technical developments in the genre. Authors such as Melville, Wells Brown, James, Sedgwick, Chopin.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL441 The Novel in America Since 1914 (3 Credits)
Survey of the American novel since World War I. Cultural and philosophical contexts, technical developments in the genre. Authors such as Hemingway, Cather, Faulkner, Anne Tyler, Morrison.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL444 Feminist Critical Theory (3 Credits)
Issues in contemporary feminist thought that have particular relevance to textual studies, such as theories of language, literature, culture, interpretation, and identity.
Prerequisite: WMST200, WMST250, or ENGL250. Cross-listed with WMST444.
Credit Only Granted for: ENGL444 or WMST444.

ENGL445 Modern British and American Poetry (3 Credits)
The formation of Modernism in British and American poetry before 1930. Such poets as Yeats, Pound, H.D., Eliot, Langston Hughes, Moore, Stevens, and Williams.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL446 Post-Modern British and American Poetry (3 Credits)
British and American poets from the 1930s to the present. Such poets as Auden, Williams, Plath, Brooks, Lowell, Wolcott, Ted Hughes, Bishop, Larkin, Jarrell, and Berryman.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL448 Literature by Women of Color (3 Credits)
Literature by women of color in the United States, Britain, and in colonial and post-colonial countries.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs. Cross-listed with WMST448.
Credit Only Granted for: ENGL448 or WMST448.

ENGL449 Selected Topics in U.S. Latinx Literature (3 Credits)
Advanced study of selected works by U.S. Latinx writers.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL450 Renaissance Drama I (3 Credits)
Drama of the sixteenth century, from Sir Thomas More's circle through Lyly, Greene, Marlowe, and their successors. Interludes, school drama, comedy and tragedy, professional theater. Influences of humanism, Protestantism, politics, and cultural change.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL451 Renaissance Drama II (3 Credits)
Drama in early decades of the seventeenth century. Playwrights include Jonson, Middleton, Marston, Webster, Beaumont and Fletcher. Tragedy, city comedy, tragicomedy, satire, masque. Pre-Civil War theatrical, political, and religious contexts.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL452 English Drama From 1660 to 1800 (3 Credits)
Restoration and eighteenth-century drama, with special attention to theater history, cultural influences, concepts of tragedy, comedy, farce, parody, and burlesque, as well as dramatic and verbal wit.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL453 Literary Theory (3 Credits)
An in-depth study of literary and critical theory.
Prerequisite: Two courses in literature; or permission of ARHU-English department.

ENGL454 Modern Drama (3 Credits)
The history of modern British drama, from its roots in Chekhov and Ibsen, through the modernisms of Samuel Beckett and Bertolt Brecht, through the Angry Young Men of the 1950s, and right up to the present. Most plays will be from the last 40 years, by writers such as David Hare, Tom Stoppard, Lucy Kirkwood, Caryl Churchill, Roy Williams, Lucy Prebble, Alan Bennett, Brian Friel, Terrence Rattigan, Kwame Kwei-Armah, Sarah Kane, and Alice Birch. We will also look at how class, money, immigration, and the end of the Empire changed British plays over time. And we will consider modern theater architecture and production design as well as the directing instincts of, for instance, Peter Brook, Katie Mitchell, Marianne Elliott, and Nicholas Hytner.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL455 The Eighteenth-Century English Novel (3 Credits)
The origins and development of the British novel, from the late seventeenth century until the beginning of the nineteenth. Questions about what novels were, who wrote them, and who read them. Authors such as Behn, Defoe, Richardson, Fielding, Sterne, Smollett, Burney, Radcliffe, and Austen.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL456 The Nineteenth-Century English Novel (3 Credits)
Surveys major novels of the period. Attention to narrative form and realism; representations of gender and class; social contexts for reading, writing and publishing. Authors such as Austen, Bronte, Dickens, George Eliot, Trollope.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL457 The Modern Novel (3 Credits)
Modernism in the novel of the twentieth century. Such writers as Joyce, Lawrence, Murdoch, James, Forster, Faulkner, Hemingway, Fitzgerald, Ellison, Welty, Nabokov and Malamud.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL458 Literature by Women after 1800 (3 Credits)
Selected writings by women after 1800.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs. Cross-listed with WMST458.
Credit Only Granted for: ENGL458 or WMST458.

ENGL459 Selected Topics in LGBTQ+ Literatures and Media (3 Credits)
Advanced study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL460 Archival Research Methods in English Studies (3 Credits)
Introduces approaches for doing archival research in English studies, exploring how researchers develop their scope and practices of study and how they access and use archival materials electronically and on site to further their research questions. Investigates a historical period, genre, or theme through the lens of manuscripts, ephemera, and other artifacts. Case studies vary by semester.
Prerequisite: Two English courses beyond the Fundamental Studies courses; or permission of ARHU-English Department.

ENGL461 Qualitative Research Methods in English Studies (3 Credits)
Introduces approaches to qualitative research in English studies, exploring how researchers build knowledge about writing and literacy. Explores qualitative methodologies such as ethnography, case study, and grounded theory. Introduces principles of ethical and responsible research practices. Engages students in practices of data collection (such as interview, observation, and survey), as well as practices of data analysis and reporting.
Prerequisite: Two English courses beyond the Fundamental Studies courses; or permission of ARHU-English Department.
Credit Only Granted for: ENGL488R or ENGL461.
Formerly: ENGL488R.

ENGL462 Folksong and Ballad (3 Credits)
A cross-section of American folk and popular songs in their cultural contexts; artists from Bill Monroe to Robert Johnson.

ENGL465 Theories of Sexuality and Literature (3 Credits)
An in-depth study of the ways in which sexuality and sexual difference create or confound the conditions of meaning in the production of literary texts. Attention to psychoanalysis, history of sexuality, feminist theory, and other accounts of sexual identity.
Prerequisite: Two lower-level English courses, at least one in literature; or permission of ARHU-English department. Cross-listed with LGBT465.
Credit Only Granted for: ENGL465 or LGBT465.

ENGL466 Arthurian Legend (3 Credits)
Development of Arthurian legend in English and continental literature from Middle Ages to twentieth century. All readings in modern English.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL467 Critical and Creative Approaches to Digital Textuality (3 Credits)
Examines electronic literature and other aspects of the literary world online with a focus on experimental writing with computers. Topics may include digital fiction and storytelling, analysis of literary texts using digital tools, bots, book hacking, flash fiction, narrative in games, and the history of computer-generated writing. No programming experience required.
Prerequisite: One English course in literature; or permission of ARHU-English department.

ENGL468 Selected Topics in Film Studies (3-9 Credits)
Advanced studies in various periods and genres of film.
Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of ARHU-English department.
Recommended: ENGL329, CMLT280, and ENGL245.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: ENGL468, ENGL479E-Spr 2008, ENGL479F-Spr 2009, ENGL479G-Fall 2008, or ENGL479M-Fall 2009/Fall 2010.

ENGL469 The Craft of Literature: Creative Form and Theory (3 Credits)
Examines various forms of poetry and/or fiction, emphasizing the practice of making literary art and the aesthetic and theoretical approaches that define it. Students will practice the elements of literary craft, producing and experimenting with a wide range of forms and conventions in poetry and/or fiction. They will also produce critical work that articulates and contextualizes theoretical approaches to the making of literary art.
Prerequisite: 2 ENGL courses in literature or creative writing; and have completed a 200-level creative writing workshop in ENGL. Or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL470 African-American Literature: From Slavery to Feedon (3 Credits)
Examines African-American literature from its beginnings to the early twentieth century, including genres ranging from slave narratives, pamphlets, essays, and oratory, to poetry and fiction. Our emphasis is on the interaction between literature and literary forms, on the one hand, and historical and political developments in the push toward emancipation, on the other.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL471 African-American Literature: 1910-1945 (3 Credits)
Emergence of modernism in African-American writing including debates over the definition of unique African-American aesthetics, with emphasis on conditions surrounding the production of African-American literatures.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL472 African-American Literature: 1945 to Present (3 Credits)
Transformation of African-American literatures into modern and postmodern forms. Influenced by World War II and the Civil Rights and Black Power movements, this literature is characterized by conscious attempts to reconnect literary and folk forms, the emergence of women writers, and highly experimental fiction.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL475 Postmodern Literature (3 Credits)
The origins and ongoing development of postmodern literature. Aspects of the 'postmodern condition,' such as the collapse of identity, the erasure of cultural and aesthetic boundaries, and the dissolution of life into textuality. The novel and other genres and media.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL478 Selected Topics in English and American Literature before 1800 (1-3 Credits)
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL479 Selected Topics in English and American Literature after 1800 (3 Credits)
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL482 History of the English Language (3 Credits)
Examines the origins and development of the English language.
Prerequisite: ENGL280, LING200, or HESP120; or permission of ARHU-English department.

ENGL483 American English(es) (3 Credits)
Examines the diversity of dialects, registers, and jargons of English found in the United States, as well as their origins, structures, and functions in society.
Prerequisite: LING200, ENGL280, or HESP120; or permission of ARHU-English department.

ENGL484 Style and Grammar in Written English (3 Credits)
The linguistic analysis of written texts. Examines grammatical and discursive constructions above the level of the sentence and their functions in literary and non-literary texts. We will study narrative structure, authorial voice, genre, register, stance, viewpoint, empathy, surprise, and humor in language.
Credit Only Granted for: ENGL484 or LING402.

ENGL486 Introduction to Old English (3 Credits)
Grammar, syntax, and phonology of Old English. Works read in the original language. Poetry may include 'Battle of Maldon,' 'Dream of the Rood,' 'Wanderer,' 'Seafarer,' riddles; prose of Bede, Wulfstan, Aelfric, and other writers of Anglo-Saxon period in England.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL487 Principles and Practices of Rhetoric (3 Credits)
A seminar examining foundational concepts and approaches in the theory and practice of rhetoric in civic, professional, academic, and interpersonal settings; focusing on key issues in persuasion, argumentation, and eloquence in historical and contemporary contexts.

ENGL488 Topics in Advanced Writing (3 Credits)
Different genres of technical and professional writing including proposal writing, computer documentation, technical report writing, instruction manuals, etc. Students will analyze models of a genre, produce their own versions, test, edit and revise them.
Repeatable to: 9 credits if content differs.

ENGL489 Special Topics in Language and Rhetoric (3 Credits)
Special topics in language and rhetoric, such as discourse analysis, semantics, or cognitive linguistics; comparative rhetoric and rhetorical theory, digital rhetorics, women's and minority rhetorics, or the history of rhetoric.
Repeatable to: 9 credits if content differs.

ENGL491 Digital Rhetoric (3 Credits)
Examines the social significance of the ways digital texts are composed and circulated. Explores why it matters how the web is written and who does the writing, understanding the Internet as rhetorical from its content and communities to the code, protocols, and policies that control digital distribution. Includes active experimentation with digital tools so students can expand their theoretical understanding through critical making.
Prerequisite: Students must have satisfied the Fundamental Studies Academic Writing requirement.
Credit Only Granted for: ENGL489J, or ENGL491.
Formerly: ENGL489J.

ENGL492 Graphic Design and Rhetoric (3 Credits)
An exploration of the visual dimensions of texts and the skills involved in designing them well. Considers graphic design theory and history from a rhetorical perspective, working to understand and practice the use of symbol systems to express, inform, and advocate. Includes direct experimentation with the principles and techniques of graphic design.
Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

ENGL493 Writing Genres as Social Action (3 Credits)
A rhetorical genre studies approach to understanding the work that texts do in the world. Examines issues of identity, power, and medium as they relate to writing in various contexts. Students analyze the texts, context(s), and social significance of a public, professional, digital, and/or advanced academic genre and produce writing that meets, modifies, and subverts expectations.
Recommended: Satisfactory completion of the professional writing requirement (FSPW).
Restriction: Must have earned a minimum of 60 credits.

ENGL494 Editing and Document Design (3 Credits)
Principles of general editing for clarity, precision and correctness. Applications of the conventions of grammar, spelling, punctuation and usage, and organization for logic and accuracy. Working knowledge of the professional vocabulary of editing applied throughout the course.
Prerequisite: ENGL393 or ENGL391; or students who have taken courses with comparable content may contact the department.

ENGL495 Independent Study in Honors (1-3 Credits)
Completion and presentation of the senior honors project.
Prerequisite: ENGL373 and ENGL370.
Restriction: Must be in English Language and Literature program; and candidacy for honors in English.

ENGL497 English at Work (3 Credits)
Examines how English majors put their academic knowledge and skills to work in professional workplaces after graduation. Students learn strategies to research careers, and they shadow a person in a career of interest for a day. Students learn to compose different professional genres to write and speak about and for professional development and advancement, including inquiry letters, technical descriptions, professional portfolios, and elevator pitches. Students will critically examine the learning they have done in their undergraduate coursework and compose a vision for bringing that learning to life in their future work.
Prerequisite: ENGL301; and an ENGL course at the 300-level or higher.
Restriction: Must have earned a minimum of 60 credits.

ENGL498 Advanced Fiction Workshop (3 Credits)
An advanced class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and to colleagues' fiction, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.
Prerequisite: ENGL352; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.
Formerly: ENGL496.

ENGL499 Advanced Poetry Workshop (3 Credits)
An advanced class in the making of poetry. Intensive discussion of students' own poems. Readings include both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, and attendance at poetry readings.
Prerequisite: ENGL353; or permission of ARHU-English department.
Repeatable to: 9 credits.
Formerly: ENGL497.

ENGX - English Education Abroad

ENGX200 Writing From Research (3 Credits)
Prepares students to plan, research, and write academic-level research papers autonomously. Students are guided through all writing stages, from preparing an articulated research proposal, to collecting sources and arranging them in an annotated bibliography, to outlining, drafting, and, finally, completing the paper in accordance with current MLA guidelines.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX202 Fiction: Genre, Techniques, and Structure (3 Credits)
Designed to help students acquire the skills for reading, appreciating, writing, and critically analyzing fiction. This course intends to introduce the students to basic concepts about literary technique, elements of fiction, and innovation while honing their critical thinking skills.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX203 Creative Writing (3 Credits)
Explores the creative process, giving students concrete ways to enhance their creative thought and writing. Through writing assignments and numerous inventive classroom exercises, students learn how to write more interesting characters, fascinating plots and colorful stories.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX300 The Image of Barcelona in Literature (3 Credits)
After the Olympic Games of 1992, Barcelona became an international tourist destination; but a short visit cannot account for the cultural complexities of the Catalan capital. In order to know any city, to 'dwell' in it, we need to become familiar with its oral history, paintings, architecture, sculpture, and literary texts.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

ENGX302 From Literature to Social Media: Reading and Writing Italian Food (3 Credits)
Focuses on one important aspect (present in both fiction and nonfiction writing): the expression and description of sensory experiences through words. Examining literature as well as nonfictional food writings, students will discover that the art of writing about food and drink involves not only an interest in the gustatory experience, but also an ability to translate sensory experiences into words.
Formerly: ENGL379I.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Umbria Institute Course Code: ENG325. More information at ter.ps/UMPerugia.

ENGX303 Italian Tales and Stories: Creative Writing Through Literary Models (3 Credits)
Explores the process of transforming sensory impressions, individual feelings, personal experiences, and factual information into engaging and effective works of creative fiction and non-fiction. Students will read from a cross-section of Italian authors dealing with a wide range of topics and issues. They will also generate their own writing through a series of exercises designed to help the writer tap into new levels of awareness and creative energy. Students will also be involved in a series of 'literary walks' aimed at enhancing their ability to gather information from the exploration of Italian natural and urban landscapes.
Formerly: ENGL379W.
Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Umbria Institute Course Code: ENG 340. More information at ter.ps/UMPerugia.

ENGX305 Scandinavian Crime Fiction (3 Credits)
In Scandinavian crime fiction, the most fantastic murders take place, families fall apart, their dark secrets are exposed, and the validity of the Scandinavian countries' welfare system is questioned - all of this described in a distinctly Scandinavian tone and style.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ENGX400 Fashion, Media and Communication (3 Credits)
Fashion Writing is an extremely important aspect of cultural and creative nonfiction prose. With the rise of internet and mass journalism worldwide, the fashion and accessories industry has become increasingly focused on getting across the messages to audiences of all ages and backgrounds.
Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX401 Shakespeare's Italian Plays (3 Credits)
The intensive study of five or six of Shakespeare's comedies and tragedies set in Italy, ancient and early modern, with attention to English attitudes toward Italy and Shakespeare's use of Italy, the nature of comedy and tragedy, and the shape of Shakespeare's career.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. American University of Rome Course code: ENG 301 / ENG 309. More information at ter.ps/UMRome.

ENGX404 Travel Writing (3 Credits)
The world is full of fascinating people and places - and stories waiting to be told. Travel writers capture these stories and pass them on to their readers. Good travel writers make us care. In this class, you will learn how to identify relevant stories, how to gather material and how to release all of this in well-written pieces. Our main focus is narrative journalism - the kind of stories you would normally see as features in travel magazines.
Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. More information at ter.ps/UMCopenhagen.

ENGX405 Hans Christian Andersen and the Danish Golden Age (3 Credits)
Hans Christian Andersen (1805-1875) is internationally known as the writer of fairy tales. Children all over the world know The Ugly Duckling, The Emperor's New Clothes, The Little Mermaid, The Princess and the Pea and other tales. But Andersen also wrote plays, novels, poems, travelogues and songs. This course will be a study of approximately 30 fairy tales by Hans Christian Andersen (1805-75) as well as extracts from his travelogues, poems, diaries and his autobiography, The Fairy Tale of My Life.
Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. More information at ter.ps/UMCopenhagen.

ENGX406 The Literature of War - Europe and WWI (3 Credits)
Examines the various literary responses to war and the ways in which artists and writers have negotiated power, violence, and resistance within the context of military conflict.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX407 Italian Women Writers (3 Credits)
This course presents an overview of women's fiction in Italy from the turn-of-the-century context, with writers such as Neera and Sibilla Aleramo, to the present day, with Elena Ferrante and Dacia Maraini. The course will examine women's changing role within Italian society and issues such as sexual violence, motherhood, the search for self-determination and autonomy and paths to political awareness.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENMA - Engineering, Materials

ENMA150 Materials of Civilization (3 Credits)
The discovery of new materials has shaped history and built civilizations. The utilization, properties and production techniques of materials from the Bronze Age up through modern times and into the future will be traced. These materials are explained by considering their atomic structure, the binding forces between atoms and their arrangement, and how controlling the structure controls the materials properties.

ENMA180 Materials Science and Engineering: The Field and the Future (1 Credit)
Overview of the profession and the components of the Materials Science and Engineering program. Students will become familiar with the departmental faculty, areas of specialization within MSE, professional society student chapter, research opportunities and other resources available to students.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENMA201 Bigger, Faster, Better: The Quest for Absolute Technology (3 Credits)
The goal of the course is to familiarize the students with applied science and engineering concepts necessary to understand technological advances, breakthroughs and world-leading achievements that have shaped our present lives and will impact our future. The political, economic, and personal driving forces behind selected technological transformations, societal contexts, and conflicts that are inherent in unsustainable technology will also be covered.
Credit Only Granted for: ENMA201 or ENMA289A.
Formerly: ENMA289A.

ENMA289A Bigger, Faster, Better: The Quest for Absolute Technology (3 Credits)
The goal of the course is to familiarize the students with applied science and engineering concepts necessary to understand technological advances, breakthroughs and world-leading achievements that have shaped our present lives and will impact our future. The political, economic, and personal driving forces behind selected technological transformations, societal contexts, and conflicts that are inherent in unsustainable technology will also be covered.
Credit Only Granted for: ENMA201 or ENMA289A.
Formerly: ENMA289A.

ENMA300 Introduction to Materials Engineering (3 Credits)
Structure of materials, chemical composition, phase transformations, corrosion and mechanical properties of metals, ceramics, polymers and related materials. Materials selection in engineering applications.
Prerequisite: ENES100; and permission of ENGR-Materials Science & Engineering department.
Corequisite: MATH241.
Recommended: PHYS261 and PHYS260.
Restriction: Permission of ENGR-Mechanical Engineering department. Cross-listed with ENME382.
Credit Only Granted for: ENMA300 or ENME382.

ENMA301 Modern Materials Engineering (3 Credits)
Five topical areas will be presented, each leading up to specific applications that have recently come to market or are currently experiencing heavy research and development. The goal of each module will be to introduce the basic materials science principles necessary to understand these new areas.
Prerequisite: ENMA180; or students who have taken courses with comparable content may contact the department. And ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA312 Experimental Methods in Materials Science (3 Credits)
Introduction to experimental methods in materials characterization; synthesis of colloidal nanoparticles; X-ray diffraction and light scattering; optical microscopy; thermal conductivity and expansion; electrical measurements; heat capacity; computational materials design.
Prerequisite: ENMA300.
Corequisite: ENMA460.
Restriction: Junior standing or higher.

ENMA315 Archeology meets Technology: Introduction to Archeometry (3 Credits)
Focuses on the application of scientific methods of analysis to archaeological materials including bone, stone, pottery, and metal. Methods include absolute dating, remote sensing, optical and SEM microscopy, elemental and isotopic analysis. Laboratory sections provide hands-on experience with a variety of archaeological materials and analytical methods.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Recommended: Some knowledge of archaeology and archaeological methods, geology or chemistry is useful, but not required.

ENMA362 Mechanical Properties (3 Credits)
Overview of Mechanical Behavior, Elastic Behavior, Dislocations, Plastic Deformation, Strengthening of Crystalline Materials, Composite Materials, High Temperature Deformation of Crystalline Materials, Permanent Deformation of Noncrystalline Materials, Tensile Fracture at Low Temperatures, Engineering Aspects of Fracture, High Temperature Fracture, Fatigue, and Experimental determination of Mechanical Properties including Hardness of Metals and Strength of Metals, Polymers, Ceramics and Composites.
Prerequisite: ENMA300.
Restriction: Junior standing or higher; and permission of ENGR-Materials Science & Engineering department.

ENMA386 Experiential Learning (3-6 Credits)
Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENMA400 Introduction to Atomistic Modeling in Materials (3 Credits)
This is an introductory course designed to study atomistic modeling and simulation techniques used in materials research. This course covers the theories, methods, and applications of atomistic-scale modeling techniques in simulating, understanding, and predicting the properties of materials. Specific topics include: molecular statics using empirical force fields; quantum mechanical methods including density functional theory; molecular dynamics simulations; and Monte Carlo and kinetic Monte Carlo modeling.
Prerequisite: ENMA300, MATH206, and ENMA460.
Recommended: Basic knowledge in quantum mechanics (preferred but not required); basic knowledge in statistical mechanics (preferred but not required). Also offered as: ENMA600.
Credit Only Granted for: ENMA489A, ENMA400, ENMA698A, or ENMA600.
Formerly: ENMA489A.

ENMA410 Materials for Energy I (3 Credits)
The goal is to demonstrate the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. There will be a discussion of U.S. and global energy and related environmental issues. Topics covered include: fuel cells and batteries (electrochemical energy conversion and storage); catalysts and membrane separations (fossil fuel and biomass energy conversion); and nuclear fuels.
Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA410 or ENMA489H.
Formerly: ENMA 489H.

ENMA411 Materials for Energy II (3 Credits)
Demonstrates the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. Materials for Energy is a two-part course based on material functionality; however, they are independent and neither is a prerequisite for the other. Materials for Energy II will focus on electrical, optical, thermal, and mechanically functional materials for energy devices. Solar cells, solar fuel, solar thermal, energy efficient lighting, building energy, thermoelectric and wind energy will be covered.
Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA411 or ENMA489I.
Formerly: ENMA489I.

ENMA412 Fundamentals of Photovoltaics (3 Credits)
Overview of the fundamentals of photovoltaic devices, including principles of operation, with emphasis on the materials science aspects of the different technologies available.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA414 Introduction to Solid State Ionics (3 Credits)
Solid State Ionics is the study of point defects in crystalline and non-crystalline solids; defect equilibria and transport; the influence of chemical and electric potentials, interfaces, and association; and the application of ionically conducting solids in solid-state electrochemical transducer systems and devices.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA414 or ENMA489W.
Formerly: ENMA489W.

ENMA421 Design of Composites (3 Credits)
Fundamentals of design, processing and selection composite materials for structural applications will be covered. The topics include a review of all classes of materials, an in-depth analysis of micro and macro mechanical behavior including interactions at the two-phase interfaces, modeling of composite morphologies for optimal microstructures, material aspects, cost considerations, processing methods including consideration of chemical reactions and stability of the interfaces, and materials selection considerations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA421 or ENMA489A.
Formerly: ENMA489A.

ENMA422 Radiation Effects of Materials (3 Credits)
Ionizing radiation, radiation dosimetry and sensors, radiation processing, radiation effects on: polymers, metals, semiconductors, liquids, and gases. Radiation in advanced manufacturing, radiation-physical technology.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA422 or ENMA489E.
Formerly: ENMA489E.

ENMA425 Introduction to Biomaterials (3 Credits)
Examination of materials used in humans and other biological systems in terms of the relationships between structure, fundamental properties and functional behavior. Replacement materials such as implants, assistive devices such as insulin pumps and pacemakers, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds, and biocompatibility will be covered.
Recommended: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

ENMA426 Reliability of Materials (3 Credits)
Students are taught the basic degradation mechanisms of materials, through the understanding of the physics, chemistry, mechanics of such mechanisms. Mechanical failure mechanisms concentrate on fatigue, and creep. Chemical failure mechanisms emphasize corrosion and oxidation. Physical mechanisms such as diffusion, electromigration, defects and defect migration, surface trapping mechanisms, charge creation and migration are also included.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA426 or ENMA489R.
Formerly: ENMA489R.

ENMA430 Quantum Size Effects in Nanomaterials (3 Credits)
Surveys materials systems whose properties are governed by quantum mechanical phenomena. The time-independent Schrodinger equation is employed to relate materials structure and size to their electrical, thermal and optical properties. Integrated throughout the course are (1) surveys of approaches for the synthesis of the nanoscale structures (nanoparticles, nanowires, nanotubes, etc.), (2) computer-based exercises, (3) review of influential articles from the scientific literature, and (4) in-depth analysis of devices and applications that utilize the quantum materials.
Prerequisite: PHYS431 or ENMA460; and (CHEM231 or CHEM481).

ENMA431 Nanomechanics of Biomaterials (3 Credits)
Focuses on the latest scientific developments and discoveries in the nanoscale structure and properties of biological materials. The course begins with introductory lectures on the various nanostructures of biomaterials, and their physiological roles under mechanical forces. General aspects of biopolymers, protein folding, and self-assembly are also covered. Next, a series of in-depth lectures are presented on the characterization methods of nanomechanical properties using single molecule techniques. Finally, current applications of nanobiomaterials in the area of molecular machines, molecular self-assembly, and nanoscaffold are discussed.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA431 or ENMA489B.
Formerly: ENMA489B.

ENMA435 Wide Bandgap Materials and Devices (3 Credits)
Presents the materials science of wide bandgap materials and analyzes the defects present in such materials from a device performance point of view.
Prerequisite: ENMA300 and ENMA465.
Corequisite: ENMA460.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA635.
Credit Only Granted for: ENMA435 or ENMA635.

ENMA440 Nano Plasma Processing of Materials (3 Credits)
Sustaining mechanisms of plasmas are covered, especially low-pressure electrical gas discharges, fundamental plasma physics, sheath formation, electric and magnetic field effects, plasma-surface interactions in chemically reactive systems, plasma diagnostic techniques and selected industrial applications of low pressure plasmas.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA440, ENMA489P, ENMA640, or ENMA698P.
Formerly: ENMA489P.

ENMA441 Characterization of Materials (3 Credits)
Techniques to characterize the properties of materials whose characteristic dimensions range from nanometers to macroscopic. These include conventional crystalline and noncrystalline materials, with a special attention to materials of current technological interest. The course will include recent results from the scientific literature.
Prerequisite: ENMA300 and MATH206.
Restriction: Permission of ENGR-Materials Science & Engineering department; and senior standing.
Credit Only Granted for: ENMA489T or ENMA441.
Formerly: ENMA489T.

ENMA442 Nanomaterials (3 Credits)
An exploration of materials whose structure places them at the boundary between small objects and large molecules. Having characteristic dimensions in the range of 1-100 nanometers, these materials are difficult to synthesize and characterize but are nevertheless at the forefront of science and technology in many fields. Also, the methods for creating, manipulating and measuring these materials with an emphasis on the current scientific literature will be covered. The novel properties and potential applications will also be addressed.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA442 or ENMA489N.
Formerly: ENMA489N.

ENMA443 Phontonic Materials, Devices and Reliability (3 Credits)
The course focuses on the understanding of the basic optical processes in semiconductors, dielectrics and organic materials. The application of such materials in systems composed of waveguides, light emitting diodes and lasers, as well as modulators is developed.
Restriction: Permission of ENGR-Materials Science & Engineering department; and junior standing or higher.
Credit Only Granted for: ENMA443 or ENMA489Z.
Formerly: ENMA489Z.

ENMA445 Liquid Crystals and Structured Soft Materials (3 Credits)
Elective course on the properties and behavior of liquid crystals and related soft materials, and their relationship to biomaterials and to applications.
Prerequisite: MATH246, PHYS270, and PHYS271.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA445 or ENMA489L.
Formerly: ENMA489L.

ENMA460 Introduction to Solid State Physics (3 Credits)
Classes of materials; introduction to basic ideal and real materials' behavior including mechanical, electrical, thermal, magnetic and optical responses of materials; importance of microstructure in behavior. One application of each property will be discussed in detail.
Prerequisite: PHYS271, PHYS270, and MATH241.
Restriction: Junior standing or higher; and must be in Engineering: Materials Science program. Cross-listed with: PHYS431.
Credit Only Granted for: ENMA460 or PHYS431.

ENMA461 Thermodynamics of Materials (3 Credits)
Thermodynamic aspects of materials; basic concepts and their application in design and processing of materials and systems. Topics include: energy, entropy, adiabatic and isothermal processes, internal and free energy, heat capacity, phase equilibria and surfaces and interfaces.
Prerequisite: ENMA300.
Restriction: Junior standing or higher.

ENMA462 Smart Materials (3 Credits)
A fundamental understanding will be provided as it relates to the following topics: ferroic materials, ferromagnets, ferroelectric materials, shape memory alloys and multiferroic materials that are simultaneously ferromagnetic and ferroelectric. The ferroic properties will be discussed on an atomic, nano- and micro-scales so that actual and potential applications on those scales become clear. Examples of those applications will be presented.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA462 or ENMA489B.
Formerly: ENMA489B.

ENMA463 Macroprocessing of Materials (3 Credits)
Processing of modern, bulk engineering materials. Raw materials, forming, firing, finishing and joining. More emphasis on metals and ceramics than polymers.
Prerequisite: ENMA300.
Restriction: Junior standing or higher.

ENMA464 Environmental Effects on Engineering Materials (3 Credits)
Introduction to the phenomena associated with the resistance of materials to damage under severe environmental conditions. Oxidation, corrosion, stress corrosion, corrosion fatigue and radiation damage are examined from the point of view of mechanism and influence on the properties of materials. Methods of corrosion protection and criteria for selection of materials for use in radiation environments.
Prerequisite: ENMA300. Or permission of ENGR-Materials Science & Engineering department; and permission of instructor.

ENMA465 Microprocessing Materials (3 Credits)
Micro and nanoscale processing of materials. Emphasis on thin film processing for advanced technologies.
Prerequisite: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA363, ENMA489B, or ENMA465.
Formerly: ENMA363.

ENMA466 Advanced Materials Fabrication Laboratory (3 Credits)
This course allows students an opportunity to study advanced materials systems in depth through a combination of lectures and hands-on laboratory experiments. Students will be trained in materials processing and characterization techniques. Each student will fabricate materials and devices in our state-of-the-art nanofabrication clean room facility (Fablab), as well as evaluate them using a variety of characterization techniques.
Prerequisite: ENMA465; and permission of ENGR-Materials Science & Engineering department.

ENMA470 Materials Selection for Engineering Design (3 Credits)
Students will learn about materials classes, properties, limitations and applications and the methodology of materials selection in engineering design.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA 470 or ENMA 489O.
Formerly: ENMA 489O.

ENMA471 Kinetics, Diffusion and Phase Transformations (3 Credits)
Fundamentals of diffusion, the kinetics of reactions including nucleation and growth and phase transformations in materials.
Prerequisite: Must have completed or be concurrently enrolled in ENMA461.
Restriction: Junior standing or higher; or permission of ENGR-Materials Science & Engineering department.

ENMA472 Additive Manufacturing of Materials (3 Credits)
Additive manufacturing approaches for metals, ceramics and polymers will be explored in terms of manufacturability and how processing parameters affect microstructure and properties. The course will include projects, including a Terrapin Works project to design and build a part, to develop an understanding of the current state of additive manufacturing, its future promise and its limitations.
Prerequisite: ENMA300.
Restriction: Must be in Engineering: Materials Science program.
Credit Only Granted for: ENMA472 or ENMA672.

ENMA473 Engineering Using High Strength Metals and Alloys (3 Credits)
This is a class focused on the materials engineering challenges of applying high strength metals and alloys to solutions. The extraordinary properties of these alloys derive from (1) highly metastable microstructures, (2) high strengths and melting points of the base metals, (3) complicated processing and fabrication procedures, and (4) their resulting complex behavior in extreme environments. This course will give you the knowledge base you need to select, apply and troubleshoot the performance of high strength metals and alloys in a variety of applications.
Prerequisite: ENMA300, ENMA362, and ENMA461; and permission of ENGR-Materials Science & Engineering department.

ENMA474 Introduction to Computational Materials Science (3 Credits)
This is an introductory course aiming for junior and senior undergraduate students to study atomistic modeling and simulation techniques that are used in materials science. This course covers the theories and applications of atomistic scale modeling techniques to simulate, understand, and predict the properties of materials. Topics include: molecular statics, quantum mechanical methods, molecular dynamics simulations and Monte Carlo simulations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA474 or ENMA489A.
Formerly: ENMA489A.

ENMA475 Fundamentals of Diffraction Techniques in Materials Science (3 Credits)
This course looks at the advanced methods of x-ray scattering/diffraction available thanks to the more powerful sources available to us. The availability of these sources enables us to study liquid crystals, polymers, nanomaterials, quasiorganized materials (including nano) and disordered materials.
Prerequisite: MATH246, PHYS270, and PHYS271.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA475 or ENMA489M.
Formerly: ENMA489M.

ENMA476 NanoManufacturing: Materials Design and Systems Integration (3 Credits)
The fundamentals of nanomanufacturing based on state-of-the-art and future prospects in materials design and systems integration. The course examines functional nanomaterials design and synthesis, structural assembly from nanoscale to macroscale, and device fabrication. Distinct from the current curricular paradigm in many nanotechnology programs that focus on underlying science, this course emphasizes the immediate need for scale-up, process robustness, and system integration issues. Featuring case studies from industry, end of chapter problems, and study questions, the course is for upper-level undergraduate and graduate students, who are interested in the future of manufacturing innovation and technology.
Restriction: Must be in Engineering: Materials Science program.

ENMA481 Introduction to Electronic and Optical Materials (3 Credits)
Electronic, optical and magnetic properties of materials. Emphasis on materials for advanced optoelectronic and magnetic devices and the relationship between properties and the processing/fabrication conditions.
Prerequisite: ENMA300; or students who have taken courses with comparable content may contact the department.

ENMA482 Introduction to Electron Microscopy (3 Credits)
An introduction of the basic principles of operation for modern electron microscopes. Details will be given on the construction of microscopes, their basic operation, and the types of questions that can be addressed with an electron microscope. Emphasis will be placed on a conceptual understanding of the underlying theories. Where appropriate, mathematical descriptions will be utilized. Upon completion of this course, students will be excepted to have a basic understanding sufficient to give interpretations of microscopy images and to suggest the correct tool or approach for certain research studies.
Prerequisite: PHYS142, PHYS122, or PHYS260.
Credit Only Granted for: ENMA482 or ENMA489J.
Formerly: ENMA489J.

ENMA484 Fundamentals of Finite Element Modeling (3 Credits)
A brief review of mechanical behavior of materials, introduction to Finite Element Modeling (FEM), and procedures for predicting mechanical behavior of materials by FEM using computer software (at present ANSYS). The FEM procedures include, setting up the model, mesh generation, data input and interpretation of the results.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA484 or ENMA489F.
Formerly: ENMA489F.

ENMA486 Seminar in Materials Science and Engineering (1 Credit)
Current research in materials science and engineering and related fields. The lectures are presented by scientists and engineers from academia, national laboratory, US government, etc., in the format of seminars.
Restriction: Must be in Engineering: Materials Science program.

ENMA487 Capstone Preparation (1 Credit)
In preparation for the senior level design course, students will do background research and develop white papers from which teams will form around short listed design projects. The projects should focus on a society, industry, military or technological based problem in Materials Science and Engineering leading to a design and strategy to address the problem in the following course, ENMA 490. The course will include written and oral presentations of the white papers and team proposals.
Restriction: Must be in Engineering: Materials Science program; and senior standing; and permission of ENGR-Materials Science & Engineering department.

ENMA489 Selected Topics in Engineering Materials (3 Credits)
Selected topics of current importance in materials science and engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 12 credits if content differs.

ENMA490 Materials Design (3 Credits)
Capstone design course. Students work in teams on projects evaluating a society or industry based materials problem and then design and evaluate a strategy to minimize or eliminate the problem; includes written and oral presentations.
Prerequisite: Minimum grade of C- in ENMA487.
Restriction: Senior standing.

ENMA495 Polymeric Engineering Materials I (3 Credits)
Study of polymeric engineering materials and the relationship to structural type. Elasticity, viscoelasticity, anelasticity and plasticity of single and multiphase materials. Emphasis is on polymetric materials.
Prerequisite: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA496 Processing and Engineering of Polymers (3 Credits)
A comprehensive analysis of processing and engineering techniques for the conversion of polymeric materials into useful products. Evaluation of the performance of polymer processes, design of polymer processing equipment, effect of processing on the structure and properties of polymeric materials.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA499 Senior Laboratory Project (1-3 Credits)
Students work with a faculty member on an individual laboratory project in one or more of the areas of engineering materials. Students will design and carry out experiments, interpret data and prepare a comprehensive laboratory report.
Restriction: Senior standing.

ENME - Engineering, Mechanical

ENME201 Careers in Mechanical Engineering (1 Credit)
The Mechanical Engineering Curriculum, Career Paths. Research areas in the Mechanical Engineering Department. The Mechanical Engineering Profession.

ENME202 Computing Fundamentals for Engineers (3 Credits)
Introduction to computational tools for the solution of engineering problems. C++ & MATLAB programming including branching and loops, functions, file handling, arrays, and data structures. Students will be introduced to object-oriented programming, basic computing, algorithms, and principles of software engineering.
Corequisite: Must be concurrently enrolled in MATH141.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENAE202 or ENME202.

ENME207 Fabrication and Machine Tool Practices for Engineering (2 Credits)
In order to make the best decisions in product design and development, it is important to understand the capabilities and limitations of different fabrication techniques. Students will learn to identify machine parts and functions, define machine shop terminology, calculate shop formulas and theories, execute machine operations, and apply proper measuring tools.
Prerequisite: PHYS161. And ENME272; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME208 Introduction to Automotive Engineering and Design (2 Credits)
Selected concepts in automotive engineering and design at the introductory level utilizing the Terps Racing Baja SAE student project as a learning instrument. This class compliments ENME408, Automotive Design, which focuses on the Terps Racing Formula SAE car.
Prerequisite: ENES100.
Recommended: ENES220; and ENES221.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 4 credits if content differs.

ENME242 Building Products that Last - Failure is NOT an Option! (3 Credits)
Have you ever wondered why airplanes crash or bridges collapse? Or even why your car is always in the shop or your computer screen goes blank? This course will let you in on the secret of why engineered products and structures fail and how designers are changing how they work to make products with higher reliability and longer life-spans. Even more, it will make you think about the many consequences that arise from failure ranging from direct replacement cost and legal liability to environmental impact and even changes in government policies and regulation

ENME272 Introduction to Computer Aided Design (2 Credits)
Fundamentals of CAD, using solid modeling packages (Pro/E, SolidWorks, and Autodesk Inventor). Two and three dimensional drawing. Dimensioning and specifications. Introduction of CAD based analysis tools. Students will complete a design project.
Prerequisite: ENES100; and must have completed or be concurrently enrolled in MATH141.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME 414 or ENME272.

ENME289 Exploring Topics in Mechanical Engineering (2 Credits)
Introductory Design Topics in the Field of Mechanical Engineering.
Repeatable to: 4 credits if content differs.

ENME331 Fluid Mechanics (3 Credits)
Principles of fluid mechanics. Mass, momentum and energy conservation. Hydrostatics. Control volume analysis. Internal and external flow. Boundary layers. Modern measurement techniques. Computer analysis. Laboratory experiments.
Prerequisite: ENES232 and ENES221.
Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENME332 Transfer Processes (3 Credits)
The principles of heat transfer. Conduction in solids. Convection. Radiation. Modern measurement techniques. Computer analysis.
Prerequisite: ENME331.
Credit Only Granted for: ENME332 or ENFP312.

ENME350 Electronics and Instrumentation I (3 Credits)
Modern instrumentation. Basic circuit design, standard microelectronic circuits. Digital data acquisition and control. Signal conditioning. Instrumentation interfacing. Designing and testing of analog circuits. Laboratory experiments.
Prerequisite: PHYS271 and PHYS270.

ENME351 Electronics and Instrumentation II (3 Credits)
Continuation of ENME 350. Modern instrumentation. Basic circuit design, standard microelectronic circuits. Digital data acquisition and control. Signal conditioning. Instrumentation interfacing. Designing and testing of analog circuits. Laboratory experiments.
Prerequisite: PHYS271, ENME350, and PHYS270.

ENME361 Vibration, Controls and Optimization I (3 Credits)
Fundamentals of vibration, controls and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical description of system response, system stability, control and optimization. Optimal design of mechanical systems.
Prerequisite: ENES220, ENES221, and MATH246; and (MATH206 or ENME202).
Restriction: Must be in Engineering: Mechanical program.

ENME371 Product Engineering and Manufacturing (3 Credits)
Business aspects of engineering product development. Relationship of design and manufacturing. Product specification. Statistical process control. Design team development. The development process.
Prerequisite: ENES221; and (ENME392 or STAT400).
Restriction: Must be in Engineering: Mechanical program.

ENME382 Introduction to Materials Engineering (3 Credits)
Structure of materials, chemical composition, phase transformations, corrosion and mechanical properties of metals, ceramics, polymers and related materials. Materials selection in engineering applications.
Prerequisite: ENES100; and permission of ENGR-Mechanical Engineering department.
Corequisite: MATH241.
Recommended: PHYS261 and PHYS260.
Restriction: Permission of ENGR-Mechanical Engineering department. Cross-listed with ENMA300.
Credit Only Granted for: ENMA300 or ENME382.

ENME386 Experiential Learning (3-6 Credits)
Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ENME392 Statistical Methods for Product and Processes Development (3 Credits)
Integrated statistical methodology for the improvement of products and processes in terms of performance, quality and cost. Designed experimentation. Statistical process control. Software application. Laboratory activities.
Prerequisite: MATH241.

ENME398 Honors Research Project (1-3 Credits)

ENME400 Machine Design (3 Credits)
Design of mechanical elements and planar machines. Failure theories. Design of pressure vessels, joints, rotating elements, and transmission elements. Kinematic structures, graphical, analytical, and numerical analysis and synthesis of linkages, gear trains, and flywheels are covered.
Prerequisite: Must have completed or be concurrently enrolled in ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME406 Roller Coaster Engineering (3 Credits)
Engineering of roller coasters including: specifications, concept creation, structural design, car design, and safety. Course covers biomechanics and rider kinematics as well as manufacturing aspects.
Prerequisite: ENES220, ENES221, and ENME272. And ENME202; or MATH206.
Corequisite: ENME400.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME407 Sustainability, Climate Change and Renewable Energy Systems (3 Credits)
Countries around the world are developing innovative and sustainable solutions that not only help to protect the environment from the threats of global climate change, but that also can improve human health and quality of life. In this course students will explore solutions to climate change, as well as geothermal and hydroelectric energy systems and their applications.
Prerequisite: PHYS260; or permission of ENGR-Mechanical Engineering department.
Restriction: Students must have completed a minimum of 60 credits by the time they will enroll in this course.

ENME408 Selected Topics in Engineering Design (3 Credits)
Creativity and innovation in design. Generalized performance analysis, reliability and optimization as applied to the design of components and engineering systems. Use of computers in design of multivariable systems.
Restriction: Must be in Engineering: Mechanical program; and senior standing. Or permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENME410 Design Optimization (3 Credits)
Introduction to the formal process of design optimization, including analytical and computational methods. Step by step design optimization techniques. Design optimization concepts, necessary and sufficient optimality conditions and solution techniques. Solution evaluation and tradeoff exploration.
Prerequisite: ENME271; or MATH206.
Restriction: Permission of ENGR-Mechanical Engineering department; and junior or senior standing.

ENME414 Computer-Aided Design (3 Credits)
Introduction to computer graphics. Plotting and drawing with computer software. Principles of writing interactive software. The applications of computer graphics in computer-aided design. Computer-aided design project.
Prerequisite: MATH241; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENME 414 or ENME272.

ENME416 Additive Manufacturing (3 Credits)
Develop a comprehensive understanding of fundamental additive manufacturing, 3D printing approaches, including: extrusion-based deposition, stereolithography, powder bed-based melting, and inkjet-based deposition. Cultivate a design for-additive manufacturing skillset for CAD and CAM methodologies to produce successful 3D prints. Fabricate 3D mechanical objects using a variety of 3D printing technologies on campus. Execute a design project that demonstrates how additive manufacturing technologies can overcome critical limitations of traditional manufacturing processes.
Prerequisite: ENME331. And ENME272; or ENME414.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME421 Engineering Design Ideation (3 Credits)
Engineering Design Methods is a technical elective for engineering students who wish to improve their ability to produce design ideas (i.e., the ideation process) for further development into conceptual ideas. Ideation is the creative, idea generation activity that happens at the beginning of the conceptual design process. Ideation methods are often built around creativity improving strategies and are often designed for individual use prior to presenting the results in a team setting.
Prerequisite: Must have completed or be concurrently enrolled in ENME371.
Restriction: Junior standing or higher.
Additional Information: Ideally, this course should be taken prior to capstone design.

ENME423 Modern Climate Control and Building Energy Design/Analysis (3 Credits)
Fundamentals and design calculations of heat and moisture transfer in buildings; evaluation of cooling, heating and power requirements of buildings; building energy consumption simulations, use of alternative energy and energy conservation measures in buildings; fundamentals of fans/pumps and air/water distribution in buildings; introduction to refrigeration and energy systems for data centers and other mission-critical facilities.
Prerequisite: ENES232.
Corequisite: ENME332.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME424 Urban Microclimate and Energy (3 Credits)
Urban microclimate from the perspective of transient heat and mass transfer using building energy simulations for building clusters as well as LEED building certification criteria. The focus is on understanding building energy consumption and environmental impacts from the individual building scale to a neighborhood scale.
Prerequisite: Must have completed or be concurrently enrolled in ENME332.
Recommended: ENME423.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME424 or ENME808I.

ENME426 Production Management (3 Credits)
The basic concepts and models needed to understand and design manufacturing systems, including the history of manufacturing, performance measures, queuing systems, variability, production planning and scheduling, lean manufacturing, and pull production control.
Credit Only Granted for: BMGT385 or ENME426.

ENME427 CSI Mechanical: Finding Reasons for Compromised Structural Integity (3 Credits)
Understanding the causes of product failures including the political, societal, economic, environmental, and ethical impact of these failures, and the strategies to avoid, postpone, or mitigate them. Students will be encouraged to combine concepts from engineering, natural sciences, social sciences, and the humanities to address these complex issues. Basics of failure analysis, forensics, and reliability engineering and the scientific fundamentals underlying the most common types of failure. Issues of legal liability. Methods for monitoring the existing condition of a structure.
Prerequisite: ENES220 and ENME382.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME430 Fundamentals of Nuclear Reactor Engineering (3 Credits)
Fundamental aspects of nuclear physics and nuclear engineering, including nuclear interactions; various types of radiation and their effects on materials and humans; and basic reactor physics topics, including simplified theory of reactor critically.
Prerequisite: MATH246.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME431 Nuclear Reactor Systems and Safety (3 Credits)
Engineering, material and thermal aspects of light water reactors, fast reactors, high temperature gas reactors, heavy water moderated reactors, breeder reactors, advanced reactors including GEN IV designs. Evolution of light water reactor safety and regulation in the US that has culminated in the current body of regulations.
Prerequisite: MATH246.
Recommended: ENME430.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME432 Reactor and Radiation Measurements Laboratory (3 Credits)
Basics concepts of nuclear radiation and radiation detectors including types of radiation, radioactive decay, and interactions of radiation with matter.
Prerequisite: ENME430 and MATH246.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME436 Renewable Energy (3 Credits)
Fundamentals, design/analysis tools, and state of the art renewable energy technologies. Energy resources and global perspectives of current and future energy demand/consumption trends, followed by prime renewable energy technologies, including wind, solar, hydro, geothermal, and ocean thermal energy conversion. Economics of renewable energy, energy conservation opportunities, CO2 capture and storage, and thermal energy storage.
Prerequisite: ENME331.
Restriction: Must be in a major within the ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489K or ENME436.
Formerly: ENME489K.

ENME440 Applied Machine Learning for Engineering and Design (3 Credits)
Learn how to apply techniques from Artificial Intelligence and Machine Learning to solve engineering problems and design new products or systems. Design and build a personal or research project that demonstrates how computational learning algorithms can solve difficult tasks in areas you are interested in. Master how to interpret and transfer state-of-the-art techniques from computer science to practical engineering situations and make smart implementation decisions.
Prerequisite: ENME392; or permission of instructor.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME440, ENME808E, or ENME743.

ENME441 Mechatronics and the Internet of Things (3 Credits)
Mechatronics integrates dynamical systems, transducers, computation, control and design. Students will gain experience with digital circuit development, mechatronics design and participate in labs and projects culminating in the development of a mobile robotic platform. Course aims to reveal the dynamic nature of mechanical components where the domains of mechanics, electronics and software converge. Project driven, hands-on course in which student will learn about the Raspberry Pi platform, wireless communication using Pi and Python code development among other skills.
Prerequisite: ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489B or ENME441.
Formerly: ENME489B.

ENME442 Information Security (3 Credits)
The materials presented are divided into three major components: overview, detailed concepts and implementation techniques. The topics to be covered are: general security concerns and concepts from both a technical and management point of view, principles of security, architectures, access control and multi-level security, trojan horses, covert channels, trap doors, hardware security mechanism, security models, security kernels, formal specifications and verification, networks and distribution systems and risk analysis.
Restriction: Must have Senior standing in engineering; and permission of ENGR-Mechanical Engineering department. Jointly offered with ENRE684 .
Credit Only Granted for: ENRE648J, ENME442, ENRE684, or ENPM808E.

ENME444 Assistive Robotics (3 Credits)
Fundamentals of assistive robots used in a wide varietyof ways to help humans with disabilities. Three application areas will be covered: (1) Rehabilitation robotics to recover motor function from neurologic injuries such as stroke, (2) Prosthetics to enable mobility function in amputees, and (3) Social robotics for cognitive impairment and developmental disorders such as autism. Theory behind different control systems employed by assistive robotics, as well as the mechanical design, sensors & actuators, and user interfaces behind representative robots in the respective areas. Guidelines for designing assistive robots. Ethical and regulatory considerations in the design of assistive robots.
Prerequisite: ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME445 Design for Reliability (3 Credits)
Failure prevention, accident prevention, design requirements analysis, designing right the first time, high system reliability, software reliability, manufacturing defect prevention, life cycle costs reduction, design reviews, managing the design for reliability, design trustworthiness, product durability, and writing good specifications are covered.
Restriction: Junior standing or higher.

ENME446 Medical Robotics (3 Credits)
The fundamentals of robot design, control and different areas of research regarding development are explored. Student will engage in a course project where they will learn to develop, build, and control a medical robot. Surgical robotics development and modeling of robotic systems, safety in medical robotics, haptics, ergonomics and surgery. Fundamentals of robot design and control. Kinematics. This proposal was approved through the Testudo Curriculum Management system.
Prerequisite: Must have completed or be concurrently enrolled in ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489C, ENME808M or ENME446.
Formerly: ENME489C.

ENME454 Vehicle Dynamics (3 Credits)
The fundamentals of passenger vehicle and light truck design and vehicle dynamics are covered. The engineering principles associated with acceleration, braking, handling, ride quality, aerodynamics, and tire mechanics are discussed, as well as suspension and steering design.
Corequisite: ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME461 Control Systems Laboratory (3 Credits)
Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control familiarize them with the characteristics and limitations of real control devices. Students will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.
Prerequisite: ENME351 and ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENEE461 or ENME461.

ENME462 Vibrations, Controls, and Optimization II (3 Credits)
Continuation of ENME 361. Fundamentals of vibration, controls, and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical descriptions of system response, system stability, control and optimization. Optimal design of mechanical systems.
Prerequisite: ENME351 and ENME361.

ENME464 Cost Analysis for Engineers (3 Credits)
An introduction to the financial and cost analysis aspects of product engineering. Introduces key elements of traditional engineering economics including interest, present worth, depreciation, taxes, inflation, financial statement analysis, and return on investment. Provides an introduction to cost modeling as it applies to product manufacturing and support. Cost modeling topics will include: manufacturing cost analysis, life-cycle cost modeling (reliability and warranty), and cost of ownership.
Prerequisite: ENME392; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME465 Probability-Based Design (3 Credits)
Review of probabilistic distributions, introduction to pseudo-random number generation, and algorithms to produce probability distributions using Monte Carlo simulation via Matlab and other approaches to best design probabilistic engineering problems.
Prerequisite: MATH206 and ENME392.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME466 Lean Six Sigma (3 Credits)
This course intends to provide in-depth understanding of Lean Six Sigma and its Define - Mearsure - Analyze - Improve - Control (DMAIC) Breakthrough Improvement Strategy. The emphasis is placed on the DMAIC process which is reinforced via application of semester long corporate projects and case study analysis.
Corequisite: ENME392; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME467 Engineering for Social Change (3 Credits)
Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.
Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering. Cross-listed with ENES467.
Credit Only Granted for: ENME467 or ENES467.

ENME470 Finite Element Analysis (3 Credits)
Basic concepts of the theory of the finite element method. Applications in solid mechanics and heat transfer.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME472 Integrated Product and Process Development (3 Credits)
Integration of product development with the development process. Design strategies. Product architecture. Design for manufacturing. Selection of materials. Design for assembly.
Prerequisite: ENME331, ENME361, ENME351, and ENME371; and must have completed or be concurrently enrolled in ENME332.
Restriction: Permission of the Department of Mechanical Engineering.

ENME473 Mechanical Design of Electronic Systems (3 Credits)
Design considerations in the packaging of electronic systems. Production of circuit boards and design of electronic assemblies. Vibration, shock, fatigue and thermal considerations.

ENME476 Mircoelectromechanical Systems (MEMS) I (3 Credits)
Fundamentals of microelectromechanical systems (MEMS). Introduction to transducers and markets. MEMS fabrication processes and materials, including bulk micromachining, wet etching, dry etching, surface micromachining, sacrificial layers, film deposition, bonding, and non-traditional micromachining. Introduction to the relevant solid state physics, including crystal lattices, band structure, semiconductors, and doping. The laboratory covers safety, photolithography, profilometry, wet etching.
Restriction: Senior standing.
Credit Only Granted for: ENME476 or ENME489F.
Formerly: ENME489F.

ENME477 Microelectromechanical Systems (MEMS) II (3 Credits)
Fabrication of devices designed in MEMS I, including everything from mask printing through training on state-of-the-art fabrication equipment through device testing. In-depth understanding of MEMS devices and technologies, such as mechanical and electromagnetic transducers, microfluidics, and chemical sensors.
Prerequisite: ENME476.

ENME481 Lab-on-a-Chip Microsystems (3 Credits)
Fundamentals and application of lab-on-a-chip and microfluidic technologies. A broad view of the field of microfluidics, knowledge of relevant fabrication methods and analysis techniques, and an understanding of the coupled multi-domain phenomena that dominate the physics in these systems.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME481, ENME808E, ENME740.
Formerly: ENME489E.

ENME483 Physics of Turbulent Flow (3 Credits)
Specific problems of turbulent flow including automobile and truck aerodynamics and canonical flows including pipes, jets and boundary layers that are measured and simulated to gain basic understanding of turbulence. A goal of the course is to impart the necessary background for students to be able to critically assess and most effectively employ the turbulent flow prediction codes (e.g. Fluent) that are a mainstay of how turbulence is analyzed in modern industries.
Prerequisite: ENME331.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with ENME656. Credit only gran ted for: ENME483 or ENME656.

ENME484 Analysis of Turbulent Flow (3 Credits)
Relentless growth in the speed and size of supercomputers has encouraged the ever expanding use of numerical simulation in the practice of fluids engineering. For the flow past ground vehicles, in the urban grid, re-entering rockets, helicopters landing on ships at sea and countless other examples, the flow is turbulent, and simulation is becoming or will one day become the methodology of choice in analyzing and designing such technologies. The goal of this course is to give an introduction to the analysis of turbulent flow via simulation and the modeling that is used in its development. Among the questions to be considered: What can one hope to learn from flow simulation? What are the strengths of the approach and what obstacles inhibit its application? What kind of physical considerations are required in setting up simulations? How does one analyze the results of a simulation?
Prerequisite: ENME331.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with ENME657. Credit only gran ted for: ENME484 or ENME657.

ENME486 Computational Modeling, Simulation, and Interactive Visualization (3 Credits)
Creation of interactive graphic displays from the numerical simulation of mechanical engineering models. Brief description of each model provided, along with varied parameters to explore models' characteristics. Conclusions drawn from use of each interactive graphic. Mathematica language introduced and interwoven with the numerical simulation of the models, which will include: robotics and mechanisms, static response of beams, control systems, measurement systems, fluid flow, vibrations, geometric modeling, finite element analysis, and nonlinear phenomena.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME488 Special Problems (3 Credits)
Advanced problems in mechanical engineering with special emphasis on mathematical and experimental methods.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME489 Special Topics in Mechanical Engineering (3 Credits)
Selected topics of current importance in mechanical engineering.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits.

ENNU - Engineering, Nuclear

ENNU386 Experiential Learning (3-6 Credits)
Restriction: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

ENNU398 Honors Research Project (1-3 Credits)

ENNU468 Research (2-3 Credits)
Investigation of a research project under the direction of one of the staff members. Comprehensive reports are required.
Restriction: Permission of instructor; and permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits.

ENNU489 Special Topics in Nuclear Engineering (3 Credits)
Selected topics of current importance in nuclear engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENRE - Reliability Engineering

ENRE447 Fundamentals of Reliability Engineering (3 Credits)
This course provides a general survey of the techniques of reliability engineering with a focus on quantitative methods. Topics covered include: failure modes and effects analysis, mathematical definition of reliability, probabilistic models to represent failure phenomena, statistical life models for non-repairable components, reliability data analysis, and system reliability models including fault trees, event trees. Students will learn how to apply these techniques to problems related to engineering systems, with example cases for process plants, energy systems and infrastructure.
Prerequisite: MATH141.

ENRE489 Special Topics in Reliability Engineering (3 Credits)
Selected topics of current importance in reliability engineering.
Prerequisite: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENSP - Environmental Science and Policy

ENSP101 Introduction to Environmental Science (3 Credits)
One of two required courses that introduce students to the topics studied and methods employed in environmental science and policy. Emphasis on scientific ways of knowing; the systems, cycles, flows, and interfaces that characterize the atmosphere, lithosphere, hydrosphere, and biosphere; the analysis of human impacts on these systems; and the nature of scientific uncertainty and methods of quantifying environmental processes.

ENSP102 Introduction to Environmental Policy (3 Credits)
Second of two courses that introduce students to the topics studied and methods employed in environmental science and policy. Emphasis on the process of formulating, implementing, and evaluating policy responses to environmental problems, with particular attention to policy controversies related to scientific uncertainty, risk assessment, the valuation of nature, and distributional equity. May be taken before or after ENSP101.
Additional Information: May be taken before or after ENSP101.

ENSP250 Lawns in the Landscape: Environmental Hero or Villain? (3 Credits)
Examination of the lawn as an element in the anthropogenic landscape and its influence on global warming, regional air and water quality, ecological diversity, mammalian pesticide exposure and consumptive water use. Demographic and socioeconomic factors are examined in the context of being predictors of landscape aesthetic desires and lawn management behaviors. Policies that incentivize lawn alternatives or changes in lawn management behavior are discussed.Cross-listed with PLSC250.
Credit Only Granted for: ENSP250 or PLSC250.

ENSP305 Applied Quantitative Methods in Environmental Science and Policy (3 Credits)
Intended for students interested in pursuing career or graduate research opportunities that will include management of environmental databases, detailed analysis of environmental data, and/or application of predictive environmental models. Students will learn necessary skills to manage and analyze environmental data through hands-on training in commonly used software and a series of topical case studies. Data analysis and data management will be taught using publicly available real-world environmental data sets.
Prerequisite: BIOM301, ECON321, GEOG306, PSYC200, or SOCY201; and (ENSP101 and ENSP102). And MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.
Restriction: Must be in a major in AGNR-Dean-Environmental Science & Policy Program; or permission of AGNR-Dean-Environmental Science & Policy Program.
Credit Only Granted for: ENSP305 or AREC382.
Additional Information: Applied topics covered in this course will supplement coursework in introductory statistics and mathematics; this course is not intended for students with significant previous advanced data analysis or statistical experience.

ENSP306 Fundamentals of Qualitative Research Methods for Environmental Studies (3 Credits)
An introduction to research design and methods, with an in-depth focus on qualitative research methods and application to environmental studies. Topics include: writing an appropriate research question, identifying relevant methods, submitting a proposal to the Institutional Review Board, choosing appropriate sampling approaches, conducting interviews, focus groups, ethnographies, analyzing textual data, and presenting qualitative results.

ENSP330 Introduction to Environmental Law (3 Credits)
An overview of environmental law, from its common law roots to its role in the modern regulatory state, including an examination of major federal environment statutes and the policy debates inherent in them. Other areas covered include civil and criminal enforcement, standing to sue, land use control, and regulatory takings.
Recommended: ENSP101 and ENSP102.
Restriction: Junior standing or higher. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP340 Water: Science, Ethics, and Policy (3 Credits)
Exploration of the science, policy, and ethical aspects of water resource protection and management. Focus on water pollution, water availability, ecosystems, and sustainability
Recommended: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP342 Environmental Threats to Oceans and Coasts: Towards an Integrated Policy Response (3 Credits)
An interdisciplinary study of the challenges of maintaining the health and vitality of oceans and coasts in the face of climate change, extreme weather, and other threats including pollution, and oil and gas development. Exploration of four broad themes: resource management, conservation and stewardship, pollution, and coastal zone management. Also, an analysis of current efforts to integrate these themes through ecosystem-based management; marine spatial planning; and related policy responses.
Recommended: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP350 Energy Resources: Science and Policy in the 21st Century (3 Credits)
Energy resource production and consumption, including historical context, current trends in the U.S. and globally, and social and environmental implications. Includes fuel-source formation, history of use, modern trends in consumption, production, pricing and trade, reserves and resources, environmental and social impacts, future outlook and potential new technologies related to energy efficiency and conservation.
Prerequisite: ENSP101 and ENSP102.
Restriction: Must have earned a minimum of 60 credits; and permission of AGNR-Dean-Environmental Science & Policy Program.
Credit Only Granted for: ENST405, ENSP350, ENST605, or MEES698Z.

ENSP386 Internship (3-6 Credits)
Restriction: Must have internship proposal approved by the concentration advisor, the director of ENSP and the student's internship sponsor.

ENSP399 Special Topics in Environmental Science and Policy (1-3 Credits)
A substantive and specialized examination of contemporary issues in environmental science or policy.
Restriction: Must be in Environmental Science and Policy program; or permission of AGNR-Dean-Environmental Science & Policy Program.
Repeatable to: 12 credits if content differs.

ENSP400 Capstone in Environmental Science and Policy (3 Credits)
Integration of physical, biological, and social sciences with applications to environmental science and policy. Problem-solving and multi-disciplinary case study evaluations pertinent to contemporary and future issues related to the environment.
Prerequisite: ENSP101; and ENSP102.
Restriction: Must be in Environmental Science and Policy program; and senior standing; and permission of the Environmental Science and Policy Program.

ENSP489 Special Topics in Environmental Science and Policy (1-3 Credits)
A lecture and or laboratory series organized to study a selected phase of Environmental Science and Policy not covered by existing courses. Credit according to time scheduled and organization of the course.
Repeatable to: 6 credits if content differs.

ENSP499 Honors Thesis Research (1-6 Credits)
Individual research, thesis, and oral defense. The research project will be conducted under the supervision of a faculty member.
Restriction: Must be in the ENSP Honors program; and permission of AGNR-Dean-Environmental Science & Policy Program.
Repeatable to: 6 credits.

ENST - Environmental Science and Technology

ENST100 International Crop Production-Issues and Challenges in the 21st Century (3 Credits)
Examines the role of crop production in elevating humans out of poverty in developing countries. It will introduce students to the basic principles of plant and soil science underlying the international production of food crops and world food security. The role of multinational agencies such as the World Bank in the promotion of sustainable crop production using environmentally-sound technologies will also be discussed.
Credit Only Granted for: ENST100 or NRSC100.
Formerly: NRSC100.

ENST140 Sustainability and History: The Maryland Experience (3 Credits)
Examines the changing nature of concern over sustainability through the environmental history of the state of Maryland. The historical approach, supplemented by discussion of the basic scientific processes underlying ecosystem functions and human impacts on the environment, reveals both enduring and changing qualities of the search for sustainable patterns of living, beginning before 17th century European contact and continuing on into the environmental concerns of our own time.

ENST200 Fundamentals of Soil Science (4 Credits)
Study and management of soils as natural bodies, media for plant growth, and ecosystem components. Morphology, composition, formation, and conservation of soils. Chemical, biological, and physical properties are discussed in relation to the production of plants, the functioning of hydrologic and nutrient cycles, the protection of environmental quality, and engineering uses of soils.
Corequisite: CHEM131 and CHEM132; or permission of AGNR-Environmental Science & Technology department.
Credit Only Granted for: ENST200 or NRSC200.
Formerly: NRSC200.

ENST214 Introduction to Fish and Wildlife Sciences (3 Credits)
Lectures, discussion, and readings in social, biological, and human dimension issues facing fisheries and wildlife biologists and natural resource managers in the United States. Coverage will include history and philosophical discussions of fish and wildlife sciences; conservation and management; principles of community, habitat, and animal ecology and management; and interrelations of wildlife, fish, and forestry.
Prerequisite: BSCI160 and BSCI161; or BSCI106.

ENST233 Introduction to Environmental Health (4 Credits)
Examines how humans are affected by the quality of our air, water, soil and food supply as well as how human activities alter these survival necessities. Students will learn how the evolution and prosperity of human populations have resulted in degradation of our environment and the impact of environmental degradation on the health of people. The implications of individual and collective choices for sustainable food production, population management, and resource utilization will be explored.

ENST281 Computer Aided Design in Ecology (2 Credits)
Basics of Computer Aided Drawing (CAD) applied to design of constructed ecosystems. Use of campus stormwater wetland as case study.
Restriction: Must be in Environmental Sci & Tech program.

ENST282 Ecological Innovation and Entrepreneurship (3 Credits)
Ecotechnology innovation is taught with design thinking, which uses an iterative cycle of developing customer empathy, learning ecological technology, appreciating environmental stewardship, brainstorming, rapid prototyping, user experience, testing and redesign. Environment entrepreneurship is based on the Lean Startup process, which uses customer discovery, encourages quick product development, reduces start-up costs, tests ideas quickly, and employs designed experiments. A multidisciplinary academic setting embraces designing, building, testing and marketing novel technologies that enhance the environmental needs of humans. Students will learn in an active environment that requires working creatively, collaboratively, diligently, and precisely to create a business model and tangible prototype for a new commercial product.
Credit Only Granted for: ENST282 or ENST499K.
Formerly: ENST499K.

ENST301 Field Soil Morphology I (1 Credit)
This is a field-oriented course that introduces students to the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Formerly: ENST308.

ENST302 Field Soil Morphology II (1 Credit)
This is the second field-oriented course in a three course sequence that provides intermediate training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.
Prerequisite: ENST301.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Formerly: ENST308.

ENST303 Field Soil Morphology III (1 Credit)
This is the third field-oriented course in a three course sequence that provides intermediate training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.
Prerequisite: ENST302.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Formerly: ENST308.

ENST309 Advanced Field Soil Morphology (1 Credit)
This is a field-oriented course that provides advanced training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the National Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field. Students will be exposed to a variety of soil landscapes and geology from outside of the northeastern U.S.
Prerequisite: ENST301.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Repeatable to: 3 credits if content differs.

ENST314 Fisheries Management and Sustainability (3 Credits)
A detailed look at the ecology, management, and sustainability of fisheries resources. Concepts on human and ecological dimensions are emphasized.
Prerequisite: BSCI160 and BSCI161; or BSCI106. Or ENST214; and 1 course from MATH113-499 course range. Or permission of AGNR-Environmental Science & Technology department.

ENST333 Ecosystem Health and Protection (3 Credits)
Discussion of the philosophies, principles, and practices for assessing ecosystem health with emphasis on an ecosystem perspective rather than a human health perspective. Degradation associated with human activities will be emphasized. Topics will range from local to regional to global issues, including a discussion on global warming and its possible impacts on ecosystems. Concepts will be clarified using case histories from the Chesapeake Bay watershed.
Prerequisite: ENST233.
Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech: Environmental Health; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech).
Credit Only Granted for: ENST499A or ENST333.
Formerly: ENST499A.

ENST334 Environmental Toxicology (3 Credits)
Concepts and case histories in ecotoxicology. Emphasis on origin and variety of environmental pollutants, routes of biological exposure, modes of toxicological action and effects on individual organisms, populations and ecosystems. Ecotoxicological issues in the Chesapeake Bay will be used as examples.
Prerequisite: CHEM131, CHEM132, and BSCI207; or permission of AGNR-Environmental Science & Technology department.

ENST360 Ecosystem Ecology (4 Credits)
The study of ecology has a long and interesting history, from early society's efforts to understand and alter their environment as a matter of survival to the challenges the modern world is facing that are global in scale. Through the course text, distributed supplemental chapter readings and an understanding of the scientific literature, this course will cover the essential concepts and principles of ecosystem ecology as well as its history and past and present controversies. Several of the basic methods and tools of field research and the applied management of ecosystems will be discussed and demonstrated with several field excursions in the natural environs of the DC area. Central to this course will be the understanding that modern human society is an integral part of nature, with the power to impact and influence elements of the natural world at multiple scales. An analysis of policy implications for the biosphere will be discussed.
Prerequisite: BSCI160 and BSCI161; or BSCI106.
Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech: Environmental Health; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech).

ENST373 Natural History of the Chesapeake Bay (3 Credits)
Consideration of the major groups of organisms associated with the Chesapeake Bay and current issues that determine humans' present and future uses for the Chesapeake and its biota.Cross-listed with BSCI373.
Credit Only Granted for: BSCI373 or ENST373.

ENST388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Repeatable to: 6 credits if content differs.

ENST389 Internship (3 Credits)
Credit will be granted for practical work carried out by students placed in work environment related to their stated career goals. Students must do an in-depth study in some portion of the work experience and produce a special project or report related to this study. A student work log is also recommended. An evaluation from the external supervisor of the project will be required. Credit arranged with supervising faculty member.
Restriction: Must be in Environmental Sci & Tech program.
Repeatable to: 6 credits if content differs.

ENST403 Invasive Species Ecology (3 Credits)
We will examine ecological, evolutionary, and anthropogenic processes facilitating or resisting biological invasions, and consider their environmental, economic, and human health impacts. We will consider various management strategies to mitigate invasions and identify areas of future research. Field trips and detailed discussion of recent findings and controversies in the literature will help illustrate fundamental concepts of invasions among various ecosystems.
Credit Only Granted for: ENST403, ENST603, or ENST689R.

ENST404 Ecological and Natural Resources Ethics (3 Credits)
Bridges science and management with ethical theory and concepts to help scientists, regulators, and managers understand how to deal with potential ethical dilemmas that arise in natural resource and environmental management implementation and policy development.
Prerequisite: ENST214 and ENST360.
Recommended: ENST314, ENST410, and ENST460.
Restriction: Senior standing or higher. Jointly offered with ENST604.
Credit Only Granted for: ENST604 or ENST404.

ENST405 Energy and Environment (3 Credits)
Introduction to the role of energy in environmental and human-dominated systems. Discussion of the historical and modern production and consumption of energy. Introduction to energy systems computer simulation and energy auditing.
Prerequisite: MATH140 or MATH120; or must have completed MATH220.
Restriction: Junior standing or higher. And must be in Environmental Sci & Tech program; or must be in Environmental Sci & Tech: Ecological Tech Design program; or must be in Environmental Sci & Tech: Environmental Health program; or must be in Environmental Sci & Tech: Soil & Watershed Science program; or must be in Environmental Sci & Tech: Natural Resources Mgmt program. Jointly offered with ENST605.
Credit Only Granted for: ENST405, ENSP350, ENST605, or MEES698Z.

ENST406 Applied Forestry Practices (3 Credits)
Focuses on the applied dynamics of a set of forest practices such as management, silviculture, measurement and inventory, preparation of a management plan, etc, within the urban/rural interface. Several field trips are included to gain hands-on experience.
Prerequisite: ENST200. And ENST360; or PLSC471. Cross-listed with PLSC4 75.
Credit Only Granted for: ENST406 or PLSC475.

ENST410 Ecosystem Services: An Integrated Analysis (3 Credits)
The importance of our ecosystems and the services they provide will be discussed. Basic principles used to analyze ecosystem services will be discussed and applied using case studies & field exercises. Forestland, wetlands and our marine resources are increasingly recognized for their ecosystem services provided to society, to include clean air and water, wildlife habitat, biodiversity, carbon storage and pollination services. This course will prepare students to deal with the complex issues involved in understanding those and other ecosystem services and their importance to society and environmental sustainability. Slowly, new markets are emerging for these services. Students will analyze the ecological, policy and financial dimensions of enhancing, restoring, and sustaining ecosystem services. New and on-going government programs and private business ventures will be discussed.
Prerequisite: ENST360 or BSCI361; or permission of instructor.
Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Environmental Health).

ENST411 Principles of Soil Fertility (3 Credits)
Soil factors affecting plant growth and quality with emphasis on the bio-availability of mineral nutrients. The management of soil systems to enhance plant growth by means of crop rotations, microbial activities, and use of organic and inorganic amendments.
Prerequisite: ENST200; or students who have taken courses with comparable content may contact the department. Jointly offered with ENS T611.
Credit Only Granted for: ENST411 or NRSC411.
Formerly: NRS C411.

ENST414 Soil Morphology, Genesis and Classification (4 Credits)
Processes and factors of soil genesis. Taxonomy of soils of the world by U.S. System. Soil morphological characteristics, composition, classification, survey and field trips to examine and describe soils.
Prerequisite: ENST200.
Credit Only Granted for: ENST414 or NRSC414.
Formerly: NRSC414.

ENST415 Renewable Energy (3 Credits)
An overview of renewable energy technologies and their current applications. Emphasis will be placed on technological readiness, efficiency and sustainability of renewable energy alternatives. Technologies include solar thermal, photovoltaics, biodiesel, ethanol, anaerobic digestion, wind, hydroelectric, and microbial fuel cells.
Prerequisite: CHEM131, PHYS121, and MATH113; or permission of AGNR-Environmental Science & Technology department.
Restriction: Must be in a major within AGNR-Environmental Science & Technology department.

ENST417 Soil Physics and Hydrology (3 Credits)
A study of soil water interactions: the hydrologic cycle; the unique properties of water and soil; the soil components and their interactions; the field water cycle; transport processes involving water, heat and solutes; human effects on soil and groundwater; as well as the measurement, prediction, and control of the physical processes taking place in and through the soil.
Prerequisite: ENST200; and (MATH113 or MATH115). Or permission of instructor.
Credit Only Granted for: ENST417 or NRSC417.
Formerly: NRSC417.

ENST421 Soil Chemistry (4 Credits)
The chemistry and composition of mineral and organic colloids in soils, including ion exchange, oxidation-reduction, acidity, surface charge, and solution chemistry. Lectures and readings pertain to plant nutrition, waste disposal, and groundwater quality.
Prerequisite: ENST200.
Credit Only Granted for: ENST421 or NRSC421.
Formerly: NRSC421.

ENST422 Soil Microbial Ecology (3 Credits)
The interdisciplinary study of soil microorganisms and their interactions with the mineral matrix; resulting in processes such as nutrient cycling, decontamination, and natural product production. We will focus on the diversity of soil communities, their survival strategies, and the new strategies used to study these communities.
Prerequisite: ENST200; or 1 course in BCHM; or must have completed a course in microbiology; or students who have taken courses with comparable content may contact the department. Jointly offered with ENS T622.
Credit Only Granted for: ENST422 or NRSC422.
Formerly: NRS C422.

ENST423 Soil-Water Pollution (3 Credits)
Reaction and fate of pesticides, agricultural fertilizers, industrial and animal wastes in soil and water with emphasis on their relation to the environment.
Prerequisite: CHEM104 and ENST200.
Credit Only Granted for: ENST423 or NRSC423.

ENST424 Field Study in Soil Morphology (4 Credits)
The fundamentals of making morphological descriptions of soils, using standard techniques, terminology, and abbreviations of the National Cooperative Soil Survey. Given a regional perspective and reasonable assumptions regarding soil properties, students should become competent to classify soils which they have described in the field and also make interpretations concerning the suitability of soils for various potential uses.
Prerequisite: ENST200.
Credit Only Granted for: ENST424 or NRSC424.
Formerly: NRSC424.
Additional Information: Students must pay a $300 course activities fee.

ENST430 Wetland Soils (3 Credits)
The soils of wetlands including hydrology, chemistry, and genesis are discussed. Federal and regional guidelines for wetland soils are covered with an emphasis on validating interpretations through field observations.
Prerequisite: ENST200.
Credit Only Granted for: ENST430, ENST630, or NRSC461.
Formerly: NRSC461.

ENST432 Environmental Microbiology (3 Credits)
Microorganisms are everywhere and mediate many of the processes that we observe everyday. These organisms are the unseen catalysts for numerous industrial processes and are critical to many emerging technologies and novel products. Environmental microbiologists ask: How do microorganisms in the environment benefit society? This course will answer this question by examining microbes in bioremediation, food safety, climate change, and biotechnology.
Prerequisite: CHEM131 and CHEM132. And BSCI170 and BSCI171; or BSCI105.
Credit Only Granted for: ENST432 or ENST499M.
Formerly: ENST499M.

ENST434 Toxic Contaminants: Sources, Fate, and Effects (3 Credits)
Study of the release to the environment, transport through natural compartments, persistence and ultimate fate of various classes of contaminants produced as a result of human activities. Topics will culminate in discussions of impacts to wildlife and human health. Students should emerge with a practical appreciation of the actual risks from exposure to a variety of environmental contaminants and an understanding of the environmental and human health implications of continuing the contaminating activities.
Prerequisite: ENST333 and ENST334.

ENST436 Emerging Environmental Threats (3 Credits)
Examine new and potential environmental concerns in the air, water, soil, space, and the built environment. Emphasis on studying the intrinsic links between ecosystem and human health. Topics will include climate change, resource consumption, biodiversity change, infectious disease, non-traditional pollutants, and other complex and significant environmental concerns.
Prerequisite: ENST233; or permission of AGNR-Environmental Science & Technology department.

ENST440 Crops, Soils and Civilization (3 Credits)
Role and importance of crop and soil resources in the development of human civilization. History of crop and soil use and management as they relate to the persistence of ancient and modern cultures.
Credit Only Granted for: ENST440 or NRSC440.
Formerly: NRSC440.

ENST441 Sustainable Agriculture (3 Credits)
Environmental, social and economic needs for alternatives to the conventional, high-input farming systems which currently predominate in industrial countries. Strategies and practices that minimize the use of non-renewable resources.
Credit Only Granted for: ENST441 or NRSC441.
Formerly: NRSC441.

ENST443 Industrial Ecology (3 Credits)
Problems of waste management and recycling in human societies are covered. The industrial ecology approach to design is contrasted with analogous patterns and processes from natural ecosystems.
Prerequisite: (MATH140 or MATH120; or must have completed MATH220); and BSCI361. Or permission of AGNR-Environmental Science & Technology department. Jointly offered with ENST643.
Credit Only Granted for: ENST443, ENST643, or MEES698J.

ENST445 Ecological Risk Assessment (3 Credits)
Assessment of ecological impacts of perturbations on natural systems. Course will describe methods for estimating environmental impacts including extrapolating from laboratory and field data. The role of regulatory agencies and implications of scientific uncertainty on risk management will be covered.
Prerequisite: ENST360 or BSCI361; and (BIOM301 and ENST334). Or permission of AGNR-Environmental Science & Technology department.

ENST450 Wetland Ecology (3 Credits)
Plant and animal communities, biogeochemistry, and ecosystem properties of wetlands. Lectures are supplemented by weekend or Friday field trips (1-3 days total during the semester) and in-class labs that emphasize collection and analysis of field data on wetland vegetation, soil, and hydrology. Wading boots (at least hip length) are strongly recommended.
Prerequisite: BIOM301; or permission of AGNR-Environmental Science & Technology department. Jointly offered with ENST650. Credit only grant ed for: ENST450 or MEES650.

ENST452 Wetland Restoration (3 Credits)
Design, construction, and evaluation of wetlands restored or created to provide ecosystem services or to mitigate losses due to development. Topics include fundamental properties of wetlands, ecological restoration theory, site selection and goal-setting, design plans, practices for establishing wetland hydrology, substrate, and vegetation, and restored ecosystem monitoring.
Prerequisite: (BSCI160 and BSCI161; or BSCI106); and (BSCI362, ENST450, ENST360, or BSCI361). Or permission of AGNR-Environmental Science & Technology department.
Credit Only Granted for: ENST452, ENST652, or MEES652.

ENST453 Watershed Science: Water Balance, Open Channel Flow, and Near Surface Hydrology (3 Credits)
Concepts of surface water balance, surface radiative flux, precipitation and evaporation measurements.
Credit Only Granted for: ENST453 or ENST653.

ENST460 Principles of Wildlife Management (3 Credits)
Ecological principles and requirements of wildlife as basis for management, and introduction to the scientific literature. Conflicts in wildlife management, government administration of wildlife resources, legislation, and history of the wildlife management profession.
Prerequisite: Must have completed two semesters of biology laboratory; and (ENST360; or BSCI361). Or permission of AGNR-Environmental Science & Technology department.

ENST461 Urban Wildlife Management (3 Credits)
Ecology and management of wildlife in urban areas. For students in biological sciences, geography, landscape design, natural resources management, recreation and urban studies. Planning, design, and wildlife conservation in landscape ecology. Public attitudes, preferences, and values, review of private conservation organizations.

ENST462 Field Techniques in Wildlife Management (3 Credits)
Hands-on experience with field techniques in wildlife management focusing on various methods of conducting indices, estimates, and censuses of wildlife populations. Includes capture and handling of amphibians, reptiles, birds, and mammals by use of drift fences, cover boards, mist nets, box traps, and dart guns.
Prerequisite: ENST460. And BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105.
Recommended: ENST461.
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.

ENST463 Wildlife Habitat and Population Modeling (3 Credits)
Students will gain basic tools for the analysis and modeling of wildlife population demographics and wildlife habitat. This class will be broken into two components: 1) will teach students techniques of modeling wildlife field data for the purpose of estimation of key parameters such as population size, viability, and other demographic rates using programs such as Riskman, Vortex, and Mark; 2) will teach students real world techniques used to determine and model habitat use on multiple scales using statistical analyses, GIS, and stand-alone programs such as Home Ranger and Biomapper. This class is designed for wildlife and natural resources majors.
Prerequisite: ENST460 and GEOG373; and (MATH120; or must have completed MATH220). Or permission of AGNR-Environmental Science & Technology department.
Restriction: Must be in Environmental Sci & Tech program; and must be in Environmental Science and Policy program.

ENST466 Ecology and Management of Wildlife Habitats (3 Credits)
Introduction to general concepts of wildlife habitat ecology and management. Specifically,land use practices on public and private lands and how these practices influence wildlife production. Conduct wildlife habitat evaluations and options for alterations/manipulations to achieve specific management goals. The class will culminate with the creation and planning of a wildlife management plan.
Recommended: ENST460.

ENST467 Ecology and Management of Wildlife Habitats Lab (2 Credits)
An introduction to the principles of wildlife habitat data analysis applied at the population level. This class will teach students real world techniques used to determine and model habitat use on multiple scales. This lab course complements the material covered in ENST 466.
Corequisite: ENST466.

ENST471 Captsone I (2 Credits)
This course will be conducted in a group discussion format that will focus on professional project proposal preparation and presentation, critical evaluation of environmental science research, professional development, and career planning. Students will develop and present original project proposals and critique project proposals presented by others.

ENST472 Capstone II (3 Credits)
This course is the second in a two-part series. Students will continue work on projects proposed and begun in ENST471. Focus on professional project preparation, presentation, critical evaluation on environmental science research, professional development, and career planning. Students will develop and present original projects and critique projects presented by others.
Prerequisite: ENST471.
Restriction: Must be in a major within AGNR-Environmental Science & Technology department; and permission of AGNR-Environmental Science & Technology department.

ENST479 Tropical Ecology and Resource Management (1-6 Credits)
Tropical ecosystems and issues of human use and impact. Includes lectures which lead up to an off-campus trip in a tropical environment.
Prerequisite: Must have completed an introductory economics course. And BSCI160 and BSCI161; or BSCI106.
Restriction: Permission of instructor.
Repeatable to: 10 credits if content differs.

ENST481 Ecological Design (4 Credits)
An advanced survey course on the field of ecological design. Principles of design are illustrated with case studies from biologically-based waste treatment systems, ecosystem management and sustainable development. Concepts covered include ecology, ecological engineering, nutrient cycling, emergy, lifecycle analysis, and design process. Technologies include treatment wetlands, living machines, anaerobic digestion, rain gardens, bioswales, bioremediation, algal turf scrubbers, and green building design.
Prerequisite: (MATH120 or MATH140; or must have completed MATH220); and (PHYS121 and CHEM131); and (BSCI361; or students who have taken courses with comparable content may contact the department). Or permission of instructor.
Restriction: Permission of AGNR-Environmental Science & Technology department. Jointly offered with MEES681. Credit only grant ed for: ENST481, ENST681, or MEES681.

ENST485 Water Management in Urban Environment (3 Credits)
Historically, with the exception of certain locations, water has been available in sufficient quantities, and providing supporting infrastructure has been relatively straightforward. In urban areas, the concentration of people and the drastic changes in land use, have altered the fluxes of water, sediments, chemicals, and microorganisms. As the population increases and the number of large urban areas keeps growing (both in U.S. and internationally), managing water in urban areas is becoming more challenging. Water must be supplied for domestic, commercial, and industrial use, as well as irrigation and maintaining and enhancing local environments (e.g., urban streams). In addition, stormwater must be managed to prevent flooding and environmental damage, and used water, which contains organic matter, nutrients, and other constituents that can be extracted and reused, must be collected and managed. In this course we take a systems approach to urban water hydrology, engineering, planning and management. We will explore urban water cycle, urban runoff and drainage characteristics, urban water supply and demand, stormwater collection and treatment and designing best management practices. Additionally, we look at the climate impacts on the urban water cycle.
Prerequisite: MATH120, MATH130, MATH136, or MATH140.
Credit Only Granted for: ENST485 OR ENST489Z.
Formerly: ENST489Z.

ENST487 Environmental Conflicts and Decision Making (2 Credits)
Study major cases which focus on environmental science with concentration on the role and techniques of negotiation, collaborative decision making, and adaptive resource management as an environmental conflict resolution process.
Restriction: Senior standing. And must be in one of the following programs (Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci&Pol-Wildlife Ecology & Mgmt) ; or permission of AGNR-Environmental Science & Technology department.

ENST489 Research Experience (3 Credits)
An advanced research-based course in the field of environmental science and technology.
Restriction: Permission of AGNR-Environmental Science & Technology department.
Repeatable to: 6 credits.

ENST499 Special Topics in Environmental Science and Technology (1-4 Credits)
An independent study, and/or lecture, and/or laboratory series organized to study a selected phase of Environmental Science and Technology not covered by existing courses. Credit arranged with supervising faculty member.
Restriction: Permission of AGNR-Environmental Science & Technology department.

EPIB - Epidemiology and Biostatistics

EPIB300 Biostatistics for Public Health Practice (3 Credits)
An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.
Prerequisite: Minimum grade of C- in CHEM131 and CHEM132.
Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.
Credit Only Granted for: EPIB300, EPIB315 or HLTH300.

EPIB301 Epidemiology for Public Health Practice (3 Credits)
An examination of the discipline of epidemiology and its application to public health issues and practices, covering current epidemiological concepts and methods.
Restriction: Must be in Public Health Science program; or must be in Community Health program. And must have earned a minimum of 45 credits. Cross-listed with HLTH301.
Credit Only Granted for: EPIB301 or HLTH301.

EPIB315 Biostatistics for Public Health Practice (3 Credits)
An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.
Prerequisite: Minimum grade of C- in EPIB301; or must have completed or be concurrently enrolled in HLTH200.
Restriction: Must be in one of the following programs (Public Health Science; Community Health). Cross-listed with: HLTH300.
Credit Only Granted for: EPIB300, EPIB315 or HLTH300.
Formerly: EPIB300.
Additional Information: Course is cross-listed; students should check program advising information to determine which counts for their major. Note that EPIB300 (old number) is still offered for students under previous curriculum.

EPIB330 The Coming Plague: Public Health Perspectives (3 Credits)
Disease control and prevention is fundamental to the health of local, national, and global populations. Infectious agents are constantly adapting and breaching our defenses. Factors related to society, the environment, and our increasing global interconnectedness increase the likelihood of disease emergence and spread. Vaccines and antibiotics, demographic changes and urbanization, climate change and natural disasters, international travel and commerce, poverty and war create conditions for infectious diseases to spread. So how do we design and execute solutions to public health threats? How do research, policies, interventions, and budgets affect public health systems?
Prerequisite: BSCI202.

EPIB399 Epidemiology and Biostatistics Independent Study (1-3 Credits)
The EPIB undergraduate independent study is an opportunity for undergraduates from other departments in the SPH or the university to work with an Epidemiology and Biostatistics faculty member on research or special projects that are based out of EPIB.
Restriction: Must have earned a minimum of 60 credits; and minimum cumulative GPA of 3.0.
Repeatable to: 6 credits if content differs.

EPIB400 Obesity: An Epidemiologic Perspective (3 Credits)
The epidemic of obesity, its causes and consequences, and issues related to energy balance will be covered. Students will characterize the obesity epidemic both nationally and internationally, compare and contrast the metrics of obesity, understand the biological consequences of different obesity phenotypes, and describe characteristics of the obesogenic environment. Throughout the course students will be introduced to the application of epidemiological methods to studies of obesity.
Prerequisite: 1 course with a minimum grade of C- from (EPIB301, HLTH301).

EPIB463 Introduction to Biostatistical Programming (3 Credits)
An introduction to basic programming principles; data analysis tasks such as the calculation of summary statistics and the creation of graphs; and the implementation of statistical analysis concepts such as T-tests, ANOVA and correlation. Querying and managing data sets using SQL in SAS will also be covered.

EPIB489 Special Topics in Epidemiology or Biostatistics (1-6 Credits)
Special topics in epidemiology or biostatistics.
Repeatable to: 6 credits if content differs.

FGSM - Federal and Global Fellows

FGSM320 Public Health Policy (3 Credits)
An exploration of the major questions and issues facing the U.S. health care system as well as the formulation and implementation of health policy.
Restriction: Must be in the Federal Fellows Program; and permission of instructor.
Credit Only Granted for: UNIV348P or FGSM320.
Formerly: UNIV348P.

FGSM330 Homeland and National Security Policy (3 Credits)
An examination of the concept of U.S. homeland and national security, threats, and major vulnerabilities in the context of recent history.
Restriction: Must be in the Federal Fellows Program; and permission of instructor.
Credit Only Granted for: UNIV348T or FGSM330.
Formerly: UNIV348T.

FGSM340 Energy and Environmental Policy (3 Credits)
An examination of issues of energy and environmental sustainability through an investigation of policy-making in energy, climate change, and sustainable development.
Restriction: Must be in the Federal Fellows Program; and permission of instructor.
Credit Only Granted for: UNIV348E or FGSM340.
Formerly: UNIV348E.

FGSM350 Critical Regions and International Relations (3 Credits)
An examination of international relations and foreign policy challenges in critical regions.
Restriction: Must be in the Global Fellows Program; and permission of instructor.

FGSM360 U.S. Diplomacy and Policymaking (3 Credits)
An examination of questions and issues in the practice of contemporary diplomacy and policy-making. Guest lecturers drawn from Washington policy-making and foreign service communities will visit class and participate in discussion.
Restriction: Must be in the Global Fellows Program; and permission of instructor.

FGSM370 Science Diplomacy: Foreign Policy & Science, Technology, and Innovation (3 Credits)
An exploration of the critical roles scientific knowledge and technological innovation play in the formation and implementation of foreign policy issues, including energy and climate change, public health, space and innovation, and economic development.
Restriction: Must be in the Global Fellows Program; and permission of instructor.
Credit Only Granted for: UNIV389F or FGSM370.
Formerly: UNIV389F.

FGSM380 Responses to Global Challenges (3 Credits)
An examination of global issues and responses primarily from the perspective of the practitioner. The focus will be on social, humanitarian, and human rights issues in different global contexts.
Restriction: Must be in the Global Fellows Program; and permission of instructor.
Credit Only Granted for: UNIV389B or FGSM380.
Formerly: UNIV389B.

FGSM398 Federal and Global Experiential Learning (3-9 Credits)
This is the experiential course component of the Federal Fellows Program and Global Fellows Program.
Restriction: Permission of instructor.
Repeatable to: 9 credits if content differs.

FILM - Film Studies

FILM245 Film Form and Culture (3 Credits)
Introduction to film as art form and how films create meaning. Basic film terminology; fundamental principles of film form, film narrative, and film history. Examination of film technique and style over past one hundred years. Social and economic functions of film within broader institutional, economic, and cultural contexts.Cross-listed with ENGL245.
Credit Only Granted for: ENGL245 or FILM245.

FILM298 Special Topics in International Film Studies (3 Credits)
Special topics in International Film.
Repeatable to: 9 credits if content differs.

FILM298B Iranian Cinema (3 Credits)
Introduction to Iranian cinema, society, and culture. Taught in English.Cross-listed with: PERS283.
Credit Only Granted for: PERS283 or FILM298B.

FILM298V Heroes and Villains in American Film (3 Credits)
We will examine the complex, changing, and ever-present representations of heroes and villains in American film. Beginning with a foundational understanding of how heroes and, conversely, villains have been defined through classic Hollywood film, we will explore how these definitions have shifted throughout the 20th and 21st century in various narrative genres, including westerns, war films, film noir, fantasy, science fiction, and, of course, superhero movies. In particular, we will be focusing on how the hero and villain maintain or disrupt specific cultural ideologies concerning race/ethnicity, gender, sexuality, and ability. This course will examine how these various ideologies have evolved throughout the 20th and 21st century, impacting the ways in which heroes and villains are both represented in American film and perceived by diverse audiences. Finally, we will examine our own complicated and sometimes troubling identification with these heroes, even when they might stand in stark contrast to our cultural values and identities.Cross-listed with: AMST213.
Credit Only Granted for: AMST213, HONR219F or FILM298V.
Formerly: HONR219F.

FILM301 Cinema History I: The Silent Era (3 Credits)
Examines the development of silent cinema from the 1890s to the early 1930s drawing on at least five distinct national traditions (French, German, Russian, British, and American). Introduces students to key cinematic conventions as they emerged around the world.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-College of Arts & Humanities.

FILM302 Cinema History II: The Sound Era (3 Credits)
Introduction to the international history of cinema from sound around 1930 to the present.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283.
Restriction: Must have permission of the Film Studies program.

FILM311 Documentary Film (3 Credits)
A survey of currents in the history of the documentary film, beginning with early cinema and continuing through to more recent manifestations.
Prerequisite: ENGL245, FILM245, or SLLC283; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: FILM311 or ENGL329L.

FILM319 Special Topics in Documentary, Animation, Experimental Cinema, and Other Visual Media (3 Credits)
Examine the possibilities of non-narrative cinema, or cinema that is structured differently from the fiction feature film, as well as other media (television, digital imagery, and photography) that entertain a close relationship with cinema in terms of form, content, and audience. Content varies.
Repeatable to: 6 credits.

FILM329 Special Topics in National/International Cinemas (3 Credits)
Examine one or more national cinematic traditions (including Hollywood cinema), or may look across traditions comparatively, for example at international and/or transnational phenomena. Content varies.
Repeatable to: 6 credits.

FILM331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)
Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of The Trial, 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's 'Kafka', 1991).Cross-listed with GERM331.
Credit Only Granted for: GERM331, FILM331, or HONR348K.

FILM332 Brazilian Cinema (3 Credits)
Brazilian films from the late 1950s to the present with a special view to the relationship between cinema, society, historical dates, and social changes in Brazil. Taught in English.Cross-listed with PORT332.
Credit Only Granted for: PORT332, FILM332, or PORT378.
Formerly: PORT378.

FILM334 Soviet Film: Propaganda, Myth, Modernism (3 Credits)
A Survey of Soviet film from the 1920s to 1991, focusing on important directors, genres, themes, and styles. Taught in English.Cross-listed with RUSS334.
Credit Only Granted for: RUSS334, FILM334, or RUSS298K.
Formerly: RUSS298K.

FILM336 Soviet Cinema and Empire (3 Credits)
Examination of the concepts of 'empire' and 'nation' through their representation in Soviet cinema. Taught in English.Cross-listed with RUSS336.
Credit Only Granted for: RUSS336, FILM336 or RUSS398K.
Formerly: RUSS398K.

FILM341 Filming War Zones: Representations of Wars in Iraq & Chechnya (3 Credits)
Comparative study of ideological and cultural discourses in war films covering military conflicts in Iraq and Chechnya in late 20th-early 21st centuries. Materials include American, Middle Eastern, and Russian feature films and documentaries; theories of propaganda, ideology and popular culture. Taught in English.Cross-listed with ARAB341.
Credit Only Granted for: ARAB341 or FILM341.

FILM342 Film Comedy (3 Credits)
Comedy as a specific cinematic genre.
Prerequisite: FILM283, ENGL245, FILM245, or SLLC283; or permission of ARHU-School of Languages, Literatures, and Cultures department. Also offered as: SLLC342.
Credit Only Granted for: SLLC342, FILM342, or SLLC368B.
Formerly: SLLC368B.

FILM344 Film and the Fantastic (3 Credits)
Survey of fantastic cinema, encompassing American classics, Hollywood recent productions, and independent films, as well as Asian horror films, anime, and European fantasy.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-School of Languages, Literatures, and Cultures department. Also offered as: SLLC344.
Credit Only Granted for: SLLC344 or FILM344.

FILM345 The Films of Alfred Hitchcock (3 Credits)
An examination of important Hitchcock films from the perspective of innovation, aesthetics, and cultural history.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: FILM345 or ENGL329J.

FILM352 The Baddest Decade: The 1970s in American Film and American History (3 Credits)
The history of the United States and of its cinema in the 1970s.
Prerequisite: HIST201. Cross-listed with HIST304.
Credit Only Granted for: FILM352 or HIST304.

FILM359 Special Topics in Genres/Auteurs/Cinema Movements (3 Credits)
Examine narrative cinema from the perspective of content (themes, issues, structures) and style through the lens of genre, auteurship (a concept of authorship in film studies), and/or historical aesthetic movements that have been influential in the development of cinema as an art and film studies as a field. Content varies.
Repeatable to: 6 credits.

FILM361 Cinema and Globalization (3 Credits)
Introduction to cinema as a global phenomenon.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of Film Studies program; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with SLLC361.
Credit Only Granted for: SLLC361, FILM361, SLLC368G, or CMLT498C.
Formerly: SLLC368G or CMLT498C.

FILM362 Vision, Visuality, and the Gaze in Cinema (3 Credits)
Students will build a way of talking critically about film. The prism of seeing, visuality, the gaze, and the like will serve as a way to investigate the way films take on meaning as well as to understand how film participates in a wide network of interconnected ideas, concepts, and modes of thought that have contributed to the audiences' ability to make sense of what a film is conveying.
Prerequisite: ENGL245 or FILM245; or permission of Film Studies Program; or permission of ARHU-School of Languages, Literatures, and Cultures department. Cross-listed with SLLC362.
Credit Only Granted for: SLLC362, FILM362, or SLLC368A.
Formerly: SLLC368A.

FILM369 Special Topics in Film Theories (3 Credits)
Examines specific methodologies (structuralism, feminism, postcolonialism, etc.) for the critical analysis of film. The course will also consider the historical development of theoretical concepts. Content varies.
Repeatable to: 6 credits if content differs.

FILM385 German Cinema (3 Credits)
A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.Cross-listed with GERM385.
Credit Only Granted for: GERM385, GERM285 or FILM385.
Formerly: GERM285.

FILM388 Experiential Learning: Film Studies (1-3 Credits)
Connects students' theoretical understanding of film studies, as obtained through the classroom, to professional experience.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.
Repeatable to: 6 credits.

FILM410 Documentary and Narrative (3 Credits)
An examination of the relationship between film and reality, focusing on documentary film.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-School of Languages, Literatures, and Cultures department. Also offered as: SLLC410.
Credit Only Granted for: SLLC410 or FILM410.

FILM411 Experimental Film (3 Credits)
Introductory survey of European and U.S. American experimental cinema.Cross-listed with SLLC411.
Credit Only Granted for: SLLC411 or FILM411.

FILM412 Animation and Cinema (3 Credits)
An examination of animation in art, cinema, and other media.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-College of Arts & Humanities.
Credit Only Granted for: FILM412 or ENGL468C.

FILM419 Special Topics in Documentary, Animation, Experimental Cinema, and Other Media (3 Credits)
Advanced studies in Documentary, Animation, Experimental Cinema, and Other Media. Examines the possibilities of non-narrative cinema, or cinema that is structured differently from the fiction feature film, as well as other media (television, digital imagery, and photography) that entertain a close relationship with cinema in terms of form, content, and audience. Content varies.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; and or permission of ARHU College of Arts and Humanities.
Restriction: Varies depending on the crosslist.
Repeatable to: 6 credits if content differs.

FILM420 French Cinema: A Cultural Approach (3 Credits)
A study of French culture, civilization, and literature through the medium of film. Taught in English.Cross-listed with FREN480.
Credit Only Granted for: FREN480 or FILM420.

FILM421 Francophone African Film (3 Credits)
Imaginary and Memory in the reality of Francophone African Film from 1960-present. Taught in English.Cross-listed with FREN421.
Credit Only Granted for: FREN421 or FILM421.

FILM423 Women and French Cinema (3 Credits)
Cultural identity, social boundaries and gender roles in French film as well as introduction to film textual analysis and diverse film theories (semiotics, film and psychoanalysis, feminist film theory, structuralism, narratology, spectatorship and cultural studies). Taught in French.Cross-listed with FREN423.
Credit Only Granted for: FREN423 or FILM423.

FILM426 Modern Chinese Film and Visual Culture (3 Credits)
Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.Cross-listed with ARTH484.
Credit Only Granted for: ARTH484 or FILM426.

FILM427 Visions and Fictions from Spain (3 Credits)
Overview of Spanish Cinema from the end of the 19th century through present day Spain. Exploration of the production of literary and cinematic texts in their sociohistorical, political, religious and cultural contexts. Taught in Spanish.
Prerequisite: SPAN331, SPAN332, or SPAN333; or students who have taken courses with comparable content may contact the department; or permission of ARHU-Spanish & Portuguese Languages & Literatures department. Cross-listed with SPAN427.
Credit Only Granted for: FILM427 or SPAN427.

FILM429 Special Topics in National/International Cinemas (3 Credits)
Courses in National/International Cinemas may examine one or more national cinematic traditions (including Hollywood cinema), or may look across traditions comparatively, for example at international and/or transnational phenomena. Content varies.
Repeatable to: 6 credits.

FILM430 Critical Issues in Israeli Cinema (3 Credits)
Critical investigation of Zionist and Israeli culture and politics through film.Cross-listed with HEBR430.
Credit Only Granted for: HEBR430 or FILM430.

FILM431 Italian Cinema II - In Translation (3 Credits)
A study of Italian society and culture through the medium of film from the mid 1970's to the present. Taught in English.Cross-listed with ITAL473.
Credit Only Granted for: ITAL473, ITAL474, or FILM431.

FILM433 Holocaust in Italian Literature and Cinema (3 Credits)
Review of literature and theoretical writings of Italy's most famous survivor, Primo Levi, to a sampling of Italian films that focus in vastly different and often extremely controversial ways on the experience of the concentration camp, while addressing a series of central questions from the brutal realities of the camps to the 'compromises' made in order to survive, the need to bear witness, and the idea of the survivor's guilt.Cross-listed with ITAL433.
Credit Only Granted for: FILM433 or ITAL433.

FILM441 Italian Cinema I: Neorealism (3 Credits)
Explores representations of Italy in cinema with special focus on identity formation and the movement of Italian neorealism and post neorealism. Taught in English.Cross-listed with ITAL436.
Credit Only Granted for: FILM441 or ITAL436.

FILM451 Film Noir and American Culture (3 Credits)
Introduction to a variety of American movies made in the 1940s and 1950s whose dark themes and stark black-and-white lighting led to their identification as film noir.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-College of Arts & Humanities.
Restriction: Must not have completed ENGL428A (Summer 2006, Spring 2007, Summer 2009) or ENGL379Q (Fall 2009) or HHUM106 (Spring 2012), or ARTH389A (Spring 2012).
Credit Only Granted for: FILM451, ENGL468D, ENGL428A ,ENGL379Q, HHUM106, or ARTH389A (Spring 2012).
Formerly: ENGL428A and ENGL379Q.

FILM452 Origins of Cinema (3 Credits)
An in-depth engagement with the specificity of early cinema, dedicated to a comparative framework that compares the early cinema period (1890-1915) to other moments of media emergence, both before and after cinema, with special emphasis on the current, 'digital' moment.
Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of Film Studies Program.
Credit Only Granted for: FILM452 or ENGL468G.

FILM459 Special Topics in Genres/Auteurs/Cinema Movements (3 Credits)
Special topics in genres, auteurs, and cinema movements.
Repeatable to: 6 credits.

FILM461 Political Cinema (3 Credits)
Histories of cinema and politics in the 20th century.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-School of Languages, Literatures, and Cultures department. Also offered as: SLLC461.
Credit Only Granted for: FILM461 or SLLC461.

FILM462 Realism and the Real in Film (3 Credits)
Exploration of the problem of realism, one of the most central theoretical issues in film studies.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of instructor.
Credit Only Granted for: FILM359R, SLLC368R or FILM462.
Formerly: FILM359R/SLLC368R.

FILM463 Screening Time: History and Memory in Cinema (3 Credits)
An examination of the ways and techniques with which cinema produces a sense of time in the viewer.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of ARHU-College of Arts & Humanities. Cross-listed with SLLC463.
Credit Only Granted for: SLLC463 or FILM463.

FILM464 The Violence of Cinema (3 Credits)
An investigation of cinema's multifaceted relationship to violence.
Prerequisite: ENGL245, FILM245, SLLC283, or FILM283; or permission of instructor.
Credit Only Granted for: FILM469A/SLLC468A or FILM 464.
Formerly: FILM469A/SLLC468A.

FILM469 Special Topics in Film Theories II (3 Credits)
Special topics in film theories.
Repeatable to: 6 credits.

FILX - Film Studies Education Abroad

FILX301 Glued to the Screen: TV Shows, Norms, and Culture (3 Credits)
Introduces the notion of TV as a cultural forum, a social regulator, and a social critique. Using examples from American, Scandinavian, and also British television, we will analyze how TV operates by working through social issues, and how TV shows mirror societal concerns and assumptions.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

FILX302 Spain In Cinema: Global and Local Perspectives (3 Credits)
This course examines both Spanish cinematography and foreign/transnational audiovisual productions related to Spanish culture. The transdisciplinary approach includes film studies, sociology, history, anthropology and art theory, while also applying cultural and cross-cultural studies and post-colonialist views.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

FIRE - First-Year Innovation & Research Experience

FIRE120 FIRE SEMESTER 1 (3 Credits)
Engages the research process through the design, research, collaborative authorship and iterative review-based refinement of research proposals. Students find and analyze primary literature, think creatively, author and communicate research proposals in a scholarly fashion and work collaboratively to solve scientific and societal problems using technology, delegation and productive team communication.
Additional Information: This is the first course in the FIRE (First-Year Innovation & Research Experience) program sequence.

FIRE150 FIRE SEMESTER 2: Antibiotic Resistance (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Antibiotic Research research stream.
Recommended: FIRE120.

FIRE151 FIRE SEMESTER 2: Sustainability Analytics (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Sustainability Analytics research stream.
Recommended: FIRE120.

FIRE152 FIRE SEMESTER 2: Environmental Pathogens (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Environmental Pathogens research stream.
Recommended: FIRE120.

FIRE153 FIRE SEMESTER 2: Found In Translation (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Found In Translation research stream.
Recommended: FIRE120.

FIRE154 FIRE SEMESTER 2: Risk Communication & Resilience (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Risk Communication and Resilience research stream.
Recommended: FIRE120.

FIRE155 FIRE SEMESTER 2: Terrapin Genome Project (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Terrapin Genome Project research stream.
Recommended: FIRE120.

FIRE157 FIRE SEMESTER 2: Addiction Science (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Addiction Science research stream.
Recommended: FIRE120.

FIRE160 FIRE SEMESTER 2: Transgenerational Brain Initiative (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Transgenerational Brain Initiative research stream.
Recommended: FIRE120.
Restriction: Must be in the program FIRE.

FIRE162 FIRE SEMESTER 2: Once and Future Planet (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Once and Future Planet research stream.
Recommended: FIRE120.
Restriction: Must be in the program FIRE.

FIRE163 FIRE SEMESTER 2: Animal and Human Relationships (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Animal and Human Relationships research stream.
Recommended: FIRE120.
Restriction: Must be in the program FIRE.

FIRE164 FIRE SEMESTER 2: Autonomous Unmanned Systems (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Autonomous Unmanned Systems research stream.
Recommended: FIRE120.
Restriction: Must be in the program FIRE.

FIRE165 FIRE SEMESTER 2: Designing Innovations (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Designing Innovations research stream.
Recommended: FIRE120.

FIRE166 FIRE SEMESTER 2: Immunogenetics (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining this research group.
Recommended: FIRE120.

FIRE167 FIRE SEMESTER 2: Felons not Families (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Felons not Families research stream.
Recommended: FIRE120.

FIRE170 FIRE SEMESTER 2: Phillips Virtual Culture (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Phillips Virtual Culture research stream.
Recommended: FIRE120.

FIRE171 FIRE SEMESTER 2: Capital One Machine Learning (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Capital One Machine Learning research stream.
Recommended: FIRE120.

FIRE172 FIRE SEMESTER 2: Engineering Biosensors (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Engineering Biosensors research stream.
Recommended: FIRE120.

FIRE173 FIRE SEMESTER 2: Deep Brain Neurotech (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the Neural Systems research stream.
Recommended: FIRE120.

FIRE174 FIRE SEMESTER 2: African American Digital Humanities - Digital Archives (3 Credits)
FIRE SEMESTER 2 course for students in the FIRE program joining the African American Digital Humanities - Digital Archives research stream.
Recommended: FIRE120.

FIRE198 FIRE SEMESTER 2 (2 Credits)
This is the second course in the FIRE (First-Year Innovation & Research Experience) program sequence.Students in this course join a research stream and gain discipline-specific training in that lab. This course focuses on the concepts related to the process of independent research including collaboration with peers, communication of ideas, troubleshooting unexpected outcomes, and discipline-specific methodologies.
Recommended: FIRE120.
Repeatable to: 2.0 credits.

FIRE250 FIRE SEMESTER 3: Antibiotic Resistance (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Antibiotic Research research stream.
Prerequisite: FIRE150.

FIRE251 FIRE SEMESTER 3: Sustainability Analytics (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Sustainability Analytics research stream.
Prerequisite: FIRE151.

FIRE252 FIRE SEMESTER 3: Environmental Pathogens (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Environmental Pathogens research stream.
Prerequisite: FIRE152.

FIRE253 FIRE SEMESTER 3: Found In Translation (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Found In Translation research stream.
Prerequisite: FIRE153.

FIRE254 FIRE SEMESTER 3: Risk Communication & Resilience (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Risk Communication and Resilience research stream.
Prerequisite: FIRE154.

FIRE255 FIRE SEMESTER 3: Terrapin Genome Project (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Terrapin Genome Project research stream.
Prerequisite: FIRE155.

FIRE257 FIRE SEMESTER 3: Addiction Science (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Addiction Science research stream.
Prerequisite: FIRE157.

FIRE260 FIRE SEMESTER 3: Transgenerational Brain Initiative (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Transgenerational Brain Initiative research stream.
Prerequisite: FIRE160.

FIRE262 FIRE SEMESTER 3: Once and Future Planet (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Once and Future Planet research stream.
Prerequisite: FIRE162.

FIRE263 FIRE SEMESTER 3: Animal and Human Relationships (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Animal and Human Relationships research stream.
Prerequisite: FIRE163.

FIRE264 FIRE SEMESTER 3: Autonomous Unmanned Systems (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Autonomous Unmanned Systems research stream.
Prerequisite: FIRE164.

FIRE265 FIRE SEMESTER 3: Designing Innovations (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Designing Innovations research stream.
Prerequisite: FIRE165.

FIRE266 FIRE SEMESTER 3: Immunogenetics (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining this research group.
Prerequisite: FIRE166.

FIRE267 FIRE SEMESTER 3: Felons not Families (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Felons not Families research stream.
Prerequisite: FIRE167.

FIRE270 FIRE SEMESTER 3: Phillips Virtual Culture (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Phillips Virtual Culture research stream.
Prerequisite: FIRE170.

FIRE271 FIRE SEMESTER 3: Capital One Machine Learning (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Capital One Machine Learning research stream.
Prerequisite: FIRE171.

FIRE272 FIRE SEMESTER 3: Engineering Biosensors (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Engineering Biosensors research stream.
Prerequisite: FIRE172.

FIRE273 FIRE SEMESTER 3: Deep Brain Neurotech (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the Deep Brain Neurotech research stream.
Prerequisite: FIRE173.

FIRE274 FIRE SEMESTER 3: African American Digital Humanities - Digitial Archives (3 Credits)
FIRE SEMESTER 3 course for students in the FIRE program joining the African American Digital Humanities - Digitial Archives research stream.
Prerequisite: FIRE174.

FIRE298 FIRE Semester 3 (3 Credits)
Capstone course in the FIRE (First-Year Innovation & Research Experience) program sequence. Students in this course transition from trainee to practitioner in their lab. This course focuses on the concepts related to the process of independent research including collaboration with peers, communication of ideas, troubleshooting unexpected outcomes, and discipline-specific methodologies.
Prerequisite: FIRE198.
Repeatable to: 3 credits.

FMSC - Family Science

FMSC110 Families and Global Health (3 Credits)
Students will explore, define, and study global health, social determinants of health, health inequalities, gender inequality, family violence, and maternal and child health using a global perspective.

FMSC111 Credit Cards and College Students (1 Credit)
Provides college students with factual information about basic money management skills, emphasizing the responsible use of credit, specifically credit cards. Topics will include financial goals, spending plan, wise use of credit, debt management, consumer credit protection, and ID Theft. Online lessons will include video clips and interactive class activities. Students will learn the basics to build a strong financial future.
Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.
Credit Only Granted for: FMSC111, FMSC341 or FMSC498D.
Formerly: FMSC498D.

FMSC170 Modern Families (3 Credits)
Examination of current trends and controversial issues in family life, including issues of marriage, reproductive technologies, adoption, child custody, remarriage, and marital violence.
Credit Only Granted for: FMSC170 or FMSC298F.
Formerly: FMSC298F.

FMSC190 Man Up! Where Are The Fathers? (3 Credits)
An examination of changing fatherhood roles, health, and inequality in diverse families. Focus will be on masculinities and disparities among men by race and class; provider role expectations; and trauma and violence faced by men in contemporary society.

FMSC260 Couple Relationships (3 Credits)
Couple relationships and their alternatives in contemporary dating, courtship and marriage.
Credit Only Granted for: FMSC260 or FMST260.
Formerly: FMST260.

FMSC280 Global, Child & Family Health: Getting There Via E-Communications (3 Credits)
Students will learn about global maternal, child and family health issues and how these issues may affect their lives. Interdisciplinary teams of students will collaborate to develop programs aimed at improving global family health through the use of information and communications technologies.
Credit Only Granted for: FMSC280 or FMSC289G.
Formerly: FMSC289G.

FMSC290 Family Economics (3 Credits)
Application of economic methodology to study families under various economic situations. Examination of how decisions about marriage, divorce, fertility, consumption and time use are influenced by labor/housing markets, tax structure, social welfare benefits and other economic considerations.
Credit Only Granted for: FMSC290 or FMST290.
Formerly: FMST290.

FMSC298 Special Topics in Family Science (1-3 Credits)
Topics of special interest under the general guidance of the Department of Family Studies.
Repeatable to: 12 credits if content differs.
Formerly: FMST298.

FMSC302 Research Methods in Family Science (3 Credits)
Introduction to the methods of the social and behavioral sciences employed in family science. The role of theory, the development of hypotheses, measurement, design, and data analysis.
Prerequisite: Must have completed an introductory statistics course.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC302 or FMST302.
Formerly: FMST302.

FMSC310 Maternal, Child and Family Health (3 Credits)
Overview of the major issues in Maternal, Child, and Family Health in the U.S. and the world. The course will cover the social, political, environmental, and economic factors that shape the health of women, children, and families throughout the life course. It will employ the core disciplines of public health -- 1) epidemiology/biostatistics, 2) environmental health, 3) health policy and administration, and 4) social and behavioral health -- to examine these factors. The course introduces specific issues and interventions and places these issues and interventions within their broad sociohistorical context.
Credit Only Granted for: FMSC310, FMSC410 or FMSC498A.
Formerly: FMSC498A and FMSC410.
Additional Information: A comprehensive understanding of maternal, child, and family health, with additional emphasis on environmental health, needs assessment and evaluation, enabling students to more effectively address issues in the workplace.

FMSC330 Family Theories and Patterns (3 Credits)
Theory and research on the family, including a cross-cultural analysis of family patterns.
Restriction: Junior standing or higher.
Credit Only Granted for: FMSC330 or FMST330.
Formerly: FMST330.

FMSC332 Children in Families (3 Credits)
A family life education approach to the study of children and families. Emphasis on the interaction of children with parents, siblings, extended kin, and the community.
Prerequisite: PSYC100 or FMSC105.
Credit Only Granted for: FMSC332 or FMST332.
Formerly: FMST332.

FMSC341 Personal and Family Finance (3 Credits)
Individual and family financial strategies with emphasis on financial planning, savings, investments, insurance, income taxes, housing, and use of credit. Planning, analyzing, and controlling financial resources to resolve personal/family financial problems and to attain financial security.
Credit Only Granted for: FMSC341 or FMST341.
Formerly: FMST341.

FMSC381 Poverty, Affluence, and Families (3 Credits)
Social, political, cultural and economic factors influencing income and wealth in American families.
Prerequisite: SOCY100 or SOCY105.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC381 or FMST381.
Formerly: FMST381.

FMSC383 Delivery of Human Services to Families (3 Credits)
Processes of service delivery with special emphasis upon relationships among managers, service providers and clients. The impact of human service systems on families.
Prerequisite: FMSC330.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC383 or FMST383.
Formerly: FMST383.

FMSC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of SPHL-Family Science department.
Restriction: Junior standing or higher.
Credit Only Granted for: FMSC386 or FMST386.
Formerly: FMST386.

FMSC399 Independent Study (1-6 Credits)
Prerequisite: Permission of SPHL-Family Science department.
Repeatable to: 12 credits.
Formerly: FMST399.

FMSC420 African American Families (3 Credits)
Examination of the history, structure, cultural foundation, and diversity of African American family life is the focus of this class. Presentations and discussions enable students to identify, analyze, and assess: (1) the major theoretical perspectives used in the study of African American families; (2) the impact of social policy on African American families; and (3) specific areas of family life (e.g., marriage and divorce, parenting, child development, health disparities).
Recommended: FMSC330.
Credit Only Granted for: FMSC420 or FMSC498F.
Formerly: FMSC498F.

FMSC425 Military and Veteran Family Services (3 Credits)
Overview of issues impacting contemporary military families including during times of war. Identification of challenges faced by military families related to deployment/reunion and mental and physical health, as well as support systems available. Examination of skills and strategies for working with service members, veterans, and military families.
Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.
Credit Only Granted for: FMSC425 or FMSC498W.
Formerly: FMSC498W.

FMSC430 Gender Issues in Families (3 Credits)
The development of historical, cultural, developmental, and psychosocial aspects of masculinity and femininity within the context of contemporary families and the implications for interpersonal relations.
Prerequisite: SOCY100, SOCY105, or PSYC100.

FMSC431 Family Crises, Emergencies and Interventions (3 Credits)
Examines the stressors in life that may lead families into a state of crisis or emergency and what can be done to help families when the need arises. Both internal stressors, such as substance abuse, finances, divorce, illness or parent-child conflict, and external stressors, such as community violence and natural disasters, are examined. Using theories and techniques for intervention and enhancement, the course examines factors involved in stressors turning into a family crisis and how factors such as emergency preparedness, social support and public policy can be a source of family resilience or protect families from negative outcomes.
Prerequisite: PSYC100.

FMSC432 Adult Development and Aging in Families (3 Credits)
Theory, research, history, and programming related to adult development and aging in the intergenerational context of family.
Prerequisite: PSYC100; and (SOCY100 or SOCY105). And FMSC332; or must have completed a comparable development course.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC432 or FMST432.
Formerly: FMST432.

FMSC440 Death and Loss in Family Life (3 Credits)
Examination of how families experience grief and loss resulting from the death of a family member, including health and financial consequences. Overview of historical, social, psychological, cultural, medical, and legal dimensions of death in families from diverse backgrounds. Exploration of how the health care system and funeral home industry assist families in managing death and loss.
Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.
Credit Only Granted for: FMSC440 or FMSC498B.
Formerly: FMSC498B.

FMSC445 Sexuality: Issues in Family Therapy and Service Delivery (3 Credits)
Typical, dysfunctional, and pathological sexual functioning, including effects on individuals, couples, and family systems. Sensitizes students to sexual issues, explores how perceptions of such issues affect work with people, and emphasizes implications for marriage and family therapy.
Prerequisite: A basic course in human sexuality; and permission of instructor. Jointly offered with FMSC645.
Credit Only Granted for: FMSC445 or FMSC645.

FMSC460 Violence in Families (3 Credits)
Theories of child, spouse, and elder abuse in the family setting. Emphasis on historical, psychological, sociological and legal trends relating to physical, emotional, and sexual abuse. Introduction to methods for prevention and remediation.
Prerequisite: SOCY100, SOCY105, or PSYC100.
Credit Only Granted for: FMSC460 or FMST460.
Formerly: FMST460.

FMSC477 Internship and Analysis in Family Science (3 Credits)
A supervised internship and a seminar requiring analysis. Opportunities to integrate theory and practice including 120 hours of contracted field experience. Summer or fall internship contracts due May 1; Spring contracts due December 1. See department for application procedures.
Prerequisite: FMSC383; and 9 credits in FMSC courses; and permission of SPHL-Family Science department.
Restriction: Must be in a major within SPHL-Family Science department.
Credit Only Granted for: FMSC477, FMST347, or FMST477.
Formerly: FMST477.

FMSC485 Introduction to Family Therapy (3 Credits)
The fundamental theoretical concepts and clinical procedures of marital and family therapy including premarital and divorce therapy issues.
Prerequisite: FMSC330; or 1 course from PSYC300-499 course range.
Credit Only Granted for: FMSC485 or FMST485.
Formerly: FMST485.

FMSC486 Law, Public Health and the Cuban Family (4 Credits)
A short-term summer study abroad course that is a comparative law and public health course. Students travel to Havana, Cuba to compare family problems in a capitalist versus socialist society within the context of legal, public health, social, cultural and economic changes.
Recommended: FMSC487. Jointly offered with: FMSC686.
Credit Only Granted for: FMSC486, FMSC686 or MIEH698B.
Additional Information: This is a study abroad course which will primarily occur in Cuba. Additionally, the course involves an online component prior to and following the trip.

FMSC487 Family Law (3 Credits)
Designed for students interested in studying the law, public health, and family science, this course provides students with a general overview of family law and the impact on healthy families. The course also includes the study of cutting-edge issues such as marriage equality, assisted reproduction and ethical issues that may arise.

FMSC498 Special Topics: Family Science (1-3 Credits)
Special course topics in family studies.
Prerequisite: Permission of SPHL-Family Science department.
Repeatable to: 6 credits if content differs.
Formerly: FMST498.

FOLA - Foreign Language

FOLA108 Elementary Foreign Languages I (3 Credits)
The first semester of conversational study of a language not otherwise offered. The arts and humanities language requirement may be fulfilled by successful completion of FOLA108, FOLA109, FOLA118 and FOLA119 in a single language.
Repeatable to: 99 credits if content differs.

FOLA109 Elementary Foreign Languages II (3 Credits)
The second semester of conversational study of a language not otherwise offered. The arts and humanities language requirement may be fulfilled by successful completion of FOLA108, FOLA109, FOLA118 and FOLA119 in a single language.
Prerequisite: FOLA108; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 99 credits if content differs.

FOLA118 Intermediate Foreign Languages I (3 Credits)
The third semester of conversational study of a language not otherwise offered. The arts and humanities language requirement may be fulfilled by successful completion of FOLA108, FOLA109, FOLA118 and FOLA119 in a single language.
Prerequisite: FOLA109; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 99 credits if content differs.

FOLA119 Intermediate Foreign Language II (3 Credits)
Developing intermediate language skills, in both grammar and vocabulary; enhancement of oral and writing abilities.
Prerequisite: FOLA118; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 99 credits if content differs.

FOLA128 Introductory Middle Eastern Languages I (3 Credits)
An introduction to the three principal languages of the Islamic Middle East: Arabic, Persian, and Turkish. Only standard written form of the three languages is taught. May not be used to satisfy arts and humanities language requirement.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

FOLA129 Introductory Middle Eastern Languages II (3 Credits)
Continuation of FOLA128. May not be used to satisfy arts and humanities language requirement.
Prerequisite: FOLA128; and permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

FOLA138 Directed Study of a Foreign Language I (3 Credits)
Directed study of a modern foreign language with use of a self-instructional approach.
Restriction: Permission of ARHU-College of Arts & Humanities; and must be a student of high motivation and proven language learning aptitude.

FOLA139 Directed Study of a Foreign Language II (3 Credits)
A continuation of FOLA138.
Prerequisite: FOLA138; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.

FOLA148 Directed Study of a Foreign Language III (3 Credits)
A continuation of FOLA139.
Prerequisite: FOLA139; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.

FOLA149 Directed Study of a Foreign Language IV (3 Credits)
A continuation of FOLA148.
Prerequisite: FOLA148; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.

FOLA158 Directed Study of a Foreign Language (Intensive) I (6 Credits)
Intensive directed study of a modern foreign language with use of a self-instructional approach. Equivalent to FOLA138 plus FOLA139.

FOLA159 Directed Study of a Foreign Language (Intensive) II (6 Credits)
A continuation of FOLA158. Equivalent to FOLA148 plus FOLA149.
Prerequisite: FOLA158; and pre-requisite must be in corresponding subject language. Or permission of ARHU-School of Languages, Literatures, and Cultures department.

FOLA228 Intermediate Middle Eastern Languages I (3 Credits)
Continuation of FOLA129. May not be used to satisfy arts and humanities language requirement.
Prerequisite: FOLA129; and permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

FOLA329 Advanced Middle Eastern Languages II (3 Credits)
Continuation of FOLA328. May not be used to satisfy arts and humanities language requirement.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

FOLA386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.

FOLA389 Foreign Civilization (3 Credits)
A survey of the cultural history, arts and letters, folklore and life-style of the speakers of a language not otherwise offered. All readings and instruction in English.
Repeatable to: 6 credits if content differs.

FOLA408 Foreign Language I (3 Credits)
Intensive study of a foreign language or related topic not available under one of the current foreign language departments or programs. May not be used to fulfill the arts and humanities language requirement.

FOLA409 Foreign Language II (3 Credits)
A continuation of FOLA 408. May not be used to fulfill arts and humanities language requirement.
Prerequisite: FOLA408; and pre-requisite must be in corresponding subject language.

FOLA459 Foreign Literature in Translation (3 Credits)
Reading and discussion of selected authors, periods or genres of a foreign literature not otherwise offered. All readings and instruction in English.
Repeatable to: 6 credits if content differs.

FREN - French

FREN101 Elementary French I (4 Credits)
Introduction to basic structures and pronunciation with emphasis on the four skills: listening, speaking, reading and writing.
Restriction: Must not have 2 or more years of high school level French; and must not be a native/fluent speaker of French.

FREN103 Intensive Elementary French (4 Credits)
Covers speaking, reading, writing, listening, and culture of French-speaking world.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed FREN102; and must not be a native/fluent speaker of French.
Credit Only Granted for: FREN102 or FREN103.

FREN169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

FREN203 Intensive Intermediate French (4 Credits)
Covers speaking, reading, writing, listening, and culture of French-speaking world.
Prerequisite: FREN103; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a native/fluent speaker of French.
Credit Only Granted for: FREN201 or FREN203.

FREN204 French Grammar and Composition (3 Credits)
Intensive study of French grammar and composition.
Prerequisite: FREN201 or FREN203; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Not open to native/fluent speakers of French.

FREN211 French Reading and Conversation (3 Credits)
Practice in spoken French at intermediate level based on readings in a variety of genres. Written homework and exams.
Prerequisite: FREN201 or FREN203.
Restriction: Must not be a native/fluent speaker of French.

FREN240 Masterworks of French Literature in Translation (3 Credits)
Major works of French literature from pre-revolutionary France to the present. Emphasis on the individual in a social context. Taught in English.

FREN241 Women Writers of French Expression in Translation (3 Credits)
Works and ideas of 20th century women writers of French in Canada, Africa, the Caribbean and France. Taught in English.

FREN242 Francophone Writers of Africa and the African Diaspora (3 Credits)
An analysis of the works and ideas of 20th and 21st century Francophone writers (Africa, the Caribbeans, France). Taught in English.

FREN243 Masterpieces in French and Francophone Cinemas (3 Credits)
This course, taught in English, will present a large array of films directed by famous French directors (Jean Renoir, Robert Bresson, Jean-Luc Godard, Agnes Varda, etc..) and Francophone filmmakers (Arcand, Sembene) who were internationally known in their time and have had a considerable influence on today's filmmakers in the U.S. (Tarantino, Lynch, Lee, etc..) and abroad (Sissoko, Angelopoulos, VonTrier, ect..).

FREN250 Introduction to Cultural and Textual Analysis (3 Credits)
Introduction to cultural and textual analysis of selected readings from various genres in French literature. Taught in French.
Prerequisite: FREN204; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.
Credit Only Granted for: FREN250 or FREN250H.

FREN269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

FREN298 Aspects of French Civilization (3 Credits)
Topic to be determined each semester. Historical or thematic approaches to French art, literature, and culture. Taught in English.
Repeatable to: 6 credits if content differs.
Additional Information: Credit may not be applied to French major.

FREN301 Composition and Style (3 Credits)
Grammatical analysis, elements of style; range of written genres.
Prerequisite: FREN250; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.

FREN302 Translation: French to English (3 Credits)
Practicum in translation primarily from French to English; contrastive analysis.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN303 Translation: English to French (3 Credits)
Practicum in translation primarily from English to French; contrastive analysis.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN306 Commercial French I (3 Credits)
Introduction to commercial French including correspondence and business terminology. Emphasis on cross-cultural concepts needed for successful interaction within business settings. Taught in French.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN311 Advanced Oral Expression (3 Credits)
Linguistic and thematic analysis of written, audio, and visual texts. Focus on aural and oral skills. Some written assignments and evaluation.
Prerequisite: FREN250; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.

FREN312 France Today (3 Credits)
Analysis and discussion of current events and institutions using various French media resources.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a native/fluent speaker of French.

FREN351 From Romanticism to the Age of Modernism and Beyond (3 Credits)
A survey of the chief authors and major movements of French literature from Pre-Romanticism to the present.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN352 From the Age of Epic and Romance to the Enlightenment (3 Credits)
A survey of the chief authors and major movements of French literature from the Middle Ages to the end of the 18th century.
Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

FREN386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.

FREN387 Critical Writing on France and the French-Speaking World (3 Credits)
Intensive writing course based on focused study of issues and concerns drawn from French and Francophone literatures, films, and cultures. Elements of style, review of grammar. Taught in French.
Prerequisite: FREN301.
Restriction: Not open to Native speakers.

FREN388 Language House Colloquium (1 Credit)
The Language House Colloquium is a one-credit course for students residing in the Language House Immersion Program. The course focuses on the further development of skills in the target language and the acquiring of cultural knowledge of the countries that speak the target language. The course is designed to supplement the learning that takes place on a daily basis in the Language House program.
Restriction: Must be a resident of Language House.
Repeatable to: 4 credits.

FREN399 Directed Study in French (1-3 Credits)
Advanced undergraduates develop syllabus, reading list, and course requirements with interested faculty member. Designed for in-depth study of material not offered in regular courses or as expansion of course material. To be planned during semester preceding registration.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 3 credits.

FREN400 Applied Linguistics (3 Credits)
The nature of applied linguistics and its contribution to the effective teaching of foreign languages. Comparative study of English and French, with emphasis upon points of divergence. Taught in French.
Prerequisite: FREN301; or permission of ARHU-French & Italian Languages & Literatures department.

FREN407 History of the French Language (3 Credits)
Evolution of the French language from Latin to modern French. Taught in French.
Prerequisite: FREN351 or FREN352; or permission of ARHU-French & Italian Languages & Literatures department.

FREN421 Francophone African Film (3 Credits)
Imaginary and Memory in the reality of Francophone African Film from 1960-present. Taught in English.Cross-listed with FILM421.
Credit Only Granted for: FREN421 or FILM421.

FREN423 Women and French Cinema (3 Credits)
Cultural identity, social boundaries and gender roles in French film as well as introduction to film textual analysis and diverse film theories (semiotics, film and psychoanalysis, feminist film theory, structuralism, narratology, spectatorship and cultural studies). Taught in French.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department. Cross-listed with FILM423.
Credit Only Granted for: FREN423 or FILM423.

FREN429 Studies in French Literature and Culture of the Renaissance (3 Credits)
Selected topics in French literature of the Renaissance.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN439 Studies in 17th Century French Literature and Culture (3 Credits)
Selected topics in seventeenth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN449 Studies in 18th Century French Literature and Culture (3 Credits)
Selected topics in eighteenth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN459 Studies in 19th Century French Literature and Culture (3 Credits)
Selected topics in nineteenth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN469 Studies in 20th Century French Literature and Culture (3 Credits)
Selected topics in twentieth-century French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN471 The Construction of French Identity I: From the Origins to the Age of Versailles (3 Credits)
French life, customs, culture, traditions (800-1750).
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN472 The Construction of French Identity II: From the Revolution to the Early Twentieth Century (3 Credits)
French life, customs, culture, traditions (1750 to the early twentieth century).
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN473 The Construction of French Identity III: Cross-Cultural Approaches to the Study of Contemporary French Society (3 Credits)
Patterns of communication, mythology, and ideology in modern France, from the Third Republic to the present, through historical and cross-cultural approaches, with reference to the Francophone world.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN474 Contemporary France: A Sociocritical Approach (3 Credits)
A sociocritical approach to understanding modern French society through the study of print and non-print media documents (autobiography, film, and paraliterature), with reference to the Francophone world. Taught in French.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.
Recommended: FREN473.

FREN478 Themes and Movements of French Literature in Translation (3 Credits)
Studies treatments of thematic problems or literary or historical movements in French literature. Topic to be determined each semester. Taught in English.

FREN479 Masterworks of French Literature in Translation (3 Credits)
Treats the works of one or more major French writers. Topic to be determined each semester. Taught in English.

FREN480 French Cinema: A Cultural Approach (in Translation) (3 Credits)
A study of French culture, civilization, and literature through the medium of film. Taught in English.Cross-listed with FILM420.
Credit Only Granted for: FREN480 or FILM420.

FREN482 Gender and Ethnicity in Modern French Literature (3 Credits)
Literature by women writers of France and other French speaking areas with a focus on the relationship between gender, ethnicity and writing. Taught in English.

FREN488 Special Topics in Francophone Studies (3 Credits)
Topic and language of instruction to be announced when offered.
Repeatable to: 9 credits if content differs.

FREN489 Seminar in Themes or Movements of French Literature (3 Credits)
Seminar on selected themes or movements of French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN495 Honors Thesis Research (3 Credits)
The writing of a paper under the direction of a professor in this department and an oral examination. Required to fulfill the departmental honors requirement.
Restriction: Must be admitted to the departmental honors program.

FREN498 Special Topics in French Literature (3 Credits)
Selected topics in French literature.
Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

FREN499 Special Topics in French Studies (3 Credits)
An aspect of French studies, the specific topic to be announced each time the course is offered.
Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.
Repeatable to: 6 credits if content differs.

GEMS - Gemstone

GEMS100 Freshman Honors Colloquium: Introduction to Gemstone (1 Credit)
Orienting new Gemstone students to the university and to the program through a variety of team building activities, resources, and skill exploration exercises. Students will also examine and discuss areas such as liberal education, diversity, service, arts, current events, academic integrity, and leadership style.
Restriction: Freshman standing; and must be in the Gemstone program.

GEMS102 Research Topic Exploration and Team Formation (1 Credit)
Under the guidance of staff and visiting speakers, students will develop research topics that they will pursue for the remainder of their participation in the Gemstone program, and form into interdisciplinary teams around these topics.
Restriction: Must be in the Gemstone program.

GEMS104 Topics in Science, Technology and Society (STS) (3 Credits)
An examination of how cultural, economic, political and social forces shape scientific and technological systems and, conversely, how scientific and technological systems have affected the culture, economies, organization and politics of societies. Students in the course will form small teams to carry out semester-long research on socio/technical topics related to the course theme chosen for that specific semester.
Prerequisite: GEMS100.
Restriction: Must be in the Gemstone program.

GEMS202 Team Dynamics and Research Methodology (2 Credits)
This experiential course is designed to foster an understanding of effective team dynamics and basic research methodology. It will teach skills applicable to Gemstone team research and the writing of a team thesis. Upperclass Gemstone students serve as discussion facilitators. Students participate in their Gemstone teams and develop a draft of their team thesis proposal.
Prerequisite: GEMS100, GEMS102, and GEMS104.
Corequisite: GEMS296.
Restriction: Must be in the Gemstone program; and sophomore standing or higher.

GEMS208 Special Topics in Leadership and Team Development (1-3 Credits)
Principles, methods and types of leadership and team development with an emphasis on group discussion and decision making. Reading, discussion and exploration of the basic team concept, communications for winning scenarios, goal setting, problem solving, conflict resolution and research methods.
Restriction: Must be in the Gemstone program.

GEMS296 Team Project Seminar I (1 Credit)
This is the first of six seminars during which Gemstone students carry out multidisciplinary research with the guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long term goals.
Prerequisite: GEMS100, GEMS102, and GEMS104.
Corequisite: GEMS202.
Restriction: Must be in the Gemstone program with sophomore standing in a research team.

GEMS297 Team Project Seminar II (2 Credits)
This is the second of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team develops its website, prepares and presents its research proposal and begins its research project.
Restriction: Must be in the Gemstone program with sophomore standing in a research team.

GEMS396 Team Project Seminar III (2 Credits)
This is the third of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team presents its progress at the Gemstone Colloquia.
Prerequisite: GEMS297.
Restriction: Must be in the Gemstone program with junior standing in a research team.

GEMS397 Team Project Seminar IV (2 Credits)
This is the fourth of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team further develops its website. Also they will prepare and present the team project in the poster session of Undergraduate Research Day.
Prerequisite: GEMS396.
Restriction: Must be in the Gemstone program with junior standing in a research team.

GEOG - Geographical Sciences

GEOG100 Introduction to Geography (3 Credits)
An introduction to the broad field of geography as it is applicable to the general education student. The course presents the basic rationale of variations in human occupancy of the earth and stresses geographic concepts relevant to understanding world, regional and local issues.

GEOG110 The World Today: Global Perspectives (3 Credits)
The most critical issue facing the world today is the sustainability of both human and physical systems in the 21st century. This class uses the context of regions of the world to explore the 21st century issues of climate change, development, politics, economy, and demography. Each region will be used to highlight aspects of sustainability.

GEOG130 Developing Countries (3 Credits)
An introduction to the geographic characteristics of the development problems and prospects of developing countries. Spatial distribution of poverty, employment, migration and urban growth, agricultural productivity, rural development, policies and international trade. Portraits of selected developing countries.

GEOG140 Natural Disasters: Earthquakes, Floods, and Fires (3 Credits)
Catastrophic Environmental Events (CCE) that are becoming more common in this time of global environmental change and it is essential that today's students be equipped with the knowledge and skills to be leaders as we, as a society, understand the upheaval that these CCEs are causing. Students will examine how CEEs shape human society and ecosystem from the interdisciplinary perspective afforded by the field of Geography. Students will use the latest geographic science concepts and techniques in exploring these events. Using satellite imagery they will gain a multi-scale perspective of the ecological and societal aspects of the events.

GEOG158 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG170 Mapping our Digital World (3 Credits)
Introduction to technical methods used in gathering, analyzing, and mapping geospatial information for applications such as urban mobility, environmental monitoring, situational awareness, and disaster management. Topics include Geographic Information Systems (GIS), cartography, map projections, satellite and airborne remote sensing, the global positioning system (GPS), and introductory statistics and probability. The course is a gateway to more advanced technical classes in geospatial science.

GEOG198 Selected Topics in Geography (1-3 Credits)
Readings and discussion on selected topics in the field of geography or GIS
Repeatable to: 12 credits if content differs.

GEOG201 Geography of Environmental Systems (3 Credits)
A systematic introduction to the processes and associated forms of the atmosphere and earth's surfaces emphasizing the interaction between climatology, hydrology and geomorphology.

GEOG202 Introduction to Human Geography (3 Credits)
Introduction to what geographers do and how they do it. Systematic study of issues regarding social and cultural systems from a global to a local scale. Looks at the distribution of these variables and answers the question 'Why here, and not there'?

GEOG211 Geography of Environmental Systems Laboratory (1 Credit)
A laboratory course to accompany GEOG 201. Analysis of the components of the earth's energy balance using basic instrumentation; weather map interpretation; soil analysis; the application of map and air photo interpretation techniques to landform analysis.
Prerequisite: Must have completed or be concurrently enrolled in GEOL120, GEOL100, or GEOG201.

GEOG212 Career Planning for Geographical Sciences, GIS, and ENSP Majors (1 Credit)
Increase student knowledge of professional development opportunities in Geographical Sciences through classroom activities and invited speakers, and to build awareness of career development tools and strategies.
Restriction: Must be in one of the following programs (Geography; GEOG-GIS & Computer Cartography).

GEOG258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG301 Advanced Geographical Environmental Systems (3 Credits)
This course will provide the students with an overview of the key elements of physical geography, including biogeography (factors and processes that control the geographical distributions of plants and animals, climatology (processes associated with controlling variations in weather and climate), and geomorphology (factors and processes that control changes to the physical structure of the earth surface in relation to geological structures).
Prerequisite: GEOG201 and GEOG211.
Credit Only Granted for: GEOG398B or GEOG301.
Formerly: GEOG398B.

GEOG306 Introduction to Quantitative Methods for the Geographical Environmental Sciences (3 Credits)
Essentials in the quantitative analysis of spatial and other data, with a particular emphasis on statistics and programming. Topics include data display, data description and summary, statistical inference and significance tests, analysis of variance, correlation, regression, and some advanced concepts, such as matrix methods, principal component analysis, and spatial statistics. Students will develop expertise in data analysis using advanced statistical software.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, JOUR405, PSYC200 or SOCY201.

GEOG310 Maryland and Adjacent Areas (3 Credits)
The physical environment, natural resources, and population in relation to agriculture, industry, transport, and trade in the State of Maryland and adjacent areas.
Credit Only Granted for: GEOG310 or GEOG321.
Formerly: GEOG321.

GEOG312 The United States and Canada (3 Credits)
The two countries as functioning geographic systems with important differences and key linkages. An examination of the cultural, environmental, and economic components and their spatial variation. Attention to the role of regions in national economies.
Credit Only Granted for: GEOG312 or GEOG320.
Formerly: GEOG320.

GEOG328 Topics in Regional Geography (3 Credits)
Selected topics in regional geography.
Repeatable to: 6 credits if content differs.

GEOG330 As the World Turns: Society and Sustainability in a Time of Great Change (3 Credits)
Cultural geography course on society and sustainability. Culture is the basic building block that is key to sustainability of societies. Course will cover sustainability of societies on different scales, examining local, regional, and worldwide issues. Sustainability will be examined as a key element of environmental sustainability. How societies adjust to rapid world change will be examined as a positive and/or negative factor in sustainability.
Credit Only Granted for: GEOG330, GEOG360, or GEOG362.
Formerly: GEOG362.

GEOG331 Introduction to Human Dimensions of Global Change (3 Credits)
Introduction to global-scale interrelationship between human beings and the environment. The development of global issues including but not limited to the environment, food, energy, technology, population, and policy.
Prerequisite: ANTH220, ANTH260, GEOG202, or GEOG201; or permission of BSOS-Geography department.
Credit Only Granted for: GEOG331 or GEOG361.
Formerly: GEOG361.

GEOG332 Economic Geography (3 Credits)
Principles of managing scarce resources in a world where everyone faces tradeoffs across both time and space. Focuses on the relationship between globalization processes and changing patterns of locational advantages, production, trade, population, socioeconomic and environmental grace and sustainability.
Credit Only Granted for: GEOG203, GEOG303, or GEOG332.
Formerly: GEOG303.

GEOG333 The Social Geography of Metropolitan Areas in Global Perspective (3 Credits)
A socio-spatial approach to human interaction within the urban environments: ways people perceive, define, behave in, and structure world cities and metropolitan areas. Cultural and social differences define spatial patterns of social activities which further define distinctions in distribution and interaction of people and their social institutions.
Prerequisite: GEOG201 and GEOG202; or permission of BSOS-Geography department.
Credit Only Granted for: GEOG456 or GEOG333.
Formerly: GEOG456.

GEOG335 Population Geography (3 Credits)
The spatial characteristics of population distribution and growth, migration, fertility and mortality from a global perspective. Basic population-environmental relationships; carrying capacity, density, and relationships to national development.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201; and GEOG202.
Credit Only Granted for: GEOG435 or GEOG335.
Formerly: GEOG435.

GEOG340 Geomorphology (3 Credits)
Survey of landform types and role of processes in their generation. Frequency of occurrence and implications for land utilization. Emphasis on coastal, fluvial, and glacial landforms in different environmental settings. Landform regions of Maryland.

GEOG342 Introduction to Biogeography (3 Credits)
The principles of biogeography, including the patterns, processes and distributions of living organisms from local to global scales, aspects of ecophysiology, population and community ecology and evolutionary biology. Spatial processes in the biosphere will be covered.
Prerequisite: GEOG201.
Recommended: GEOG211.
Credit Only Granted for: GEOG342 or GEOG347.
Formerly: GEOG347.

GEOG345 Introduction to Climatology (3 Credits)
The geographic aspects of climate with emphasis on energy-moisture budgets, steady-state and non steady-state climatology, and climatic variations at both macro-and micro-scales.

GEOG346 Cycles in the Earth System (3 Credits)
The Earth System operates through some fundamental cycles such as water, energy, and the Carbon Cycle. This course will build on GEOL/GEOG/AOSC123 starting with concept of feedbacks within the Earth System, global energy balance and the Greenhouse Effect. A brief introduction to the atmospheric and oceanic circulation will lead to the water cycle connecting the land, ocean, and atmosphere to the Earth System. Introduction to the Global carbon, nitrogen, and sulfur cycles will be followed by the concept of long-term climate regulation and short-term climate variability. The concepts of cycles, feedbacks, forcings, and responses in the Earth System will be applied to Global Warming and Ozone Depletion.
Prerequisite: GEOG123, AOSC123, GEOL123, or MATH140; or permission of CMNS-Geology department.
Recommended: PHYS171, PHYS141, PHYS161, or MATH141. Cross-listed with GEOL346.
Credit Only Granted for: AOSC346, GEOG346, or GEOL346.

GEOG358 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG372 Remote Sensing (3 Credits)
Principles of remote sensing in relation to photographic, thermal infrared and radar imaging. Methods of obtaining quantitative information from remotely-sensed images. Interpretation of remotely-sensed images emphasizing the study of spatial and environmental relationships.

GEOG373 Geographic Information Systems (3 Credits)
Characteristics and organization of geographic data; creation and use of digital geospatial databases; metadata; spatial data models for thematic mapping and map analysis; use of geographic information system in society, government, and business. Practical training with use of advanced software and geographic databases.

GEOG376 Introduction to Computer Programming for GIS (3 Credits)
Introduces conceptual and practical aspects of programming for geographic applications. The main focus is on developing a solid understanding of basic programming techniques irrespective of the specific programming language including variables, looping, conditional statements, nesting, math, strings, and other concepts. In addition, students will develop a proficiency in applying these basic programming principles to manipulating spatial data sources within the Geographic Information Systems (GIS).
Prerequisite: Must have completed or be concurrently enrolled in MATH120, MATH130, or MATH140; or must have completed MATH220. And GEOG373; or permission of BSOS-Geography department.

GEOG384 Internship in Geography I (3 Credits)
Supervised field training to provide career experience. Introduction to professional level activities, demands, opportunities. Placement at a public agency, non-profit organization, or private firm. Participation requires application to the internship advisor in preceding semester.
Prerequisite: GEOG211, GEOG306, GEOG212, and GEOG201; and (ENGL393 or ENGL390).
Restriction: Must be in Geography program.

GEOG385 Internship in Geography II (3 Credits)
Supervised field training to provide career experience. Introduction to professional-level activities, demands, opportunities. Placement at a public agency, nonprofit organization, or private firm. Participation requires application to the internship advisor in preceding semester.
Prerequisite: GEOG211, GEOG306, GEOG212, and GEOG201; and must have completed a Junior (Professional) English course.
Restriction: Must be in Geography program.

GEOG396 Honors Research (3 Credits)
First course in the departmental honors sequence. Student development of a potential research topic under the guidance of a faculty advisor, culminating in a written and oral presentation of a research proposal.
Restriction: Permission of BSOS-Geography department; and senior standing or higher; and must be in Geography program.
Formerly: GEOG397.

GEOG397 Honors Thesis (3 Credits)
Second course in the departmental honors sequence. Student research under the auspices of a faculty advisor, culminating in a research paper to be defended orally before the geography honors committee.
Prerequisite: GEOG396.
Restriction: Must be in Geography program; and senior standing or higher.
Formerly: GEOG399.

GEOG398 Special Topics in Geography (1-3 Credits)
An introductory course dealing with special topics in geography.
Restriction: Permission of BSOS-Geography department.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: GEOG298 or GEOG398.
Formerly: GEOG298.

GEOG413 Migration: Latin America and the United States (3 Credits)
Develops an understanding of the push and pull factors that have contributed to human mobility (migration) that has transformed the Americas. The class is divided in two parts: immigration and emigration from Latin American and Latin America migration to the United States. We will be interested in studying the migration shifts that have occurred in Latin America and the theories that help explain them. The themes that will be addressed are the history of migration with Latin America and to North America, the impact of this migration on both sending and receiving countries, and the various policy strategies and issues concerning migration.
Prerequisite: GEOG313; or permission of BSOS-Geography department.
Recommended: HIST250; or USLT201; or LASC234.
Credit Only Granted for: GEOG413, or GEOG498M.
Formerly: GEOG498M.

GEOG415 Land Use, Climate Change, and Sustainability (3 Credits)
The issues of climate change and land use change as two interlinked global and regional environmental issues and their implications for society and resource use are explored.
Prerequisite: GEOG123 or GEOG306; or permission of BSOS-Geography department.
Recommended: GEOG340; or GEOG342; or GEOG331. Or GEOG201; and GEOG211.
Credit Only Granted for: GEOG415 or GEOG498D.
Formerly: GEOG498D.

GEOG416 Conceptualizing and Modeling Human-Environmental Interactions (3 Credits)
Develops skills to carry out research that integrates environmental and economic aspects of sustainability by introducing extensively used quantitative tools for analyzing human-environmental interactions in the field of ecological economics. These include, e.g., index number calculations and decomposition analysis, Environmental Kuznets Curve (EKC), environmental input-output analysis and life-cycle analysis, and multi-criteria decisions aid (MCDA). Students will need laptops to run models during class.
Prerequisite: Permission of BSOS-Geography department. Or GEOG306, STAT100, MATH107, or MATH111; and (GEOG201 and GEOG202); and (GEOG331 or GEOG330).
Corequisite: MATH130, MATH140, or MATH120; or MATH220.
Credit Only Granted for: GEOG416 or GEOG498N.
Formerly: GEOG498N.

GEOG417 Land Cover Characterization Using Multi-Spectral Remotely Sensed Data Sets (3 Credits)
Students will be introduced to the image processing steps required for characterizing land cover extent and change. Key components of land cover characterization, including image interpretation, algorithm implementation, feature space selection, thematic output definition, and scripting will be discussed and implemented.
Prerequisite: Permission of BSOS-Geography department. Or GEOG372; and GEOG472; and GEOG306. Jointly offered with GEOG617. Credit only grante d for: GEOG498R; GEOG788R; GEOG417; GEOG617.
Formerly: GEOG498R.

GEOG418 Field and Laboratory Techniques in Environmental Science (1-3 Credits)
Lecture and laboratory learning each week. A variable credit course that introduces field and laboratory analyses in environmental science. Individual learning contract are developed with instructor.
Restriction: Permission of BSOS-Geography department.
Credit Only Granted for: GEOG418 or GEOG448.
Formerly: GEOG448.

GEOG421 Changing Geographies of China (3 Credits)
Covers physical geography, history, and economic and political systems of the world's most populous country. The major focus will be on geographical issues in China's contemporary development: agriculture, population, urbanization, resource and energy, and environment.
Prerequisite: Permission of BSOS-Geography department. Or GEOG202; and GEOG201; and (GEOG435, GEOG333, or GEOG332).
Recommended: GEOG130; or GEOG140.
Credit Only Granted for: GEOG328B or GEOG421.
Formerly: GEOG328B.

GEOG422 Changing Geographies of Sub-Saharan Africa (3 Credits)
Students will develop an understanding of the geographic contexts of SubSaharan Africa, including an overview of the physical, bioclimatic, historical, cultural, political, demographic, health and economic geographies of Sub-Saharan Africa. Students will fill in the map of Africa by studying the spatial distribution within each of these geographic domains. In addition to an overview of geography South of the Sahara, the Congo will be taken as a more intensive case study through additional readings, lectures and discussions.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201; and GEOG202; and (GEOG335 or GEOG333).
Recommended: GEOG130 or GEOG110.
Credit Only Granted for: GEOG328C, GEOG422.
Formerly: GEOG328C.

GEOG423 Latin America (3 Credits)
A geography of Latin America and the Caribbean in the contemporary world: political and cultural regions, population and natural resource distribution, economic and social development, poverty, crime, urbanization, migration trends, and natural disasters.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201 and GEOG202; and (GEOG332, GEOG435, or GEOG333).
Recommended: GEOG130 and GEOG110.
Credit Only Granted for: GEOG313 or GEOG423.
Formerly: GEOG313.

GEOG431 Culture and Natural Resource Management (3 Credits)
Basic issues concerning the natural history of humans from the perspective of the geographer. Basic components of selected behavioral and natural systems, their evolution and adaptation, and survival strategies.
Credit Only Granted for: GEOG421 or GEOG431.
Formerly: GEOG421.

GEOG432 Spatial Econometrics (3 Credits)
An introduction to modern econometric techniques in general and spatial econometrics in particular, using the popular open source statistical computer language R. A focus on using statistical computing to produce analytical reports for real-world applications, research papers, and dissertations.
Prerequisite: Permission of BSOS-Geography department. Or GEOG201; and GEOG202; and GEOG306; and GEOG332. Jointly offered with GEOG732. Credi t only granted for: GEOG498E, GEOG432, GEOG788E, GEOG732.
Formerly: GEOG498E.

GEOG433 Land Use and Urban Economics (3 Credits)
While populations in developed countries have already concentrated in cities, recent estimates suggest that there will be several billion new urban dwellers mainly in developing countries during the first three decades of this century. This class will equip you to answer the following questions by introducing space into economic models and studying the location of economic activities: Why are cities so attractive to majority of population and industrial/commercial activities? What determines the land-use intensity and patterns of a city? Which policies can modify the shape of a city?
Prerequisite: Permission of BSOS-Geography department. Or GEOG201 and GEOG202; and (GEOG333 or GEOG332).

GEOG437 Political Geography (3 Credits)
Geographical factors in the national power and international relations; an analysis of the role of geopolitics and geostrategy, with special reference to the current world scene.
Credit Only Granted for: GEOG423 or GEOG437.
Formerly: GEOG423.

GEOG438 Seminar in Human Geography (3 Credits)
Selected topics in human geography.
Recommended: GEOG201; or GEOG211.
Restriction: Permission of BSOS-Geography department.
Repeatable to: 6 credits if content differs.

GEOG441 The Coastal Ocean (3 Credits)
Introduction to coastal oceanography, focusing on the physical, biological, and geological aspects of ocean areqs on the inner continental shelves. Wave, currents, and tidal dynamics of bays, open coast, estuaries, and deltas. Sedimentary environments of major coastal types. Ecology and biogeochemical relationships, including benthic and planktonic characteristics. Coastal evolution with sea level rise. Human impacts: eutrophication, modification of sedimentation. The coastal future: rising sea level, hypoxia, and increased storminess.
Prerequisite: GEOG140; or students who have taken courses with comparable content may contact the department; or permission of BSOS-Geography department.
Credit Only Granted for: GEOG441 or GEOG498C.
Formerly: GEOG498C.

GEOG442 Biogeography and Environmental Change (3 Credits)
Biogeographical topics of global significance, including a consideration of measurement techniques, and both descriptive and mechanistic modeling. Topics may include: scale in biogeography, biodiversity, carbon geography, climate and vegetation, interannual variability in the biosphere, land cover, global biospheric responses to climate change, NASA's Mission to Planet Earth and Earth Observation System. The class focuses on both natural and athropogenic controls, impacts of biography on climate and ecosystem services and different methods in biogeography.
Prerequisite: GEOG301. And GEOG201 and GEOG211; or permission of BSOS-Geography department. Jointly offered with GEOG642.
Credit Only Granted for: GEOG642, GEOG442, GEOG447, or GEOG484.
Formerly: GEOG4 47.

GEOG458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GEOG461 Machine Learning for Computational Earth Observation Science (CEOS) (3 Credits)
Provides an introduction to machine learning methods and models with an emphasis on Earth observation. Topics will include supervised (decision trees, random forest, neural networks, support vector machine, Gaussian process and ensemble techniques), and unsupervised techniques (clustering/segmentation, dimension reduction, multi-dimensional data visualization). The course will highlight the state-of-the-art deep learning models; object-based versus pixel-based image classification; how to deal with missing data and non-uniform coverage of data; and large scale land cover land use mapping from heterogenous satellite data. Practical part will include satellite image classification by applying classification models and biophysical parameters retrieval by applying regression models.
Prerequisite: GEOG371.

GEOG472 Remote Sensing: Digital Processing and Analysis (3 Credits)
Digital image processing and analysis applied to satellite and aircraft land remote sensing data. Consideration is given to preprocessing steps including calibration and geo registration. Analysis methods include digital image exploration, feature extraction thematic classification, change detection, and biophysical characterization. One or more application examples may be reviewed.
Prerequisite: GEOG372 and GEOG306; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: GEOG472 or GEOG480.
Formerly: GEOG480.

GEOG473 Geographic Information Systems and Spatial Analysis (3 Credits)
Analytical uses of geographic information systems; data models for building geographic data bases; types of geographic data and spatial problems; practical experience using advanced software for thematic domains such as terrain analysis, land suitability modeling, demographic analysis, and transportation studies.
Prerequisite: GEOG306 and GEOG373; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: GEOG473 or GEOG482.
Formerly: GEOG482.

GEOG475 Computer Cartography (3 Credits)
An overview of the basic concepts and techniques that underlie digital map making and the broader field of geographic visualization for intermediate GIS users. This includes the use of color, map symbolization, map layout, and also the contribution to geographic visualization from the fields of scientific visualization, information visualization, and cognition. Fundamentals of dynamic map design and web mapping will be introduced through the use of animated and interactive maps.
Prerequisite: GEOG373 and GEOG306.
Credit Only Granted for: GEOG471 or GEOG475.
Formerly: GEOG471.

GEOG476 Object-Oriented Computer Programming for GIS (3 Credits)
Expands on conceptual and practical aspects of programming for geographic applications. The main focus of this course is to provide students more advanced programming in object oriented programming languages (i.e. Python). In addition, students will develop a proficiency in applying these advanced programming principles to manipulating spatial data sources within the Geographic Information Systems (GIS).
Prerequisite: GEOG373 and GEOG376; or permission of BSOS-Geography department. And must have completed MATH220; or must have completed or be concurrently enrolled in MATH120, MATH130, or MATH140.
Restriction: Must be in Geography program; or must be in GIS minor.

GEOG477 Mobile GIS Development (3 Credits)
Designed as an introduction to mobile GIS, to the programming concepts underlying mobile GIS development, and more importantly, to the design and implement of a mobile GIS application. Covers how to develop, test, and publish mobile GIS native apps working across two mobile platforms: Android and iOS. This course will also try to leverage the capabilities of JavaScript, Swift, Google maps, ArcGIS Server and runtime SDK to developing and publishing mobile GIS web apps.
Prerequisite: GEOG306, GEOG373, and GEOG376; and (GEOG473, GEOG475, or GEOG476). And MATH140 or MATH120; or must have completed MATH220.
Restriction: Must be in a major within the BSOS-Geography department; or permission of BSOS-Geography department.
Credit Only Granted for: Geog477 or Geog498V.
Formerly: Geog498V.

GEOG498 Topical Investigations (1-3 Credits)
Independent study under individual guidance.
Prerequisite: Restricted to advanced undergraduate students; and 24 credits in GEOG courses. Or restricted to graduate students.
Repeatable to: 6 credits if content differs.

GEOL - Geology

GEOL100 Physical Geology (3 Credits)
A general survey of the rocks and minerals composing the earth, its surface features and the agents that form them, and the dynamic forces of plate tectonics.
Credit Only Granted for: GEOL100 or GEOL120.
Additional Information: CORE Distributive Studies Physical Science Laboratory Course only when taken concurrently with GEOL 110.

GEOL102 Historical Geology (4 Credits)
Earth's history as revealed through the principles of stratigraphy and the processes of physical geology. Emphasis on formations and geologic development of the North American continent.
Prerequisite: GEOL120 or GEOL100; and GEOL110. Or permission of CMNS-Geology department.

GEOL104 Dinosaurs: A Natural History (3 Credits)
Dinosaurs, their evolution, and our understanding of their fossil record. Students will examine the geologic record and the tools used by paleontologists to determine: geologic ages and ancient environments; evolutionary history and extinctions; dinosaurian biology and behavior; and their survival as birds. Mechanisms of global change ranging from plate tectonics to asteroid impact will be discussed.

GEOL110 Physical Geology Laboratory (1 Credit)
The basic materials and tools of physical geology stressing familiarization with rocks and minerals and the use of maps in geologic interpretations.
Prerequisite: Must have completed or be concurrently enrolled in GEOL120 or GEOL100.
Additional Information: CORE Distributive Studies Physical Science Laboratory Course only when taken concurrently with GEOL 100.

GEOL120 Environmental Geology (3 Credits)
A review of geologic factors underlying many environmental problems and the interactions between population and physical environment: geologic hazards, land-use planning, conservation, mineral resources, waste disposal, land reclamation, and the geologic aspects of health and disease. The course is aimed at lower division students in education and liberal arts, and should be useful to any student concerned with geologic perspectives of environmental problems.
Credit Only Granted for: GEOL100 or GEOL120.

GEOL123 Causes and Consequences of Global Change (3 Credits)
Study of the major components of Earth's climate system and climate change history. Discussion of 21st century climate change prediction, mitigation and adaptation efforts.Cross-listed with AOSC123.
Credit Only Granted for: AOSC123, GEOG123, GEOL123, or METO123.

GEOL124 Evolution of Life and Environment on Planet Earth (3 Credits)
An exploration of how life has shaped Earth's physical environments, both in the contemporary Earth and over the long course of Earth history. Topics range from evidence for the origin and diversification of life and its impact on Earth environments to the mind-set and methods of the scientists who interpret it, and what those methods tell us about future interactions between life and the environment, both on Earth and in the Solar System.

GEOL200 Earth's Fury: Earthquakes, Volcanoes, and Tsunami (3 Credits)
Earthquakes, volcanic eruptions, and tsunami frequently remind us of the dangers associated with living on a constantly changing planet. How do people prepare for these rare but dramatic events? Student will study the science behind earthquakes and volcanoes, how it guides monitoring, forecasting, prevention, and response, and the cultural and ethical aspects of these events.

GEOL204 Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past (3 Credits)
Examination of evidence used to reconstruct critical events in the history of life by looking at case studies of significant evolutionary origins, transitions, and extinctions; addressing the role of paleontology in human society, including science education, conservation, and the media.

GEOL212 Planetary Geology (3 Credits)
An examination of the geologic and geochemical processes at work in the solar system from the perspectives supplied by space age exploration of the planets and other solar system bodies.
Credit Only Granted for: ASTR330 or GEOL212.

GEOL224 Observations and Measurements of the Natural World (3 Credits)
A scientific research team experience focused on evaluating environmental controls on water quality in urbanized streams of College Park. Training in field, laboratory, and digital visualization techniques to gain hands on knowledge of the scientific method through detailed observations, measurements, manipulations, and interpretations of data gathered during the course.

GEOL288 Field Studies I (1 Credit)
Examination and investigation of Earth Science phenomena in the field, particularly geology. Involves fieldwork of one week or longer duration, which work normally includes both observation and data collection. Particular programs may require certain prerequisites. Permission of Instructor is required. Special fees may be necessary.
Repeatable to: 3 credits if content differs.

GEOL310 Forensic Geology and Homeland Security (3 Credits)
An introduction to the fundamentals of forensic science with special reference to the application of geological techniques, and to the applications of Earth science in understanding problems in homeland security and hazardous materials response.
Prerequisite: CHEM131 and GEOL100; and (MATH107 or MATH110). Or permission of CMNS-Geology department; or permission of instructor is required of non-degree seeking students.

GEOL322 Mineralogy (4 Credits)
Basic mineralogy for geology majors. The principles of morphologic crystallography, crystal chemistry, and determinative mineralogy.
Prerequisite: GEOL120 or GEOL100; and GEOL110. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Permission of instructor is required for non-degree seeking students.

GEOL329 Instructional Assistance Practicum (1-2 Credits)
Undergraduate teaching assistantship in Geosciences. Individual instruction course. Contact department or instructor to obtain section number.

GEOL331 Principles of Paleontology (4 Credits)
A review of the theory, principles, and applications of Paleontology. A systematic overview of the morphology, evolution, and relationships of the major fossil-producing taxa.
Prerequisite: GEOL102; or (BSCI207 or BSCI392); or permission of CMNS-Geology department.
Restriction: Permission of instructor is required of non-degree seeking students. Cross-listed with BSCI333.
Credit Only Granted for: GEOL331 or BSCI333.

GEOL340 Geomorphology (4 Credits)
Analysis of landforms, organized on the basis of the geologic processes that have operated during the late Cenozoic. Constructional and erosional landforms related to physical systems operating on geologic structures through time.
Prerequisite: GEOL120 or GEOL100.
Restriction: Permission of instructor is required of non-degree seeking students.

GEOL341 Structural Geology (4 Credits)
Study of the deformation of Earth's lithosphere, especially stress, rheology, strain, and the origin and significance of structural features. Development of 3-dimensional thinking through drafting and drawing of structures, construction of geologic maps and cross-sections, and stereographic and orthographic representation of structures. Improvement of scientific writing. Two weekend field trips.
Prerequisite: GEOL120 or GEOL100; and GEOL102; and GEOL110. Or permission of CMNS-Geology department.
Restriction: Permission of instructor is required of non-degree seeking students.

GEOL342 Sedimentation and Stratigraphy (4 Credits)
Description, origin, and distribution of sediments and sedimentary rocks. Two mandatory weekend field trips.
Prerequisite: GEOL120 or GEOL100; and GEOL110; and GEOL322. And CHEM103; or (CHEM131 and CHEM132); or (CHEM135 and CHEM136).
Restriction: Permission of instructor is required of non-degree-seeking students.

GEOL346 Cycles in the Earth System (3 Credits)
The Earth System operates through some fundamental cycles such as water, energy, and the Carbon Cycle. This course will build on GEOL/GEOG/AOSC123 starting with concept of feedbacks within the Earth System, global energy balance and the Greenhouse Effect. A brief introduction to the atmospheric and oceanic circulation will lead to the water cycle connecting the land, ocean, and atmosphere to the Earth System. Introduction to the Global carbon, nitrogen, and sulfur cycles will be followed by the concept of long-term climate regulation and short-term climate variability. The concepts of cycles, feedbacks, forcings, and responses in the Earth System will be applied to Global Warming and Ozone Depletion.
Prerequisite: MATH140; and (GEOG123, AOSC123, or GEOL123). Or permission of CMNS-Geology department.
Recommended: PHYS171, PHYS141, PHYS161, or MATH141.
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with GEOG346.
Credit Only Granted for: AOSC346, GEOG346, or GEOL346.

GEOL351 Statistics for Geoscientists (3 Credits)
Practical approach to basic statistics applied in the geosciences. Experimental design, elementary statistics and probability, sequence analysis, spatial analysis, linear regression, nonparametric statistics, bivariate, multivariate and principal components analysis of variance, hypothesis testing. Problem sets and participatory discussion of statistical applications in the current literature.
Prerequisite: MATH115.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

GEOL375 Introduction to the Blue Ocean (3 Credits)
Introduction to physical, chemical, and biological properties of the ocean. Role of the ocean in climate as a component of the Earth system. El Nino and the ocean, impact of global warming on the ocean and marine habitats including fisheries.
Prerequisite: MATH140.
Recommended: MATH141, PHYS161, or PHYS171.
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with AOSC375.
Credit Only Granted for: AOSC375, GEOL375 or METO375.

GEOL386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of CMNS-Geology department.
Restriction: Junior standing or higher.

GEOL388 Field Studies II (3 Credits)
Examination and investigation of Earth Science phenomena in the field, particularly geology. Involves field work of one week or a longer duration, which would normally involve both observations and data collection, with associated classroom lectures and/or laboratory study, normally including additional analysis of collected observations and data. Particular programs may require certain prerequisites. Permission of instructor required. Special fees may be necessary.
Restriction: Non-degree-seeking students require the permission of the instructor.
Repeatable to: 6 credits if content differs.

GEOL393 Geology Senior Thesis I: Proposal (3 Credits)
The first semester of the two-semester Geology Senior Thesis. Emphasis is on developing a plan for original research in the geosciences and presenting that plan both in writing and in public presentations that adhere to geosciences professional standards.
Prerequisite: PHYS141 and MATH141. And CHEM131 and CHEM132; or (CHEM135 and CHEM136). And must have completed at least two upper-level geology courses and be concurrently enrolled in a third.
Restriction: Junior standing or higher; and must be in Geology program; and non-degree-seeking students require the permission of the instructor.

GEOL394 Geology Senior Thesis II: Research (3 Credits)
The second semester of the two-semester Geology Senior Thesis. Investigation of specific original research question in geosciences. Emphasis is on completion of original research proposed in GEOL393 and presentation of results both in writing and in public presentations that adhere to geosciences professional standards.
Prerequisite: GEOL393; and must have completed at least three upper level GEOL courses.
Restriction: Must be in Geology program; and junior standing or higher; and in addition, non-degree-seeking students require the permission of the department.

GEOL412 Geology of the Terrestrial Planets (3 Credits)
Geological features of Mercury, Venus, Mars and the Moon with an emphasis on results from recent NASA planetary mission. Topics include interior structure, impact cratering, tectonic and volcanic history, surface conditions, climate change, and habitability.
Prerequisite: GEOL341 or GEOL340.
Credit Only Granted for: GEOL489A or GEOL412.
Formerly: GEOL489A.

GEOL413 Geoscientific Modeling (3 Credits)
A model is a simplified representation of reality. Modeling is implicit or explicit in almost everything we do as geoscientists. Model construction, coding, and the concepts of parsimony vs complexity, robustness, validation, uncertainty, and the scientific interpretation of simulation results. Problem sets, independent study and participatory discussion of modeling applications in the current literature.
Prerequisite: MATH115; and two 400-level GEOL courses.
Recommended: Some experience in computer programming.
Restriction: Non-degree-seeking students require the permission of the instructor. Jointly offered with: GEOL613.
Credit Only Granted for: GEOL413, GEOL489G, GEOL613 or GEOL789G.
Formerly: GEOL489G.

GEOL423 Optical Mineralogy (4 Credits)
The optical behavior of crystals with emphasis on the theory and application of the petrographic microscope.
Prerequisite: GEOL100 or GEOL120; and GEOL110; and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL431 Vertebrate Paleobiology (4 Credits)
A survey of the evolution of the vertebrates, encompassing information from the diversity of living members, but concentrating on the contribution of the fossil record. Emphasis is on the phylogenetic systematics, comparative and functional anatomy, developmental biology, and stratigraphic distribution of major extinct and extant groups.
Prerequisite: BSCI207, BSCI392, GEOL104, GEOL204, or GEOL331; or permission of CMNS-Geology department.

GEOL435 Environmental Geochemistry (3 Credits)
An understanding of geochemical cycles of Earth's surface systems including soils, rivers, lakes, and estuaries and causes and implications of alteration of geochemical cycles. Topics include chemical weathering, soils, chemical composition of inland waters, hydrologic tracers, salinization, eutrophication, nutrient and metal pollution, and global geochemical cycles.
Prerequisite: MATH115; and (GEOL100 or GEOL120); and (GEOL436 or GEOL444). And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Nondegree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL489W or GEOL435.
Formerly: GEOL489W.

GEOL436 Principles of Biogeochemistry (3 Credits)
An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.
Prerequisite: MATH140 or MATH120; or must have completed MATH220. And GEOL100 or GEOL120; or GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with AOSC436.
Credit Only Granted for: GEOL436 or AOSC436.

GEOL437 Global Climate Change: Past and Present (3 Credits)
Introduction to the processes by which climate varies, the paleoclimate record, and projections of climate change into the 21st century, including discussion of climate sensitivity to external radiative forcing.
Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).

GEOL443 Petrology (4 Credits)
Study of igneous and metamorphic rocks: petrogenesis, distributions, chemical and mineralogical relations, macroscopic and microscopic descriptions, geologic significance.
Prerequisite: GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103. And must have completed or be concurrently enrolled in GEOL423; and (GEOL100 or GEOL120); and GEOL110.
Corequisite: Permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL444 Low Temperature Geochemistry (4 Credits)
Basic chemical principles, thermodynamics, and kinetics of low-temperature inorganic and organic geochemical reactions in a wide range of surface environments. These geochemical tools will be used to provide a context for understanding elemental cycling and climate change. Laboratories will include problem sets as well as wet chemical and mass spectrometric techniques used in low temperature geochemistry.
Prerequisite: GEOL322, GEOL100, and MATH115. And CHEM103; or (CHEM131 and CHEM132); or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL445 High Temperature Geochemistry (4 Credits)
Review of chemical principles and their use in understanding processes of Earth, and solar system formation and differentiation. Topics include nucleosynthesis and cosmochemical abundances of elements, bonding and element partitioning, equilibrium thermodynamics and phase stabilities, radiogenic isotopes and geochronology, kinetics, and diffusion.
Prerequisite: GEOL322, GEOL100, and MATH115. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL446 Geophysics (3 Credits)
An introduction to modern geophysics. Topics include: global plate tectonics, plate motion, triple junctions, geomagnetism, earthquakes and faulting, reflection and refraction seismology, gravity and isostasy, heat flow and mantle dynamics, deep interior of the Earth, geophysical observations and measurements.
Prerequisite: PHYS141, MATH141, and MATH140; and (GEOL100 or GEOL120).
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL447 Observational Geophysics (3 Credits)
An introduction to practical signal processing, data analysis, and inverse theory in geophysics.
Prerequisite: MATH140 and MATH141; and (PHYS141, PHYS161, or PHYS171).

GEOL451 Groundwater (3 Credits)
An introduction to the basic geologic parameters associated with the hydrologic cycle. Problems in the accumulation, distribution, and movement of groundwater will be analyzed.
Prerequisite: GEOL110 and MATH140; and (GEOL120 or GEOL100); and (CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor; and junior standing or higher.

GEOL452 Watershed and Wetland Hydrology (3 Credits)
Physical processes by which water moves in watershed and wetland systems. Topics include: precipitation, infiltration, flow in the unsaturated zone, streamflow generation processes, and groundwater flow.
Restriction: Junior standing or higher; and all other students require the permission of the instructor.

GEOL453 Ecosystem Restoration (3 Credits)
Overview of ecosystem functions across biomes/geologic settings, and considerations and tradeoffs in ecosystem restoration strategies. Specific case studies and discussions will be aimed at understanding how structure can influence biophysical and biogeochemical processes supporting ecosystems, and then describes how rates, timing, and location of physical, chemical, and ecosystem processes can be altered by different restoration strategies to enhance ecosystem services.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (CHEM131 or CHEM135); and (CHEM132 or CHEM136); and (GEOL100, GEOL120, or ENST200).
Restriction: Junior standing or higher; and permission of instructor is required of non-degree-seeking students.
Credit Only Granted for: GEOL453 or GEOL489L.
Formerly: GEOL489L.

GEOL455 Marine Geophysics (3 Credits)
Plate tectonics, earthquakes and faulting, isostasy and gravity, heat and mantle dynamics, ocean ridges and transform faults, hydrothermal vents, trenches and oceanic islands, subduction zones, accretionary and erosion wedges, sedimentary basins and continental rifts. Exploration of the oceans using geophysical methods.
Prerequisite: MATH141 and MATH140; and (GEOL120 or GEOL100). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL455 or GEOL489E.
Formerly: GEOL489E.

GEOL456 Engineering Geology (3 Credits)
An overview of engineering geology with an emphasis on physical understanding of natural hazards and natural resources. General theories of stress and strain, failure criteria, frictional stability, fluid flow in porous media and poroelasticity are introduced. Quantitative approaches on earthquakes, landslides, land subsidence, and geotechnical aspects of oil/gas exploration are discussed.
Prerequisite: PHYS141 and MATH141; and (GEOL120 or GEOL100). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL456 or GEOL489Z.
Formerly: GEOL489Z.

GEOL457 Seismology (3 Credits)
General overview of the basics of seismology, starting with wave propagation, seismic reflection and refraction. Applications to the determination of the seismic velocity and anisotropy structure of the Earth. Earthquake generation, postseismic deformation and creep events, relation to faulting and plate tectonics.
Prerequisite: GEOL120 or GEOL100; and (MATH141, GEOL110, and MATH140). Or permission of CMNS-Geology department.
Recommended: PHYS171, PHYS141, or PHYS161.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL457 or GEOL489A.
Formerly: GEOL489A.

GEOL460 Field Geophysics (4 Credits)
Students will become familiar with geophysical instrumentation used for both scientific and industrial applications. Students will be given an introduction to the use of geophysical instrumentation for data collection, processing, and analysis, design of field experiments for investigating field geophysical problems, and an introduction to the theory of instrument design and use. Instruments that will be covered include (but are not limited to): broadband seismometers, geophones, ground-penetrating radar, magnetotellurics, and Global Positioning Satellites.
Prerequisite: GEOL100 or GEOL120, MATH140, MATH141, and (PHYS141, PHYS161, or PHYS171).
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL463 Economic Geology (3 Credits)
The geological setting, and mineralogy of ore bodies, as well as the chemical and physical factors affecting the source, transport and deposition of metallic ores, petroleum and natural gas will be covered. The economics of mineral resources will be discussed.
Prerequisite: GEOL322; and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL489Q or GEOL463.
Formerly: GEOL489Q.

GEOL471 Geochemical Methods of Analysis (3 Credits)
Principles and application of geochemical analysis as applied to a variety of geological problems. X-ray and optical spectroscopy, X-ray diffraction, atomic absorption, electron microprobe, and electron microscopy.
Prerequisite: CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL472 Tectonics (3 Credits)
Study of the development of the lithosphere on Earth and other rocky planets and moons. Emphasis on student-led discussions. Improvement of scientific writing.
Prerequisite: GEOL120 or GEOL100; and (GEOL102, GEOL341, and GEOL110). Or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL473 Origin and Evolution of the Continents (3 Credits)
Introduction to current theories regarding the origin and evolution of the continents. Emphasis on development of critical reading and reasoning skills, and improvement of verbal and written communication.
Prerequisite: GEOL445 and GEOL443; or permission of instructor.
Restriction: Non-degree-seeking students require the permission of the instructor.
Formerly: GEOL489I.

GEOL488 Geology Colloquium (1 Credit)
Contemporary research topics and issues in geosciences are explored through the weekly Geology departmental colloquium and discussion of its contents.
Prerequisite: At least one 300 or 400-level Geology course of at least 3 credits.
Restriction: May not be taken concurrently with GEOL497 or GEOL497H.
Repeatable to: 4 credits.

GEOL489 Special Topics (3 Credits)
Recent advances in geology.
Prerequisite: Must have completed at least 2 upper-level GEOL courses plus one additional GEOL course.
Corequisite: GEOL393.
Restriction: Must be in Geology program; and junior standing or higher.

GEOL490 Geology Field Camp (6 Credits)
Intense field geology course taught off campus during the summer. Students describe and compile maps of formations and structures from outcrops, subsurface, and remotely sensed data. Special fees required.
Prerequisite: GEOL341 and GEOL443.
Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL491 Environmental Geology Field Camp (3-6 Credits)
Intensive field course designed for students of environmental geology. Students will learn to make maps, to describe soil profiles and site characteristics, to monitor hydrologic and groundwater conditions, and to measure geologic structures and stratigraphic sections.
Prerequisite: GEOL341, GEOL342, and GEOL451; or permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.
Credit Only Granted for: GEOL490 or GEOL491.

GEOL497 Recent Advances: Geology (3 Credits)
A survey of important recent advances in geological sciences in the context of the methods and practices of scientific research.
Prerequisite: Must have completed at least 2 upper-level GEOL courses.
Corequisite: GEOL393; and a third upper-level geology course.
Restriction: Must be in Geology program; and GPA of 3.0 or better in both overall and in all courses required for the major; and senior standing; and to be taken as late as possible in the program.
Credit Only Granted for: GEOL497 or GEOL489H.
Formerly: GEOL489H.

GEOL499 Special Problems in Geology (1-3 Credits)
Intensive study of a special geologic subject or technique selected after consultation with instructor. Intended to provide training or instruction not available in other courses which will aid the student's development in his or her field of major interest.
Prerequisite: (GEOL120 or GEOL100; and (GEOL102 and GEOL110)); or students who have taken courses with comparable content may contact the department. And permission of CMNS-Geology department.
Restriction: Non-degree-seeking students require the permission of the instructor.

GERM - Germanic Studies

GERM101 Elementary German I (4 Credits)
Introduction to basic structures and pronunciation by emphasis on the four skills: listening, speaking, reading and writing. Readings concern the current lifestyle and civilization of the German-speaking world.

GERM103 Intensive Elementary German (4 Credits)
Covers speaking, reading, writing, listening, and culture of German-speaking world.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed GERM102; and must not be a fluent/native speaker of German.
Credit Only Granted for: GERM102 or GERM103.

GERM148 Germanic Languages - Elementary I (3 Credits)
Basic instruction in a Germanic language other than German; Yiddish and Swedish are offered regularly, Danish, Netherlandic, and Norwegian when demand is sufficient. Subtitle will reflect the language. May be repeated in a different language.
Repeatable to: 6 credits if content differs.

GERM149 Germanic Languages - Elementary II (3 Credits)
Continuation of GERM148. May be repeated in a different language. Subtitle will reflect the language.
Prerequisite: GERM148.

GERM169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GERM203 Intensive Intermediate German (4 Credits)
Covers speaking, reading, writing, listening, and culture of German-speaking world.
Prerequisite: GERM103; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed GERM201; and must not have completed GERM202; and must not be a fluent/native speaker of German.
Credit Only Granted for: GERM202 or GERM203.

GERM204 German Grammar Review (3 Credits)
An in-depth study and analysis of selected grammatical topics in a contextualized framework.
Prerequisite: GERM203; or Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not be a fluent/native speaker of German.

GERM248 Germanic Languages Intermediate - I (3 Credits)
Intermediate instruction in a Germanic language other than German. May be repeated in a different language. Subtitle will reflect the language.
Prerequisite: GERM149.

GERM249 Germanic Languages - Intermediate II (3 Credits)
Continuation of GERM248. May be repeated in a different language. Subtitle will reflect the language.
Prerequisite: GERM248.

GERM255 Once Upon a Time: Fairy Tales of the Brothers Grimm (3 Credits)
A critical examination of how fairy tales and folklore pervade and influence diverse facets of Western culture, ranging from issues of politics and national identity, ethics and morality, violence and fear, education and pedagogy, to gender and sexuality in the establishment and regulation of social norms. Taking the German tales collected by Jacob and Wilhelm Grimm as its focal point, the magical and often terrifying world of fairy tales within the German, European, and American cultural traditions from Romanticism to today will be explored.
Credit Only Granted for: GERM255 or GERM289G.
Formerly: GERM289G.
Additional Information: Course is taught in English.

GERM269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GERM289 Selected Topics in the Cultures of the Germanic Speaking Countries (3 Credits)
Topics in the cultures of the Germanic speaking countries.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

GERM299 Special Topics in Germanic Studies (3 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

GERM301 Conversation and Composition I: The German-Speaking World (3 Credits)
Practice in contemporary spoken and written German. Systematic review of grammar, and exercises in composition. Emphasis on cultural contrasts in the German-speaking world.
Prerequisite: GERM204; or students who have taken courses with comparable content may contact the department.

GERM302 Conversation and Composition II: Current Topics in German-Speaking Society (3 Credits)
Further practice in contemporary spoken and written German. Contemporary social, political, and cultural themes.
Prerequisite: GERM301; or students who have taken courses with comparable content may contact the department.

GERM315 Practicum in Translation I (3 Credits)
Problems and strategies of translation from German to English.
Prerequisite: GERM301; or students who have taken courses with comparable content may contact the department.

GERM319 Selected Topics in Germanic Language Studies (1-3 Credits)
The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.
Prerequisite: GERM203; or students who have taken courses with comparable content may contact the department.
Repeatable to: 6 credits if content differs.

GERM320 Survey of German Studies (3 Credits)
Approaches to analysis of German cultural products such as literature, film, poetry, architecture and works of art. Taught in German.
Prerequisite: GERM301; or students who have taken courses with comparable content may contact the department.

GERM322 Highlights of German Literature and Culture (3 Credits)
Selected literary masterworks, social and cultural issues, and historical events in German-speaking countries from the Enlightenment, Romanticism, Junges Deutschland, Realism, Naturalism and its counter currents, Expressionism to the present. Taught in German.
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.

GERM331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)
Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of 'The Trial,' 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's 'Kafka,' 1991).Cross-listed with FILM331.
Credit Only Granted for: GERM331, FILM331, or HONR348K.

GERM339 German Literature In Translation (3 Credits)
Selected movements, genres or other special topics in German literature. Readings and instruction in English. May not be counted in the fulfillment of German major requirements in German literature.
Repeatable to: 6 credits if content differs.

GERM349 Germanic Literatures in Translation (3 Credits)
Study of an important author, period or theme in a Germanic literature other than German: Yiddish, Netherlandic or Scandinavian. Taught in English.
Repeatable to: 6 credits if content differs.

GERM356 German for the Professions (3 Credits)
An examination of the structures and work conditions of various industries in the German-speaking world including understanding and navigating company culture, professional development, and preparation for an internship or job where German is spoken.
Prerequisite: GERM301.
Credit Only Granted for: GERM319B or GERM356.
Formerly: GERM319B.

GERM369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GERM383 The 'Warrior' in German Culture: From Valiant Knights to Brazen Terrorists (3 Credits)
Acknowledging the nexus between acts of military aggression and political apparatuses, this course examines the semiotic significance of literary and cinematic manifestations of the warrior at critical junctures in German history. Taking the warrior as its focal point, this course explores the intricate web connecting various forms of military conflict, political systems of power, and social conventions within Western civilization from Antiquity to today. Taught in English.

GERM385 German Cinema (3 Credits)
A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.Cross-listed with FILM385.
Credit Only Granted for: GERM385, GERM285 or FILM385.
Formerly: GERM285.

GERM386 Experiential Learning (1-6 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Junior standing or higher.

GERM388 Language House Spring Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident of Language House.
Repeatable to: 8 credits.

GERM389 Topics in Germanic Culture (3 Credits)
Topics in the cultures of the German, Germanic, Indo-European peoples and of their culturally related non-Indo-European neighbors. Taught in English.
Repeatable to: 6 credits if content differs.

GERM397 Honors Reading (Independent Study) (3 Credits)
Supervised reading to be taken normally only by students admitted into honors program.

GERM398 Honors Research (3 Credits)
Prepares students to write an honors thesis. Under the direction of a German department faculty member, the student will select a thesis topic and conduct the necessary research.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM399 Selected Topics in Germanic Studies (3 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

GERM401 Advanced Conversation (3 Credits)
Development of fluency in spoken German to achieve advanced level.
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.

GERM402 Advanced Conversation and Composition (3 Credits)
Advanced instruction in and acquisition of written and oral communication skills in German
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.
Restriction: Must not have completed GERM401 or GERM403.
Credit Only Granted for: (GERM401 and GERM403) or GERM402.

GERM403 Advanced Composition (3 Credits)
Advanced instruction in and acquisition of German writing skills.
Prerequisite: GERM302; or students who have taken courses with comparable content may contact the department.

GERM415 German/English Translation I (3 Credits)
An intensive presentation of German grammar limited exclusively to reading skill; graded readings in the arts and sciences. Instruction in English; cannot be used to satisfy the arts and humanities foreign language requirement.
Restriction: Must not have completed GERM101, GERM102, GERM103, GERM201, GERM202, GERM203, GERM204, GERM301, or GERM302.

GERM419 Selected Topics in German Language Studies (3 Credits)
The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.
Prerequisite: GERM302; and permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM436 The Usual Suspects: Criminals in German Literature and Film (3 Credits)
An examination of how historical, cultural and political discourses in German-speaking countries influence social norms and criteria for judging what is considered socially acceptable or 'deviant'. Texts and films span from the 18th to 21st centuries. Taught in German.
Prerequisite: GERM320 or GERM322; or permission of instructor.

GERM439 Selected Topics in German Literature (3 Credits)
Special study of an author, school, genre, or theme. Taught in German.
Prerequisite: GERM320, GERM321, or GERM322; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM441 Border Crossings and Cultural Transfers (3 Credits)
Border Crossings and Cultural Transfers emphasizes the transnational and global dimensions of German culture, analyzing the interrelationship of dominant and minority cultures within Germany and/or the impact of German cultures abroad. Topics include migration, exile, (post)colonialism, and globalization. Taught in German.
Prerequisite: GERM320 or GERM322.
Credit Only Granted for: GERM441, GERM439A, or GERM439F.
Formerly: GERM439A, GERM439F.

GERM442 Gender and Sexuality in German Literature and Society (3 Credits)
Gender and Sexuality in German Literature and Society analyzes gender and sexuality as key discourses for understanding German-speaking literatures, cultures, and societies. Topics include the history of sexuality; death and desire; and representations of gender in German literature. Taught in German.
Prerequisite: GERM320 or GERM322.

GERM443 Literature as Cultural Discourse (3 Credits)
Investigates literature as cultural discourse in the construction of knowledge, emphasizing a discursive approach to analyzing a range of literary texts. Taught in German.
Prerequisite: GERM320 or GERM322.
Credit Only Granted for: GERM443, GERM439K, or GERM439G.
Formerly: GERM439K, GERM439G.

GERM444 The German-Jewish Experience (3 Credits)
Focuses on the German-Jewish experience as a key dimension of European history, literature, and culture. Topics include Heinrich Heine, German-Jewish authors and texts, and the Holocaust in literature and film.
Prerequisite: GERM320 or GERM322.
Credit Only Granted for: GERM444 or GERM439Q.
Formerly: GERM439Q.
Additional Information: Taught in German.

GERM449 Selected Topics in Germanic Studies (3 Credits)
Study of a linguistic, literary or cultural topic in Yiddish, Netherlandic, or Scandinavian studies.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM457 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)
Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.Cross-listed with: AREC357.

GERM458 Literary or Media Genres (3 Credits)
Literary or Media Genres studies the formal and stylistic dimensions of specific genres, emphasizing genre as a social, political, and aesthetic category. Topics include pop literature; the history of German drama; and German film genres among others.
Prerequisite: GERM320 or GERM322.
Repeatable to: 6 credits if content differs.
Additional Information: Taught in German.

GERM473 Variation in Contemporary German Language (3 Credits)
Examines the unique, multilingual society that is modern Germany, exploring issues such as regional varieties, gendered language, language reform (and resistance to it), public and media speech, the influence of American English on colloquial speech and in specific fields, and the problems of immigrant communities acquiring both dialect and standard German.
Prerequisite: GERM302; or permission of instructor. Jointly offered wit h GERM673.
Credit Only Granted for: GERM473, GERM489M, or GERM673.
Formerly: GERM489M.

GERM488 Capstone Seminar (3 Credits)
Provides an opportunity for German majors (usually in their senior year) to demonstrate that they have achieved the goals for learning established and approved by the department. Students analyze in depth a research topic and apply their accumulated learning. Requirements include engaging in an in-depth research project (research paper or media project) and an in-class presentation of their research to faculty and student peers. Taught in German.
Prerequisite: Students must have completed two 400-level courses taught in German.

GERM489 Social Issues in German Culture (1-3 Credits)
Special topics course examining the cultural constructions and representations of important social, political, and linguistic issues, investigating their connection to German values and institutions. Taught in German.
Prerequisite: GERM320 or GERM322.
Repeatable to: 6 credits if content differs.

GERM498 Honors Thesis Writing (3 Credits)
Required for students pursuing departmental honors in Germanic languages and literatures. Under the direction of a German department faculty member, students write their honors theses.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GERM499 Directed Study (1-3 Credits)
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

GREK - Greek

GREK101 Elementary Ancient Greek I (4 Credits)
Study of basic grammar, development of reading facility, and introduction to Athenian life and culture in the fifth century B.C.
Restriction: A student who has had two units of Greek in high school may register for GREK101 for purposes of review but not for credit.

GREK102 Elementary Ancient Greek II (4 Credits)
Continuing development of basic grammar and reading skills; study and discussion of central aspects of Greek culture.
Prerequisite: GREK101; or students who have taken courses with comparable content may contact the department.

GREK111 Elementary Modern Greek I (3 Credits)
An introduction to the language and culture of modern Greece. Students begin to acquire the basic tools of the language and to communicate, in simple everyday situations. This is the first of our two-semester sequence in Elementary Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Restriction: Must not be a native speaker of Greek.
Credit Only Granted for: FOLA108G or GREK111.
Formerly: FOLA108G.

GREK112 Elementary Modern Greek II (3 Credits)
It is designed for students who have already completed the first semester course (GREK111) and/or those whose level of proficiency in Greek is not advanced enough for the intermediate level. Like GREK111, an introduction is provided to the language and culture of modern Greece. Students acquire the basic tools of the language and learn to communicate in simple, everyday situations. This is the second of our two-semester sequence in Elementary Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Prerequisite: GREK111; or permission of instructor.
Credit Only Granted for: FOLA109G or GREK112.
Formerly: FOLA109G.

GREK201 Intermediate Ancient Greek (4 Credits)
Advancing beyond the basic skills developed in GREK 101 and GREK 102; review of selected grammatical concepts; continuous reading of passages from Greek literature.
Prerequisite: GREK102; or students who have taken courses with comparable content may contact the department.

GREK211 Intermediate Modern Greek I (3 Credits)
A continuation of the study of basic structures and the development of fluency in functional, spoken and written communication. This is the first of our two-semester sequence in Intermediate Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Prerequisite: GREK112; or permission of instructor.
Credit Only Granted for: FOLA118G or GREK211.
Formerly: FOLA118G.

GREK212 Intermediate Modern Greek II (3 Credits)
A continuation in the development of fluency in spoken and written communication along with the exploration of syntactic and grammatical structures. Comprehension and vocabulary enrichment are further developed through selected readings from Modern Greek prose and poetry. This is the second of our two-semester sequence in Intermediate Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.
Prerequisite: GREK211; or permission of instructor.
Credit Only Granted for: FOLA119G or GREK212.
Formerly: FOLA119G.

GREK269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GREK301 Scenes from Athenian Life (3 Credits)
Makes the transition from study of Greek grammar to reading. Focus on selected aspects of life in Athens: marriage, friendship, the courts, festival, theatre. Reading short works by three authors: Lysias, Plato, and a playwright (e.g., Menander). Readings are in ancient Greek.
Credit Only Granted for: GREK301 or GREK351.
Formerly: GREK351.

GREK369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GREK386 Experiential Learning (3-6 Credits)
Restriction: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

GREK388 Intermediate Ancient Greek Readings (3 Credits)
The reading of one or more selected Greek authors from the archaic period through late antiquity. Appropriate for those at an intermediate level in the study of ancient Greek.
Prerequisite: GREK201; or students who have taken courses with comparable content may contact the department.

GREK398 Advanced Modern Greek (3 Credits)
Develops advanced communication skills in the modern Greek language: speaking, listening, reading, and writing.
Prerequisite: GREK212; or permission of ARHU-Classics department.
Repeatable to: 6 credits.

GREK399 Topics in Advanced Modern Greek Language & Culture (3 Credits)
Development of communicative skills in advanced Modern Greek. Topics will be drawn from the social and folk life of modern Greece.
Prerequisite: GREK212; or permission of ARHU-Classics department.
Repeatable to: 6 credits.

GREK403 Greek Tragedy (3 Credits)
Additional Information: Readings are in ancient Greek.

GREK411 Modern Greek Literature and History (3 Credits)
Students will study historical and political events in Greece during the 19th and 20th centuries through the viewpoint of the man of letters. Poetry, prose, plays, and essays reflect national emancipation, social reconstruction, and political struggles. Readings and discussion are in Modern Greek.
Prerequisite: Students must have earned a grade of C- or better in a 300-level Modern Greek course.
Restriction: Permission of instructor.
Credit Only Granted for: GREK311 or GREK411.
Formerly: GREK311.

GREK415 Homer (3 Credits)
Extensive readings in Greek from the Iliad or the Odyssey, with special attention to the features of Homeric style and the relationship between the two epics.
Prerequisite: Permission of ARHU-Classics department.

GREK472 History and Development of the Greek Language (3 Credits)
Mastery of ancient Greek through grammar review, prose composition, and analysis of historical developments in Greek writers' modes of expression.
Restriction: Permission of instructor.

GREK488 Greek Readings (3 Credits)
The reading of one or more selected Greek authors. Reports.
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.
Additional Information: Readings are in ancient Greek.

GREK499 Independent Study in Greek Language and Literature (1-3 Credits)
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

GVPT - Government and Politics

GVPT101 Introduction to Political Science (3 Credits)
A study of the basic principles and concepts of political science.

GVPT105 Introduction to Political Ethics (3 Credits)
An examination of major theories of political life and politics as they pertain to international politics, conflict, and culture. Emphasis will be given to theories of ethics and morality that pertain to international studies, such as human rights.
Restriction: Must be in the College Park Scholars program; and must be in International Studies program or Public Leadership program.

GVPT158 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GVPT170 American Government (3 Credits)
A comprehensive study of national government in the United States.

GVPT200 International Political Relations (3 Credits)
A study of the major factors underlying international relations, the causes of conflict and cooperation among international actors, the role of international institutions, the interactions of domestic and foreign policies, and major issues in security, economy and the environment.

GVPT201 Scope and Methods for Political Science Research (3 Credits)
An introduction to empirical research in political science.
Credit Only Granted for: GVPT100 or GVPT201.
Formerly: GVPT100.

GVPT202 Politics, Constitutional Policy, and the Institution of the U.S. Supreme Court (3 Credits)
A thorough examination of the U.S. Supreme Court in the American political system. Focusing on the Court as an institution-the set of norms, rules, and policymaking processes that lead to the Supreme Court's decisions-and how justices' decision-making processes critically determine substantive legal policy and the meaning of the U.S. Constitution.

GVPT203 The Challenge of Authoritarianism (3 Credits)
An introduction to the persistent challenge of authoritarianism. The course explores the nature of authoritarianism and its evolution from ancient through modern times. Students will study how authoritarian regimes vary, why citizens sometimes comply with them, and when and how citizens rebel. The course concludes with a review of contemporary authoritarianism, focusing on its resilience in the Middle East and East Asia and its potential for a resurgence in the US and Europe.

GVPT204 Uncertain Partners: US and China in a Changing World (3 Credits)
The rapid ascent of the People's Republic of China (PRC) as a major political and economic power has meant that its relationship with the United States has become central in contemporary international politics. To an increasing extent, some of the biggest global challenges--ranging from nuclear proliferation, to climate change, to economic growth--require U.S.-China cooperation if they are to be managed effectively. Yet the U.S.-China relationship is at times turbulent, and its future remains highly uncertain. Will the U.S. and China be able to forge a closer partnership that will enable them to cooperate in dealing with some of the vexing challenges facing the international community? Or are they more likely to drift toward a more adversarial relationship, as China's growing power--and the US reaction--generate a vicious cycle of mutual mistrust? In this class, students will grapple with these questions as they learn about the history of U.S.-China relations, and about many of the current issues facing the relationship.
Credit Only Granted for: GVPT204 or GVPT289J.
Formerly: GVPT289J.

GVPT205 Special Topics in International Ethics, Conflict, and Immigration (3 Credits)
An examination of issues in international ethics, conflict generated at the international level, and problems in immigration policy and law, including theories of rights and immigration, and ideological sources of international violence.
Prerequisite: GVPT105.
Recommended: GVPT241.
Restriction: Must be in College Park Scholars program; and must be in GVPT international Studies program.

GVPT206 Appetite for Change: Politics and the Globalization of Food (3 Credits)
An overview of the major forces transforming the food system--political, economic, technological, environmental--and the political debates surrounding them.
Credit Only Granted for: GVPT206 or GVPT289A.
Formerly: GVPT289A.

GVPT207 Racial and Ethnic Politics in the Obama Era (3 Credits)
This course seeks to understand the meaning and significance of Barack Obama as the first African American president. The course examines the extent to which the United States of America has entered into a post-racial society. We also examine the policy challenges Obama has faced as the first African American president. One example is the passing of comprehensive health care reform. We discuss whether opposition to health care is driven by people's racial attitudes or their different views about the role of government. Others topics that the course will examine are: how Obama became the first African American president; the strategies his campaign used to motivate citizens to the voting booth; the public's reaction to Obama's election; racial group identity during the Obama era; Trump's victory as a response to Obama.
Credit Only Granted for: GVPT207 or GVPT289O.
Formerly: GVPT289O.

GVPT208 Political Science Topics in Study Abroad (3 Credits)
The study of topics in political science taken as part of an approved study abroad program.
Repeatable to: 9 credits if content differs.

GVPT217 Mock Trial (3 Credits)
Experience the excitement and reward of arguing, and perhaps winning your client's case in court. Mock Trial is designed for students who are interested in learning practical techniques for shaping the evidence, using the law, and exploiting the courtroom to create a coherent and convincing case theoryCross-listed with MLAW217.
Credit Only Granted for: MLAW217, GVPT217, or GVPT319A.
Formerly: GVPT319A.

GVPT221 Introduction to Formal Theories of Political Behavior and Politics (3 Credits)
An introduction to the theories of rational choice including theories of negotiation and bargaining, elections and voting in democracies, community organizing and the contrast between the roles and performances of government and market.
Prerequisite: GVPT170.

GVPT228 The Craft of Political Science Research (4 Credits)
An introduction to research design and statistics applicable to political science.
Prerequisite: GVPT100 and GVPT170.
Restriction: Must be in a major in BSOS-College of Behavioral & Social Sciences; and sophomore standing or higher.
Repeatable to: 8 credits if content differs.
Formerly: GVPT227.

GVPT241 The Study of Political Philosophy: Ancient and Modern (3 Credits)
Examines some of the salient continuities and breaks between the ancient and modern traditions in Western political philosophy.

GVPT258 Introduction to Political Science Topics in Study Abroad (3 Credits)
The study of topics in political science taken as part of an approve study abroad program.
Repeatable to: 9 credits if content differs.

GVPT260 State and Local Government (3 Credits)
A study of the functioning and problems of state and local government in the United States, with illustrations from Maryland jurisdictions.
Prerequisite: GVPT170.

GVPT272 The Politics of Race Relations in the United States (3 Credits)
Political dimension of historical and contemporary racial cleavage in the United States with particular emphasis on the post-World War II period.
Prerequisite: GVPT170.

GVPT273 Introduction to Environmental Politics (3 Credits)
An overview of modern environmental philosophy, politics, and policy, exploring environmental politics in the US by way of comparison with other developed and developing countries.

GVPT280 The Study of Comparative Politics (3 Credits)
An introduction to the comparative study of politics and governance, including the analytical concepts for studies of politics and a survey of the major types of regimes, including democratic and authoritarian/communist regimes.

GVPT282 Politics and the Developing World (3 Credits)
A study of the domestic governmental institutions; processes and problems such as conflict and economic development; and the socio-economic environments that are common to developing countries of Africa, the Middle East, Asia, and Latin America.

GVPT289 Special Topics in Government and Politics (1-6 Credits)
Substantive issues of and theoretical approaches to political phenomenon. Topics and credit vary.
Repeatable to: 6 credits if content differs.

GVPT289A Appetite for Change: Politics and the Globalization of Food (3 Credits)
An overview of the major forces transforming the food system--political, economic, technological, environmental--and the political debates surrounding them.
Credit Only Granted for: GVPT206 or GVPT289A.
Formerly: GVPT289A.

GVPT289J Uncertain Partners: US and China in a Changing World (3 Credits)
The rapid ascent of the People's Republic of China (PRC) as a major political and economic power has meant that its relationship with the United States has become central in contemporary international politics. To an increasing extent, some of the biggest global challenges--ranging from nuclear proliferation, to climate change, to economic growth--require U.S.-China cooperation if they are to be managed effectively. Yet the U.S.-China relationship is at times turbulent, and its future remains highly uncertain. Will the U.S. and China be able to forge a closer partnership that will enable them to cooperate in dealing with some of the vexing challenges facing the international community? Or are they more likely to drift toward a more adversarial relationship, as China's growing power--and the US reaction--generate a vicious cycle of mutual mistrust? In this class, students will grapple with these questions as they learn about the history of U.S.-China relations, and about many of the current issues facing the relationship.
Credit Only Granted for: GVPT204 or GVPT289J.
Formerly: GVPT289J.

GVPT289O Racial and Ethnic Politics in the Obama Era (3 Credits)
This course seeks to understand the meaning and significance of Barack Obama as the first African American president. The course examines the extent to which the United States of America has entered into a post-racial society. We also examine the policy challenges Obama has faced as the first African American president. One example is the passing of comprehensive health care reform. We discuss whether opposition to health care is driven by people's racial attitudes or their different views about the role of government. Others topics that the course will examine are: how Obama became the first African American president; the strategies his campaign used to motivate citizens to the voting booth; the public's reaction to Obama's election; racial group identity during the Obama era; Trump's victory as a response to Obama.
Credit Only Granted for: GVPT207 or GVPT289O.
Formerly: GVPT289O.

GVPT301 Identity and Conflict (3 Credits)
An examination of identity as a source of civil conflict. The course explores how identity is embedded in context, how identity is manipulated for political ends, and how identity conflict may be resolved.

GVPT306 Global Environmental Politics (3 Credits)
Focus on three processes of international environmental policy development- identifying problems, negotiating solutions, and implementing agreements- through a range of case studies, including global climate change.
Prerequisite: GVPT200.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; or permission of BSOS-Government & Politics department.

GVPT308 Political Science Topics in Study Abroad II (3 Credits)
The study of topics in political science taken as part of an approved study abroad program.
Repeatable to: 9 credits if content differs.

GVPT309 Topics in International Relations (3 Credits)
The study of topics in international relations.
Repeatable to: 6 credits if content differs.

GVPT317 Mock Trial II: Advanced Trial Advocacy (3 Credits)
Development of trial advocacy skills through participation in practice trials and intercollegiate mock trial competitions. Student may have an opportunity to represent the university in intercollegiate mock trial tournaments, including the National Mock Trial Championships.
Prerequisite: GVPT217.
Credit Only Granted for: GVPT317 or GVPT319B.
Formerly: GVPT319B.

GVPT319 Topics in Social Advocacy (1-3 Credits)
Reading, research and discussion of variety of topics related to social advocacy.
Repeatable to: 6 credits if content differs.

GVPT331 Courts, Law and Justice (3 Credits)
An introductory course to the study of law with emphasis on how lawyers and judges think and argue. Topics include, contract law, property, family law, torts, and criminal procedure.
Prerequisite: GVPT170.

GVPT339 Topics in Public Law (3 Credits)
The study of topics in public law.
Repeatable to: 6 credits if content differs.

GVPT349 Topics in Political Philosophy (3 Credits)
The study of topics in political philosophy.
Repeatable to: 6 credits if content differs.

GVPT351 Model United Nations (3 Credits)
Students are prepared for the model United Nations Conference.
Restriction: Must be in College Park Scholars program; and must be in GVPT International Studies program.
Formerly: GVPT388S.

GVPT354 International Development and Conflict Management (3 Credits)
Serves as the gateway course for the Minor in International Development and Conflict Management. Provides an introductory foundation in the theory and practice of international development and conflict management. Introduces the structures, key players, intersections, and main trends in the evolution of the fields. Explores causal factors that drive economic growth, poverty, inequality, and conflict, as well as the resources, methods, and tools available to track and address these issues.
Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and permission of BSOS-Government & Politics department; and sophomore standing or higher.
Additional Information: Students are expected to take the course during the Fall semester after admission to the program.

GVPT355 Capstone in International Conflict Management (3 Credits)
Serves as one of the two capstone courses for the Minor in International Development and Conflict Management. Focuses on advanced theory and the practice and profession of international conflict management and is designed to provide students an introduction to, and a chance to engage with, a core set of practical skills relevant to the field.
Prerequisite: GVPT354.
Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and sophomore standing or higher; and permission of BSOS-Government & Politics department.

GVPT356 Capstone in International Development (3 Credits)
Serves as one of the two capstone courses for the Minor in International Development and Conflict Management. Focuses on advanced theory and the practice and profession of international development and is designed to provide students an introduction to, and a chance to engage with, a core set of practical skills relevant to the field.
Prerequisite: GVPT354.
Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and sophomore standing or higher; and permission of BSOS-Government & Politics department.

GVPT358 Study Abroad Seminar in Political Science (3 Credits)
The study of topics in political science.
Repeatable to: 9 credits if content differs.

GVPT359 Topics in Comparative Politics (3 Credits)
The study of topics in comparative politics.
Repeatable to: 6 credits if content differs.

GVPT360 International Negotiations (3 Credits)
A study of the complexities of international negotiation and cross-cultural decision-making. Students will apply advanced computer technology in an interactive simulation involving actual negotiations.
Prerequisite: GVPT200.

GVPT368 Special Topics in Government and Politics (3 Credits)
The study of topics in government and politics.
Repeatable to: 6 credits if content differs.

GVPT373 Geographic Information Systems for Redistricting (3 Credits)
Local, state and federal governments must periodically draw and redraw political boundaries to account for shifts in the population. This course will be an introduction and overview of district drawing and redistricting as an important application of GIS research in political science and public policy. This class will equip students to use convenient GIS tools to create and consider alternative district scenarios to find the best possible solution. After finishing this class students will be able to draw districts to define police beats, sales territories, congressional and state legislative districts, school and fire protection districts, and numerous other boundaries.Recommended: at least one course in statistics.
Prerequisite: GVPT392.
Recommended: at least one course in statistics.

GVPT376 Applied Field Research in Government and Politics (3-6 Credits)
Students in this course participate as interns in an agency of government or in some other appropriate political organization. Assignments are arranged to provide students with insights into both theoretical and practical aspects of politics. Under the tutelage of the host agency and an academic advisor, students conduct a major research project of mutual interest to the student and his or her host agency in the field of government and politics.
Prerequisite: GVPT170.
Corequisite: GVPT377.

GVPT377 Experiential Learning: Government and Politics Internship Program (3 Credits)
The application of major concepts of political science to the realities of the political process. The course connects internship experiences with larger themes of political science. Students must be admitted to the GVPT Internship Program.
Prerequisite: GVPT170.
Credit Only Granted for: GVPT377 or GVPT388W.
Formerly: GVPT388W.

GVPT379 Topics in American Politics (3 Credits)
The study of topics in American politics.
Repeatable to: 6 credits if content differs.

GVPT386 Experiential Learning (3-6 Credits)
Restriction: Permission of BSOS-Government & Politics department; and junior standing or higher.

GVPT388 Topical Investigations (1-3 Credits)
Independent research and writing on selected topics in government and politics.
Prerequisite: 1 course from GVPT200-299 course range.
Repeatable to: 6 credits if content differs.

GVPT389 Experiential Learning II (3-6 Credits)
Experiential credit for working in government & politics related internships, research, and teaching opportunities.
Restriction: Permission of BSOS-Government & Politics department; and junior standing or higher.
Repeatable to: 6 credits.

GVPT390 Game Theory (3 Credits)
Introduction to game theory with applications to political science, economics and sociology. Topics include preference theory, expected utility theory, Nash equilibria, subgame perfection, repeated games, folk theorems, and evolutionary stability.
Restriction: Must not have completed ECON414.
Credit Only Granted for: GVPT399A, GVPT390, CMSC474 or ECON414.
Formerly: GVPT399A.

GVPT392 Introduction to Geographic Information Systems for Social Science Research (3 Credits)
Introduction to the use of Geographic Information Systems for conducting research in the social sciences. Overview of spatially embedded nature of many social science phenomena and content of theories common to spatial thinking. Students will obtain hands-on experience with various GIS tools and methods most frequently employed by social scientists.
Credit Only Granted for: GVPT392, GVPT429A, or GVPT729D.
Formerly: GVPT429A, GVPT729D.

GVPT393 Intermediate Geographic Information Systems (3 Credits)
Part II of a two-semester course that integrates Geographic Information Systems with social science research. Lectures and readings will motivate the use of GIS by exposure to research applications in international relations; political and non-profit fundraising; environmental justice; public health; race relations; business and economics.
Prerequisite: Must have completed one GIS course and at least one course in statistics.
Credit Only Granted for: GVPT368I, GVPT393 or GEOG498W.
Formerly: GVPT368I.

GVPT396 Introduction to Honors Research (3 Credits)
A required course for all honors students designed to emphasize library research, methodology, and writing skills in political science and political philosophy. A written proposal, bibliography and research design for an honors paper required of all students as a final project.
Restriction: Must be in Government & Politics Honors Program; and must have permission of the Government & Politics Honors Program.

GVPT397 Honors Research (3 Credits)
Individual reading and research. Preparation of an original paper.
Prerequisite: GVPT396.
Restriction: Must be in Government & Politics Honors Program.

GVPT399 Seminar in Government and Politics (3 Credits)
Reading, research, discussion, analysis, and writing in the area of politics. Both substantive issues and methodological approaches will be considered. Primarily for government and politics undergraduate majors.
Prerequisite: 1 course from GVPT200-299 course range.

GVPT402 International Law (3 Credits)
A study of the basic character, general principles and specific rules of international law, with emphasis on recent and contemporary trends in the field and its relation to other aspects of international affairs.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT404 Political Economy of Foreign Aid (3 Credits)
The world spends hundreds of billions of dollars on foreign aid every year. The effects of this aid spending are controversial. Research supports both pessimistic and optimistic views of foreign aid's effectiveness, with little consensus. Where does aid money go? What are the motivations of aid donors? Is foreign aid effective at achieving its goals? Why or why not? This course is designed to survey the promise and the challenges of foreign aid as a policy tool. The first half of the course will focus on the motivations and goals of foreign aid. We will consider various foreign aid donors, such as countries, institutions, and individuals, to understand the motivations behind and effects of foreign aid. We will create a typology of foreign aid agendas, motivations, and donors. The second half of the course will consider the challenges specific to foreign aid. This includes both technical challenges and political challenges. We will consider the strategies that aid donors and organizations have taken to try to overcome these challenges.
Recommended: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409R or GVPT404.
Formerly: GVPT409R.

GVPT406 International Organizations (3 Credits)
A basic introduction to the full range of international organizations that have come into being over the past century and one-half, including those that aspire to be universal or global, those with a geopolitical or regional focus, and those that address specific structural or functional areas of human endeavor or issue areas.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher. Or must be in Government & Politics: International Relations program; and junior standing or higher.

GVPT407 International Political Economy (3 Credits)
Introduces the field of international political economy, which analyzes the ways in which economic and political changes produce both economic and political reactions.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT409 Seminar in International Relations and World Politics (3 Credits)
Reading, writing, and research on topics in international relations and world politics. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT200.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; and junior standing or higher.
Repeatable to: 9 credits if content differs.

GVPT410 Politics of Nationalist and Ethnic Conflict (3 Credits)
An examination of the major causes and consequences of ethnic, nationalist, and separatist conflict. The course will focus on both theories of ethnicity and nationalism, as well as theories of conflict related to these issues. The course will also explore empirical trends in ethnic and nationalist politics.
Prerequisite: GVPT200.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).
Credit Only Granted for: GVPT409M or GVPT410.
Formerly: GVPT409M.

GVPT411 Conflict in the International System (3 Credits)
In this course, we will examine conflict, peace, and conflict resolution in contemporary international politics. We will interrogate what we mean by concepts such as peace, conflict, and violence, the different forms that these phenomena can take, and how we can measure their occurrence. We will discuss theoretical explanations for why individuals and groups have disputes, why these actors choose to use violence (or not) in these disputes, and ways in which violent disputes can be resolved peacefully. We will examine these arguments in a detailed study of conflicts in the Middle East, as well as by evaluating published articles that examine the effectiveness of conflict management strategies such as peacekeeping.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409P or GVPT411.
Formerly: GVPT409P.

GVPT413 Peace, Justice, and Conflict Resolution (3 Credits)
An examination of classic and contemporary perspectives on peace, justice, and conflict, resolution after armed conflict. The goal of this course is to expose students to the advantages, risks, and challenges of the most prominent methods of conflict mitigation and resolution, including mediation and arbitration; peacekeeping, peacemaking, and peacebuilding; the protection of civilians, Responsibility to Protect, and humanitarian assistance; elections, democratization, and power-sharing; and transitional reconciliation and justice. We will do this by reading, discussing, and synthesizing classic and cutting-edge Political Science research on these topics.
Recommended: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409A or GVPT413.
Formerly: GVPT409A.

GVPT414 International Relations of East Asia (3 Credits)
An examination of international relations in East Asia, focusing mostly on Northeast Asia. The course will provide some background on the evolution of international politics in the region over the past several decades, and will examine several contemporary issues--including the North Korean nuclear issue, the relationship across the Taiwan Strait, and maritime disputes in the East and South China Seas--in depth.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics or Government & Politics: International Relations program.
Credit Only Granted for: GVPT409E or GVPT414.
Formerly: GVPT409E.

GVPT417 Seminar in Advanced Topics in Environmental Policy Analysis (3 Credits)
A series of critical tools and methods used to analyze environmental policy. This class should be of interest to students who are either considering a career or graduate studies in environmental protection.
Prerequisite: GVPT273.
Restriction: Must be in one of the following programs (Government & Politics; Environmental Sci&Policy-Env Politics & Policy).
Credit Only Granted for: GVPT419B or GVPT417.
Formerly: GVPT419B.

GVPT419 Seminar in Public Policy (3 Credits)
Reading, writing, and research on topics in public policy. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT270.
Restriction: Must be in Government & Politics program.
Repeatable to: 6 credits if content differs.

GVPT420 The Logic and Practice of Measuring Political Behavior (3 Credits)
Introduction to concepts and practices used for measuring political behavior. Political analysis is an increasingly quantitative field. It is crucial for students of political behavior to learn how to define concepts in concrete ways, examine different methods of measuring concepts, learn how to test the quality of chosen measures, learn how to construct richer measures out of multiple questions, and finally how to examine the relationship between multiple measures of similar concepts. Common pitfalls, errors, bias, and ethics will be examined along the way.
Prerequisite: GVPT201.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT421 Advanced Quantitative Methods (3 Credits)
Advanced quantitative methods for political science research.
Prerequisite: GVPT201.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT422 Quantitative Political Analysis (3 Credits)
Introduction to quantitative methods of data analysis, including selected statistical methods, block analysis, content analysis, and scale construction.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT220.
Restriction: Must be in Government & Politics program.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

GVPT423 Elections and Electoral Behavior (3 Credits)
An examination of various topics relating to elections; the focus includes the legal structure under which elections are conducted, the selection and nomination process, the conduct of election campaigns, and patterns of political participation and voting choice in different types of elections.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program.

GVPT424 Quantitative Study of International Relations (3 Credits)
A comprehensive introduction to the quantitative study of international conflict. Students will perform statistical analysis of international conflict data using the R software platform.
Prerequisite: GVPT201.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).
Credit Only Granted for: GVPT409H (Fall 2015 and Fall 2016) or GVPT424.
Formerly: GVPT409H (Fall 2015 and Fall 2016).

GVPT428 Topics in Formal Theories of Political Behavior and Politics (3 Credits)
An evaluation of theories of political behavior such as game, social choice and voting theory, and their applications to problems of distribution and social justice, community organizing, responsive public policy, institutional design, and alliance and coalition formation.
Prerequisite: GVPT241 and GVPT221.
Restriction: Must be in Government & Politics program.
Repeatable to: 6 credits if content differs.

GVPT429 Problems in Political Behavior (3 Credits)
The problem approach to political behavior with emphasis on theoretical and empirical studies on selected aspects of the political process.
Prerequisite: GVPT241.
Recommended: GVPT220.
Restriction: Must be in Government & Politics program.

GVPT431 Introduction to Constitutional Law (3 Credits)
A systematic inquiry into the general principles of the American constitutional system, with special reference to the role of the judiciary in the interpretation and enforcement of the federal constitution.
Prerequisite: GVPT170 and GVPT331.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; and junior standing or higher.

GVPT432 Civil Rights and the Constitution (3 Credits)
A study of civil rights in the American constitutional context, emphasizing freedom of religion, freedom of expression, minority discrimination, and the rights of defendants.
Prerequisite: GVPT170 and GVPT331.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT433 The Judicial Process (3 Credits)
An examination of judicial organization in the United States at all levels of government, with some emphasis on legal reasoning, legal research, and court procedures.
Prerequisite: GVPT241 and GVPT331.
Restriction: Must be in Government & Politics program.

GVPT439 Seminar in Public Law (3 Credits)
Reading, writing, and research on topics in public law. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT331.
Restriction: Must be in Government & Politics program; and junior standing or higher.
Repeatable to: 6 credits if content differs.

GVPT441 History of Political Theory: Ancient and Medieval (3 Credits)
A survey of the principal political theories set forth in the works of writers before Machiavelli.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT442 History of Political Theory--Medieval to Recent (3 Credits)
A survey of the principal theories set forth in the works of writers from Machiavelli to Nietzsche.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.

GVPT443 Contemporary Political Theory (3 Credits)
A survey of the principal political theories and ideologies set forth in the works of writers from Karl Marx to the present.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.

GVPT445 Marxism and Postmarxism (3 Credits)
The study of Marxist thought and an assessment of the critical transformations and reassessments of the theory and practice of Marxism.
Restriction: Must be in a major within BSOS-Government & Politics department.

GVPT448 Non-Western Political Thought (3 Credits)
Examination of works by major authors and general themes of political thought originating in Asia, the Middle East, and Africa. This is not a survey of all non-Western political thought, but a course to be limited by the professor with each offering.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.
Additional Information: Permission of department required for repeat.

GVPT449 Seminar in Political Philosophy (3 Credits)
Reading, writing, and research on topics in political philosophy. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241.
Restriction: Must be in Government & Politics program.
Repeatable to: 6 credits if content differs.

GVPT454 Seminar in the International Relations of China (3 Credits)
Explores the foreign relations behavior of the People's Republic of China, with focus on the contemporary era.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher. Or must be in Government & Politics: International Relations program; and junior standing or higher.

GVPT456 The Politics of Terrorism (3 Credits)
Examination of the definition, causes and organization of terrorist activity, along with key domestic and international counter- and anti-terrorism responses. Special emphasis on challanges and opportunities to the scientific study of terrorism.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.
Credit Only Granted for: GVPT456 or GVPT459T.
Formerly: GVPT459T.

GVPT457 American Foreign Relations (3 Credits)
The principles and machinery of the conduct of American foreign relations and an analysis of the major foreign policies of the United States.
Prerequisite: GVPT200.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

GVPT459 Seminar in Comparative Politics (3 Credits)
Reading, writing, and research on topics in comparative politics. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT200; and (GVPT282 or GVPT280).
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.
Repeatable to: 6 credits if content differs.

GVPT460 State Politics and Government (3 Credits)
A study of the structure, procedures and policies of state governments with special emphasis on intergovernmental relationships, and with illustrations from Maryland governmental arrangements.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT260.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT461 Local Politics and Government (3 Credits)
An introduction to local government and politics in the U.S. context. The course explores the evolution of local jurisdictions, particularly cities, and the politics of local level decision making.
Prerequisite: GVPT170.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.
Credit Only Granted for: GVPT461 or GVPT479L.
Formerly: GVPT479L.

GVPT473 The U.S. Congress (3 Credits)
A detailed survey of lawmaking and the legislative process, emphasizing the U.S. Congress, and its members.
Prerequisite: GVPT241 and GVPT170.
Restriction: Junior standing or higher. And must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT474 Political Parties (3 Credits)
A descriptive and analytical examination of American political parties, nominations, elections, and political leadership.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program.

GVPT475 The Presidency and the Executive Branch (3 Credits)
An examination of the U.S. presidency in historical and contemporary perspective: nomination and electoral politics and the president's place in policy-making, administration, and public opinion.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT476 The Business Government Relationship (3 Credits)
Examines the structures, process, and outcomes of business and government and the politics and products of their cooperative-adversarial relationships in the United States. The design integrates interest group and administrative politics and the public policy process.
Prerequisite: GVPT241 and GVPT170.
Recommended: GVPT270.
Restriction: Must be in Government & Politics program.

GVPT477 Voting and Participation (3 Credits)
A study of the factors that influence individual vote choice and voter participation in the U.S. The course will introduce political science research pertaining to both topics and will engage current controversies over such things as political campaign laws and the various state and federal rules that govern election administration.
Prerequisite: GVPT170 and GVPT241.
Restriction: Must be in Government & Politics program.

GVPT479 Seminar in American Politics (3 Credits)
Reading, writing, and research on topics in American politics. Both substantive issues and methodological approaches will be considered.
Prerequisite: GVPT241 and GVPT170.
Restriction: Must be in Government & Politics program; and junior standing or higher.
Repeatable to: 6 credits if content differs.

GVPT481 Government and Administration of Russia and the States of the Former Soviet Union (3 Credits)
A comparative study of the governmental systems and political processes of the states of the former Soviet Union.
Prerequisite: GVPT200; and (GVPT282 or GVPT280).
Restriction: Must be in Government & Politics program.

GVPT482 Government and Politics of Latin America (3 Credits)
A comparative study of the governmental systems and political processes of the Latin American countries.
Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT484 Government and Politics of Africa (3 Credits)
A comparative study of the governmental systems and political processes of the African countries, with special emphasis on the problems of nation-building in emergent countries.
Prerequisite: GVPT282 or GVPT280.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT485 Government and Politics of the Middle East (3 Credits)
A comparative study of the governmental systems and political processes of Middle Eastern countries, with special emphasis on the problems of nation-building in emergent countries.
Prerequisite: GVPT200; and (GVPT282 or GVPT280).
Restriction: Must be in Government & Politics program.
Credit Only Granted for: GVPT485 or GVPT459E.
Formerly: GVPT459E.

GVPT487 Government and Politics of China (3 Credits)
Discussion of major issues in the study of the domestic politics of the People's Republic of China.
Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; and junior standing or higher.
Credit Only Granted for: GVPT359A or GVPT487.
Formerly: GVPT359A.

HACS - ACES-Cybersecurity

HACS100 Foundations in Cybersecurity I (2 Credits)
Interdisciplinary foundational course of the ACES program. Through lectures, lab activities, and discussions, students will learn and practice various aspects of cybersecurity. Weekly technical lectures will introduce students to the operating system UNIX. Students will partner with the Division of Information Technology in a project to engage the University of Maryland community in a cyber- hygiene and cyber-ethics campaign based on the concepts learned in class.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS101 Applied Cybersecurity Foundations (2 Credits)
Prepares students for team research that will be conducted in HACS 200. Students gain an understanding across the breadth of cybersecurity including system monitoring, networking basics and penetration testing. An applied approach to statistics is also included to prepare students to assess the data collected for their research projects. The course is conducted with a hands-on approach applying virtual environments to practice the concepts learned in the technical lectures each week.
Prerequisite: Minimum grade of C- in HACS100.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS102 Foundations in Cybersecurity II (3 Credits)
Second interdisciplinary foundational course of the ACES program. Through lectures and project work, students will learn and practice cybersecurity. Students will work in teams to develop a honeypot project, and work on this project throughout the course. Weekly lectures will supplement project work, focusing on types of computer attacks and protections, data collection and analysis, and other foundational cybersecurity concepts.
Prerequisite: HACS100.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS200 Applied Cybersecurity Foundations II (2 Credits)
Students will apply the skills learned in HACS 100 and 101 to practice cybersecurity research through team led projects employing honeypots, carrying that project through all stages - proposal, implementation, and analysis. Weekly lectures will supplement project work by addressing trends observed in honeypot attacks and protections needed, along with data collection and analysis tools, and other foundational cybersecurity concepts.
Prerequisite: Minimum grade of C- in HACS101.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS201 Introduction to UNIX (1 Credit)
Introduction to the operating system UNIX through lectures and hands-on assignments.
Restriction: Must be a first-year student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.
Credit Only Granted for: HACS201 or CMSC216.
Additional Information: Required course for students who have not completed the ACES Living-Learning Program or taken CMSC216.

HACS202 Group Project in Cybersecurity (3 Credits)
The group project in this course will combine technical, analytical, and communication skills, further engaging students in the practice of cybersecurity. Students will learn about design concepts and data analysis as they engage in a team project designing, deploying, and collecting and analyzing data from a honeypot. The hands-on nature of the course will give students experiential insight about how and why attackers attack and how to engage in protective measures to prevent attacks.
Restriction: Must be a first-year student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and cannot have been an ACES Living-Learning Program student (i.e., have taken HACS100 and HACS102).

HACS208 Seminar in Cybersecurity (3 Credits)
Explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. Although each section may focus on a different topic, each integrates active student engagement, communication, critical communication, critical thinking, and teamwork.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.
Repeatable to: 6 credits if content differs.

HACS279 Undergraduate Research in Cybersecurity (1-3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.
Repeatable to: 6 credits if content differs.

HACS287 Undergraduate Research in Cybersecurity (3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS297 Cybersecurity Experience Reflection (3 Credits)
Cybersecurity experience is defined as an experiential learning activity either with a University of Maryland entity (such as the Division of Information Technology, the ACES competition team or in an ACES outreach program), or with an external organization that will provide valuable, hands-on experience to supplement the knowledge learned in the other ACES coursework.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS318 Cybersecurity Professionals Colloquium Series (1 Credit)
The Cybersecurity Professionals Colloquium Series explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. The colloquium series consists of guest lectures of cybersecurity professionals. In written assignments, students will not only summarize the lecture content but also reflect on the significance of the lecture content for the field of cybersecurity.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.
Repeatable to: 2 credits.

HACS402 Applied Security Analysis and Visualization (3 Credits)
Focuses on exploratory and statistical data analysis, data and information visualization, and the presentation and communication of analysis results. These topics will be presented and explored in the context of and with applications to cybersecurity related data.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408 Advanced Seminar in Cybersecurity (3 Credits)
Explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. Although each section may focus on a different topic, each integrates active student engagement, communication, critical communication, critical thinking, and teamwork.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.
Repeatable to: 9 credits if content differs.

HACS479 Undergraduate Research in Cybersecurity (1-3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.
Repeatable to: 6 credits if content differs.

HACS498 Cybersecurity Group Problem Solving (3 Credits)
The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in team problem solving activities in order to gain greater insight into a specific area within cybersecurity and to obtain an appreciation for the subtleties and difficulties associated with these activities in order to prepare students for graduate school and the workforce. Students engage in a semester long problem solving or development project under the mentorship of a industry specialist and with the guidance of university faculty. Through the exercise the students will develop teamwork experience and professional communication skills in addition to experience of the project itself. The project might be evaluation, creation, testing or analysis of some area of cybersecurity as needed by the mentor-sponsor. A contract of what will be accomplished is required must be agreed upon by the mentor, the student and the ACES leadership before the project can begin.
Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.
Repeatable to: 6 credits.

HDCC - Design Cultures and Creativity

HDCC105 Introduction to Design Cultures and Creativity I (3 Credits)
History, concepts, and technologies of creative design expression, coupled with an introduction to development for particular platforms and devices.
Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC106 Introduction to Digital and Creativity II (3 Credits)
Introduction to the methods and theory of digital cultural production, with emphasis on creative and expressive platforms.
Restriction: Must be in the Digital Cultures and Creativity Honors College Living/Learning program.

HDCC201 Capstone Proposal Through Design Thinking (1 Credit)
Engages principles of design thinking to prepare second-year students in the Design Cultures and Creativity (DCC) program to create a proposal for their spring Capstone Project.
Prerequisite: HDCC105 and HDCC106.
Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC208 Seminar in Digital Cultures and Creativity (3 Credits)
An advanced seminar in specific aspects of digital culture and creativity, designed to keep students abreast of the latest developments in new media and the online world. Possible topics include mobile gaming, digital storytelling, and electronic music.
Prerequisite: HDCC106 and HDCC105.
Restriction: Must be in the Digital Cultures and Creativity Honors College Living/Learning program.
Repeatable to: 6 credits if content differs.

HDCC209 Practicum in Digital Cultures and Creativity (2 Credits)
Practicum in Digital Cultures and Creativity in which students will develop their program capstone projects under the supervision of a faculty mentor, with regular checkpoints and presentations to track progress.
Prerequisite: HDCC208.
Restriction: Must be in the Digital Cultures and Creativity Honors College Living/Learning program.
Repeatable to: 4 credits if content differs.

HDCC379 Digital Cultures and Creativity Independent Study (1-3 Credits)
Involves research and/or creative scholarship directed by individual DCC faculty outside of the formal classroom structure.
Prerequisite: HDCC105.
Restriction: Must be enrolled in the Digital Cultures and Creativity Honors College living-learning program; and permission of UGST-HCOL-Digital Cultures & Creativity Program.
Repeatable to: 6 credits if content differs.

HEBR - Hebrew

HEBR102 Elementary Hebrew I-B (3 Credits)
Continues HEBR101. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing and reading ability. Corresponds to the second half of HEBR111.
Prerequisite: HEBR101; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR111.
Credit Only Granted for: (HEBR101 and HEBR102) or HEBR111.

HEBR103 Elementary Hebrew II-A (3 Credits)
Continuation of HEBR102 and HEBR111. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing, and reading ability. Corresponds to the first half of HEBR112.
Prerequisite: HEBR111 or HEBR102; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR112.
Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR104 Elementary Hebrew II-B (3 Credits)
Continuation of HEBR103. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing, and reading ability. Corresponds to the second half of HEBR112.
Prerequisite: HEBR103; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR112.
Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR106 Intensive Elementary Hebrew I (4 Credits)
An intensive study of fundamentals of Hebrew reading, writing, listening and Israeli culture. Covers present tense in all verb categories, basic syntax and builds vocabulary.
Prerequisite: Must have appropriate Foreign Language Placement Assessment (FLPA) score.
Credit Only Granted for: HEBR111 or HEBR106.

HEBR107 Intensive Elementary Hebrew II (4 Credits)
A continuation of intensive study of fundamentals of Hebrew reading, writing, listening, speaking and Israeli culture. Covers past tense in all verb categories, basic syntax and builds vocabulary.
Prerequisite: HEBR106 or HEBR111; or must have appropriate score on Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: HEBR107 or HEBR112.

HEBR111 Elementary Hebrew I (6 Credits)
Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing and reading ability.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed HEBR101; and must not have completed HEBR102.
Credit Only Granted for: (HEBR101 and HEBR102) or HEBR111.

HEBR112 Elementary Hebrew II (6 Credits)
Continuation of HEBR 111.
Prerequisite: HEBR111; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed HEBR103; and must not have completed HEBR104.
Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR199 Special Topics in Hebrew (3 Credits)
Topics in language, literature, and culture. Varies by semester and instructor.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

HEBR203 Intermediate Hebrew II-A (3 Credits)
Continuation of HEBR211 or HEBR202. Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture. Corresponds to the first half of HEBR212.
Prerequisite: HEBR212 or HEBR202; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR212.
Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR204 Intermediate Hebrew II-B (3 Credits)
Continuation of HEBR203. Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture. Corresponds to the second half of HEBR212.
Prerequisite: HEBR203; or must have placement by the Hebrew coordinator.
Restriction: Must not have completed HEBR212.
Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR206 Intermediate Intensive Hebrew I (4 Credits)
Provides a comprehensive review of the fundamentals of Hebrew grammar and oral skills, and introduces new skills in future tense verb conjugation, and communication in reading, writing, listening and speaking.
Prerequisite: Must have completed HEBR107 OR HEBR112; or must have appropriate Foreign Language Placement Assessment(FLPA) score.
Restriction: Must not be a fluent/native speaker of Hebrew.
Credit Only Granted for: HEBR206 or HEBR211.

HEBR207 Intensive Intermediate Hebrew II (4 Credits)
A review of the fundamentals of Hebrew grammar, reading, writing, listening and speaking.
Prerequisite: Must have completed HEBR206 OR HEBR211; or have the appropriate Score on the Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: HEBR207 or HEBR212.

HEBR211 Intermediate Hebrew I (6 Credits)
Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture.
Prerequisite: HEBR112; or Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed HEBR201; and must not have completed HEBR202.
Credit Only Granted for: (HEBR201 and HEBR202) or HEBR211.

HEBR212 Intermediate Hebrew II (6 Credits)
Continuation of HEBR211.
Prerequisite: HEBR211; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed HEBR203; and must not have completed HEBR204.
Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR249 Special Topics in Hebrew Studies (1-3 Credits)
A broad range of cultural and societal topics pertaining to the communication of Hebrew.
Prerequisite: Must have completed HEBR206; or HEBR211; or must have appropriate score on Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.
Repeatable to: 9 credits if content differs.

HEBR269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HEBR298 Special Topics in Jewish Studies (3 Credits)
Repeatable to: 6 credits if content differs.

HEBR298B Introduction to the Hebrew Bible/Old Testament (3 Credits)
Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.Cross-listed with: JWST262, ENGL262.
Credit Only Granted for: JWST262, HEBR293B, or ENGL262.

HEBR313 Conversation and Composition I (3 Credits)
A practical language course recommended for all students continuing with Hebrew. Review of grammar and composition. Selected readings. Oral and written exercises.
Prerequisite: HEBR212; or students who have taken courses with comparable content may contact the department.

HEBR314 Conversation and Composition II (3 Credits)
A practical language course recommended for all students continuing with Hebrew. Review of grammar and composition. Selected readings. Oral and written exercises.
Prerequisite: HEBR313; or students who have taken courses with comparable content may contact the department.

HEBR369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HEBR381 Introduction to Hebrew Cultural Studies (3 Credits)
Critical study of Israeli culture with emphasis on literature, film, and art as sites of struggle over political and social meaning during times of cultural transformation. Focus on the historical development of Israeli identity and gender, in particular within the military and Zionist youth movements. Taught in Hebrew.
Prerequisite: HEBR314; or permission of instructor.

HEBR386 Experiential Learning (3-6 Credits)
Restriction: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

HEBR388 Language House Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident in the Language House Immersion program.
Repeatable to: 8 credits.

HEBR430 Critical Issues in Israeli Cinema (3 Credits)
Critical investigation of Zionist and Israeli culture and politics through film.Cross-listed with FILM430.
Credit Only Granted for: HEBR430 or FILM430.

HEBR498 Special Topics in Hebrew (3 Credits)
Repeatable to: 6 credits if content differs.

HEBR499 Independent Study in Hebrew (1-3 Credits)
Independent study under faculty supervision.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

HEIP - Entrepreneurship and Innovation

HEIP143 Foundations of Entrepreneurship and Innovation (1 Credit)
Foundational ideas and terms in entrepreneurship and innovation are introduced, with attention to developing students understanding of cultivating a business in diverse, global environments; leading and collaborating in a competitive world; developing an entrepreneurial mind for an entrepreneurial world; and industry dynamics of technological innovation.
Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HEIP144 Contemporary Issues in Entrepreneurship and Innovation (3 Credits)
Inspires entrepreneurial innovation and creativity through interactive lectures, workshops, and case studies on contemporary issues to include energy, life sciences, healthcare, and technology. Explores entrepreneurial innovation sources, structures and dynamics. Helps students develop skills for generating ideas and addressing current issues and problems.
Prerequisite: HEIP143.
Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HEIP240 Exploring International Entrepreneurship and Innovation (3 Credits)
An introduction to the opportunities and challenges of entrepreneurship and innovation from an international perspective.
Restriction: Must be an EIP student in good-standing.

HEIP241 EIP Capstone: Creating Enterprise with Social Impact (2 Credits)
Addresses the global necessity to develop and implement solutions to critical social and environmental concerns in ways that are both technologically viable and economically sustainable. Through group exercises, guest speakers, discussions, and experiential learning activities, students will develop the skills to create businesses that achieve the double bottom line of both profitability and social benefit.
Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HESI - Higher Ed, Student Affairs, and International Ed Policy

HESI202 Race and Diversity in Higher Education (3 Credits)
Will discuss contemporary and controversial issues on race and diversity in higher education. Addresses the question: How should race influence college admissions and campus climate? Will expose students to different viewpoints on the role of race in higher education settings.

HESI217 Introduction to Student Leadership (3 Credits)
Introduction to leadership theories, concepts, and skills. Completion of personal and leadership self-assessments, values exploration, and small group application.
Restriction: Freshman standing; or sophomore standing.

HESI220 Adaptive Strategies for Multicultural Leadership and Dialogue (3 Credits)
As U.S. society becomes increasingly complex along multiple and continually evolving dimensions of individual and group identities, successful leaders will benefit from learning adaptive strategies and practices that will help them to navigate this complexity and adapt effectively in a climate of constant change. This class will focus on specific strategies, concepts, and insights for successful leadership and dialogue in twenty-first century U.S. multicultural society.
Restriction: Must not have completed BSCV301; and junior standing or lower.
Credit Only Granted for: EDCP318L or HESI220.
Formerly: EDCP318L.

HESI221 Leadership, Power and Privilege (3 Credits)
Critical analysis of social issues, contemplative practice, and dialogue are used to examine how power and privilege operate at individual, institutional, and societal levels to impact leadership perceptions and behaviors.

HESI298 Special Problems in Higher Education, Student Affairs, and International Education Policy (1-6 Credits)
Individual instruction in special problems related to higher education, student affairs and international education policy.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI310 Transfer2Terp Learning Community: Applying Your Strengths at the University of Maryland and Beyond (3 Credits)
Students will identify their strengths and learn how to apply them both in and outside of the classroom. Students will work side by side with the faculty and staff in the Adele H. Stamp Student Union to learn about their strengths while applying them to leadership positions.
Restriction: Priority will be given to students transferring from Maryland Community Colleges; or permission of EDUC-Counseling, Higher Education and Special Education department.

HESI315 Student Leadership in Groups and Organizations (3 Credits)
Acquiring and integrating leadership knowledge within group and organizational contexts so that students can navigate organizational environments and apply leadership in diverse communities of practice and career contexts.
Prerequisite: HESI217.
Credit Only Granted for: HESI315 or EDCP315.
Formerly: EDCP315.

HESI318 Applied Contextual Leadership (3 Credits)
Course will utilize experiential learning opportunities to develop and apply the knowledge and skills of leadership into specific contexts of leadership practice.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: HESI318 or EDCP318.
Formerly: EDCP318.

HESI320 Social Action Seminar (2 Credits)
The use of leadership theories to inform the practice of addressing social issues in society, on campus, or within the surrounding community. Students will: identify a current and compelling social issue; explore the historical, social, and political aspects of social issues; identify and select applicable leadership theories to confront the social issue; create and develop a plan that integrates leadership theories and the social issue; and implement and evaluate the overall social action project.
Prerequisite: HESI217.
Restriction: Limited to Minor in Leadership Studies students.

HESI321 Advanced Social Action Seminar (1 Credit)
The use of leadership theories to inform the practice of addressing social issues in society, on campus, or within the surrounding community. Students will: identify a current and compelling social issue; explore the historical, social, and political aspects of social issues; identify and select applicable leadership theories to confront the social issue; create and develop a plan that integrates leadership theories and the social issue; and implement and evaluate the overall social action project. Focuses on executing, implementing, and assessing a social action project in small groups and teams.
Prerequisite: HESI217 and HESI320.
Restriction: Limited to Minor in Leadership Studies students only.

HESI417 Advanced Leadership Seminar (3 Credits)
Students will analyze and synthesize the concept of leadership using cultural, ethical, sociological, historical perspectives. Exploration and reflection of personal values, decision making, in-depth analysis on various leadership activities. Theories will be emphasized.
Prerequisite: HESI217; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDCP417 or HESI417.

HESI418 Special Topics in Leadership (3 Credits)
The special topics and leadership course will address a single topic related to leadership through the semester. In-depth study and analysis on the topic will be the basis for the course. Topics include gender and leadership, ethics and leadership, and culture and leadership. Leadership will serve as the foundation in the course.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: HESI418 or EDCP418.
Formerly: EDCP418.

HESI470 Introduction to Student Personnel (3 Credits)
A systematic analysis of research and theoretical literature on a variety of major problems in the organization and administration of student personnel services in higher education. Included will be discussion of such topics as the student personnel philosophy in education, counseling services, discipline, housing, student activities, financial aid, health, remedial services, etc.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDCP470 or HESI470.
Formerly: EDCP470.

HESI489 Field Experiences in Higher Education, Student Affairs, and International Education Poli (1-4 Credits)
Planned field experience in education and community related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI498 Special Problems in Higher Education, Student Affairs, and International Education Policy (1-3 Credits)
Available only to HESI students who have formal plans for individual study of approved problems.
Prerequisite: Available only to HISA, HIED, and HIEP students who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI499 Workshops, Clinics, Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Higher Education, Student Affairs, and International Education Policy program (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listings.
Repeatable to: 6 credits.

HESP - Hearing and Speech Sciences

HESP120 Introduction to Linguistics (3 Credits)
An introduction to the scientific study of natural language with focus on the basic concepts of phonology, syntax, semantics and pragmatics, with subsequent attention to the applied aspects of linguistic principles.
Additional Information: HESP120 is required for HESP majors. HESP majors may not substitute LING200.

HESP150 Introduction to Language Science (3 Credits)
Language science is the scientific study of how humans acquire, use, comprehend, and produce language. Most people in all societies learn and use their native language or languages with apparent ease - but don't be fooled: languages are highly complex, and speaking and understanding language requires some amazing feats of mental acrobatics. Thus there are many opportunities for difficulties with language, which is the focus of our field. Understanding difficulties with speech, language, and hearing require first understanding how processing works when language is successful - the psychological (behavioral) and neurobiological (brain) factors that enable people to learn and use language despite its intricacies, the structure and properties of language itself, and how knowledge of language is acquired, represented, and processed in the mind and brain.

HESP202 Introduction to Hearing and Speech Sciences (3 Credits)
An introduction to communication sciences and disorders; a survey of the bases of normal speech, language and hearing ability, major forms of communicative disorders and their treatment.

HESP214 Should I Buy INTO That? Comparing Media Claims with Scientific Evidence from Brain & Behavior Research (3 Credits)
Millions of dollars are spent each year advertising products that 'make you smarter' or 'learn a foreign language faster' or 'increase your memory', etc. But are these statements true? Can they be backed up? Learn how to critically evaluate media claims of new discoveries in brain and behavior. Read popular-press articles, listen to podcast episodes and review commercial products that claim to be based on science. Then, learn how to find out if the claims are true.

HESP258 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HESP300 Introduction to Psycholinguistics (3 Credits)
An introduction to current theories of language and an investigation of their relationship to human communication behavior. Survey of the experimental literature relating to this question.
Prerequisite: Minimum grade of C- in HESP202; or permission of BSOS-Hearing & Speech Sciences department.
Recommended: HESP120.

HESP303 Phonetic transcription (2 Credits)
An introduction to broad and narrow phonetic transcription, and to physiology of speech production. The primary goal of the course is to provide knowledge about phonetics and the ability to use this knowledge in an applied setting.
Prerequisite: Permission of instructor.

HESP305 Anatomy and Physiology of the Speech Mechanism (3 Credits)
Anatomy, physiology, and neurology of speech mechanism.
Prerequisite: Minimum grade of C- in HESP202; or permission of BSOS-Hearing & Speech Sciences department.

HESP306 Anatomy and Physiology of Speech & Hearing (4 Credits)
This is a 4-credit course focusing on the biological and neurological bases of human speech production and human hearing, namely the anatomy, physiology, and neurology of the vocal/speech mechanism and the hearing mechanism.Specifically, respiration, phonation, resonance, articulation, swallowing, and hearing will be highlighted. A strong understanding of normal anatomy and physiology is essential for the successful evaluation and treatment of patients with speech, language, swallowing and hearing disorders.
Prerequisite: Permission of instructor.

HESP307 Speech & Hearing Science (4 Credits)
Human hearing is exquisitely sensitive, allowing us to hear extremely faint sounds, to follow the sounds of a friend's voice in a loud party, and to appreciate subtle differences between words in the language. This course provides an introduction to the basic physics of sound, the acoustic properties of the sounds of speech, and the mechanisms by which those sounds are perceived by the listener.
Prerequisite: HESP303.

HESP311 Anatomy, Pathology and Physiology of the Auditory System (3 Credits)
Gross anatomy of the ear and pathways for transmission of sound energy through the peripheral and central auditory system. Causes, development and effects of pathological conditions contributing to temporary or chronic hearing impairments.
Prerequisite: Minimum grade of C- in HESP202; or permission of BSOS-Hearing & Speech Sciences department.

HESP313 Neurobiology for Speech and Hearing (2 Credits)
This course is designed to provide an understanding of normal neuroanatomy and neurophysiology of speech and language. It will also provide preliminary information regarding pathologic processes, especially those affecting speech and language

HESP359 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HESP386 Experiential Learning (1-3 Credits)
Students will have the opportunity observe and/or participate in therapy activities provided by a speech-language pathologist or audiologist in this experiential learning course.
Restriction: Junior standing or higher; and permission of BSOS-Hearing & Speech Sciences department.

HESP388 Undergraduate Research Externship (1-3 Credits)
Off-campus research internship with departmental affiliates at National Institutes of Health and regional universities. Contact department chairman for openings and descriptions of eligible placements.
Prerequisite: HESP311, HESP300, HESP305, and HESP202.
Restriction: Permission of BSOS-Hearing & Speech Sciences department; and sophomore standing or higher.

HESP389 LEAP Classroom Internship (1-3 Credits)
Participation in a language-based, literacy-rich preschool classroom for children with speech-language disorders. Students will learn behavior management techniques, curriculum planning and implementation, facilitation of play among children, data collection and teaching srategies.
Prerequisite: HESP202; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of BSOS-Hearing & Speech Sciences department.

HESP400 Speech and Language Development in Children (3 Credits)
Analysis of the normal processes of speech and language development in children.
Prerequisite: Minimum grade of C- in HESP300; or permission of BSOS-Hearing & Speech Sciences department.
Recommended: LING200 or HESP120.
Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP402 Language and Phonological Disorders in Children (3 Credits)
Etiology, assessment and treatment of language and phonological disorders in children.
Prerequisite: Minimum grade of C- in HESP400; or permission of BSOS-Hearing & Speech Sciences department.
Restriction: Must be in Hearing and Speech Sciences program.

HESP403 Introduction to Phonetic Science (3 Credits)
An introduction to physiological, acoustic and perceptual phonetics; broad and narrow phonetic transcription; current models of speech production and perception.
Prerequisite: Minimum grade of C- in HESP305; or permission of BSOS-Hearing & Speech Sciences department.
Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP406 Acquired Neurogenic Communication Disorders in Adults (3 Credits)
Survey of the dysarthrias and aphasias in adults from an interdisciplinary point of view.
Prerequisite: Minimum grade of C- in HESP300 and HESP305; or permission of BSOS-Hearing & Speech Sciences department.
Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP407 Bases of Hearing Science (3 Credits)
Fundamentals of hearing, including the physics of sound, anatomy and physiology of peripheral and central auditory nervous system, psychophysical procedures used in measurement of auditory sensation and perception, and topics in psychological acoustics.
Prerequisite: Minimum grade of C- in HESP311; or permission of BSOS-Hearing & Speech Sciences department.
Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP411 Introduction to Audiology (3 Credits)
An introduction to the field of audiology. Evaluation and remediation of hearing handicaps.
Prerequisite: Minimum grade of C- in HESP311; or permission of BSOS-Hearing & Speech Sciences department.
Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP413 Aural Rehabilitation/Habilitation (3 Credits)
The fundamental aspects of aural rehabilitation therapy for both adults and children are introduced to students. Class time will consist of lectures, discussions, and hands-on activities.
Prerequisite: HESP411.
Restriction: Sophomore standing or higher.

HESP415 Principles and Methods in Speech-Language Pathology (2 Credits)
The principles and methods required to provide treatment of speech and language disorders to children and adults. Topics include writing goals and objectives, programming,teaching strategies,session design, data collection, behavior modification and counseling.
Prerequisite: HESP400.
Restriction: Must be in Hearing and Speech Sciences program.

HESP416 Principles and Methods in Audiology (2 Credits)
Relate previous knowledge of anatomy/physiology and pathologies of the auditory system and integrate this information into clinical application.
Prerequisite: Minimum grade of C- in HESP411.
Restriction: Must be in Hearing and Speech Sciences program; and permission of BSOS-Hearing & Speech Sciences department.

HESP417 Principles and Methods in Speech-Language Pathology and Audiology (3 Credits)
The principles underlying the treatment of speech, language and hearing disorders in children and adults.
Prerequisite: HESP400 and HESP411; or permission of BSOS-Hearing & Speech Sciences department.
Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP418 Clinical Practice in Speech-Language Pathology and Audiology (3 Credits)
Supervised observation with some direct participation in clinical methods for the treatment of disorders of articulation, fluency, child and adult language; evaluation and habilitation/rehabilitation of hearing impaired children and adults.
Prerequisite: Minimum grade of C- in HESP417.
Restriction: Permission of BSOS-Hearing & Speech Sciences department.
Repeatable to: 6 credits.

HESP422 Neurological Bases of Human Communication (3 Credits)
Basic neurology as it pertains to anatomy and physiology substrates of speech and language.
Prerequisite: HESP305; or permission of instructor.
Credit Only Granted for: HESP498 or HESP422.

HESP469 Honor Thesis Research (1-3 Credits)
Student will develop thesis proposal, conduct research, analyze results, develop and defend final written document.
Prerequisite: Permission of honors thesis advisor required.
Repeatable to: 6 credits if content differs.

HESP498 Seminar (3 Credits)
Selected topics in human communication and its disorders.
Restriction: Permission of BSOS-Hearing & Speech Sciences department.
Repeatable to: 6 credits if content differs.

HESP499 Independent Study (1-3 Credits)
A directed study of selected topics pertaining to human communication and its disorders.
Restriction: Permission of BSOS-Hearing & Speech Sciences department.
Repeatable to: 6 credits if content differs.

HHUM - Honors Humanities

HHUM105 Honors Humanities: Introduction to the Arts and Humanities (3 Credits)
Introduction to the university, the different fields of the arts and humanities, and the history of how the university and the humanities have evolved across the world from ancient times to the present. Primary emphasis on reading and discussion of literary artifacts to assess the meaning and social status of the arts and humanities in the past and their personal and social value for the future.
Restriction: Must be an entering freshmen in the Honors Humanities Program.
Credit Only Granted for: ARHU105 or HHUM105.
Formerly: ARHU105.

HHUM106 Honors Humanities: The Humanities in Practice (3 Credits)
The application of the disciplines, methods and traditions of the Humanities to contemporary problems and issues such as social injustice, immigration, income inequality, and the role of social media. Students will apply to such issues the tools of the Humanities: research and historical analysis, critical reasoning, communication and persuasion, ethical debate, and imagination. The course will utilize the institutions of Washington, D.C. to explore contemporary problems and will guide students in the creation of their individual proposals for the capstone project that is the culmination of the curriculum in Honors Humanities.
Recommended: HHUM105.
Restriction: Must be in the Honors Humanities Program.
Additional Information: Priority enrollment will be given to students in Honors Humanities.

HHUM205 Second Year Seminar in Honors Humanities (3 Credits)
Seminar on basic issues and methodologies in the humanities and arts.
Credit Only Granted for: ARHU205 or HHUM205.
Formerly: ARHU205.

HHUM206 Honors Humanities Keystone Project (3 Credits)
Design, execution and completion of students' chosen Keystone Projects in the form of research, creativity, or service. Students will have formulated tentative plans for their projects in HHUM106; in this course they will revise and augment those proposals, articulate their connections with the traditions and methods of the humanities, formulate a work plan for completing the project within one semester, and work with their fellow students to workshop their materials as they develop. The course will culminate in a presentation of the project at the annual Keystone Symposium and with the submission of the project in its final form.

HHUM288 Seminar: Selected Issues in Honors Humanities (3 Credits)
Seminar on important topics in Arts and Humanities for students in the Honors Humanities Program.
Restriction: Must be in the Honors Humanities Program.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: ARHU288 or HHUM288.
Formerly: ARHU288.

HHUM328 Internship in Honors Humanities (1-3 Credits)
Supervised service-learning in Honors Humanities.
Prerequisite: HHUM105; and permission of the Honors Humanities Director.
Restriction: Sophomore standing or higher.
Repeatable to: 3 credits.
Credit Only Granted for: ARHU328 or HHUM328.
Formerly: ARHU328.

HHUM329 Undergraduate Teaching Assistantship (1-3 Credits)
Supervised pedagogical service-learning in the Honors Humanities curriculum.
Prerequisite: HHUM106, HHUM205, and HHUM105; and permission of the Honors Humanities Director.
Credit Only Granted for: ARHU329 or HHUM329.
Formerly: ARHU329.

HISP - Historic Preservation

HISP200 The Everyday and the American Environment (3 Credits)
An introduction to the theories of the everyday within the context of the American built environment. Focuses primarily on the American experience of underrepresented, minority, and/or immigrant communities; both historical and contemporary. Attempts to challenge what is meant by American in describing the American everyday built environment.Jointly offered with HISP615.

HISP319 Special Topics in Historic Preservation (1-6 Credits)
Students will explore technical aspects of preservation taught by practitioners whose expertise are of special benefit to undergraduate students.
Repeatable to: 12 credits.

HIST - History

HIST106 American Jewish Experience (3 Credits)
History of the Jews in America from colonial times to the present. Emphasis on the waves of migration from Germany and Eastern Europe; the changing nature of the American Jewish community and its participation in American social, economic, and political life.Cross-listed with JWST141.
Credit Only Granted for: HIST106 or JWST141.

HIST108 Freshman/Sophomore Seminar in History (3 Credits)
Seminar for freshmen and sophomores on a specific historical case study and historical 'problem,' taught by a professor who specializes in the field. Participants will learn about the subject by doing the work of historians: carefully considering primary and secondary sources, discussing them in a seminar format, and preparing original written work drawn upon these materials. Seminar topics will range widely and the offerings will vary each semester; these are 'special topics' courses.
Repeatable to: 6 credits if content differs.

HIST110 The Ancient World (3 Credits)
Interpretation of select literature and art of the ancient Mediterranean world with a view to illuminating the antecedents of modern culture; religion and myth in the ancient Near East; Greek philosophical, scientific, and literary invention; and the Roman tradition in politics and administration.

HIST111 The Medieval World (3 Credits)
The development of Europe in the Middle Ages; the role of religious values in shaping new social, economic, and political institutions; medieval literature, art and architecture.

HIST113 The Making of Modern Europe (3 Credits)
Evolution of modern nation states since late medieval times. Industrial-economic structure and demography. Emergence of modern secular society.

HIST120 Islamic Civilization (3 Credits)
Introduction to society and culture in the Middle East since the advent of Islam: as a personal and communal faith; as artistic and literary highlights of intellectual and cultural life; and as the interplay between politics and religion under the major Islamic regimes.Cross-listed with RELS120.
Credit Only Granted for: HIST120 or RELS120.

HIST123 Sub-Saharan Africa Since 1800 (3 Credits)
Overviews early mid-19th-century changes in African societies, European conquest and African resistances in the late 19th-century, colonial states and societies, African nationalisms and decolonization and the independence era. Struggles over social, economic, and political changes are emphasized.

HIST131 The History of the American Dream (3 Credits)
An introduction to the way Americans thought of themselves in the past, and their often conflicting visions of what constituted the American Dream. Central questions will include whether or not Americans have always envisioned their country as a land of equality, opportunity, democracy, and freedom and whether or not their ideas of what these values meant changed or remained the same over time.
Credit Only Granted for: HIST131 or HIST289J.
Formerly: HIST289J.

HIST132 Fighting Slavery (3 Credits)
An examination of the different tools and tactics, means and methods that Americans have used to escape slavery or try to eliminate it.

HIST133 God Wills It!' The Crusades in Medieval and Modern Perspectives (3 Credits)
An examination of the identities and convictions both of the Western Europeans who participated in the Crusades and of the Easterners (Muslim, Christian, and Jewish) whom they encountered in the Holy Land. Focuses on the era of the first four great Crusades, from about 1095 to 1215. Consideration of the cultural impact of these movements on both Western Europe and the Middle East.Cross-listed with: RELS289D.
Credit Only Granted for: HIST133 or RELS289D.

HIST134 Spies, Assassins, Martyrs, and Witches: Famous Trials in American History (3 Credits)
Examination of some of the most famous trials in American history and their enduring hold on the imagination.

HIST135 Civil Discourse or Urban Riot: Why Cities Don't (Often) Explode (3 Credits)
An examination of the mechanisms that promote peaceful co-existence in urban societies and a discussion of how and why city streets sometimes become violent.Cross-listed with: JWST289E.
Credit Only Granted for: HIST135 or JWST289E.

HIST136 Moneyland: Business in American Culture (3 Credits)
An exploration of American business culture and institutions from colonial times to the present with emphasis on how inherited and acquired identities (social capital) have shaped Americans' experiences as entrepreneurs, managers, workers, and consumers.

HIST137 Pursuits of Happiness: Ordinary Lives in the American Revolution (3 Credits)
Investigates the search for personal fulfillment unleashed by the American Revolution; explores the many different meanings ascribed to the notion of the 'pursuit of happiness' by Americans in the early national period.
Credit Only Granted for: HIST289E or HIST137.
Formerly: HIST289E.

HIST141 Carbon: Element at the Center of History (3 Credits)
Traces the history of the 'carbon' economy and its impacts from the Industrial Revolution to the present; treats the role of modern dependence on fossil fuels and their role in geopolitics.
Credit Only Granted for: HIST289B or HIST141.
Formerly: HIST289B.

HIST142 Looking at America through a Global Lens (3 Credits)
Looking at America will focus on a thematic approach to the study of foreign -- negative and positive -- perceptions of America in the 20th century.
Credit Only Granted for: HIST289I or HIST142.
Formerly: HIST289I.

HIST143 Power, Ritual, and Society in Western History (3 Credits)
Introduces students to influential works of political thinking, in the Western tradition from classical Antiquity to the present, that treat the relationship between power, ritual, and society. Investigates ritual and its relationships to power, both in reality and the imagination of political thinkers.
Credit Only Granted for: HIST289F or HIST143.
Formerly: HIST289F.

HIST187 God, Land, Power, and the People: Moral Issues in the Jewish Historical Experience (3 Credits)
Examines the complicated relationship between theology, nationalism, sovereignty, and the ethical exercise of social control using case studies drawn from the Jewish historical experience. The universal and age-old issues implicit in the exercise of power have gained special moral force for Jews with the creation of the State of Israel, a Jewish and a democratic state with substantial non-Jewish minorities and hundreds of thousands of non-citizen subjects. Can these be reconciled? Jewish efforts over the ages and in recent times to define justice provide concrete examples through which to examine and discuss crucial abstract principles.Cross-listed with: JWST187.
Credit Only Granted for: HIST187 or JWST187.

HIST189 Topics in History (1-3 Credits)
Thematic exploration of a topic in history at an introductory level with emphasis on understanding what historians do and how history is relevant in the contemporary world.
Repeatable to: 6 credits if content differs.

HIST200 Interpreting American History: Beginnings to 1877 (3 Credits)
The United States from colonial times to the end of the Civil War. Establishment and development of American institutions.
Credit Only Granted for: HIST156 or HIST200.
Formerly: HIST156.

HIST201 Interpreting American History: From 1865 to the Present (3 Credits)
The United States from the end of the Civil War to the present. Economic, social, intellectual, and political developments. Rise of industry and emergence of the United States as a world power.
Credit Only Granted for: HIST157 or HIST201.
Formerly: HIST157.

HIST204 Introduction to the History of Science (3 Credits)
An exploration of the roots of modern science from the ancient Greeks through the medieval and early modern periods. Focus on the men and women who helped to create the sciences and to change public perceptions of their disciplines.
Credit Only Granted for: HIST174 or HIST204.
Formerly: HIST174.

HIST205 Environmental History (3 Credits)
An exploration of the way different societies have used, imagined, and managed nature. Includes examination of questions of land use, pollution, conservation, and the ideology of nature, especially but not exclusively in Europe and North America.

HIST206 Introduction to the History of Technology (3 Credits)
Introduction to the history of major technological changes and innovations; examination of the revolutionizing potential of technology.
Credit Only Granted for: HIST175 or HIST206.
Formerly: HIST175.

HIST208 Historical Research and Methods Seminar (3 Credits)
Reading and research skills and methods. Research papers will be based on the topic of the seminar.
Restriction: Must be in History program.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: HIST208 or HIST220.
Formerly: HIST220.

HIST210 Love, Labor, and Citizenship: Women in America to 1880 (3 Credits)
An examination of the economic, family, and political roles of colonial, slave, immigrant, and frontier women in America from pre-industrial colonial period through the early stages of 19th-century industrialization and urbanization.Cross-listed with WMST210.
Credit Only Granted for: HIST210 or WMST210.

HIST211 Love, Labor, and Citizenship: History of American Women Since 1880 (3 Credits)
An examination of women's changing roles in working class and middle class families, the effects of industrialization on women's economic activities and status, and women's involvement in political and social struggles including those for women's rights, birth control, and civil rights.Cross-listed with WMST211.
Credit Only Granted for: HIST211 or WMST211.

HIST212 Women in Western Europe, 1750-Present (3 Credits)
An analysis of the economic, family, and political roles of European women from 1750 to the present. The effects of industrialization on women's work and status, the demographic parameters of women's lives, and women's participation in political events from market riots to suffrage struggles.Cross-listed with WMST212.
Credit Only Granted for: HIST212 or WMST212.

HIST213 History of Sexuality in America (3 Credits)
Explores the social construction of sexualities from the first colonial settlement to the modern era in the United States. Analyzes the implications of these understandings for power relations in U.S history.Cross-listed with: WMST298L.
Credit Only Granted for: HIST213 or WMST298L.

HIST215 Women in Western Europe to 1750 (3 Credits)
An exploration of the theories and rhetoric about the nature and existence of women in the West, focusing on the experience of women from the hegemony of Classical Greece to the French Revolution, an era that marks the beginning of a continuous process of change. Emphasis will be on the period between 1250 and 1750, when the Western European world was fundamentally altered in every aspect and in every level of society, culture, and government.
Credit Only Granted for: HIST215 or HIST219A.
Formerly: HIST219A.

HIST219 Special Topics in History (3 Credits)

HIST219I Religions of the Ancient Near East (3 Credits)
Introduction to ancient Near Eastern religious systems and mythology, from the third millennium BCE through the fourth century BCE. Particular emphasis on Mesopotamia and ancient Israel.Cross-listed with: JWST225, RELS219A.
Credit Only Granted for: JWST225, HIST219I, or RELS219A.

HIST220 The Atlantic World in the Age of Exploration, Conquest, and Settlement (3 Credits)
Study of encounters, exchanges, and clashes between Native Americans, Europeans, and Africans in the early modern Atlantic World. Examines conquest and colonial systems; movement of men and women and mixing of peoples, and the persistence of native folkways.
Credit Only Granted for: HIST219V or HIST220.
Formerly: HIST219V.

HIST221 Asian American History (3 Credits)
Introduction to the history of Asian Americans in the United States and the Americas and to the field of Asian American Studies, from an interdisciplinary perspective. Topics include theories of race and ethnicity; Asian migration and diaspora to the Americas; Asian American work and labor issues; gender, family, and communities; nationalism and nativism, and anti-Asian movements; Asian Americans in World War II, the Cold War, and the issues in the civil rights & post-civil rights era.Cross-listed with AAST201.
Credit Only Granted for: AAST201 or HIST221.

HIST222 Immigration and Ethnicity in America (3 Credits)
The history of immigration and the development of diverse populations i the United States are examined. Topics include related political controversies, the social experiences of immigrants, ethnicity, generations, migration, inter-group relations, race, and diversity in American culture.
Credit Only Granted for: AAST222 or HIST222.

HIST223 Globalizing the American Revolution (3 Credits)
An examination of the global forces that shaped the American Revolution and the international consequences of this nation's break with Britain.

HIST224 Modern Military History, 1494-1815 (3 Credits)
Survey of global military history from the European 'discovery' of the Americas to the end of the Napoleonic Wars. Explores how the creation of professional armies, advancement of weapons technology, and evolution of military-civilian relations in Europe during these three centuries sparked the 'Rise of the West'.

HIST225 Modern Military History, 1815-Present (3 Credits)
The military history of Europe through an examination of the economic, financial, strategic, tactical, and technological aspects of the development of military institutions and warfare from the Congress of Vienna in 1815 to the present.

HIST232 The Historical Development of London (3 Credits)
Study Abroad in London, England. The history of London, beginning with its foundation by the Romans, continuing with the city's progressive political and cultural domination of England, the British Isles and the British Empire, and concluding with a look at the city in the 20th century. Students look at London through the eyes of contemporaries and historians while forming their own impressions of the city during course-based walking tours of the city.
Restriction: Permission of Study Abroad Office required.
Credit Only Granted for: GNED288 and HIST232.
Formerly: GNED288.

HIST233 Empire! The British Imperial Experience 1558-1997 (3 Credits)
Britain's empire from the mid-sixteenth century to the late twentieth century, focusing on the encounter between Britain and indigenous peoples. Topics include the origins of British imperialism in Ireland and North America, the slave trade, the East India Company and India, women in empire, transportation and the making of Australia, sex in empire, missionaries, racial theories, and decolonization.
Credit Only Granted for: HIST219P or HIST233.
Formerly: HIST219P.

HIST234 Invaders, Conquerors, Usurpers: A History of Pre-Modern Britain to 1485 (3 Credits)
British history from Roman times to the 15th century. The Anglo-Saxon, Scandinavian, and Norman invasions; the coming of Christianity; Magna Carta, the development of Parliament, legal institutions, and the Common Law; the decline of medieval kingship.

HIST235 Divorced, Beheaded, Deposed: England and Britain 1485-1689 (3 Credits)
British history from the War of the Roses to the Hanoverian succession; Yorkist and Tudor society and politics; the Renaissance and Reformation in England, Henry VIII through Elizabeth I; 17th-century crises and revolutions; intellectual and cultural changes; the beginnings of empire; the achievement of political and intellectual order.

HIST236 From Peacocks to Punks: Modern Britain from 1688 to Today (3 Credits)
British history from the Glorious Revolution of 1688 to the present. The revolution of 1688; the structure of 18th-century society and politics; economic and social change in the Industrial Revolution; 19th- and 20th-century political and social reform; imperialism; the impact of the First and Second World Wars on British society.

HIST237 Russian Civilization (3 Credits)
An overview of Russian history stressing the main lines of development of the Russian state and the evolution of Russian culture to the present day.

HIST240 Europe in the Twentieth Century (3 Credits)
Political, cultural, and economic developments in 20th-century Europe.
Credit Only Granted for: HIST240 or HIST337.
Formerly: HIST337.

HIST245 Reformers, Radicals, and Revolutionaries: The Middle East in the Twentieth Century (3 Credits)
The 20th century was a period of dramatic changes in the Middle East. Within the global context of the two World Wars and the Cold War, countries in the region struggled with the effects of colonialism and painful processes of decolonization. The course offers a thematic-comparative approach to issues such as social and political reform, nationalism, the colonial experience, independence struggles, models of governance, political violence, and Islamism. Course lectures and the analysis and discussion of primary sources will lead students to understand that the peoples of the Middle East found answers to the challenges posed by Western dominance based on their specific historical, cultural and socio-economic circumstances.
Credit Only Granted for: HIST219W or HIST245.
Formerly: HIST219W.

HIST250 Colonial Latin America (3 Credits)
Introductory survey of the history of Latin America from pre-Columbian Indian cultures to the beginning of the wars for independence (ca. 1810), covering cultural, political, social, and economic developments. Major themes include conquest, colonialism, indigenous culture, African slavery, religion, race and ethnicity, and gender ideologies.Cross-listed with LASC250.
Credit Only Granted for: HIST250 or LASC250.

HIST251 Latin America Since Independence (3 Credits)
Introductory survey of the history of Latin America from the era of independence (c. 1810-1825) through the early 1980s. Major themes include independence and sovereignty, postcolonialism and neocolonialism, nation- and state-building, liberalism, citizenship, economic development and modernization, social organization and stratification, race and ethnicity, gender relations, identity politics, reform and revolution, authoritarianism and democratization, and inter-American relations.Cross-listed with HIST251.
Credit Only Granted for: HIST251 or LASC251.

HIST254 African-American History to 1865 (3 Credits)
Survey of the principal developments in the history and culture of the peoples of African descent in colonial North America and the United States to 1865. Examines the African past, the Atlantic slave trade, variation in slavery, the growth of free black communities, the transformations of families and cultural forms, and patterns of resistance.Cross-listed with: AASP298C.
Credit Only Granted for: HIST254 or AASP298C.

HIST255 African-American History, 1865 - Present (3 Credits)
An introductory course in the African-American experience in the United States from 1865 to the present. Topics include the aftermath of the Civil War on US race relations, the rise of segregation, northern migration, World War I and II, Civil Rights Movements, and the Black Power Movement.

HIST266 The United States in World Affairs (3 Credits)
A study of the United States as an emerging world power and the American response to changing status in world affairs. Emphasis on the relationship between internal and external development of the nation.

HIST269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HIST281 Inventing Traditions: The Making of Rabbinic Judaism (3 Credits)
Introduces the dramatic literary and cultural (as well as political and demographic) innovations that reshaped Judaism in late antiquity. Examines the fundamental works and genres of rabbinic literature and the religious movement that produced them. Special emphasis on the rabbinic uses of 'tradition' to enhance authority and legitimacy, and to foster group identity.Cross-listed with: JWST230, RELS219C.
Credit Only Granted for: HIST281 or JWST230.

HIST282 History of the Jewish People I (3 Credits)
Political, economic, social, and cultural development within Jewish history from the Biblical period to the late Middle Ages. Special attention to the emergence of Rabbinic Judaism and its subsequent encounter with medieval Christian and Islamic civilizations.Cross-listed with JWST234.
Credit Only Granted for: HIST282 or JWST234.

HIST283 History of the Jewish People II (3 Credits)
Political, economic, social, and cultural development within Jewish history from the end of Middle Ages to the present. Special attention to twentieth-century developments including the Nazi holocaust and its aftermath, the Zionist movement and the creation of the State of Israel; rise of the contemporary American Jewish community.
Credit Only Granted for: HIST283, HIST283H, JWST235, or JWST235H.

HIST284 East Asian Civilization I (3 Credits)
An interdisciplinary survey of the development of East Asian cultures. An historical approach drawing on all facets of East Asian traditional life, to gain an appreciation of the different and complex cultures of the area.

HIST285 East Asian Civilization II (3 Credits)
A survey of the historical development of modern Asia since 1700. Primarily concerned with the efforts of East Asians to preserve their traditional cultures in the face of Western expansion in the 18th and 19th centuries, and their attempts to survive as nations in the 20th century.

HIST286 The Jew and the City through the Centuries (3 Credits)
Jewish urban experience from ancient times to the present. Public space and private. The city and the sacred. Jewish ghettos and quarters. The struggle over modern Jerusalem.Cross-listed with JWST275.
Credit Only Granted for: HIST286 or JWST275.

HIST287 Why the Jews? Historical and Cultural Investigations (3 Credits)
Examines the history and culture of the Jews from the thirteenth century BCE/BC to the present through an examination of significant themes or problems (such as 'religion' or 'diaspora') that shape our understanding of the Jewish people. A primary focus in the course will be on texts, artifacts, and other cultural products by Jews and others that illustrate the history of the Jews help understand their cultural heritage.
Restriction: Must not have completed HIST282, HIST283, JWST234, or JWST235. Cross-listed with JWST233.
Credit Only Granted for: HIST287 or JWST233.

HIST299 Directed Research (1-3 Credits)
Closely guided research in primary sources for students currently enrolled in selected 100- or 200-level surveys in the Department of History.
Restriction: Permission of ARHU-History department.
Repeatable to: 9 credits if content differs.

HIST304 The Baddest Decade: The 1970s in American Film and American History (3 Credits)
The history of the United States and of its cinema in the 1970s.
Prerequisite: HIST201. Cross-listed with FILM352.
Credit Only Granted for: FILM352 or HIST304.

HIST306 History of Religion in America (3 Credits)
A history of religion, religious movements, and churches in America from the early Colonial period to the present, with special attention to the relation between church and society.
Prerequisite: HIST200, HIST201, HIST210, HIST211, HIST213, HIST254, or HIST255; or permission of instructor. Cross-listed with RELS346.
Credit Only Granted for: HIST306 or RELS346.

HIST307 The Holocaust of European Jewry (3 Credits)
Roots of Nazi Jewish policy in the 1930's and during World War II: the process of destruction and the implementation of the 'final solution of the Jewish problem' in Europe, and the responses made by the Jews to their concentration and annihilation.Cross-listed with JWST345.
Credit Only Granted for: HIST307 or JWST345.

HIST310 History of South Africa (3 Credits)
Explores the roots of Apartheid and the anti-Apartheid movement from precolonial times to the present: the social history of work and identity, the rise of kingdoms (Zulu, Sotho), conquest and colonial administration, urban and rural mass politics, gender relations, and the transition to democracy.
Formerly: HIST419E.

HIST319 Special Topics in History (3 Credits)
Repeatable to: 6 credits if content differs.

HIST320 Early Christianity: Jesus to Constantine (3 Credits)
Social and religious history of early Christianity from its origins in the first century to the reign of Constantine.
Prerequisite: Must have completed one course in ancient history at the 200 level. Cross-listed with JWST331.
Credit Only Granted for: HIST320 or JWST331.

HIST321 Biblical History and Culture (3 Credits)
Study of the political, social, and religious development of the Jewish nation from its inception to its return from exile in Babylonia around 536 C.E. Focus on biblical texts, archeological finds, and source materials from neighboring cultures to reconstruct political history and the development of religious concepts.Cross-listed with: JWST324.
Credit Only Granted for: HIST321, or JWST324.

HIST324 Classical Greece (3 Credits)
The ancient Greeks from Homer to Socrates, 800-400 B.C. Society and religion of the city-state, the art and literature of Periclean Athens, the Peloponnesian War, and the intellectual circle of Socrates.

HIST325 Alexander the Great and the Hellenistic Age (3 Credits)
History of the Greeks 400-30 B.C.: Alexander and the changes he wrought in the Mediterranean world; the rise of monarchies and leagues; new directions in religion, art, literature, and science; and Hellenization of the Near East, including the Jews.
Prerequisite: HIST111 or HIST110; or permission of instructor.

HIST326 The Roman Republic (3 Credits)
Ancient Rome 753-44 B.C., from its founding to the assassination of Julius Caesar. Rome's conquest of the Mediterranean world, the social and political forces that brought it about, and the consequent transformation and decline of the Republic.
Prerequisite: HIST111 or HIST110; or permission of instructor.

HIST327 The Roman Empire (3 Credits)
Roman history from Augustus to Heraclius, 44BC-641AD: The Imperial court and government; the diversity of culture in provinces and cities and the progress of Romanization; Roman religion and its transformation in late antiquity; the Roman army and defense of the frontiers.

HIST328 Selected Topics in History (3 Credits)
Repeatable to: 9 credits.

HIST328D Inventing Ancient Greek Culture (3 Credits)
Who were the ancient Greeks, and were they the founders of Western civilization' The course examines the foundations of ancient Greece. Through an analysis of the historical, archaeological, and linguistic evidence, it sheds light on the so-called Black Athena Controversy, which raised doubts about the ancient Greek contribution to Western culture. The course also focuses on the impact of modern identity politics on scholarly discussions of antiquity and the ways in which the Culture Wars of the 1980s and 1990s have influenced analyses of the ancient Greek world.Cross-listed with: CLAS311.
Credit Only Granted for: CLAS311 or HIST328D.

HIST328W Women in Classical Antiquity (3 Credits)
A study of women's image and reality in ancient Greek and Roman societies through an examination of literary, linguistic, historical, legal, and artistic evidence; special emphasis in women's role in the family, views of female sexuality, and the place of women in creative art. Readings in primary sources in translation and modern critical writings.Cross-listed with: CLAS320, WMST320.
Credit Only Granted for: CLAS320, WMST320, or HIST328W.

HIST329 Special Topics in History (1-3 Credits)
Repeatable to: 9 credits.

HIST330 Europe in the Making: The Early Medieval West (A.D. 300-1000) (3 Credits)
From one empire to another. Rome to Charlemagne. This period is approached as a crucible in which classical, Christian, and Germanic elements merged, yielding new experimental syntheses. This course will deal with issues of authority, cultural trends, and the formation of group solidarity.Cross-listed with RELS340.
Credit Only Granted for: HIST330 or RELS340.

HIST331 Europe in the High Middle Ages: 1000-1500 (3 Credits)
Medieval civilization in the 11th through 15th centuries. Emphasis on cultural and political developments of the high Middle Ages with study of the principal sources of medieval thought and learning, art and architecture, and political theory prior to the Renaissance.Cross-listed with RELS341.
Credit Only Granted for: HIST331 or RELS341.

HIST332 Renaissance Europe (3 Credits)
Intellectual developments in Italy and Northern Europe from 1300 to 1550 and their influence on the arts and religion; social and economic trends, including the rise of the commercial economy in cities; the family and the role of women in society; expansion of Europe overseas and the beginnings of colonization; emergence of the state and consequent changes in political theory.
Prerequisite: HIST112 or HIST111; or permission of instructor. Also offered as: RELS342.
Credit Only Granted for: HIST332 or RELS342.

HIST333 The European Reformations (3 Credits)
Examination of developments in European religion between 1450 and 1700; the late-medieval Church and its critics; rise of Protestant thought in Germany and its spread throughout Europe; reform efforts in the Catholic Church; religious wars and violence and their impact on state and society; consequences of religious reform in society and its impact on the family and women.
Prerequisite: HIST111; or permission of instructor. Cross-listed with R ELS343.
Credit Only Granted for: HIST333 or RELS343.

HIST336 Europe in the 19th Century, 1815-1919 (3 Credits)
The political, economic, social, and cultural development of Europe from the Congress of Vienna to the First World War.

HIST339 Special Topics in History (3 Credits)
Thematic exploration of a topic in history.
Repeatable to: 9 credits if content differs.

HIST344 Revolutionary Russia (3 Credits)
An exploration of the roots, dynamics, and consequences of the Russian Revolution of 1917. Major interpretations of the fall of tsarism, social and political forces at play, Leninism and Stalinism.

HIST352 America in the Colonial Era, 1600-1763 (3 Credits)
The founding of the English colonies in America and their European backgrounds, the reasons for the instability of colonial society to 1689 and the emergence of stable societies after 1689; the development of colonial regionalism, political institutions, social divisions, the economy, religion, education, urban and frontier problems in the eighteenth century.
Prerequisite: HIST200, HIST210, HIST213, or HIST254; or must have completed HIST156; or permission of instructor.

HIST353 America in the Revolutionary Era, 1763-1815 (3 Credits)
The background and course of the American Revolution and early nationhood through the War of 1812. Emphasis on how the Revolution shaped American political and social development, the creation of a new government under the Constitution, and the challenges facing the new nation.

HIST354 Ante-Bellum America 1815-1861 (3 Credits)
Traces how the strong nationalism after the War of 1812 transformed int the sectionalism that led to Civil War. The course concentrates on the controversies over slavery and other issues contributing to North-South antagonism, including Jacksonian democracy, capitalism, racism, immigration, manifest destiny and religious, social, and intellectual movements, each of which produced its own social tendencies and tensions.
Prerequisite: HIST200, HIST210, HIST213, HIST222, HIST254, or HIST275; or must have completed HIST156; or permission of instructor.

HIST355 Civil War and the Rise of Industrialization, 1860-1900 (3 Credits)
Civil War, sectional and class conflicts and their impact on American life and institutions from the beginning of the Civil War through the Gilded Age; social, economic, and political reconstruction of the Union; industrialization, urbanization, and technological changes.
Prerequisite: HIST200, HIST201, HIST210, HIST213, HIST222, HIST254, HIST255, or HIST275; or must have completed HIST156 or HIST157; or permission of instructor.
Credit Only Granted for: HIST355 or HIST364.

HIST356 Emergence of Modern America, 1900-1945 (3 Credits)
The emergence of modern institutions and identities, 1900-1945. These institutions may include corporate enterprises and the welfare state; identities include homosexuality, the New Woman, and the New Negro.
Prerequisite: HIST201, HIST211, HIST213, HIST222, HIST255, or HIST275; or must have completed HIST157; or permission of instructor.

HIST357 Recent America: 1945-Present (3 Credits)
American history from the inauguration of Harry S. Truman to the present with emphasis upon politics and foreign relations, but with consideration of special topics such as radicalism, conservatism, and labor.
Prerequisite: HIST201, HIST211, HIST213, HIST222, HIST255, or HIST275; or must have completed HIST157; or permission of instructor.

HIST360 Women and the Civil Rights Movement (3 Credits)
Twentieth-century U.S. civil rights movement from the vantage point of women, considering both women's involvement in the legal campaigns and political protests and the impact of civil rights struggles on women's condition, status, and identity.

HIST361 Metropolitan Change and Modern America: Cities, Suburbs, Hinterlands (3 Credits)
An exploration of the forces that have transformed metropolitan and rural life since the mid-19th century. What role have politics, policy, economics, and ideology/culture played in creating an urbanized and then a 'suburbanized' nation?
Prerequisite: HIST201, HIST211, HIST222, or HIST255; or must have completed HIST157; or permission of instructor.
Credit Only Granted for: HIST419B or HIST361.
Formerly: HIST419B.

HIST369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HIST370 Jews and Judaism in Antiquity I: Sixth Century BCE through the First Century CE (3 Credits)
Political, social, and religious history of the Jews from the Persian period to the Judean revolt of 66-70 CE. Special attention to the rise of sectarian and revolutionary movements.Cross-listed with JWST325.
Credit Only Granted for: HIST370 or JWST325.

HIST371 Jews and Judaism in Antiquity II: First through Seventh Century (3 Credits)
Political, social, and religious history of the Jews from the destruction of the Jerusalem Temple in 70 CE to the Muslim conquests. Special attention to the political transformation of Judaism under late Roman Christianity, and the rise of the Rabbinic movement.
Recommended: HIST370. Cross-listed with JWST326.
Credit Only Granted for: HIST371 or JWST326.

HIST373 Jews in Early Modern Times 1450-1750 (3 Credits)
Emergence of new powerful population centers, religious and cultural creativity, new forms of community, and radical messianic movements.
Recommended: HIST282 or JWST234. Cross-listed with JWST333.
Credit Only Granted for: JWST333, HIST373, HIST418C/JWST419C (Fall 2006, Fall 2004) or HIST419C/JWST419Y (Spring 2001).
Formerly: HIST419C.

HIST375 Modern Jewish History II: World Jewry Since 1870 (3 Credits)
Social, political, economic, and cultural change in the Jewish world since 1870. Emphasis on emancipation, assimilation, and new forms of Jewish identity in Western and Eastern European Jewry from the 19th Century to the present.Cross-listed with JWST344.
Credit Only Granted for: HIST375 or JWST344.

HIST376 History of Modern Israel (3 Credits)
History of modern Israel since the beginning of the Zionist settlement in 1882. Attention to different interpretations and narratives of Israel's history, including the historical and ideological roots of Zionism, the establishment of the State of Israel, ideological forces, wars, and the triumphs and crises of democracy.Cross-listed with ISRL342.
Credit Only Granted for: HIST376 or ISRL342.

HIST382 Law and Culture in Late Imperial China (3 Credits)
An exploration of Chinese law and its social/cultural implications in the late imperial period (1550s-1900s). Major interpretations of the conceptions of law and justice, the functioning of the judicial system, and local courts. An introduction to society and culture, politics and the bureaucracy, family and gender relations, and literature and popular religion of China through the lens of law.

HIST386 Experiential Learning (3-6 Credits)
The History Department's Internship program. Pre-professional experience in historical research, analysis, and writing in a variety of work settings.
Restriction: Permission of ARHU-History department; and junior standing or higher.

HIST395 Honors Colloquium I (3 Credits)
History and theory: the conceptual underpinnings of the historical discipline. Students evaluate several contrasting theories of history. Prerequisite for other honors courses.
Restriction: Permission of ARHU-History department; and must be in History program.

HIST396 Honors Colloquium II (3 Credits)
Uses a seminar approach to examine a major problem of historical interpretation across two or more diverse cultures in different periods. Topics vary and include: religion and society, the city in history, gender, slavery and emancipation, and modernization.
Prerequisite: Permission of ARHU-History department; or HIST395.
Restriction: Must be in History program.

HIST398 Honors Thesis I (3 Credits)
Individual research and preparation of History Honors Theses.
Prerequisite: HIST395 and HIST396.
Restriction: Must be in History Honors program.

HIST399 Honors Thesis II (3 Credits)
Individualized research and preparation of History Honors Theses.
Prerequisite: HIST395, HIST396, and HIST398.
Restriction: Must be in the History Honors program.
Formerly: HIST398.

HIST401 Science and Gender (3 Credits)
Examines the role of women and gender in the history of science. Includes consideration of barriers to women's participation in science; women's role as scientific subjects and researchers; and questions about the scientific construction of gender and the gendered construction of science.
Credit Only Granted for: HIST401 or HIST429R.
Formerly: HIST429R.

HIST404 History of Modern Biology (3 Credits)
The internal development of biology in the 19th and 20th centuries, including evolution, cell theory, heredity and development, spontaneous generation, and mechanism-vitalism controversies. The philosophical aspects of the development of scientific knowledge and the interaction of biology with chemistry and physics.

HIST405 Environmental History (3 Credits)
An introduction to the key issues and methods of environmental history. The scope of the subject is discussed, as well as its relationship with other disciplines, such as ecology, anthropology, and geography. A primary focus is environmental change in history with emphasis on the American experience.

HIST406 History of Technology (3 Credits)
The changing character of technology in modern history, beginning with the Middle Ages. Concentrates on the Industrial Revolution and its aftermath, the nature of technological knowledge and the sources of technological change.

HIST407 Technology and Social Change in History (3 Credits)
Social consequences of technological innovations and the ways in which societies have coped with new technologies.

HIST408 Senior Seminar (3 Credits)
A capstone course for history majors, designed to increase historical knowledge and the ability to analyze texts and arguments. Topics will focus on the literature of a particular field and primary-source research.
Restriction: Must be in History program.
Repeatable to: 6 credits if content differs.

HIST412 History of Women and Gender in Africa (3 Credits)
An examination of socio-economic and cultural change in Africa from the dawn of the colonial era in the 19th century to independence in the mid-twentieth century. Major focus on how African women understood and responded to the expansion of European empires, changes in the colonial economy, and impact of westernization and urbanization.
Prerequisite: HIST122 or HIST123; or permission of ARHU-History department.
Credit Only Granted for: HIST412 or HIST428L.
Formerly: HIST428L.

HIST413 Revolutionary Prophets: Political and Religious Movements in Africa and the Atlantic World (3 Credits)
In the expanding nineteenth-century and twentieth-century culture of the 'Black Atlantic' world, investigates the intersection of African cultures, modern nationalism, prophetism, millenarianism, and social change.
Recommended: HIST122 or HIST123.
Credit Only Granted for: HIST413 or HIST419V.
Formerly: HIST419V.

HIST415 Ideas and Politics in Europe Since 1900 (3 Credits)
Examination of intersection of ideas and politics in Europe since 1900. Focus will be on advocates of liberalism, social democracy, fascism, Nazism, communism, and conservatism and their impact on politics and policy since 1900.

HIST416 History of Slavery and the Slave Trade in Africa (3 Credits)
Examines the history and impact of the slave trade on African states, societies, and economies. Investigates the meaning of slavery in Africa, the local uses of slavery there and Africa's connections to the Trans-Saharan, Red Sea, and Trans-Atlantic slave trades.
Credit Only Granted for: HIST416 or HIST419Y.
Formerly: HIST419Y.

HIST417 Colonial Encounters: Natives, Spaniards, and Africans in the New World (3 Credits)
An exploration of the discourses and practices of the Spanish colonial project in the New World and the ways in which Indians and Blacks were incorporated into or excluded from that project. Also examines native and African resistance and adaptation to Spanish rule, and the process of transformation and hybridization of Spanish, native and African cultures in Spanish America. An analysis of recent historiographical developments that have profoundly changed the understanding of the Spanish conquest and colonization of the New World.
Recommended: HIST220 and HIST250.
Credit Only Granted for: HIST417 or HIST428Y.
Formerly: HIST428Y.

HIST418 Jews and Judaism: Selected Historical Topics (3 Credits)
Prerequisite: HIST281, HIST283, HIST106, HIST286, or HIST282; or permission of instructor.
Repeatable to: 6 credits if content differs.

HIST419 Special Topics in History (3 Credits)
Repeatable to: 9 credits if content differs.

HIST421 Medieval Heresies (3 Credits)
An examination of twelfth- and thirteenth-century heresies in the medieval West. Consideration of why so many heretics emerged, and how the church attempted to deal with them, and what effect their persecution had on Europe both then and later. Special attention given to groups that stood on the fine line between heresy and orthodox religion.
Credit Only Granted for: HIST408L or HIST421.
Formerly: HIST408L.

HIST425 Imperial Russia (3 Credits)
The rise and fall of the Russian Empire, Peter the Great to the collapse of tsarism in revolution. Emphasis on the evolution of autocracy, social groups, national identities, and cultural change.

HIST427 Age of Decline: Britain 1914 to Present (3 Credits)
British society since the First World War. The social, cultural, economic, and political impact of the First World War; labor and politics in the 1920s and 1930s; the inter-war Depression, appeasement and foreign policy; the social impact of the Second World War; the welfare state and nationalization of industry; the dissolution of Empire; the emergence of a consumer society; social criticism in the 1950s; the economic and political problems of the 1960s and 1970s.

HIST428 Selected Topics in History (3 Credits)
Repeatable to: 9 credits.

HIST429 Special Topics in History (3 Credits)
Repeatable to: 9 credits.

HIST430 Reformations in Politics, Religion, and Gender: England 1485-1603 (3 Credits)
An examination of the political, religious, and social forces in English life, 1485-1603, with special emphasis on Tudor government, the English reformation, and the Elizabethan era.

HIST431 Becoming Great Britain, 1603-1704 (3 Credits)
An examination of the political, religious, and social forces in English life, 1603-1714, with special emphasis on Puritanism and the English revolutions.

HIST433 Strategic Military Theory: Clausewitz (3 Credits)
An exploration of Clausewitzian thought. Topics include the conduct of fighting and war planning, the relationship of war and politics, guerrilla war, the principles of concentration of force, the Clausewitzian trinity, absolute war and real war, unlimited and limited war, the relative strengths of the defense and the attack, and the intuitive sources of strategic decision.
Credit Only Granted for: HIST419J or HIST433.
Formerly: HIST419J.

HIST436 Napoleon, the French Revolution and the World (3 Credits)
An argument for the broad continuity between the revolutionary and Napoleonic wars.

HIST437 Modern France from Napoleon to DeGaulle (3 Credits)
The changing political and cultural values of French society in response to recurrent crises throughout the 19th and 20th centuries. Students should have had some previous survey of either Western civilization or European history.

HIST440 Germany in the Nineteenth Century, 1815-1914 (3 Credits)
Examines the social, economic, cultural, and political development of the major German states before 1871 and of Germany, excluding Austria, from 1871 to 1914.

HIST441 Germany Since 1900 (3 Credits)
Course places Nazism in context of German and European history. Topics include collapse of German democracy and the establishment of the Nazi dictatorship; the role of Hitler; the response of political, military, economic, diplomatic, legal, media, theological elites and the broader population; the mix of terror, consent and coercion; propaganda and Nazi culture; contours of Nazi racial ideology and anti-Semitism and their impact on domestic and foreign racial policy; the economic history of the Nazi regime; foreign policy from rearmament to launching World War II to expansion and defeat; Jewish policy from the years of persecution to those of extermination; Nazi policy in Eastern and Western Europe, towards the United States, and towards North Africa and the Middle East; why the Allies won World War II and why and how Nazi Germany was defeated; the nature of the Allied occupation after 1945; the Nuremberg war crime trials; aftermath of facing and avoiding the crimes of the Nazi regime in West and East Germany.

HIST442 Twentieth-Century Russia (3 Credits)
Russia and the Soviet Union from the fall of the tsars to the post-communist present. Impact of Leninism, Stalinism, and Soviet Communism on state, society, culture, and nationality.

HIST446 Old Regime France, 1589-1789 (3 Credits)
An exploration of the demographic patterns of the seventeenth and eighteenth centuries. Examination of arguments that the population was governed by Malthusian constraints; the social structure of the time; the nature of the elites; the debate over the phrase 'rise of the bourgeoisie'; the Enlightenment both as an intellectual phenomenon and as a social agent; and arguments that Enlightenment led to the desacralization of the monarchy.
Credit Only Granted for: HIST419I or HIST446.
Formerly: HIST419I.

HIST447 Riot, Law and Justice in European History (3 Credits)
An examination of the role of violence and the attempt of law to contain or punish it. Major interpretations of societal codes of honor, retribution, and punishment, and how violence is governed by these codes.
Credit Only Granted for: HIST428C or HIST447.
Formerly: HIST428C.

HIST450 American Capitalism: 1600-1900 (3 Credits)
This course explores the transformation of economic life in what became the United States from pre-colonial times to 1900, with special emphasis on economic interactions among Native American, Mexican, and European societies; how and why capitalism took root and became dominant; economic dimensions of the Revolutionary and Civil Wars; why the North, South, and West followed distinct economic paths; the revolutions in transportation and communications; slavery as a business system; causes and consequences of industrialization; and trends in the distribution of wealth and income.
Prerequisite: HIST200, HIST210, HIST213, HIST222, HIST254, HIST275, or HIST311; or permission of instructor.

HIST451 American Capitalism: 1900 to Present (3 Credits)
An examination of the evolution of American capitalism from 1900 to the present, with special attention on the emergence of the United States as the world's leading economic power; the impact of big business on work and government regulation; causes and consequences of the Great Depression; the role of business in the two world wars; postwar growth followed by the decline of U.S. global competitiveness; why consumerism occupied a central role in U.S. history; the influence of economic theory on policymaking; realities and mythologies of Reaganomics and Clintonomics; and the economic impact of the digital revolution.
Prerequisite: HIST201, HIST211, HIST213, HIST222, HIST255, or HIST275; or permission of instructor.

HIST452 Diplomatic History of the United States to 1914 (3 Credits)
American foreign relations from the American Revolution to the beginning of World War I. International developments and domestic influences that contributed to American expansion in world affairs. Analyses of significant individuals active in American diplomacy and foreign policy.

HIST453 Diplomatic History of the United States from 1914 (3 Credits)
American foreign relations in the 20th century. World War I, the Great Depression, World War II, the Cold War, the Korean War, and Vietnam. A continuation of HIST452.

HIST454 Constitutional History of the United States: From Colonial Origins to 1865 (3 Credits)
The interaction of government, law, and politics in the constitutional system. The nature and purpose of constitutions and constitutionalism; the relationship between the constitution and social forces and influences, the way in which constitutional principles, rules, ideas, and institutions affect events and are in turn affected by events. The origins of American politics and constitutionalism through the Constitutional Convention of 1787. Major constitutional problems such as the origins of judicial review, democratization of government, slavery in the territories, secession, and civil war.

HIST455 Constitutional History of the United States: Since 1865 (3 Credits)
American public law and government, with emphasis on the interaction of government, law, and politics, and the relationship between the constitution and social forces and influences, the way in which constitutional principles, rules, ideas, and institutions affect events and are in turn affected by events. Major crises in American government and politics such as Reconstruction,the rise of corporate power, civil liberties during wartime, the New Deal era, the civil disorders of the 1960s.

HIST457 History of American Culture and Ideas Since 1865 (3 Credits)
A continuation of HIST456, from the Civil War to the present.
Prerequisite: HIST201, HIST211, HIST213, HIST222, HIST255, or HIST275; or must have completed HIST157; or permission of instructor.

HIST459 Society in America: Historical Topics (3 Credits)
A consideration of selected aspects of American society from colonial times to the present. Special emphasis on regionalism, immigration, nativism, minorities, urbanization, and social responses to technological changes.
Repeatable to: 6 credits if content differs.

HIST460 History of Labor in the United States (3 Credits)
The American working class in terms of its composition; its myths and utopias; its social conditions; and its impact on American institutions.
Prerequisite: HIST200, HIST201, HIST210, HIST211, HIST222, HIST255, or HIST275; or must have completed HIST156 or HIST157; or permission of instructor.

HIST462 Slavery, Sectionalism, and the U.S. Civil War (3 Credits)
Slavery, sectionalism, and the coming of the Civil War. Resources and strategy of the Confederacy and the Union, the war's changing character, emancipation and its consequences, conditions on the home front, and the wartime origins of Reconstruction.

HIST463 History of the Old South (3 Credits)
The golden age of the Chesapeake, the institution of slavery, the frontier South, the antebellum plantation society, the development of regional identity, and the experiment in independence.

HIST466 Immigration and Ethnicity in the U.S. (3 Credits)
Seminar exploring historical problems relating to US immigration, race, and ethnicity since 1848, with emphasis on cultural impacts of migration on immigrants, their children, and U.S. society.
Prerequisite: AAST200, AAST201, AAST222, HIST200, HIST201, HIST221, or HIST222; or must have completed HIST156 or HIST157; or permission of ARHU-History department.
Credit Only Granted for: AAST498L or HIST466.

HIST467 Women and Reform Movements in the Twentieth-Century United States (3 Credits)
Investigation of women's participation in such twentieth-century reform movements as the labor movement, the struggle for racial justice, social welfare reform, and women's movements. Will ask how race, class, and gender were implicated in the ways that women agitated for social political change.
Recommended: HIST201, HIST211, or HIST255.
Credit Only Granted for: HIST467 or HIST429E.
Formerly: HIST429E.

HIST469 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

HIST471 History of Brazil (3 Credits)
The history of Brazil with emphasis on the national period.
Prerequisite: LASC234, HIST251, HIST250, or LASC235; or permission of instructor.

HIST473 History of the Caribbean (3 Credits)
Offers a concise introduction to the history of the Caribbean regions from the Columbian voyages to the 20th century. Special emphasis is given to the dynamics of local social and cultural formations within the framework of the political and economic history of the Atlantic world.
Prerequisite: HIST112, HIST113, HIST122, HIST123, HIST240, HIST250, or HIST251.

HIST474 History of Mexico and Central America I (3 Credits)
History of Mexico and Central America, beginning with the pre-Spanish Indian cultures and continuing through European contact, conquest, and colonial dominance, down to the beginning of the Mexican War for Independence in 1810.
Prerequisite: LASC234, HIST251, or LASC235; or permission of instructor.

HIST475 History of Mexico and Central America II (3 Credits)
A continuation of HIST474 with emphasis on the political development of the Mexican nation.
Prerequisite: LASC234, HIST251, or LASC235; or permission of instructor.

HIST476 Jews in Medieval Times 1000-1450 (3 Credits)
Social and cultural life of Jewish communities spread throughout Islam and Christendom. Major topics include the Gaonate, kehila organizations, legal, rationalist, and mystical thought, and the context of rising animosity against Jews linked to the Crusades and changing Church doctrines.
Recommended: HIST282, HIST330, HIST331, or JWST234. Cross-listed with J WST432.
Credit Only Granted for: HIST476 or JWST432.

HIST477 Transnational Blackness in the Americas (3 Credits)
The African diaspora is a concept that attempts to comprehend the shared experiences of African-descended peoples throughout the world, particularly in the Americas. While many of these peoples identify with a particular nationality (being Brazilian, Cuban, or from the United States above or alongside being black, of color, or of African descent), many of them have forged connections with each other across national boundaries and recognized commonalities that transcend their national contexts. This class will use fiction, memoir, and recent historical scholarship to explore the history of the links that Afro-Latin American and Afro-North Americans have created in the nineteenth and twentieth centuries. Ultimately, the course will help us understand the historical possibilities and limitations of conceiving of African Americans as a hemispheric, transnational social group.

HIST481 A History of Modern China (3 Credits)
Modern China from 1644 to the People's Republic of China. Emphasis on the coming of the West to China and the various stages of the Chinese reaction.

HIST482 History of Japan to 1800 (3 Credits)
Traditional Japanese civilization from the age of Shinto mythology and introduction of continental learning down to the rule of military families, the transition to a money economy, and the creation of a townsmen's culture. A survey of political, economic, religious, and cultural history.

HIST483 History of Japan Since 1800 (3 Credits)
Japan's renewed contact with the Western world and emergence as a modern state, industrial society, and world power, 1800-1931; and Japan's road to war, occupation, and recovery, 1931 to the present.

HIST484 Cultural History of the Chinese Revolutions (3 Credits)
Examines the cultural origins, experience, and results of the Cultural Revolution in China.
Recommended: HIST481 or HIST285.
Credit Only Granted for: HIST419G or HIST484.
Formerly: HIST419G.

HIST486 Social Issues in Modern China (3 Credits)
Explores the problems surrounding family, community, and social life in modern China, including a focus on issues that affect groups and subcultures within the population. Examines as well the political system's capacity to regulate this complex society.
Recommended: HIST285; and HIST481.
Credit Only Granted for: HIST419N (Fall2007) or HIST486.
Formerly: HIST419N.

HIST491 History of the Ottoman Empire (3 Credits)
Survey of the Ottoman Turkish Empire from 1300 A.D. to its collapse during World War I. Emphasis on the empire's social and political institutions and its expansion into Europe, the Arab East and North Africa.

HIST492 Women and Society in the Middle East (3 Credits)
Examines the customs, values, and institutions that have shaped women's experience in the Middle East in the past and in the contemporary Middle East.
Recommended: Must have completed prior coursework in Middle East studies or gender studies. Cross-listed with WMST456.
Credit Only Granted for: HIST492 or WMST456.

HIST495 Women in Medieval Culture and Society (3 Credits)
Medieval women's identity and cultural roles: the condition, rank and rights of medieval women; their access to power; a study of women's writings and the constraints of social constructs upon the female authorial voice; and contemporary assumptions about women.Cross-listed with WMST455.
Credit Only Granted for: HIST495 or WMST455.

HIST499 Independent Study (1-3 Credits)
Restriction: Permission of ARHU-History department.
Repeatable to: 6 credits.

HISX - History Education Abroad

HISX300 Scandinavia in the Middle Ages: from Viking Warriors to Christian Knights (3 Credits)
Focuses on the development of Denmark, Norway, and Sweden as kingdoms in the Middle Ages, both in terms of internal relations and contact, conflict, and exchanges with continental Europe and the wider world. We examine state building and law-making, Christianization and church organization, feuds, rebellions, and warfare, the Baltic crusades and forced conversion of pagans, literary and cultural developments, as well as migration and border-crossing. The aim of the course is to consider these phenomena in the intersection between cultural adaptation and domestic creativity; to what extent does Scandinavia adapt to wider European trends, and to what extent are they independently formed?
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

HISX301 History of Sweden in Europe and the World (3 Credits)
Sweden's historical relationships to the Baltic Region, Europe and the US. We will look at the Great Power Era, the poverty and mass emigration of the 19th century, the internationally famous inter-war Middle Way; we will then consider Sweden's role in World War II and the Cold War, as well as the current impact of neoliberalism and globalization. Our focus, throughout, will be on Sweden's international profile and power, and the influence of this, in turn, on Sweden's national identity and future.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

HISX302 Barcelona: the City and its History (3 Credits)
This is a course that emphasizes the historical development of Barcelona from Pre-Roman times until nowadays. Although this course has a dominant historical approximation, other disciplines will be also taken into account, such as art, literature, architecture and urbanism.
Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

HLMN - Hillman Entrepreneurs Program

HLMN470 Fundamentals of Entrepreneurial Ventures (3 Credits)
Learn the processes and skills needed to launch and manage start-up ventures, including technology startups. Assess the feasibility of a startup ventures, as well as how to apply best practices for planning, launching, and managing new companies by using real-world examples and in-depth case studies. Discuss a wide range of issues of importance and concern to entrepreneurs and learn to recognize opportunity, assess the skills and talents of successful entrepreneurs, and learn models and approaches that help navigate uncertainty.
Restriction: Restricted to students in the Southern Management Leadership Program.
Credit Only Granted for: HLMN470, SMLP470, ENES460 or BMGT461.
Formerly: HLMN470.
Additional Information: SMLP470 may not count toward any BMGT major or minor degree.

HLMN471 Entrepreneurial Finance (3 Credits)
Examine the elements of entrepreneurial finance, develop and analyze financial statements, focusing on technology-based startup ventures and the early stages of company development. Address key questions that challenge all entrepreneurs: how much money can and should be raised; when it should be raised and from whom; how to define a reasonable valuation of a company; and how to structure funding, develop employment contracts, and make exit decisions. Analyze the variety of financing models across a venture's life cycle, with an aim to understanding the incentives of each type of investor and the relative costs and benefits of each source of funding.
Restriction: Restricted to students in the Southern Management Leadership Program.
Credit Only Granted for: HLMN471, SMLP471, ENES466 or BMGT365.
Formerly: HLMN471.
Additional Information: SMLP471 may not count toward any BMGT major or minor degree.

HLMN472 Strategies for Innovation & Entrepreneurship (3 Credits)
Understand the process of technological change; the ways that firms come up with innovations; the strategies that firms use to benefit from innovation; and how to create new value not only through new products or services, but with novel technologies, business concepts, organizing structures, transaction/financing mechanisms, distribution channels, and market segmentation. Challenge students to think about how to create value and build a productive business organization with available resources (e.g. intelligence, insight, energy, initiative and personal relationships).
Restriction: Restricted to students in the Southern Management Leadership Program.
Credit Only Granted for: HLMN472, SMLP472, BMGT467, or ENES463.
Formerly: HLMN472.
Additional Information: SMLP472 may not count toward any BMGT major or minor degree.

HLSA - Health Services Administration

HLSA300 Introduction to Health Policy and Services (3 Credits)
A multidimensional view of public health policy and services. Through interactive discussion of assigned readings, team-based learning, and supplementary lecture, students will learn about the nature of and development of policy, public health policy, and financing and delivery of health care services. This course will place a significant emphasis on a team-based learning approach to understanding the health care system and health care reform.
Prerequisite: Must have completed or be concurrently enrolled in SPHL100 or PHSC300.
Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.
Credit Only Granted for: SPHL498P or HLSA300.
Formerly: SPHL498P.

HLSA465 Creating Headspace: Designing Solutions to Address Mental Health and Wellness for UMD Students (3 Credits)
Students will use Design Thinking to create, reshape, redesign and transform the ways in which mental health and wellness is perceived and addressed on the campus. This course will incorporate students and the UMD community as stakeholders in designing, planning and contributing to developing solutions that leverage existing mental health resources or create new pathways to improve mental health and wellness at UMD. Students will learn and use design thinking skills to enhance public health practice skills in project proposals and grant writing.
Prerequisite: EPIB315 and HLTH366.

HLSA484 Redesigning Health Care: Developing a Clinic to Meet Community Needs (3 Credits)
Provides an opportunity for students to learn a key entrepreneurial skill, Design Thinking, while helping to build, reshape, redesign and transform delivery of health care in the Mona Center, a new community center and clinic in Prince George's County. This new, modern vision for a health and wellness clinic embraces student involvement in designing, planning and contributing to innovative programs, solutions, and processes to improve the clinic's ability to meet community and patient needs by addressing the social determinants of health as well as traditional clinical health status. Students in the class will develop empathy for patients, providers and other stakeholders, define problems, select a specific problem for intervention, understand problems based on stakeholder input, ideate, reframe and suggest options to solve or address the problem, prototype solutions, test ideas, and make recommendations to inform implementation and ongoing measurement and monitoring of impact.
Restriction: Must have completed a minimum of 60 credits.
Additional Information: Two sessions will be on-site at the Mona Clinic in Temple Hills, MD, and the remaining sessions will be taught in the University of Maryland's Academy for Innovation and Entrepreneurship.

HLSC - Integrated Life Sciences

HLSC100 Students in the University: Integrated Life Sciences (1 Credit)
In a small classroom setting, Integrated Life Sciences students learn about academic resources on and off campus.
Restriction: Must be in the Honors College Integrated Life Sciences program.
Credit Only Granted for: EDCP108O, HLSC100, HONR100, or UNIV100H.

HLSC207 Principles of Biology III Organismal Biology (3 Credits)
The diversity, structure and function of organisms as understood from the perspective of their common physicochemical principles and unique evolutionary histories.
Prerequisite: (BSCI160 and BSCI161; or BSCI106); and (BSCI170 and BSCI171; or BSCI105). Or students who have taken courses with comparable content may contact the department.
Restriction: Must be in the Honors College Integrated Life Sciences program.
Credit Only Granted for: BSCI207, BSCI279D, or HLSC207.

HLSC217 The British Masters of Science (3 Credits)
The British Masters of Science will look at the British Scientists who have been at the forefront of some of history's greatest advances and have shaped science as we know it today. This London study abroad program will explore these scientific masters in the city where they made their great contributions, visiting the places where they lived and worked to experience the historic foundations of science.
Restriction: Must be in the Integrated Life Sciences Honors Program.

HLSC322 Principles of Genetics and Genomics (4 Credits)
Principles and mechanisms of heredity and gene expression, with a focus on the application of genomics to contemporary medicine, biotechnology, and societal issues.
Prerequisite: HLSC207.
Restriction: Must be in a major in UGST-HCOL-Integrated Life Sciences Program.
Credit Only Granted for: HLSC322 or BSCI222.

HLSC374 Mathematical Modeling in Biology (4 Credits)
Students will learn empowering mathematical techniques through the understanding of biological models. Models are chosen from a variety of biological disciplines. Mathematical skills that will be developed along the way include: solving non-linear difference equations, eigenvector analysis, and the implementation of these algorithms as computer models.
Prerequisite: MATH131, MATH136, or MATH141. Cross-listed with BSCI374.
Credit Only Granted for: BSCI374, BSCI474, or HLSC374.
Additional Information: The HLSC374 version of this course is restricted to students in the Honors College Integrated Life Sciences program.

HLSC377 Research and Application in Life Sciences (3 Credits)
A skills based course covering current research in the life sciences emphasizing novel approaches to complex real-word problems having a biological basis.
Prerequisite: HLSC207 and HLSC322.
Restriction: Must be in the Integrated Life Sciences honors program.

HLTH - Health

HLTH106 Drug Use and Abuse (3 Credits)
An interdisciplinary analysis of contemporary drug issues and problems. The course will examine physiological, psychological, social, philosophical, historical, legal and health aspects of drug use and abuse. Special attention will be focused on those general motivations for drug use that attend life on the college campus.

HLTH124 Introduction to Behavioral and Community Health (1 Credit)
Required of first semester Community Health majors to expose them to introductory-level concepts within the field of behavioral and community health as well as the Community Health degree program. Includes discussion on the delivery of behavioral and community health at the local, state, national, and global levels; career opportunities in the diverse sectors of the community health field; undergraduate programmatic information; and strategies for student success.
Restriction: Must be in a major within the SPHL-Behavioral & Community Health department.

HLTH130 Introduction to Public and Community Health (3 Credits)
An introduction to the theory and practice of public and community health. The influence of public health professionals on the past, present, and future health status of society through the examination of critical health issues will be described. Programming models, theories and policy development are included.

HLTH140 Personal and Community Health (3 Credits)
Meaning and significance of physical, mental and social health as related to the individual and to society; important phases of national health problems; constructive methods of promoting health of the individual and the community.

HLTH170 The Corporate Footprint: How Industries Influence the Public's Health (3 Credits)
As public health advocates strive to protect, promote and advance the health of our communities, they sometimes find their efforts in conflict with the activities of corporations and their industry associations. This course will provide an overview of how various industries from Big Pharma to Tobacco Corporations have launched successful campaigns to influence policymakers, counter science and at times mislead the public on the harms of products to the health of communities. Students will also contemplate whether the relationship between corporations and public health advocates can ever be collaborative rather than contentious.

HLTH200 Introduction to Research in Community Health (3 Credits)
An overview of specific components and steps involved in the community health research process. Content includes, foundations of research, sampling, measurement design, and analysis in a community context.
Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH230 Introduction to Health Behavior (3 Credits)
Psychological, social psychological, and sociological approaches to the following health areas: development of health attitudes and behavior, patient-provider interaction and the organization of health care.

HLTH234 Global Health Messages: Understanding Exposure & Impact. (3 Credits)
Using a global perspective, this course teaches students to be critical consumers of current and historical health communication interventions. It also provides students with the skills to develop media interventions that target specific and general populations. Students will discover the array of diverse media messages that influence the health and well-being of individuals and communities.

HLTH242 Sex in the City: An Interdisciplinary Public Health Assessment (3 Credits)
An examination of risky sexual behavior from an interdisciplinary public health perspective. How biological psychological, as well as sociological influences make individuals vulnerable to practicing risky sexual behavior and how public health systems and government policies attempt to identify and prevent the spread of disease.
Restriction: Must be in Community Health program; or non-major with less than 45 credits.

HLTH244 Public Health and Aging (3 Credits)
A broad overview of public health and aging issues as well as the barriers to achieving a healthful lifestyle through old age. Emphasis will be placed on socio-cultural, historical, political, economic, and behavioral factors.
Restriction: Must be in Community Health program; or non-major with less than or equal to 45 credits.
Additional Information: Priority in enrollment will be given to Community Health (HLTH) majors. Can be used by HLTH majors as a health elective.

HLTH246 The U.S. Tobacco Epidemic (3 Credits)
Tobacco is the leading cause of preventable death in the U.S. Course provides an overview of the tobacco epidemic including history, health effects, economic costs, policy, surveillance, and prevention, in addition to additional products like e-cigarettes, vaping and hookahs. .

HLTH264 Tweets & Likes: Digital Health & Social Media (3 Credits)
Examines the current and potential use of digital health and social media to influence public health. Provides an overview of knowledge, skills and terminology necessary to optimize the effectiveness of these technologies to contribute to the enhancement of individual and community health.

HLTH285 Controlling Stress and Tension (3 Credits)
Health problems related to stress and tension. Analysis of causative psychosocial stressors and intervening physiological mechanisms. Emphasis on prevention and control of stress through techniques such as biofeedback, meditation and neuromuscular relaxation.

HLTH289 Topical Investigations (1-3 Credits)
Independent study by an individual student or an experimental course in special areas of knowledge not covered by regularly scheduled courses.
Repeatable to: 6 credits if content differs.

HLTH292 Community Health Engagement (3 Credits)
An exploration and application of basic community health concepts. An integral part of the course is service learning, that includes evaluating, planning and implementing a community health program with a local community partner.
Restriction: Must not be in Community Health program.

HLTH300 Biostatistics for Public Health Practice (3 Credits)
An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.
Prerequisite: Minimum grade of C- in EPIB301; or must have completed or be concurrently enrolled in HLTH200.
Restriction: Must be in one of the following programs (Public Health Science; Community Health). Cross-listed with: EPIB315.
Credit Only Granted for: EPIB300, EPIB315 or HLTH300.
Formerly: EPIB300.
Additional Information: Course is cross-listed; students should check program advising information to determine which counts for their major. Note that EPIB300 (old number) is still offered for students under previous curriculum.

HLTH301 Epidemiology for Public Health Practice (3 Credits)
An examination of the discipline of epidemiology and its application to public health issues and practices, covering current epidemiological concepts and methods.
Prerequisite: Minimum grade of C- in HLTH300.
Restriction: Must be in Community Health program. Cross-listed with EPIB301.
Credit Only Granted for: EPIB301 or HLTH301.

HLTH302 Measuring Change in Community Based Research (3 Credits)
Examination of research and evaluation tools that can be applied to community health promotion. Includes the application of qualitative research methods, community needs and strengths assessments, asset mapping, and monitoring and evaluating process, outcome and impact evaluation.
Prerequisite: Minimum grade of C- in HLTH200 and EPIB301.
Restriction: Must be in a major within the SPHL-Community Health Department.

HLTH306 Macro Level Influences on Community Health (3 Credits)
An examination of the effects and influences of policy decisions at the local, state and national levels on community health delivery. Historical and contemporary policy issues will be included with a focus on how the policies have impacted community organizations and the overall health of communities.
Prerequisite: Minimum grade of C- in HLTH124.
Restriction: Must be in a major within the SPHL-Behavioral & Community Health department.

HLTH325 Poor in America: Health and Wellbeing (3 Credits)
Using the ecological framework, students will explore the complicated relationship between poverty and health and well-being in the United States.
Recommended: HLTH130; or HLTH140.

HLTH352 Portrayal of Drug Use and Addiction on Screen: Does Hollywood get it Right? (3 Credits)
Through comparative analysis of public health research evidence with portrayals used in film, the student gains a deep understanding of substance abuse, its consequences, and theoretical foundations of its biopsychosocial etiology and radiating effects on families, communities and society.

HLTH364 Social Media & Digital Tools for Community & Public Health (3 Credits)
Examination of the characteristics and uses of media platforms and digital technologies to expand the capability to identify and reduce community and public health risks at all levels of prevention. Also considered will be the potential threats these new media can play on individual choice, privacy, confidentiality, and social influence -- which themselves can pose health threats to community and public health.
Prerequisite: Completion of HLTH230 with a C- or higher.
Restriction: Must be in a major within the SPHL-Behavioral and Community Health department; Restricted to majors who entered the program in Fall 2018 or later.

HLTH366 Behavioral and Community Issues in Public Health (3 Credits)
The exploration of how social and behavioral science theories and public health concepts and methods can be applied to both the health-illness experience and community interventions.
Prerequisite: HLTH130, HLTH230, PSYC100, SOCY100, SOCY105, or ANTH260.
Restriction: Must be in Public Health Science program; or permission of SPHL-Behavioral & Community Health department. And must have earned a minimum of 45 credits.
Additional Information: This course will initially be restricted to Public Health Science (PHSC) majors, but could ultimately be opened to other majors, particularly those in HLTH.

HLTH371 Communicating Safety and Health (3 Credits)
The communication and evaluation of safety and health information. Emphasis on various types of communications and recipient factors which contribute to their success or failure.
Restriction: Must be in a major within SPHL-Behavioral & Community Health department.

HLTH374 Drugged, Drowsy & Distracted Driving: traffic safety issues for the new millenium (3 Credits)
An in-depth examination of the current status of research, historical trends and policies regarding impaired driving. Designed to provide exposure to the research process for understanding the behavioral factors that contribute to impaired driving in our society.
Prerequisite: Minimum grade of C- in HLTH200 and HLTH300.
Restriction: Must be in Community Health program.

HLTH377 Human Sexuality (3 Credits)
The biological and developmental aspects of human sexuality; the psychological and emotional aspects of sexual behavior; sexual identity; the historical, cultural, social, linguistic, legal and moral forces affecting sexual issues; the importance of communication, disclosure and intimacy in interpersonal relationships; and research trends in the area of human sexuality.

HLTH386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of SPHL-Behavioral & Community Health department.
Restriction: Junior standing or higher.

HLTH389 Topical Investigations (1-3 Credits)
Independent study by an individual student or an experimental course in special areas of knowledge not covered by regularly scheduled courses.
Repeatable to: 6 credits if content differs.

HLTH391 Making a Difference: Applying Community Health (3 Credits)
The exploration and application of community health concepts including theoretical models, advocacy, cultural competency, asset mapping, and needs assessment. Includes planning, implementing and evaluating a community health program with a designated community partner.
Prerequisite: SPHL100, HLTH124, HLTH140, HLTH200, HLTH230, and EPIB301; and must have completed or be concurrently enrolled in HLTH302 and EPIB315.
Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH399 Community Health Field Work (1-6 Credits)
Students will gain practical experience under conditions conducive to educational and professional development. The internship is a supervised period of community/public health activities, carried out in a relevant professional organization, that emphasizes the application of theory and previous coursework.
Prerequisite: Minimum grade of C- in HLTH124, HLTH140, and SPHL100.
Restriction: Must be in Community Health program; and must have earned a minimum of 45 credits.
Repeatable to: 6 credits if content differs.
Additional Information: Students will have the opportunity to be matched with regular DBCH partners who have requested an intern for the designated semester. Most field work experiences will be off-campus.

HLTH410 Honors Seminar (3 Credits)
Undergraduate majors with a strong academic record are provided the opportunity to engage in challenging educational experiences related to the social and behavioral aspects of public health. Students will learn the skills and knowledge to develop, propose, defend, and complete an honors thesis or honors project.
Prerequisite: HLTH200; and must have completed 2 other courses in HLTH.
Restriction: Minimum cumulative GPA of 3.5; and must have completed 45 credits before applying.

HLTH420 Effective Strategies for Public Health Practice (3 Credits)
The purpose of this course is to present the interrelationships of curriculum planning, methodology and the selection and use of successful public health presentation strategies. Special problems associated with public health presentations are discussed, and students become familiar with a variety of resources as well as with planning for and implementing demonstration presentations.
Prerequisite: Minimum grade of C- in BSCI170, BSCI171, BSCI201, and HLTH391.
Corequisite: HLTH490.
Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH424 Lesbian, Gay, Bisexual & Transgender Health (3 Credits)
The preparation of students to be knowledgeable advocates for the health of lesbian, gay, bisexual, and transgender (LGBT) populations. Course focus is defined by the Healthy People 2020 federal health objectives for LGBT populations: data collection for research, culturally competent healthcare, bullying in schools, suicide, homelessness, and sexually transmitted diseases including HIV.
Recommended: Students should have some familiarity with basic psychology, sociology and/or epidemiology.
Restriction: This course is restricted to students who have completed a minimum of 60 credits. Jointly offered with HLTH624.
Credit Only Granted for: HLTH424 or HLTH6 24.

HLTH430 Health Education in the Workplace (3 Credits)
A survey of the role of health education in work settings. Examination of occupational stress, the health effects of shift work, women's health in the workplace, health education approaches to informing workers and management, and health promotion programs in the workplace.

HLTH431 Health Literacy in Action (3 Credits)
This course introduces the concept of health literacy and develops the knowledge and skills to understand the field and engage productively about health literacy with healthcare providers, systems, and policy makers. The class explores diverse perspectives about health information and communication, and different pathways and strategies to help create the conditions for more informed and engaged individuals and communities.
Recommended: HLTH 371; or equivalent.
Repeatable to: 0 credit.
Credit Only Granted for: HLTH431 or HLTH498L.
Formerly: HLTH498L.

HLTH432 Medical Terminology (3 Credits)
Provides the framework for understanding medical language and terminology used by health care professionals. Students will gain an understanding of the rules of building and analyzing medical terms from word origins and will learn correct pronunciation, definitions, and spelling for all of the body systems, major pathological conditions, common disorders, prescribed medications, and more. Whether a student is interested in learning more about the medical field or they want to acquire practical knowledge for future personal use, this course provides the foundation for understanding the language of medicine.
Credit Only Granted for: HLTH432 or HLTH498T.
Formerly: HLTH498T.

HLTH434 Introduction to Public Health Informatics (3 Credits)
Provides an overview of the field of public health informatics and the influence of technology on the public's health and well-being. Emphasizes the application of various technologies and computer/internet applications to support public health research and practice, including strategies to address new and emerging threats.
Restriction: Must be in one of the following programs (Community Health; Public Health Science) ; and must have earned a minimum of 60 credits.
Credit Only Granted for: HLTH434 or HLTH498E.
Formerly: HLTH498E.

HLTH460 Minority Health (3 Credits)
Health concerns of U.S. ethnic minority groups and factors placing them at elevated risk for disease and injury. Health education concepts and strategies to reduce disparities between their health status and the health status of the general population.
Prerequisite: HLTH140, HLTH230, or HLTH366; or permission of SPHL-Behavioral & Community Health department.
Restriction: Must be in a major within the SPHL-Behavioral & Community Health department.

HLTH471 Women's Health (3 Credits)
The historical, physiological, psychological, and sociological mechanisms which contribute to women's health. Topics will include gynecological concerns and reproductive health; nutrition, exercise; violence; substance use/abuse; and the health of special populations.
Restriction: Must be in a major within the SPHL-Behavioral & Community Health department; or must be in a major within the ARHU-Women's Studies department. Cross-listed with WMST471.
Credit Only Granted for: HLTH471 or WMST471.

HLTH476 Death Education (3 Credits)
Examination of the genesis and development of present day death attitudes and behavior by use of a multidisciplinary life cycle approach.

HLTH489 Field Laboratory Projects and Workshop (1-6 Credits)
A course designed to meet the needs of persons in the field with respect to workshop and research projects in special areas of knowledge not covered by regularly structured courses.

HLTH490 Professional Preparation in Community Health (3 Credits)
The development of skills necessary for joining the public health work force post-graduation, as well as assistance in obtaining an appropriate internship that will serve as a final semester, capstone experience. Students will be exposed to various relevant professional experiences, and will be afforded the opportunity to strengthen their own individual skills by selecting from a menu of skills-based learning modules that best suit their perceived needs.
Prerequisite: Minimum grade of C- in BSCI170, BSCI171, BSCI201, and HLTH391.
Corequisite: HLTH420.
Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH491 Community Health Internship (12 Credits)
Integrating theory with practice in a community health setting.
Prerequisite: Minimum grade of C- in HLTH420 and HLTH490.
Restriction: Must have completed all program requirements and be in the last semester of the Community Health degree program.

HLTH492 BS/MPH Community Health Internship (9 Credits)
Integrating theory with practice in a community health setting.
Prerequisite: Minimum grade of C- in HLTH490.
Restriction: Must be a Community Health major who has been admitted to the combined BS/MPH degree program.

HLTH498 Special Topics in Health (3 Credits)
Topics of special interest in areas not covered by regularly scheduled courses.
Repeatable to: 6 credits if content differs.

HNUH - University Honors

HNUH218X Uprising, Riot, Revolt: Violence in Story and Theory (3 Credits)
How does violence connect to revolution? Is violence the result of lone wolf actors, oppressive social structures, or just blind fate? Is it a side-effect of revolution or its driving force? Is violence a way to fight injustice, or is it a problem of evil? Why is one person's uprising another person's riot? In this seminar, we will explore literature, politics, and religion to debate the meaning and causes of violence. By examining the writings of a prison psychiatrist, historians, activists, theorists, and theologians alongside classic and contemporary literary works, we will disrupt common understandings of violence. In conducting interviews with community members, engaging in classroom debate, and sharing ideas in a project-poster session, we will investigate violence in the UMD community and wider DC area, on-line and face-to-face, and propose ways toward revolutionary change.

HNUH218Y The Science, Economics, and Governance of Climate Change: The Need For An Energy Revolution (3 Credits)
Hardly a day goes by without some news worthy item being reported on Earth's changing climate. Often the stories are contradictory, tainted by parochialism and extremism, not only by the conservative and liberal media, but also by the camps of so-called believers and deniers. This seminar will begin with a review of the history of how decisions regarding human interactions with the environment have either doomed past societies to failure, or enabled long-term, sustainable success. Next we'll examine the science that underlies global warming, in a manner accessible to non-scientists, as well as the potential consequences of a rapidly changing climate. We will then discuss the economics of large-scale provision of energy by renewable resources, which will be needed to avert climate catastrophe. During the final few weeks of this seminar, students will break into three groups, representing various parts of the world, and negotiate an international plan to transition the world energy supply to renewable resources that emit little or no greenhouse gases.

HNUH228A Peace in our time? Conflict and Conflict Resolution in International Politics (3 Credits)
Is the world getting more peaceful? There are currently civil wars raging in much of the world and millions of people have fled these wars as refugees or internally displaced persons. Terrorist attacks kill thousands, and can occur in any corner of the planet. At the same time many actors use strategies such as peacekeeping, mediation, promotion of human rights and post-conflict justice to resolve conflicts and build peace. In this course, we will examine conflict, peace, and conflict resolution in contemporary international politics. We will interrogate concepts such as peace, conflict, and violence, the different forms that these phenomena can take, and how we can measure their occurrence. We will discuss theoretical explanations for why individuals and groups have disputes and why these actors choose to use violence (or not) in these disputes and examine these arguments in specific cases. We will analyze conflict resolution strategies such as mediation, peacekeeping, and human rights promotion both theoretically and empirically. This discussion will allow students to develop an argument for whether the world is getting more peaceful, why it is or is not, and what this could mean about the future of violence and peace.

HNUH228X How to Wage War Without Firing A Single Shot: A History of Soft Power and the Cold War (3 Credits)
If you close your eyes and think about war, the first images that pop into your mind are probably soldiers, battles, and military technology–NOT jeans, kitchens, and hockey! And yet, during the Cold War, it was precisely realms like fashion, sports, and music that, for many people of the time, came to define the conflict between the United States and the USSR. This course will explore soft power, or countries' ability to get what they want through attraction rather than traditional force, in the context of the Cold War.

HNUH238A Deliberative Democracy (3 Credits)
How do we change our politics, save democracy, and move beyond the 'us vs. them' culture that divides us? This course begins with the premise that how we talk to one another and debate controversial issues can promote the public good or erode it in irreparable ways. Students in each class session will put principles of public dialogue into practice as they learn deliberative theories and skills that can help save democracy. Class readings will turn to historical case studies to frame the most controversial political issues we face today.

HNUH248X My Hometown, Our Wilderness: Ecology of Identity (3 Credits)
What has been the setting of your life? Suburbs? Cities? A farm? We may be used to thinking of environments as equal access across society, since everyone is free to visit our National Parks or spend a day at the beach. But there are striking ways in which identity affects our habitat. Race, class, gender, sexual preference, and other markers have strong influences on where we spend our time, what we eat, and how we work and relax. Suburbs, cities, wilds, and farms are not just physical places, they exhibit histories of social inclusion and exclusion. For example, the money and free time of affluent Americans serves as a portal to leisure spaces that would be inaccessible to working-class Americans who lack the ability to take time off, drive or fly long distances, and pay for it all.

HONR - Honors

HONR100 Honors Colloquium (1 Credit)
Attendance at various additional activities and events is required. Reading and discussion on the personal and social value of higher education; development of a coherent general education program; exploration of the educational and cultural resources of the campus and metropolitan area; participation in a community service project; and other activities designed to broaden students' conception of what it means to be an educated person.
Restriction: Permission of University Honors Program.

HONR149 Honors Colloquium (3 Credits)
A colloquium on a variety of topics.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR168 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR169 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR200 Honors Research Colloquium (1 Credit)
Introduction to scholarly research through readings and meetings with faculty from various disciplines; exploration of research methods and some of the problems encountered in research; discussion of the creative process; attendance at scholarly lectures; and other activities designed to prepare students to enter college or departmental honors programs.
Recommended: Recommended for students in their second semester. All others should meet with the Honors Advisor.
Restriction: Permission of University Honors Program.

HONR208 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR209 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR217 Life, The Multiverse and Everything: Developing an Individual Cosmovision (3 Credits)
In this Honors seminar, students pursue personal cosmologies in light of our contemporary core 'Western' scientific world-view and a selection of other ancient and indigenous cosmographies for comparison including those of Mesoamerica, the Inca, the Egyptians or the Chinese.

HONR218 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR219 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR228 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR229 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR238 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR239 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR248 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR248E Cultures of the Contact Zones - Seville, Al-Andalus and the Atlantic World (3 Credits)
Content is broad enough to deal with issues of multiculturalism in Spain but also specific enough to center on the city of Seville and the Andalusion region.Cross-listed with: SPAN225.
Credit Only Granted for: HONR248E or SPAN225.

HONR249 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR258 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR259 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR268 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR269 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR278 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR279 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR288 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR289 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR298 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR299 Honors Seminar (1-3 Credits)
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR318 Advanced Honors Seminar (3 Credits)
A series of seminars, often interdisciplinary in character, and sometimes team taught. The subjects will vary from semester to semester.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR328 Advanced Honors Seminar (3 Credits)
A series of seminars, often interdisciplinary in character, and sometimes team taught. The subjects will vary from semester to semester.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR338 Advanced Honors Seminar (3 Credits)
A series of seminars, often interdisciplinary and sometimes team taught. The subjects will vary from semester to semester.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR348 Advanced Honors Seminar (1-3 Credits)
A series of seminars, often interdisciplinary and sometimes team taught. The subjects will vary from semester to semester.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR349 Honors Colloquium (1-3 Credits)
A series of seminars, often interdisciplinary and sometimes team taught. Subjects may vary.
Restriction: University or departmental Honors student. Or permission of instructor; and permission of Director of University Honors.
Repeatable to: 3 credits if content differs.

HONR358 Honors Practicum (3 Credits)
For student section leaders of HONR100 or HONR200.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.
Formerly: HONR379.

HONR359 Honors Workshop (1-6 Credits)
Honors workshops are small seminar classes which concentrate on skill development.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR368 Advanced Honors Seminar (3 Credits)
A series of seminars, often interdisciplinary in character and sometimes team-taught. The subjects will vary from semester to semester.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR378 Advanced Honors Seminar (3 Credits)
A series of seminars, often interdisciplinary in character and sometimes team-taught. The subjects will vary from semester to semester.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

HONR379 Honors Independent Study (1-6 Credits)
Involves reading or research directed by individual faculty, especially in areas outside of the student's major. Open only to University honors students.
Restriction: Permission of University Honors Program.
Repeatable to: 6 credits if content differs.

HONR386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

HONR388 Honors Thesis or Project (3-6 Credits)
Repeatable to: 6 credits if content differs.
Formerly: HONR370.

HONR389 Guided Honors Teaching (3 Credits)
For HONR100 and HONR200 section leaders. Guided teaching experience for selected students in the University Honors Program.
Restriction: Permission of University Honors Program.
Repeatable to: 9 credits if content differs.

IMMR - Immigration Studies

IMMR200 Introduction to Immigration and Migration Studies (3 Credits)
Introduces concepts and theoretical interpretations about the causes of international migration; provides an historical overview of the main flows of immigration to the U.S.; analyzes economic, political, social, and cultural aspects that impact the immigrants' settlement process.

IMMR219 Special Topics in Immigration and Migration Studies (3 Credits)
Thematic exploration of a topic in immigration or migration studies history at an introductory level withemphasis on understanding how the movement of people is relevant in the contemporary world.
Repeatable to: 6 credits if content differs.

IMMR219C Immigration Policy, Immigrant Lives (3 Credits)
An examination of the phenomenon of international migration, or immigration. Students develop awareness of how immigration has been framed in the general public and examined by social science disciplines, most prominently anthropology. Examination of case studies of different immigrant groups in distinct geographic contexts will illuminate the varied incorporation experiences of immigrants into U.S. society.Cross-listed with: ANTH264.
Credit Only Granted for: ANTH264 or IMMR219C.

IMMR319 Special Topics in Immigration and Migration Studies (3 Credits)
Thematic exploration of a topic in immigration or migration studies with emphasis on understanding how the movement of people is relevant in the contemporary world.
Repeatable to: 6 credits if content differs.

IMMR394 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)
An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.Cross-listed with: AAST394, AMST324.
Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.
Formerly: AAST398E.

IMMR399 Internship in Immigration/Migration Studies (1-6 Credits)
Internship experience with an organization that works with or studies migration or immigrant populations. This experiential learning course provides training that enriches the students' academic field of study and the IMMR transcript notation. Students submit a final written report of how the experience ties into their major field of study.
Prerequisite: HIST222, IMMR200, or IMMR400; and permission of the Center for Global Migration Studies required.
Restriction: Minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits.
Repeatable to: 6.0 credits if content differs.
Additional Information: This course is intended primarily for students seeking the Immigration and Migration Studies transcript notation, but exceptions will be considered for students with educational or career interests that lie in this area. Student internships must be approved by the Executive Director of the Center for Global Migration Studies. Students must secure an appropriate faculty mentor for the internship course. An internship course will be approved only if a faculty supervisor is available.

IMMR400 Vital Voices: Oral Histories of the Immigrant Experience (3 Credits)
An exploration of the dynamic subject of U.S. immigrant experience through the scope of individual immigrant life stories in a global context. Course will include an overview of U.S. and global immigration patterns and an introduction to the practice of oral history.
Recommended: HIST222; or IMMR200.
Credit Only Granted for: HIST428N, IMMR400, THET428I, or THET498V..
Formerly: HIST428N.

IMMR419 Special Topics in Immigration and Migration Studies (3 Credits)
Thematic exploration of a topic in immigration or migration studies history with emphasis on understanding how the movement of people is relevant in the contemporary world.
Repeatable to: 6 credits if content differs.

INAG - Institute of Applied Agriculture

INAG100 Introduction to Plant Science (4 Credits)
A general introduction to plant science designed to provide the students with a working knowledge of the fundamental structures and processes of plants. Content includes plant anatomy, physiology, genetics and environmental relationships.
Restriction: Must be a student in the Institute of Applied Agriculture; or permission of AGNR-Institute of Applied Agriculture department.
Credit Only Granted for: INAG100, PLSC100, or PLSC101.

INAG102 Agricultural Entrepreneurship (3 Credits)
This course introduces fundamental concepts related to launching a profitable agricultural business. Topics include idea generation, opportunity recognition, conducting feasibility studies, assembling the entrepreneurial team, and financing the new venture, among others. Students will learn knowledge and skills relevant to starting a new agricultural business.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture. May not count toward any BMGT major or minor requirement.

INAG103 Agricultural Marketing (3 Credits)
Principles of market demand are used to develop a consumer oriented market strategy for agricultural businesses. Topics include market structures, target marketing, market segmentation, niche marketing and direct marketing. Market concepts unique to agriculture products are also covered.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture. Course cannot be used to fulfill a requirement for a Robert H. Smith School of Business major or minor.

INAG105 Soils and Fertilizers (3 Credits)
Soils and Fertilizers is an introductory course for students entering careers related to applied agricultural production. The course is divided into three subject areas: soil properties, soil fertility, and environmental concerns of using soils for agricultural production. Emphasis is placed upon the characteristics of Maryland soils which are similar to the soils in the mid-Atlantic region. The importance of nutrient management and non-point source pollution of the Chesapeake Bay are covered in the course.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

INAG106 Pesticide Use and Safety (2 Credits)
An overview of pesticide use and safety. Topics include environmental protection, labeling, personal safety, first aid, formulation and chemistry, equipment, disposal, storage, record-keeping and liability. The course prepares students to take the Maryland State test for a private applicator's license.
Restriction: Must be in a major in AGNR-Institute of Applied Agriculture department; or must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority enrollment will be given to students in the IAA program or to students in the College of Agriculture and Natural Resources (AGNR).

INAG110 Oral Communication (3 Credits)
A study of how perception, self-concept, and verbal and nonverbal communications affect the communication process as it emerges in the workplace. The course provides skill training in speech writing, public speaking, group communication, interpersonal communication, listening, and responding.
Credit Only Granted for: COMM107, COMM200, INAG110, JOUR130, THET285.

INAG123 People, Planet, and Profit: Digging Into Sustainable Agriculture (3 Credits)
Investigates the principles and practices of sustainable agriculture and their relationship to the greater food system. Explores the social (people), environmental (planet), and economic (profit) impacts of agriculture - from challenges to opportunities. INAG123 applies the principles of sustainability to various agricultural production practices and systems - at a range of different scales - to see what lessons these varied models can offer. Along the way, we will consider domestic issues such as food safety and distribution, food justice, cultural relevance, biodiversity, farming communities, and effects on local economies.

INAG131 Introduction to Agricultural Policy and Communication (3 Credits)
Introduction to Agricultural Policy and Communication equips students with the knowledge and skills needed to engage in real-world communication around timely issues in agriculture. This course covers basics of United States government and the policymaking process, current and historical policy issues in agriculture, advocacy communication strategies and tactics, and careers in policy and advocacy. This course focuses on practical skills application, as well as exposure to government and advocacy work in action, including field trips and guest speakers. Throughout the course, students will learn and practice communication methods both individually and in team-directed agriculture-related projects.
Restriction: Must be a student in the Institute of Applied Agriculture; or must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

INAG132 Agricultural Leadership and Teamwork (3 Credits)
Introduces fundamental concepts related to leadership and teamwork in agricultural organizations. Topics include leadership practices and skills; relationships between leadership, authority, power, and ethics; team decision-making and management; and organizational culture and change. Students will develop effective leadership skills necessary for leading agricultural organizations.
Restriction: Students at the Institute of Applied Agriculture (IAA); or students at the College of Agriculture and Natural Resources (AGNR); or permission may be granted to other students based on available space.

INAG201 Agricultural Human Resources Management (3 Credits)
The course introduces students to the study and application of the basic principles of human relations and personnel management. A variety of approaches to recruiting, training, delegating, motivating, and appraising employees are among the topics discussed.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: May not count toward any BMGT major or minor requirement.

INAG203 Agricultural Finance (3 Credits)
This course introduces fundamental concepts related to the financial management of an agricultural business. Topics include financial statement analysis, financial planning, the relationship between risk and return, the time value of money, costs associated with borrowed funds, sources of capital, financial markets and intermediaries in agriculture, and personal finance, among others. Students will gain financial knowledge and skills necessary for managing a profitable agricultural business.
Restriction: Students at the Institute of Applied Agriculture (IAA); or students at the College of Agriculture and Natural Resources (AGNR); or permission may be granted to other students based on available space.
Additional Information: Course cannot be used to fulfill a requirement for a Robert H. Smith School of Business major or minor.

INAG204 Agricultural Business Management (3 Credits)
This course integrates various concepts related to managing a profitable agricultural business. Topics include business management and decision making, preparing a business plan, financial analysis and budgeting, risk and investment management, and small business taxes, among others. Students will gain relevant knowledge and skills as they complete the comprehensive business plan for successfully managing an agricultural business.
Recommended: INAG102.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture. May not count toward any BMGT major or minor requirement.

INAG205 Analyzing Alternative Enterprises (3 Credits)
This course identifies and analyzes alternative crops, livestock, and other agricultural business enterprises. Students assess sustainability, geographic adaptability and potential profitability of businesses through lectures, class projects, and presentations from farmers, entrepreneurs, and managers engaged in alternative enterprises. Topics may include value added approaches, organic crop production, and recreational agricultural pursuits.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture.

INAG206 Agricultural Business Law (3 Credits)
This course introduces various legal concepts and their relationships to agricultural business and transactions. Topics include torts, criminal law, contracts, promissory notes, property, partnerships, business entities, employment, and bankruptcy, among others. Students will gain a general understanding of the legal system that will help them manage and/or operate profitable agricultural businesses.
Restriction: Students at the Institute of Applied Agriculture (IAA); or students at the College of Agriculture and Natural Resources (AGNR); or permission may be granted to other students based on available space.
Additional Information: Course cannot be used to fulfill a requirement for a Robert H. Smith School of Business major or minor.

INAG207 Power and Machinery (3 Credits)
The basic principles of compact equipment management, including selection, maintenance, operation, adjustment and troubleshooting of agricultural machinery and power units, will be studied. The methods of power development, measurement, and transmission, through power trains both mechanical and hydraulic, will be studied. A systematic disassembly, analysis, diagnosis and reassembly of a small engine will be completed by each student.
Prerequisite: INAG250 or PLSC204.
Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority will be given to IAA students and permission will be granted to AGNR students and others on a space available basis.

INAG213 Crop Production Practices (3 Credits)
Crop Production Practices covers the applied methods of producing various vegetable and agronomic crops in Maryland. This course focuses on commercial scale production where economics impact production decisions. Topics include crop rotation, cropping systems, nutrient management, and integrated pest control strategies. Throughout the course, economically, socially and ecologically sustainable production practices will be addressed.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture.

INAG214 Agronomic Principles of Golf Turf Management (3 Credits)
An in-depth study of golf course management practices such as turfgrass selection, fertilization, mowing, irrigation, and cultivation practices. Weed control programs will be discussed in detail for the different playing surfaces on the golf course. Field plot work, laboratory work, and field trips will reinforce lecture material.
Recommended: INAG107; or PLSC305.
Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or must be in one of the following programs (Plant Sciences; Plant Sciences: Horticulture & Crop Production; Plant Sciences: Landscape Management; Plant Sciences: Plant Science; Plant Sciences: Turf & Golf Course Mgmt; Plant Sciences: Urban Forestry) ; or permission of instructor.
Additional Information: Enrollment priority is given to students within the Institute of Applied Agriculture (IAA) and the Plant Science and Landscape Architecture Department.

INAG215 Business Management Principles for Turf Facilities (3 Credits)
An advanced course in turfgrass management with emphasis on development of maintenance operating budgets for labor, fertilization, pest control, and supplemental cultural practices for golf courses and athletic field facilities. An overview of the current trend in golf course design and construction and in athletic field construction practices will be covered. Students will be responsible for a presentation concerning some phase of turfgrass management relating to golf course or athletic field operations.
Recommended: INAG107; or PLSC305.
Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or must be in one of the following programs (Plant Sciences; Plant Sciences: Horticulture & Crop Production; Plant Sciences: Landscape Management; Plant Sciences: Plant Science; Plant Sciences: Turf & Golf Course Mgmt) ; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Enrollment priority is given to students majoring in Turfgrass and Golf Course Management in the Institute of Applied Agriculture and Plant Science and Landscape Architecture.

INAG224 Greenhouse and Plant Production Management (3 Credits)
Principles of managing greenhouses--structures, coverings, lighting, irrigation, heating and cooling systems--and their effects on plant production. Plant propagation methods and environments will be analyzed and practiced.
Restriction: This course is open to students in AGNR. Priority enrollment will be given to students in the Institute of Applied Agriculture. All other majors will be granted permission based on available space.
Credit Only Granted for: INAG 114 or INAG 224.

INAG226 Diseases of Ornamentals and Turf (3 Credits)
The course will cover various topics such as plant pathology, disease control practices, and an in depth coverage of the major diseases of ornamentals and turfgrasses in the Mid-Atlantic region. Emphasis will be placed on identification of disease signs and symptoms. Over 50 diseases will be covered during the semester.
Recommended: Completion of one of the following is recommended: PLSC 253, PLSC 254, INAG 107, PLSC 305.
Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture.

INAG231 Insects of Ornamentals and Turf (3 Credits)
A study of the major insect pests and beneficial insects of ornamental plants and turfgrasses in the Mid-Atlantic region. The student will be responsible for insect identification, life history, and control practices of approximately 100 insects. An insect collection consisting of both insect pests and beneficial insects is required.
Recommended: PLSC253, PLSC254, or PLSC305; or INAG107.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Additional Information: Priority enrollment will be given to students in the IAA program.

INAG235 Irrigation and Drainage (3 Credits)
An overview of U.S. and state water doctrines and plant water use rates. Irrigation systems for residential and athletic field use will be discussed covering such topics as hydraulics, sprinkler spacing, pipe selection and sizing, pumps, controllers, valves, and irrigation trouble shooting. Surface and subsurface drainage for turfgrass sites will also be covered.
Restriction: Permission of instructor.
Credit Only Granted for: INAG235, PLSC235 or PLSC489I.
Formerly: PLSC489I.
Additional Information: Priority enrollment will be given to IAA and PLSC majors. By permission for available seats.

INAG237 Surveying and GPS Applications in Agriculture (3 Credits)
The principles of land measurement, using conventional surveying techniques to determine distance, elevation change or topography; Global Positioning System (GPS) devices; and mapping, utilizing Graphical Information Systems (GIS), will be the focus of this course. Students will use surveying equipment and GPS receivers and other data collection instruments to collect land data features. Data will be mapped and analyzed using software including: Trimble GPS Pathfinder Office, and ESRI ArcGIS software. Students will download and integrate available on-line geo-referenced map images or other data to support the development of their GPS collected data. Spatial analysis software will be used to map problem areas of field agronomic factors.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-College of Agriculture & Natural Resources.
Additional Information: Course is open to Institute of Applied Agriculture students and permission will be granted to others in the College of Agriculture and Natural Resources based on available seats. IAA student must have completed INAG 101 and INAG 104.

INAG242 Golf Course Design and Construction (3 Credits)
An appreciation and understanding of the game of golf is obtained through lectures on the history, organizations, and rules of the game. Golf course design theories, great architects and their courses, and construction specifications are discussed. Students will complete two golf course design projects.

INAG244 Herbaceous Plants (3 Credits)
Herbaceous plants are integral components of residential and commercial landscapes. Students will become familiar with 250 annual and perennial plants. The emphasis will be on plant management requirements and seasonal variation in the landscape.
Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.
Credit Only Granted for: INAG244 or PLSC244.

INAG248 Topics in Sustainable Agriculture (1 Credit)
Through readings, class discussions, and guest speakers, this one-credit seminar course exposes students to current trends, concerns and research in sustainable agriculture. It allows students to explore various interest areas and discuss a variety of topics as they relate to sustainable practices.
Recommended: INAG123.
Repeatable to: 2 credits if content differs.
Additional Information: The topics covered in this course change every year, guided by student interest, current research, and availability of guest speakers.

INAG250 Fundamentals of Agricultural Mechanics (3 Credits)
A comprehensive course that teaches the fundamentals of agricultural related mechanics. Lecture and lab exercises will cover the broad range of topics associated with agricultural mechanics including electricity, plumbing, welding processes, and wood and metal working applications. Emphasis will be given to the design and installation of electrical circuits. It will also include project planning and implementation including development of safety protocols for each area of study and introduction of GPS equipment and software for survey data collection.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources OR Permission of AGNR-Institute of Applied Agriculture Department.
Credit Only Granted for: PLSC204 or INAG250.
Additional Information: Priority given to IAA majors and AGNR students whose major requires this course. Permission will be granted to other students on seats available basis.

INAG251 Landscape Construction (3 Credits)
An introductory course in the basics of hardscape topics in landscape construction. Covers fundamental construction layout using surveying techniques; GPS; elements of construction dealing with wood, concrete, masonry, pavers, and/or electrical amenities used in hardscape construction. Emphasis will be placed on safety, interpretation of construction drawings or plans, specifications for specific structures, materials selection, cost estimations, site preparation and typical construction techniques.
Prerequisite: INAG250 or PLSC204.
Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources.
Additional Information: Priority enrollment is given to Landscape Management majors in the Institute of Applied Agriculture.

INAG252 Agricultural Public Relations (3 Credits)
Introduces the fundamental concepts and procedures of public relations in agriculture. Topics include understanding external audiences; key practices in agricultural media relations, social media, executive communication, and crisis communication; and managing the research, planning, and evaluation aspects of the public relations process. Students will gain the public relations knowledge and skills necessary for communicating effectively with an organization's external audiences.
Recommended: INAG103.

INAG253 Agricultural Strategic Communication (3 Credits)
Introduces the fundamental concepts and applications of strategic communication in agricultural organizations. Topics include strategic communication planning; communication and culture; communication and change; managing internal and external communication; and corporate responsibility. Students will learn how to use communication to accomplish organizational goals.
Recommended: INAG252.

INAG288 Internship (1 Credit)
On-site internship training in the student's major area of study. Students must complete a minimum of 320 working hours at an approved work site. Course work also includes weekly written assignments and a site visit assessment.
Restriction: Must be enrolled in the Institute of Applied Agriculture; or permission of the Institute of Applied Agriculture.
Repeatable to: 2 credits.

INAG289 Internship Experience & Professional Development (3 Credits)
Professional development and reflective analysis of the experience from the Practicum (INAG 288). Based on their 320-hours of internship work experience, students will write an internship report and analysis, deliver an oral presentation, and develop professional skills and materials needed to enter their careers.
Prerequisite: INAG288.
Restriction: Must be enrolled in the Institute of Applied Agriculture students; or permission of the Institute of Applied Agriculture.

INST - Information Studies

INST123 Databases for All (3 Credits)
An introduction to relational databases for students with no previous programming experience. Provides a means for students of diverse backgrounds to successfully learn how to store, retrieve, and maintain data in relational databases. Topics include a brief comparison of database systems with an emphasis on relational databases, fundamental relational database concepts, and data types. Includes technical approaches to accessing information stored in relational databases.

INST126 Introduction to Programming for Information Science (3 Credits)
An introduction to computer programming for students with very limited or no previous programming experience. Topics include fundamental programming concepts such as variables, data types, assignments, arrays, conditionals, loops, functions, and I/O operations.
Prerequisite: Minimum grade of C- in MATH115; or must have math eligibility of MATH140 or higher; or permission of instructor.
Restriction: Must not have completed INST326; and must be in Information Science program.

INST127 Introduction to Programming for Information Science Lab (1 Credit)
Laboratory component of INST126, Introduction to Programming for Information Professionals, is designed to complement the lecture and provide structured exercises and activities for students to practice and develop programming skills. INST 126 is an introduction to computer programming for students with very limited or no previous programming experience. Topics include fundamental programming concepts such as variables, data types, assignments, arrays, conditionals, loops, functions, and I/O operations.
Corequisite: INST126.

INST152 Fake Checking': Battling Misinformation and Disinformation in the Real World (3 Credits)
Examining the phenomenon of 'fake news' using the principles of information literacy, students will develop their skills in locating, analyzing, and evaluating different information sources -- in the classroom, in their personal lives, and in the workplace.

INST154 Apollo at 50 (3 Credits)
Examines Apollo mission, one of the greatest engineering accomplishments of all time, in which Neil Armstrong walked on the moon. Since the mission, people have asked: if we can land on the moon, why can't we eliminate poverty? Why can't we cure cancer? Why can't we prevent global warming? Asks what were the social, political, financial, scientific, engineering, operational, and human aspects of the Apollo program that came together to make the moon landings possible?

INST155 Social Networking (3 Credits)
Introduces methods for analyzing and understanding how people use social media - social networking websites, blogging and microblogging, and other forms of online interaction and content generation - and their societal implications. Introduces students to the science and social science of network analysis. Through real world examples, including analysis of their own social networks, students develop skills for describing and understanding the patterns and usage of services like Facebook, Twitter, YouTube, and others.
Credit Only Granted for: INFM289I or INST155.
Formerly: INFM289I.

INST201 Introduction to Information Science (3 Credits)
Examining the effects of new information technologies on how we conduct business, interact with friends, and go through our daily lives. Understanding how technical and social factors have influenced the evolution of information society. Evaluating the transformative power of information in education, policy, and entertainment, and the dark side of these changes.
Credit Only Granted for: INST201 or INST301.
Formerly: INST301.

INST208 Special Topics in Information Studies (1-6 Credits)
Covers special topics in information studies.
Repeatable to: 9 credits if content differs.

INST228 Academic Peer Mentor Experience in Information Science (1-3 Credits)
Students who are participating in instructional activities for undergraduate courses offered by the College of Information Studies, or by faculty members of the College through other units, can take this course to earn course credit for their AMP work.
Prerequisite: Must have completed or be concurrently enrolled in TLTC333.
Restriction: Permission of INFO-College of Information Studies required.
Repeatable to: 6 credits if content differs.
Formerly: INST208M.

INST301 Introduction to Information Science (3 Credits)
Examining the effects of new information technologies on how we conduct business, interact with friends, and go through our daily lives. Understanding how technical and social factors have influenced the evolution of information society. Evaluating the transformative power of information in education, policy, and entertainment, and the dark side of these changes.
Restriction: Must be in Information Science program; and restricted to students in the Information Science Program on the Universities at Shady Grove campus.
Credit Only Granted for: INST201 or INST301.

INST308 Education Abroad in Information Studies (1-6 Credits)
Covers special topics in information studies in foreign settings.
Repeatable to: 9 credits if content differs.

INST309 Independent Study in Information Science (1-3 Credits)
Individual independent study of an aspect of information science, selected according to student interest and need in consultation with a member of the iSchool faculty. Repeatable to 6 credits if content differs.
Prerequisite: Must have completed INST301

INST311 Information Organization (3 Credits)
Examines the theories, concepts, and principles of information, information representation and organization, record structures, description, and classification. Topics to be covered in this course include the methods and strategies to develop systems for storage, organization, and retrieval of information in a variety of organizational and institutional settings, as well as policy, ethical, and social implications of these systems.
Restriction: Must be in Information Science program.

INST314 Statistics for Information Science (3 Credits)
Basic concepts in statistics including measure construction, data exploration, hypothesis development, hypothesis testing, pattern identification, and statistical analysis. The course also provides an overview of commonly used data manipulation and analytic tools. Through homework assignments, projects, and in-class activities, you will practice working with these techniques and tools to create information resources that can be used in individual and organizational decision-making and problem-solving.
Prerequisite: Minimum grade of C- in STAT100 and MATH115 (or higher).
Restriction: Must be in the Information Science program.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201.

INST326 Object-Oriented Programming for Information Science (3 Credits)
An introduction to programming, emphasizing understanding and implementation of applications using object-oriented techniques. Topics to be covered include program design and testing as well as implementation of programs.
Prerequisite: Minimum grade of C- in INST126.
Restriction: Must be in the Information Science program.

INST327 Database Design and Modeling (3 Credits)
Introduction to databases, the relational model, entity-relationship diagrams, user-oriented database design and normalization, and Structured Query Language (SQL). Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems.
Prerequisite: Minimum grade of C- in INST126.
Restriction: Must be in the Information Science program.
Credit Only Granted for: INST327 or BMGT402.

INST335 Organizations, Management and Teamwork (3 Credits)
Examines principles, methods and types of leadership with an emphasis on goal setting, motivation, problem solving, and conflict resolution. Examines principles of developing teams and managing team projects through planning and execution, including estimating costs, managing risks, scheduling, staff and resource allocation, communication, tracking, and control. Trains students to recognize and capitalize on opportunities to use information to increase efficiency, improve performance, and support innovation within teams and organizations. Focuses on strategic use of emerging technologies and new information resources to execute information-enabled change.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in PSYC100.
Restriction: Must be in Information Science program.

INST341 Introduction to Digital Curation (3 Credits)
Explores various dimensions and contexts for digital curation, which includes all activities involving the management, representation and preservation of both born-digital and digitized information. Focuses on opportunities, challenges and demands of every-increasing digital data and networked information infrastructure.
Prerequisite: Minimum grade of C- in INST126, INST201, INST311, STAT100, MATH115, and PSYC100.
Restriction: Must be in Information Science program.

INST346 Technologies, Infrastructure and Architecture (3 Credits)
Examines the basic concepts of computer hardware, systems software, networking, client/server architectures, cloud computing, distributed systems, and high performance computing as applied to information rich domains. Technology and architectures will be discussed within the contexts of solving social issues, supportingscience, and conducting business operations. Current computing topics such as web environments, IoT, security, management, and policy will also be reviewed.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and 1 course with a minimum grade of C- from (INST326, CMSC131); and minimum grade of C- in INST327.
Restriction: Must be in Information Science program; and permission of INFO-College of Information Studies.
Credit Only Granted for: INST346 or BMGT405.

INST352 Information User Needs and Assessment (3 Credits)
Focuses on use of information by individuals, including the theories, concepts, and principles of information, information behavior and mental models. Methods for determining information behavior and user needs, including accessibility issues will be examined and strategies for using information technology to support individual users and their specific needs will be explored.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST311.
Restriction: Must be in Information Science program.

INST354 Decision-Making for Information Science (3 Credits)
Examines the use of information in organizational and individual decision-making, including the roles of information professionals and information systems in informed decision-making through techniques such as data analysis and regression, optimization, sensitivity analysis, decision trees, risk analysis and business simulation models.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST314, MATH115, STAT100, and PSYC100.
Restriction: Must be in Information Science program.

INST362 User-Centered Design (3 Credits)
Introduction to human-computer interaction (HCI), with a focus on how HCI connects psychology, information systems, computer science, and human factors. User-centered design and user interface implementation methods discussed include identifying user needs, understanding user behaviors, envisioning interfaces, and utilizing prototyping tools, with an emphasis on incorporating people in the design process from initial field observations to summative usability testing.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST326; and minimum grade of C- in PSYC100.
Restriction: Must be in Information Science program.

INST364 Human-Centered Cybersecurity (3 Credits)
Cybersecurity is fundamentally a problem of human interaction with technology, but its technical challenges are better understood than its human challenges. This course is designed to give you an overview of human interactions with cybersecurity technology, from users to system designers. Using the information gleaned in this course, you should be able to make better predictions about how people react to cybersecurity policies and tools, and how those reactions shape organizational behavior. The earlier part of the course focuses on explanations for behavior, while the later parts of the course focus more on the development and evaluation of tools for assisting people in cybersecurity.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST327, STAT100, MATH115, and PSYC100.
Restriction: Must be in Information Science program.

INST366 Privacy, Security and Ethics for Big Data (3 Credits)
Evaluates major privacy and security questions raised by big data, Internet of things (IoT), wearables, ubiquitous sensing, social sharing platforms, and other AI-driven systems. Covers history of research ethics and considers how ethical frameworks can and should be applied to digital data.
Prerequisite: INST201 or INST301; or permission of instructor.

INST370 Information and Preparedness, Response and Recovery in Japan (3 Credits)
Education abroad program in Japan. Examines how individuals and groups respond to disaster through informal and formal practices of community resilience and recovery. Focuses on Japanese uses of information for these purposes, including storytelling, game-based learning, social media, archives, and memorials. Examines Japanese principles of community and kizuna ('connectedness'). Includes 2 weeks of pre-departure online course in the US, 1 week of study and travel in Japan over spring break, and 2 weeks of post-return online coursework in the US.
Credit Only Granted for: INST370 or INST770.

INST377 Dynamic Web Applications (3 Credits)
An exploration of the basic methods and tools for developing dynamic, database-driven websites, including acquiring, installing, and running web servers, database servers, and connectability applications.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST327, STAT100, MATH115, and PSYC100.
Restriction: Must be in Information Science program.
Credit Only Granted for: INST377 or BMGT406.

INST389 Supervised Internship in Information Science (1-6 Credits)
Course will provide students with the knowledge, skills, and experiences that will help shape their goals as they begin their successful high-impact Information Career. It will prepare them to work an in an environment in which suitability for high-status positions is not determined by specific skills, but rather by ability to take initiative in complex, dynamic situations. Students must have an internship arranged before enrolling.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, PSYC100, STAT100, and MATH115; and 12 credits in INST courses.
Restriction: Must be in Information Science program.
Repeatable to: 6 credits.

INST401 Design and Human Disability and Aging (3 Credits)
Focuses on the design of consumer products and information systems to enable their use by persons with a wider range of physical, sensory, and cognitive abilities. Overviews aging and major types of impairment as they relate to resulting problems using consumer products and information systems. Focuses on principles of design of mass market products.
Restriction: Permission of instructor.
Credit Only Granted for: INST408B or INST401.
Formerly: INST408B.

INST402 Designing Patient-Centered Technologies (3 Credits)
Companies have created a vast array of apps and other technologies for understanding managing personal health and wellness, but many of them have been created with little understanding of audience needs or potential ethical issues. Course introduces students to the unique challenges of studying people's health and wellness needs as well as designing and evaluating technologies to meet those needs.
Prerequisite: A minimum of a C- in INST201, MATH115, PSYC100, INST126, and STAT100.
Restriction: Must be in the Information Science program.

INST408 Special Topics in Information Science (3 Credits)
Selected topics in information science.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, STAT100, PSYC100, and MATH115.
Restriction: Must be in Information Science program.
Repeatable to: 9 credits if content differs.

INST414 Data Science Techniques (3 Credits)
An exploration of how to extract insights from large-scale datasets. The course will cover the complete analytical funnel from data extraction and cleaning to data analysis and insights interpretation and visualization. The data analysis component will focus on techniques in both supervised and unsupervised learning to extract information from datasets. Topics will include clustering, classification, and regression techniques. Through homework assignments, a project, exams and in-class activities, students will practice working with these techniques and tools to extract relevant information from structured and unstructured data.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST314, STAT100, MATH115, and PSYC100.
Restriction: Must be in Information Science program.

INST441 Information Ethics and Policy (3 Credits)
Explores via case studies the legal, ethical, and technological challenges in developing and implementing policies for managing digital assets and information. Emphasizes access questions pertinent to managing sensitive information and the roles and responsibilities of information professionals.
Prerequisite: INST341; or permission of instructor.

INST442 Digital Curation Across Disciplines (3 Credits)
Examines how to apply digital curation principles, tools, and strategies in managing diverse data collections and digital information in different disciplinary settings. Explores differences among data curation principles and practices across diverse settings, ranging from scientific organizations (such as business and academic research laboratories and computational science settings), to humanities-based institutions (such as cultural heritage organizations) to social science-based institutions (such as data-intensive professional environments).

INST443 Tools and Methods for Digital Curation (3 Credits)
Introduces students to the application of digital tools and methods in a variety of organizational settings, academic disciplines, and economic sectors. Hands-on experience with digital curation tools is an integral part of the course, and will be provided in the Digital Curation Innovation Center (DCIC).
Prerequisite: Must have completed or be concurrently enrolled in INST341.

INST447 Data Sources and Manipulation (3 Credits)
Examines approaches to locating, acquiring, manipulating, and disseminating data. Imperfection, biases, and other problems in data are examined, and methods for identifying and correcting such problems are introduced. The course covers other topics such as automated collection of large data sets, and extracting, transforming, and reformatting a variety of data and file types.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST327, STAT100, MATH115, and PSYC100; and 1 course with a minimum grade of C- from (INST326, CMSC131).
Restriction: Must be in Information Science program.

INST448 Digital Curation Research in Cultural Big Data Collections (3 Credits)
Students will learn the principles, methods, and technologies involved in the digital curation of large cultural data collections. Students will learn these concepts in class lectures, discussions, and participating on project teams in the Digital Curation Innovation Center (DCIC).
Prerequisite: INST311.
Restriction: Must be in Information Science program.
Repeatable to: 6 credits if content differs.

INST452 Health Data Analytics (3 Credits)
Health data analytics involves the extrapolation of actionable insights from patient data, using data sources such as electronic health records (EHRs), claims data, surveillance data, and surveys. Health data is complex, often unstructured and incomplete, and is organized for clinical care rather than to meet analytic needs. This course will involve the use of various analytical methods in order to translate large and complex data, whether structured or unstructured, into insights that improve decision-making from both the patient and provider perspectives. Healthcare data are rich and hold so much potential, but a challenge is presented to patients, providers, and even government agencies when it comes to figuring out how to leverage these data. Students in this course will learn foundational topics in data analytics focused on health data and will apply this knowledge to real health datasets through hands-on labs integrated into the lectures.
Prerequisite: Minimum of a C- in INST201, MATH115, PSYC100, INST126, and STAT100.
Restriction: Must be in the Information Science program.

INST462 Introduction to Data Visualization (3 Credits)
Exploration of the theories, methods, and techniques of visualization of information, including the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST314, MATH115, PSYC100, and STAT100.
Restriction: Must be in Information Science program.

INST464 Decision Making for Cybersecurity (3 Credits)
Discusses human and organizational decision making from a variety of perspectives. Applies different risk assessment and decision making frameworks that are relevant to personal and organization cybersecurity, with a focus on the quantitative Factor Analysis of Information Risk (FAIR) model. Considers monetary, social and societal costs of cybersecurity decisions. Considers a range of questions relating to cybersecurity, from whether to install a game on a smartphone to how to allocate scarce information security resources in an organization.
Prerequisite: Must have earned a minimum grade of C- in INST201, INST126, MATH115, PSYC100, and INST364.
Restriction: Must be in Information Science program.
Credit Only Granted for: INST408W or INST464.
Formerly: INST408W.

INST465 Design and Human Disability and Aging (3 Credits)
Design of special and mainstream products and systems to include use by people facing barriers to use due to disability and aging. Includes introduction to people with disabilities and the tools they use and strategies for cross-disability inclusive design of special and mainstream technology.The class will then be divided into interdisciplinary design teams. These teams will be given a special or mass market product for which they are to develop a design which is more accessible, yet remains mass producible and marketable. Emphasis will be on practical mass-market design and the realities and constraints of design for commercial production and/or public systems.
Credit Only Granted for: INST408B or INST465.
Formerly: INST408B.

INST466 Technology, Culture, and Society (3 Credits)
Individual, cultural, and societal outcomes associated with development of information & communication technologies (ICTs), including pro- and anti-social factors. Unpacking how gender, race, ethnicity, sexual orientation, disabilities, and political affiliations affect consumption and production of online experiences. Unpacking how structures of dominance, power and privilege manifest at individual, institutional and cultural levels.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301).
Restriction: Must be in the Information Science program.

INST467 Practical Hacking for Policy Makers (3 Credits)
Explores the key issues facing policy makers attempting to manage the problem of cybersecurity from its technical foundations to the domestic and international policy considerations surrounding governance, response, critical infrastructure risk management, and privacy. Designed for students with little to no background in information technology, and will provide the principles to understand the current debates shaping a rapidly evolving security landscape.
Prerequisite: Minimum grade of C- in INST126, INST201, INST364, MATH115, STAT100, and PSYC100.
Restriction: Must be in Information Science program.
Credit Only Granted for: INST408V, PLCY388C, or INST467.
Formerly: INST408V.

INST490 Integrated Capstone for Information Science (3 Credits)
The capstone provides a platform for Information Science students where they can apply a subset of the concepts, methods, and tools they learn as part of the Information Science program to addressing an information problem or fulfilling an information need.
Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in INST126, INST311, INST314, INST326, INST327, INST335, INST346, INST352, INST362, PSYC100, STAT100, and MATH115.
Restriction: Must be in Information Science program; and permission of INFO-College of Information Studies.

ISRL - Israel Studies

ISRL142 Introduction to Modern Israel (3 Credits)
An introduction to the history, politics, culture and society of modern Israel.
Credit Only Granted for: ISRL142, JWST142, JWST219B.

ISRL249 Selected Topics in Israel Studies (3 Credits)
Topics in the study of Zionism and contemporary Israel from the 1880's to the present. Future offerings may address history, politics, or culture.
Recommended: ISRL142.
Repeatable to: 6 credits if content differs.

ISRL249G Introduction to Jewish Literature (3 Credits)
A survey of Jewish literature and introduction to methods of reading literature in general and Jewish literature in particular. Concern with what makes a literary corpus Jewish and other issues of canonicity. All texts in English translation.Cross-listed with: JWST272, CMLT242.
Credit Only Granted for: JWST272, CMLT242, or ISRL249G.

ISRL269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ISRL282 Introduction to Israeli Cinema (3 Credits)
An overview of Israeli cinema, with attention to the distinctive themes, politics, and problems that distinguish Israeli film-making. Taught in English.

ISRL289 New Explorations in Israel Studies (3 Credits)
Investigation of critical and innovative responses in Israel Studies. Although the topic will vary, the course will encourage intellectual exploration by students of fundamental problems and critical methods.

ISRL299 Independent Study in Israel Studies (1-3 Credits)
This lower-level independent study allows students to work closely with an Israel Studies faculty member of their choice, pending prior approval of the faculty member. In this independent study, students will focus on a topic specific to Israel Studies.
Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Repeatable to: 6 credits.

ISRL329 Special Topics in Israel Studies (3 Credits)
Topics in the study of Zionism and contemporary Israel from the 1880's to the present at an intermediate level. Individual sections may address history, politics, or culture.
Repeatable to: 9 credits if content differs.

ISRL342 History of Modern Israel (3 Credits)
History of modern Israel since the beginning of the Zionist settlement in 1882. Attention to different interpretations and narratives of Israel's history, including the historical and ideological roots of Zionism, the establishment of the State of Israel, ideological forces, wars, and the triumphs and crises of democracy.Cross-listed with HIST376.
Credit Only Granted for: HIST376 or ISRL342.

ISRL343 Global Migration and the Israeli Case Study (3 Credits)
Over 70% of Israel's population is made of first, second or third generation immigrants, who came from over 70 countries, making Israel an ultimate immigrant society. This course will focus on the history of Israel as a case study for the understanding of the historical phenomena of modern immigration.Cross-listed with: SOCY398G.
Credit Only Granted for: ISRL349K, GVPT368G, SOCY398G, SOCY398I, or ISRL343.
Formerly: ISRL349K.

ISRL349 Investigating Topics in Israel Studies (3-6 Credits)
Topics in the study of Zionism and contemporary Israel from the 1880's to the present at an intermediate level. Individual sections may address history, politics, or culture.
Recommended: ISRL142 and ISRL249.

ISRL369 Special Topics in Study Abroad (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ISRL448 Seminar in Israel Studies (3 Credits)
Intensive study of an Israel Studies topic. Expected work product is a substantial research or analysis paper or appropriate equivalent.
Recommended: ISRL349 and ISRL249.
Restriction: Must be in the Israel Studies Minor.

ISRL449 Advanced Topics in Israel Studies (3 Credits)
Topics in the study of Zionism and contemporary Israel from the 1880s to the present at the advanced level. Individual sections may address history, politics, or culture. Some Sections may have language or course prerequisites.
Recommended: ISRL349 or ISRL249.
Repeatable to: 6 credits if content differs.

ISRL499 Advanced Independent Study in Israel Studies (1-3 Credits)
This upper-level independent study allows students to work closely with an Israel Studies faculty member of their choice, pending prior approval of the faculty member. In this independent study, students will focus on a topic specific to Israel Studies.
Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Repeatable to: 6 credits.

ITAL - Italian

ITAL103 Intensive Elementary Italian (4 Credits)
Covers speaking, reading, writing, listening, and culture of Italian-speaking world.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Not open to fluent/native speakers of Italian.
Credit Only Granted for: ITAL103 or ITAL121.

ITAL121 Accelerated Italian I (3 Credits)
An intensive beginning course in Italian language skills: guided practice in reading, writing, understanding and conversation, to enable the student to move more quickly to advanced courses. Restricted to students already having a good background in at least one other foreign language. When taken with ITAL122, may be used to satisfy language requirement.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.
Credit Only Granted for: ITAL103 or ITAL121.

ITAL122 Accelerated Italian II (3 Credits)
Continuation of ITAL121. Completion of accelerated cycle. May be used to satisfyARHU Global Engagement requirement.
Prerequisite: ITAL121; or must have appropriate Foreign Language Placement Test (FLPT) score.
Credit Only Granted for: ITAL203 or ITAL122.

ITAL169 Special Topics in Study Abroad I (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ITAL203 Intensive Intermediate Italian (4 Credits)
Covers speaking, reading, writing, listening, and culture of Italian-speaking world.
Prerequisite: ITAL103; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed ITAL122; and must not be a fluent/native speaker of Italian.
Credit Only Granted for: ITAL203 or ITAL122.

ITAL204 Review Grammar and Composition (3 Credits)
An intensive review of major aspects of contemporary grammatical usage; training in comprehension; an introduction to guided composition.
Prerequisite: ITAL203 or ITAL122; or must have appropriate Foreign Language Placement Test (FLPT) score.

ITAL207 Reading and Writing in Italian (3 Credits)
Culture-based, process approach to reading and writing in Italian; selected grammatical topics.
Prerequisite: ITAL204; or students who have taken courses with comparable content may contact the department.
Restriction: Must not be a fluent/native speaker of Italian.

ITAL211 Intermediate Conversation (3 Credits)
Practice in spoken Italian based on reading and listening exercises in a variety of genres. Written assignments and exams.
Prerequisite: ITAL203; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Italian.

ITAL251 Introduction to Italian Literature (3 Credits)
Reading of selected literary texts; discussion and brief essays in Italian.
Prerequisite: ITAL204; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Italian.

ITAL252 Stories of Italy (3 Credits)
Introduction to fictions across time and space in Italy.
Prerequisite: ITAL207; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Italian.
Additional Information: .

ITAL261 Cuisine, Culture, and Society in Italy Yesterday and Today (3 Credits)
Exposes students to an important aspect of Italian culture: the art of gastronomy. Provides an in-depth understanding of the close relationship between food and culture, while enriching their knowledge of the Italian language through reading and analysis of various texts which deal with the preparation and adaptation of Italian food in different cultural settings. Taught in Italian.
Prerequisite: ITAL204; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ITAL301 Italian Composition (3 Credits)
Techniques of composition; grammatical analysis; various genres; vocabulary.
Prerequisite: ITAL207; or students who have taken courses with comparable content may contact the department.

ITAL306 Commercial Italian I (3 Credits)
An introduction to Italian Business language and culture. Special emphasis on communicative strategies used in business transactions and applications. Reading and discussion of relevant articles relating to business world from on-line newspapers and magazines.
Prerequisite: ITAL301; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL311 Advanced Oral Expression: Current Events (3 Credits)
Oral expression; development of idiomatic forms and vocabulary to level of the Italian press.
Prerequisite: ITAL211; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL361 Survey of Italian Society and Culture: From Fascism to the Seventies (3 Credits)
Development of Italian society and culture from Fascism to the 1970s. Literature, cinema, economy, popular culture, and daily life. Taught in Italian.
Prerequisite: ITAL207.

ITAL362 Survey of Italian Society and Culture: From the 1980s to thePresent Day (3 Credits)
Development of Italian society and culture from the 1980s to the present. Literature, cinema, economy, popular culture, daily life. Taught in Italian.
Prerequisite: ITAL207; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ITAL386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

ITAL388 Language House Colloquium (1 Credit)
The Language House Colloquium is a one-credit course for students residing in the Language House Immersion Program. The course focuses on the further development of skills in the target language and the acquiring of cultural knowledge of the countries that speak the target language. The course is designed to supplement the learning that takes place on a daily basis in the Language House program.
Restriction: Must be a resident in Language House.
Repeatable to: 4 credits.

ITAL399 Directed Study in Italian (1-3 Credits)
Intended for undergraduates who wish to work on an individual basis with a professor of their choice.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 3 credits.

ITAL401 Advanced Composition and Style (3 Credits)
Advanced writing practice in range of genres.
Prerequisite: ITAL301; or students who have taken courses with comparable content may contact the department.

ITAL411 Monsters and Demons: the Faces of Evil in Dante's Inferno (3 Credits)
An interdisciplinary study of Dante's Inferno as represented in the Divine Comedy. Special emphasis on Dante's own portrayal of monsters and demons and their roles in the poet's eschatological vision of Hell.Taught in English

ITAL421 The Italian Renaissance (3 Credits)
A study of major trends of thought in Renaissance literature, art, and science. Taught in English.
Credit Only Granted for: ITAL421 or ITAL422.

ITAL431 Italian Civilization in Translation (3 Credits)
Political, social, intellectual, literary and artistic forces shaping contemporary Italy from the late Middle Ages to the present. Taught in English.
Credit Only Granted for: ITAL431 or ITAL432.

ITAL433 Holocaust in Italian Literature and Cinema (3 Credits)
Review of literature and theoretical writings of Italy's most famous survivor, Primo Levi, to a sampling of Italian films that focus in vastly different and often extremely controversial ways on the experience of the concentration camp, while addressing a series of central questions from the brutal realities of the camps to the 'compromises' made in order to survive, the need to bear witness, and the idea of the survivor's guilt.Cross-listed with FILM433.
Credit Only Granted for: FILM433 or ITAL433.

ITAL436 Italian Cinema I: Neorealism (3 Credits)
Explores representations of Italy in cinema with special focus on identity formation and the movement of Italian neorealism and post neorealism. Taught in English.Cross-listed with FILM441.
Credit Only Granted for: FILM441 or ITAL436.

ITAL469 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ITAL471 Italian Cinema: A Cultural Approach in Translation (3 Credits)
The culture of Italy through the medium of film from the silent days up to the present. Taught in English.
Credit Only Granted for: ITAL471 or ITAL472.

ITAL473 Italian Cinema II - In Translation (3 Credits)
A study of Italian society and culture through the medium of film from the mid 1970's to the present. Taught in English.Cross-listed with FILM431.
Credit Only Granted for: ITAL473, ITAL474, or FILM431.

ITAL475 The Italian Opera Libretto in English (3 Credits)
History and analysis of Italian opera librettos from Monteverdi through Mozart to Verdi and Puccini. Taught in English.
Prerequisite: Must have completed one course in literature.
Credit Only Granted for: ITAL475 or ITAL476.

ITAL478 Colloquium in Italian (1 Credit)
Colloquium section taught in Italian to accompany 400-level Italian courses taught in English. Discussion, presentations, readings.
Prerequisite: ITAL311; or students who have taken courses with comparable content may contact the department.
Corequisite: ITAL498, ITAL411, ITAL431, ITAL421, ITAL473, ITAL475, ITAL471, or ITAL499.
Repeatable to: 6 credits.

ITAL497 Senior Project (3 Credits)
Individual independent study of an aspect of Italian literature, culture or society selected according to student interest and need in consultation with a member of the Italian program.
Prerequisite: 4 courses from ITAL400-499 course range; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL498 Special Topics in Italian Literature (3 Credits)
Repeatable to: 6 credits if content differs.

ITAL499 Special Topics in Italian Studies (3 Credits)
Repeatable to: 6 credits if content differs.

ITAX - Italian Education Abroad

ITAX201 Cultural Diversity in Italy (3 Credits)
The different practices and experiences of cultural diversity and its challenges in contemporary Italy. The course will analyze the transition of Italy from a country of emigration to a country of both emigration and immigration.
Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

IVSP - Individual Studies Program

IVSP317 Progress Report (1 Credit)
A written analysis of the program. Students register for IVSP 317 only once, the semester before the final term.
Restriction: Must be in Individual Studies program.

IVSP318 Independent Learning Activities (1-6 Credits)
An independent study course which students can use for a variety of out-of-class internship and research opportunities.
Restriction: Must be in Individual Studies program; and permission of faculty sponsor.
Repeatable to: 9 credits if content differs.

JAPN - Japanese

JAPN101 Elementary Japanese I (6 Credits)
Introduction to basic patterns of contemporary spoken Japanese and to the two phonetic syllabaries (Katakana and Hiragana).
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.

JAPN102 Elementary Japanese II (6 Credits)
Continued introduction to the basic spoken patterns of contemporary Japanese.
Prerequisite: Minimum grade of C- in JAPN101; or appropriate Foreign Language Placement Test (FLPT) score.

JAPN201 Intermediate Japanese I (6 Credits)
Contemporary spoken and written Japanese.
Prerequisite: Minimum grade of C- in JAPN102; or or appropriate Foreign Language Placement Test (FLPT) score.

JAPN202 Intermediate Japanese II (6 Credits)
Contemporary spoken and written Japanese.
Prerequisite: Minimum grade of C- in JAPN201; or appropriate Foreign Language Placement Test (FLPT) score.

JAPN221 Radical Transformations in Japanese Culture (3 Credits)
Since the early modern period, Japanese cultural forms have reflected the innate instability of contemporary social structures. Focusing on Noh drama, Matsuo Basho's haiku travelogue Oku no hosomichi, popular fiction by Ihara Saikaku, the movement for vernacular literature in the late 19th century, the rise and fall of Marxists and feminists in early 20th century Japan, a variety of perspectives on WWII and its legacy, as well as Japanese pop culture, we will consider the way cultural works developed as part of Japan's radical transformations in the last four centuries. A major film component increases students' direct exposure to the work of Japan's cultural producers, and students' suggestions and interests will help shape the final unit of the course about Japan today. Taught in English, and all readings are in English translation.

JAPN269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

JAPN298 Special Topics Japanese Literature (3 Credits)
Special topics in Japanese literature.
Repeatable to: 9 credits if content differs.

JAPN301 Advanced Japanese I (6 Credits)
Advanced conversation, oral comprehension, and selected readings.
Prerequisite: Minimum grade of C- in JAPN202; or permission of instructor.

JAPN302 Advanced Japanese II (6 Credits)
Continued readings in varied modern texts and advanced conversation and oral comprehension.
Prerequisite: Minimum grade of C- in JAPN301; or permission of instructor.

JAPN311 Traditional Japanese Language and Culture (3 Credits)
Introduction to classical Japanese language (kobun) through representative texts and genres from the literary traditions of the Heian period (794-1185) to the Early Modern period (1600-1868). Taught in Japanese and English.
Prerequisite: Minimum grade of C- in JAPN202; or permission of instructor.

JAPN314 Edo Text and Context: Origins of Japanese Popular Culture (3 Credits)
Intensive reading of various genres of literary and historical texts from the early modern (Edo/Tokugawa) period, read in English translation. Taught in English.

JAPN315 Reading Japanese Empire (3 Credits)
Reading a wide variety of cultural, intellectual, and official texts, this course explores how Japan's age of empire (1869-1945) was understood, imagined, and lived in various colonial contexts and in the metropolitan center. Students will gain a textured understanding of the complexities and contradictions of Japan's imperial project and the fraught ways this history plays out today in Japan and Asia. Taught in English.

JAPN316 Women and Japanese Literature: Japanese Literature in Translation (3 Credits)
Close critical reading of a range of Japanese literary texts that deal in some significant manner with gender, sex and sexuality. Taught in English.
Credit Only Granted for: JAPN316 or JAPN418W.
Formerly: JAPN418W.

JAPN325 Modern Japanese Literature and Film (In Translation) (3 Credits)
Explores and questions the significance of some of modern Japan's most dynamic historical transformations, pressing social issues, and modes of cultural expression. Covers the Meiji period (1868-1912) to the 21st century.

JAPN345 Mapping Premodern Japan (3 Credits)
Mapping Premodern Japan investigates travel in Japan through concentrated study of a key route in the premodern period. We will explore the role travel played in larger social, political, economic, and cultural structures and how stories of travel shaped ideas of identity, place, and national culture. We will analyze scholarship, conduct research, and learn the process for developing authentic scholarship in Cultural Studies. The course will culminate in a digital humanities final project in which students will conduct research on the major site of study and present their findings using digital storytelling. Taught in English.
Credit Only Granted for: JAPN498M, JAPN498T, or JAPN345.
Formerly: JAPN498T and JAPN498M.

JAPN369 Special Topics in Study Abroad (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

JAPN386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

JAPN388 Language House Spring Colloquium (1 Credit)
For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.
Restriction: Must be a resident of Language House.
Repeatable to: 8 credits.

JAPN401 Readings in Modern Japanese Literature (3 Credits)
Development of advanced reading, vocabulary, grammar, and translation skills through selected readings in Japanese drawn primarily from modern literature.
Prerequisite: Minimum grade of C- in JAPN302; or permission of instructor.

JAPN402 Readings in Japanese Cultural Studies (3 Credits)
Development of advanced reading, vocabulary, grammar, and translation skills through selected readings in Japanese drawn from the fields of history, social sciences, cultural studies, film studies, and popular culture.
Prerequisite: Minimum grade of C- in JAPN302; or permission of instructor.

JAPN407 The Art of Translation (3 Credits)
Theory and practice of translation. Variety of genres. Japanese to English.
Prerequisite: 1 course with a minimum grade of C- from (JAPN401, JAPN402); or students who have taken courses with comparable content may contact the department.

JAPN408 Special Topics in Japanese (3 Credits)
Topic in the Study of Japanese, to be announced each time course is offered. Taught in Japanese.
Prerequisite: Minimum grade of C- in JAPN302; or permission of instructor.

JAPN412 Classical Japanese (3 Credits)
Continuation of JAPN 411 with more advanced classical Japanese.
Prerequisite: JAPN411.

JAPN418 Japanese Literature in Translation (3 Credits)
Representative works of Japanese literature in translation.
Repeatable to: 9 credits if content differs.

JAPN421 History of the Japanese Language (3 Credits)
Investigation of the origin of the Japanese language, its relationship with other languages, and its development. Taught in English, but presumes knowledge of Kanji (Chinese characters).
Prerequisite: JAPN102; or permission of ARHU-School of Languages, Literatures, and Cultures department.

JAPN422 Introductory Japanese Linguistics (3 Credits)
An investigation of Japanese sound patterns and syntax through a comparison with English.

JAPN424 Japan From the Margins (3 Credits)
Japan from the Margins takes as its focus the history and representations of various others in Japanese society. They include ethnic Ainu, Okinawans, and Koreans, a historical outcaste group called the Burakumin, and people marginalized for their non-normative gender and sexual practices. Students learn about the historical specificities of each group as well as their common experiences of institutional discrimination as they grapple with larger questions regarding prejudice, nationalism, and social justice. Taught in English.
Credit Only Granted for: JAPN498B or JAPN424.
Formerly: JAPN498B.

JAPN425 The Atomic Bomb in Literature and Memory (3 Credits)
Study of declassified documents and commentary on the United States decision to use the bomb in 1945, the many ways Japanese writers have attempted to express their indescribable experiences in Hiroshima and Nagasaki, and the shaping of historical narratives and national identities in post-war Japan and the U.S. Taught in English.
Credit Only Granted for: JAPN498A or JAPN425.
Formerly: JAPN498A.

JAPN428 Seminar in Japanese Discourse and Conversation Analysis (3 Credits)
Presentation and discussion of classic and current readings in English and Japanese on theories and actual practice of discourse and conversation analysis. Students will learn transcription techniques and have an opportunity to apply them in a final term paper.
Prerequisite: JAPN302.
Recommended: JAPN422.
Repeatable to: 6 credits if content differs.

JAPN438 Topics in Japanese Pragmatics (3 Credits)
Basic concepts in the field of pragmatics (the study of language in context) such as deixis and indexicality, speech acts, ellipsis, and politeness. Readings in English on English and Japanese examples.
Prerequisite: JAPN201.
Recommended: JAPN422.
Repeatable to: 9 credits if content differs. Jointly offered with JAPN638.

JAPN498 Special Topics in Japanese Studies (3 Credits)
Special topics in Japanese studies. Taught in English.

JAPN499 Directed Study in Japanese (1-3 Credits)
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

JOUR - Journalism

JOUR106 Introduction to Studio Production (1 Credit)
Students will participate in various production roles to assist in the production of UMTV shows.
Additional Information: Course does not count toward a Journalism degree.

JOUR130 Self-Presentation in the Age of YouTube (3 Credits)
Students, as they make use of evolving technologies, need to be able to present themselves effectively in front of any number of different audiences through any number of different outlets. Whether in an interview on radio, a guest presentation at a conference, in comments on a video blog, in commentary on TV, in the lead on a self-produced YouTube video, or as spokesperson in front of investors or management, professionals need strong oral communication skills. This class focuses on strengthening those skills through active individual and group presentations, as well as, through discussion of key techniques and group critique of presentation publicly available in the social media space on sites such as YouTube.
Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130 or THET285.
Additional Information: May not count toward the Journalism major.

JOUR150 Introduction to Mass Communication (3 Credits)
Survey of the functions and effects of the mass media in the United States. A consumer's introduction to newspapers, television, radio, film, sound recording, books, magazines, and new media technology.
Additional Information: Not applicable toward journalism major.

JOUR152 Introduction to Storytelling with Code (1 Credit)
An introduction to the ways markup and programming languages and computational thinking are transforming news reporting and storytelling.
Prerequisite: Must have completed or be concurrently enrolled in JOUR200.

JOUR175 Media Literacy (3 Credits)
An analysis of the information, values and underlying messages conveyed via television, newspapers, the internet, magazines, radio and film. Examines the accuracy of those messages and explores how media shape views of politics, culture and society.
Additional Information: Not applicable toward journalism major.

JOUR181 Grammar for Journalists (1 Credit)
The basic grammatical structures of standard American written English and its conventions of punctuation, diction and usage in journalistic writing.
Credit Only Granted for: ENGL181, ENGL281, or JOUR181.

JOUR199 Survey Apprenticeship (1 Credit)
College-monitored experience in approved mass-communications organizations and industries.
Prerequisite: Permission of JOUR-Philip Merrill College of Journalism.
Repeatable to: 6 credits if content differs.
Formerly: JOUR198.

JOUR200 Journalism History, Roles and Structures (3 Credits)
Introduction to the study of journalism from the standpoint of media history and sociology.

JOUR201 News Writing and Reporting I (3 Credits)
Introduction to news for the print and electronic media, development of new concepts: laboratory in news-gathering tools and writing skills. Students who earned 80% or higher on the JOUR181 diagnostic are exempt from the JOUR181 prerequisite.
Prerequisite: Minimum grade of C- in ENGL101, JOUR181, and JOUR200; and permission of JOUR-Philip Merrill College of Journalism.
Restriction: For students intending to be journalism majors; and permission of JOUR-Philip Merrill College of Journalism.

JOUR202 News Editing (3 Credits)
Copy editing, fact checking, verification and research across media platforms, including social, with consideration of story play and placement, graphic principles, headlines and SEO.
Prerequisite: JOUR201.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR203 Introduction to Multimedia Skills (3 Credits)
Examining the basics of producing and editing digital photos, video, and audio. Topics include: framing, lighting, and other aspects of composition; sequencing, using wide, medium, and tight shots; and ethical considerations when collecting sound and visuals.
Prerequisite: JOUR201.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.
Credit Only Granted for: JOUR203 or JOUR328G.
Formerly: JOUR328G.

JOUR262 News Videography (3 Credits)
Introduction to shooting, editing and production of video stories for broadcast and the Web; includes newsgathering in the field.
Prerequisite: Must have completed or be concurrently enrolled in JOUR201. Jointly offered with: JOUR603.
Credit Only Granted for: JOUR262 or JOUR603.

JOUR281 Media Law and Ethics in the Digital Age (3 Credits)
Explores the First Amendment, libel, privacy, FOIA and copyright as they have evolved in the digital news age of bloggers, tweeters and citizen journalists. The course will cover fundamental legal and ethical concepts as well as practical application.
Credit Only Granted for: JOUR289E or JOUR281.
Formerly: JOUR289E.
Additional Information: This course is intended for non-journalism majors.

JOUR282 Beyond Facebook: How Social Media are Transforming Society, Culture, Business and Politics (3 Credits)
Examining the rise of social media and their impact on culture, business, government, politics, journalism and society, this course provides students with a broad contextual understanding of the multidisciplinary impacts of social media such as Twitter, Facebook and similar Internet-based services.
Credit Only Granted for: JOUR289F or JOUR282.
Formerly: JOUR289F.

JOUR284 Scandal: Exposing Corruption, Justice, and Vice in America (3 Credits)
Students will examine the nature and meaning of scandals in society: how they are uncovered and constructed; why some forms of wrongdoing are considered scandalous but not others; how this definition has changed over time; and how scandals resonate in ways that reflect societal norms.
Credit Only Granted for: JOUR289P, JOUR284 or HONR239J.
Formerly: JOUR289P, HONR239J.

JOUR289E Media Law and Ethics in the Digital Age (3 Credits)
Explores the First Amendment, libel, privacy, FOIA and copyright as they have evolved in the digital news age of bloggers, tweeters and citizen journalists. The course will cover fundamental legal and ethical concepts as well as practical application.
Credit Only Granted for: JOUR289E or JOUR281.
Formerly: JOUR289E.
Additional Information: This course is intended for non-journalism majors.

JOUR289F Beyond Facebook: How Social Media are Transforming Society, Culture, Business and Politics (3 Credits)
Examining the rise of social media and their impact on culture, business, government, politics, journalism and society, this course provides students with a broad contextual understanding of the multidisciplinary impacts of social media such as Twitter, Facebook and similar Internet-based services.
Credit Only Granted for: JOUR289F or JOUR282.
Formerly: JOUR289F.

JOUR289P Scandal: Exposing Corruption, Justice, and Vice in America (3 Credits)
Students will examine the nature and meaning of scandals in society: how they are uncovered and constructed; why some forms of wrongdoing are considered scandalous but not others; how this definition has changed over time; and how scandals resonate in ways that reflect societal norms.
Credit Only Granted for: JOUR289P, JOUR284 or HONR239J.
Formerly: JOUR289P, HONR239J.

JOUR300 Journalism Ethics (3 Credits)
Examination of ethical problems in news writing and reporting.
Prerequisite: JOUR201.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR320 News Writing and Reporting II: Multiplatform (3 Credits)
Principles and practices of news reporting; covering news beats and other news sources, including researching news stories for accuracy, comprehensiveness and interpretation. Due to rigorous publication requirement, plan your schedule accordingly.
Prerequisite: Must have completed or be concurrently enrolled in JOUR152; and minimum grade of C- in JOUR201; and must have completed or be concurrently enrolled in JOUR262 or JOUR370.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR324 Commentary and Editorial Writing (3 Credits)
Journalistic interpretation and analysis; commentary and editorial writing.
Prerequisite: JOUR320 or JOUR360.
Formerly: JOUR326.

JOUR325 Capital News Service Bureau (9 Credits)
Advanced journalism training. Students report as part of college's Capital News Service program.
Prerequisite: JOUR320; and permission of JOUR-Philip Merrill College of Journalism.

JOUR327 Urban Affairs Reporting (3 Credits)
Students are immersed in coverage of issues affecting cities, working on a semester-long multi-platform reporting project based in Baltimore.
Prerequisite: JOUR320; and permission of instructor. Jointly offered with JOUR627.
Credit Only Granted for: JOUR327 or JOUR627.

JOUR328 Special Topics in News Writing and Reporting (1-3 Credits)
Advanced training and practice in writing and reporting news.
Repeatable to: 6 credits if content differs.

JOUR334 Audio and Podcast Reporting (3 Credits)
Students will learn the tools needed to report and produce short- and long-form audio storytelling, including writing, reporting, interviewing, production, editing, hosting and delivery. Field reporting and audio gathering outside of class are required, along with writing and mixing broadcast-quality audio stories. Students will work together to produce a complete radio broadcast on deadline, with live and pre-recorded elements. Various interests in audio reporting are welcome and encouraged.
Prerequisite: JOUR360.
Credit Only Granted for: JOUR368L OR JOUR334.
Formerly: JOUR368L.

JOUR343 Investigative Reporting (3 Credits)
Students will learn the essentials of accountability reporting while producing a publishable, in-depth project on an issue with national significance and impact on people's lives. Substantial fieldwork, teamwork and persistence are required.
Prerequisite: JOUR320; or must have completed or be concurrently enrolled in JOUR361. And permission of instructor.
Credit Only Granted for: JOUR328I or JOUR343.
Formerly: JOUR328I.

JOUR350 Multimedia Presentation (3 Credits)
An examination of the relationship of verbal and visual components of news content and the presentation of information in print and online publications by combining typography, graphics, images and interactivity using current digital technologies.
Prerequisite: Minimum grade of C- in JOUR202; or minimum grade of C- in JOUR262.
Credit Only Granted for: JOUR350 or JOUR373.

JOUR352 Interactive Design and Development (3 Credits)
Conceptualize, wireframe, design and build responsive Web pages using HTML, style sheets and other coding tools; work with open source interactive tools, JavaScript libraries, multimedia and text to create charts, timelines, maps and other forms of nonfiction storytelling.
Prerequisite: JOUR152; and JOUR201; and must have completed or be concurrently enrolled in JOUR262 or JOUR370. Or permission of JOUR-Philip Merrill College of Journalism.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism. Jointly offered with JOUR652.
Credit Only Granted for: JOUR352 or JOUR652.

JOUR353 News Bureau: Multimedia Reporting (6 Credits)
Advanced reporting and writing in an online environment focusing on multimedia, non-traditional storytelling and investigative reporting.
Prerequisite: JOUR352; and permission of JOUR-Philip Merrill College of Journalism; and (JOUR320 or JOUR360).

JOUR354 Interactive Multimedia Storytelling (3 Credits)
Advanced development of multimedia journalism, with emphasis on interactivity and application of new technologies, drawing on multiple sources, technologies and techniques to create interactive narratives.
Prerequisite: JOUR352.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR355 News Bureau: Multimedia Editing and Production (6 Credits)
Advanced online journalism training. Students work as multimedia and social media editors and producers, building interactive content and special reports.
Prerequisite: JOUR320 or JOUR360; and JOUR352; and permission of JOUR-Philip Merrill College of Journalism.

JOUR356 Kaiser Health Multimedia Reporting (3 Credits)
Opportunities are provided for advanced reporting and writing on health topics, using traditional and multimedia storytelling tools.
Prerequisite: JOUR203; and (JOUR320 or JOUR360); and permission of instructor.

JOUR357 Capital News Service Broadcast Immersion (6 Credits)
Advanced broadcast journalism training. Students report as part of the College's Capital News Service program.
Prerequisite: JOUR361; and permission of JOUR-Philip Merrill College of Journalism.

JOUR358 Special Topics in Visual Communication (3 Credits)
Advanced training and practice in visual communication.
Prerequisite: JOUR320 or JOUR360.
Repeatable to: 6 credits if content differs.

JOUR360 News Writing and Reporting II: Broadcast (3 Credits)
Writing and reporting for broadcast media: production of news stories.
Prerequisite: Minimum grade of C- in JOUR201.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR361 Television Reporting and Production (3 Credits)
Writing and editing for the broadcast media. Interpretive and documentary news stories.
Prerequisite: JOUR262 and JOUR360.

JOUR362 Broadcast News Producing (3 Credits)
Producing TV news.
Prerequisite: JOUR262 and JOUR360; and must have completed or be concurrently enrolled in JOUR361.

JOUR363 Long Form Broadcast Journalism (3 Credits)
Production of long form broadcast news reporting, reality videos or documentaries.
Prerequisite: JOUR361; and permission of JOUR-Philip Merrill College of Journalism.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism. Jointly offered with JOUR663. Credit only grant ed for: JOUR363, JOUR486 or JOUR663.
Formerly: JOUR486.

JOUR364 Advanced Audio and Podcast Reporting (3 Credits)
Students will receive professional skills training in the reporting, writing, editing, voicing and production of radio news. Students will be required to do extensive field reporting, along with writing and mixing radio pieces. They will also participate in other aspects of radio news production, including editing, directing, live interviewing and hosting. By the end of the semester, students will have created all the elements of a complete radio broadcast. The class will also delve into the history and evolution of radio news and its future in podcasting and other forms.
Prerequisite: JOUR 334. Jointly offered with: JOUR664.

JOUR367 Broadcast News Bureau (9 Credits)
Advanced broadcast journalism training. Students report as part of the college's Capital News Service program.
Prerequisite: JOUR361; and permission of JOUR-Philip Merrill College of Journalism.

JOUR368 Topics in Broadcast and Electronic Media (1-3 Credits)
Advanced research, analysis and/or practice of selected topics in broadcast journalism.
Repeatable to: 6 credits if content differs.

JOUR370 Photojournalism (3 Credits)
Examining the basics of shooting, editing and storytelling with still photos taken with 35mm digital cameras. Students shoot portraits, feature photos and action shots. Final project is a photo story/essay.
Prerequisite: Must have completed or be concurrently enrolled in JOUR201.
Restriction: Permission of JOUR-Philip Merrill College of Journalism.
Credit Only Granted for: JOUR 368P, JOUR 370 or JOUR 670.
Formerly: JOUR 368P.
Additional Information: Students are required to borrow, rent or purchase a 35mm digital camera. Contact department for camera specifications.

JOUR371 Feature Writing (3 Credits)
Research and writing feature articles.
Prerequisite: JOUR320.

JOUR381 Media Industry Reporting (3 Credits)
Students hone their reporting and writing skills as they produce work for an award-winning professional magazine, and immerse themselves in the news industry, which is undergoing dramatic transformation in the digital age.
Prerequisite: JOUR320; and permission of instructor. Jointly offered wi th JOUR681.
Credit Only Granted for: JOUR381 or JOUR681.

JOUR382 Sports Writing and Reporting (3 Credits)
Gives students full and wide-ranging instruction in all aspects of sports reporting and writing, including how to report, write, edit and lay out sports stories, incorporating photography and multimedia. We will also discuss ethics, objectivity, fairness and the future of sports journalism.
Prerequisite: JOUR320; and permission of JOUR-Philip Merrill College of Journalism.
Credit Only Granted for: JOUR328B or JOUR382.
Formerly: JOUR328B.

JOUR389 News Coverage of Special Topics (1-3 Credits)
Advanced training and practice in writing and reporting news in one specialized field of interest.
Repeatable to: 6 credits.

JOUR396 Supervised Internship (2 Credits)
Students will complete a minimum of 90 hours in a supervised journalism internship over a minimum of 10 weeks in spring and fall, and eight weeks in summer. Emphasis is on relating academic training to professional experience. Students may pick up an internship proposal form in KNI 1100, have their internship supervisor fill it out, and meet with the college's internship director to receive permission to register. No requests to register after the Schedule Adjustment Period will be granted. This requirement would affect incoming freshmen from the fall 2012 class.
Prerequisite: Must have earned a grade of C- or better in JOUR320.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.
Credit Only Granted for: JOUR326, JOUR366, or JOUR396.

JOUR398 Independent Study (1-3 Credits)
Individual projects in journalism.
Repeatable to: 3 credits.

JOUR399 Supervised Internship (1 Credit)
Supervised news internship experience; relation of academic training to professional experience.
Prerequisite: Minimum grade of C- in JOUR320 and JOUR360.
Repeatable to: 3 credits if content differs.
Credit Only Granted for: JOUR326, JOUR366, JOUR396, or JOUR399.

JOUR400 Media Law (3 Credits)
Legal rights and constraints of mass media; libel, privacy, copyright, monopoly, contempt, and other aspects of the law applied to mass communication. Previous study of the law not required.
Prerequisite: JOUR320, JOUR360, or JOUR501.
Restriction: Junior standing or higher.

JOUR402 Journalism Law and Ethics (3 Credits)
An examination of the legal rights and ethical problems and constraints of mass media, including libel, privacy, copyright, monopoly and contempt.
Prerequisite: JOUR201.
Credit Only Granted for: JOUR402 OR JOUR400 and JOUR300.

JOUR405 Breaking News With Numbers: Statistics for Journalists (3 Credits)
Common statistical tools, software and data visualization techniques will be used to allow students to analyze data and solve problems relevant to reporting and writing about politics, sports, criminal justice, business and other fields.
Prerequisite: Minimum grade of C- in JOUR201; and (MATH107 or MATH110; or must have completed a higher level math course). Or have permission of the instructor.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.
Credit Only Granted for: BIOM301, BMGT230, CCJS200, ECON230, ECON321, EDMS451, GEOG306, GEOL351, GVPT422, INST314, JOUR405, PSYC200 or SOCY201. (These courses do not necessarily meet the same major requirements-check with your advisor to see which of these courses will count for your major).

JOUR434 Salzburg Seminar: Global Media Literacy (3 Credits)
An advanced analysis of the information, values underlying messages conveyed via television, newspapers, the Internet, magazines, radio and film from a cross-cultural perspective. Examines the accuracy of messages and explores how distinctive global media shape views of politics culture and society with nations, across regions and internationally.
Restriction: Must be in Salzburg Academy program. Jointly offered with JOUR734.
Credit Only Granted for: JOUR434 or JOUR734.

JOUR435 Salzburg Seminar: Global Change, Global Cooperation (3 Credits)
Practical and theoretical examination of a global problem (or problems) of contemporary importance from a cross-cultural, perspective. Analytical framework used to examine how media shape global problems, events and/or issues regionally.
Restriction: Must be in Salzburg Academy program. Jointly offered with JOUR735.
Credit Only Granted for: JOUR435 or JOUR735.

JOUR443 Sports, Society, Culture and the Media (3 Credits)
Designed to explore how sports, society, culture and the media critically relate to each other and the vast audiences of fans and interested parties. Students will study how journalists impact change; how sports shape culture; and how sports are seen throughout the world. College sports, children and sports, the business of sports, the history of sports media and the future of sports in society will be studied as well.
Restriction: Junior standing or higher.
Credit Only Granted for: JOUR459G or JOUR443.
Formerly: JOUR459G.

JOUR451 Advertising and Society (3 Credits)
Advertising as an institution with manifest economic purposes and latent social effects. Influences of advertising on people, and related issues of ethics and social responsibility.
Restriction: Junior standing or higher.

JOUR452 Women in the Media (3 Credits)
Participation and portrayal of women in the mass media from colonial to contemporary times.Cross-listed with WMST452.
Credit Only Granted for: JOUR452 or WMST452.

JOUR453 News Coverage of Racial Issues (3 Credits)
Analysis of news media coverage of issues relating to racial minorities in the United States, with special attention to Hispanics, Asian Americans, African Americans and Native Americans.
Restriction: Junior standing or higher.

JOUR455 Media Entrepreneurship (3 Credits)
Basic business and entrepreneurship concepts will be covered and will explore how technology is transforming the business of media. Students develop and pitch ideas for media businesses, learn startup basics, do exercises in Internet advertising and business plan analysis, use social networks and other digital communication tools, and perform other hands-on exercises in business development and presentation.
Credit Only Granted for: JOUR459E or JOUR455.
Formerly: JOUR459E.

JOUR456 Literature in Journalism (3 Credits)
From Truman Capote's In Cold Blood to Mark Bowden's Black Hawk Down, students will examine how literary works can help writers approach a subject in a different way than more traditional forms of journalism, including the advantages and limitations of the style.
Credit Only Granted for: JOUR456 or JOUR673.

JOUR458 Special Topics in Journalism (3 Credits)
Issues of special concerns and current interest.
Repeatable to: 6 credits if content differs.

JOUR459 Special Topics in Journalism (1-3 Credits)
Issues of special concern and current interest. Open to all students.
Repeatable to: 6 credits if content differs.

JOUR462 Professional Seminar in Public Affairs Reporting (3 Credits)
Explore theoretical and practical issues in the press coverage of governments. Examine the complex press-government relationship.
Prerequisite: Permission of JOUR-Philip Merrill College of Journalism.

JOUR470 Journalism and Public Communication Research (3 Credits)
Journalism and public communication research methods used in measuring public opinion and media programs and materials.
Prerequisite: Must have completed a university statistics course.
Credit Only Granted for: JOUR470 or JOUR477.
Formerly: JOUR477.

JOUR472 Data Journalism (3 Credits)
A practical, skills-based course in the basics of modern data journalism, data analysis and data storytelling. Students will learn to use data programming, statistical analysis, visualization tools and investigative reporting techniques to unearth key facts, patterns and proof in storytelling.
Prerequisite: JOUR320 or JOUR360. Jointly offered with JOUR772.
Credit Only Granted for: JOUR472 or JOUR772.

JOUR476 Researching Emerging Media in Journalism: Past, Present and Future (3 Credits)
Students will examine developments billed as innovative in the current technology-laden news ecology -- such as social media, mobile reporting and virtual reality -- and the blurring of lines between hard news, informed opinion and advocacy. While questions about the future cannot be answered with any certainty, an exploration of the past allows us to see what happened when new technologies, information systems and practices appeared as possible tools for use by journalists and the communities they served. Students will learn to use resources for researching emerging media, including UMD library databases and open access sources. The course will include presentations by the instructor, discussions, field trips, in-class exercises and student presentations. Each student will engage in a research project to understand the experience of emerging media in a decade between 1820 and 1980. Students will also write an essay contemplating current trends and the future of emerging media.
Prerequisite: Must have completed a university statistics course.
Credit Only Granted for: JOUR479W or JOUR476.
Formerly: JOUR479W.

JOUR479 Special Topics in Data Gathering and Analysis (1-3 Credits)
Special research topics for reporting and writing.
Repeatable to: 3 credits.

JOUR480 Capstone Colloquium: The Business of News (1 Credit)
Students will learn the basic news business concepts and examine how revenue and cost structures for media businesses are evolving in new directions. Topics include basic principles and concepts that drive media businesses in the Internet age, including revenue sources, dynamics of online advertising and subscriptions, mobile media strategies, user metrics, engaging audiences, and market dynamics.
Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism; and junior standing or higher; and permission of JOUR-Philip Merrill College of Journalism.

JWST - Jewish Studies

JWST141 American Jewish Experience (3 Credits)
History of the Jews in America from Colonial times to the present. Emphasis on the waves of migration from Germany and Eastern Europe; the changing nature of the American Jewish community and its participation in American social, economic, and political life.Cross-listed with HIST106.
Credit Only Granted for: HIST106 or JWST141.

JWST171 Is Judaism a Religion? (3 Credits)
Jewish identity can be framed in terms of ethnicity, culture, and religious practice, but also in terms of more contemporary social constructions including social action, political engagement, and intellectual pursuit. In the context of such diverse social and individual frames, what does it mean to identify Judaism as a religion? Attention to Jewish society in historical and global perspective will provide a backdrop for a particular focus on contemporary Jews in the United States and Israel.Cross-listed with: RELS171.
Credit Only Granted for: JWST171, JWST419O or RELS419O.
Formerly: JWST419O, RELS419O.

JWST187 God, Land, Power, and the People: Moral Issues in the Jewish Historical Experience (3 Credits)
Examines the complicated relationship between theology, nationalism, sovereignty, and the ethical exercise of social control using case studies drawn from the Jewish historical experience. The universal and age-old issues implicit in the exercise of power have gained special moral force for Jews with the creation of the State of Israel, a Jewish and a democratic state with substantial non-Jewish minorities and hundreds of thousands of non-citizen subjects. Can these be reconciled? Jewish efforts over the ages and in recent times to define justice provide concrete examples through which to examine and discuss crucial abstract principles.Cross-listed with: HIST187.
Credit Only Granted for: HIST187 or JWST187.

JWST219 Special Topics in Jewish Studies (3 Credits)
Repeatable to: 9 credits if content differs.

JWST225 Religions of the Ancient Near East (3 Credits)
Introduction to ancient Near Eastern religious systems and mythology, from the third millennium BCE through the fourth century BCE. Particular emphasis on Mesopotamia and ancient Israel.Cross-listed with: HIST219I, RELS219A.
Credit Only Granted for: JWST225, HIST219I, or RELS219A.

JWST230 Inventing Traditions: The Making of Rabbinic Judaism (3 Credits)
Introduces the dramatic literary and cultural (as well as political and demographic) innovations that reshaped Judaism in late antiquity. Examines the fundamental works and genres of rabbinic literature and the religious movement that produced them. Special emphasis on the rabbinic uses of 'tradition' to enhance authority and legitimacy, and to foster group identity.Cross-listed with: HIST281, RELS219C.
Credit Only Granted for: HIST281 or JWST230.

JWST231 Jewish Texts and Cultures of the Second Temple Period (3 Credits)
An introduction to the literature, history, and culture of Jews in the period between the sixth century BCE and the second century CE. Special topics may include the rise of the formation of the biblical canon, scriptural interpretation, sectarian and revolutionary movements, and growth of the diaspora.
Credit Only Granted for: HIST219C (Fall 2005), JWST219C (Fall 2005), or JWST231.

JWST233 Why the Jews? Historical and Cultural Investigations (3 Credits)
Examines the history and culture of the Jews from the thirteenth century BCE/BC to the present through an examination of significant themes or problems (such as 'religion' or 'diaspora') that shape our understanding of the Jewish people. A primary focus in the course will be on texts, artifacts, and other cultural products by Jews and others that illustrate the history of the Jews help understand their cultural heritage.
Restriction: Must not have completed HIST282, HIST283, JWST234, or JWST235. Cross-listed with HIST287.
Credit Only Granted for: JWST233 or HIST287.

JWST234 History of the Jewish People I (3 Credits)
Political, economic, social, and cultural development within Jewish history from the Biblical period to the late Middle Ages. Special attention to the emergence of Rabbinic Judaism and its subsequent encounter with medieval Christian and Islamic civilizations.Cross-listed with HIST282.
Credit Only Granted for: HIST282 or JWST234.

JWST235 History of the Jewish People II (3 Credits)
Political, economic, social and cultural development within Jewish history from the end of the Middle Ages to the present. Special attention to the twentieth century developments including the Nazi Holocaust and its aftermath, the Zionist movement and the creation of the State of Israel, and the rise of the contemporary American-Jewish community.
Credit Only Granted for: HIST283, HIST283H, JWST235, or JWST235H.

JWST250 Fundamental Concepts of Judaism (3 Credits)
A conceptional introduction to Judaism, analyzing its fundamental concepts from both analytical and historical perspectives. Discussion of 'normative' Judaism as well as other conceptions of Judaism. Topics include: God, the Jewish people, authority, ethics, the sacred and the profane, particularism and universalism.Cross-listed with PHIL234, RELS250.
Credit Only Granted for: JWST250, PHIL234, or RELS250.

JWST260 Introduction to Classical Hebrew I (3 Credits)
Readings of the Bible and other classical texts in original Hebrew. Emphasis on classical grammar and vocabulary, and reading of textual passages.
Prerequisite: HEBR111; or students who have taken courses with comparable content may contact the department.
Formerly: HEBR401.

JWST262 Introduction to the Hebrew Bible/Old Testament (3 Credits)
Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.Cross-listed with: ENGL262, HEBR298B.
Credit Only Granted for: JWST262, HEBR293B, or ENGL262.

JWST269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

JWST272 Introduction to Jewish Literature (3 Credits)
A survey of Jewish literature and introduction to methods of reading literature in general and Jewish literature in particular. Concern with what makes a literary corpus Jewish and other issues of canonicity. All texts in English translation.Cross-listed with: CMLT242, ISRL249G.
Credit Only Granted for: JWST272, CMLT242, or ISRL249G.

JWST275 The Jew and the City through the Centuries (3 Credits)
Jewish urban experience from ancient times to the present. Public space and private. The city and the sacred. Jewish ghettos and quarters. The struggle over modern Jerusalem.Cross-listed with HIST286.
Credit Only Granted for: HIST286 or JWST275.

JWST281 Yiddish I (3 Credits)
Introduction to the Yiddish language, with emphasis on speaking, reading, and writing skills. Students will also learn the history of the language, its significance to Jewish culture, its origins and basic structure.

JWST282 Elementary Yiddish II (3 Credits)
Continuation of JWST281.
Prerequisite: JWST281; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

JWST289 New Explorations in Jewish Studies (3 Credits)
Investigation of critical and innovative responses in Jewish Studies. Although the topic will vary, the course will encourage intellectual exploration by students of fundamental problems and critical methods.

JWST289E Civil Discourse or Urban Riot: Why Cities Don't (Often) Explode (3 Credits)
An examination of the mechanisms that promote peaceful co-existence in urban societies and a discussion of how and why city streets sometimes become violent.Cross-listed with: HIST135.
Credit Only Granted for: HIST135 or JWST289E.

JWST298 Elementary/Introductory Language Module for Jewish Studies (1-3 Credits)
A supplementary language module for students enrolled in designated Jewish Studies classes. Language of instruction English, texts in original language.
Prerequisite: HEBR212 or JWST282; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Repeatable to: 9 credits if content differs.

JWST299 Independent Study in Jewish Studies (1-3 Credits)
This lower-level independent study allows students in to work closely with a Jewish Studies faculty member of their choice, pending the prior approval of the faculty member. In this independent study, students will focus on a topic specific to Jewish Studies.
Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Repeatable to: 6 credits if content differs.

JWST304 Critical Approaches to Israeli Culture (3 Credits)
An examination of the intersections of literature, society, philosophy, and politics in the making of modern Israeli culture. Special attention will be paid to the Zionist emphasis on making 'new' Jews and its implications when expressed in literature and society.
Formerly: JWST419B and JWST419K.

JWST314 Pedagogy and Instruction in the Hebrew Classroom (3 Credits)
An exploration of applied linguistic theory and issues in Hebrew teaching to current and future Hebrew and Judaic studies teachers. First and second language acquisition theories, past and present language teaching methodologies, effective approaches to teaching and testing in the four skill areas (listening, speaking, reading, and writing), as well as knowledge of the role of identity, context, and affective factors in Hebrew language learning. Taught in English.
Credit Only Granted for: JWST314, JWST419F, or JWST429C.
Formerly: JWST419F and JWST429C.

JWST315 Culture and Identity in Jewish and Hebrew Education (3 Credits)
An in-depth examination of heterogeneous natures of various language learning settings. Social and psychological theories of second language and identity acquisition, anomie and language/identity attrition, and conflicts of class, religion, ethnicity, and power relations that affect Jewish and Hebrew education. Taught in English.
Credit Only Granted for: JWST429P or JWST315.
Formerly: JWST429P.

JWST319 Special Topics in Jewish Studies (1-6 Credits)
Topics in Jewish Studies.
Repeatable to: 12 credits if content differs.

JWST319Y Archaeological Methods and Practice (3 Credits)
A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.
Prerequisite: ANTH240, ARTH200, or CLAS180. Cross-listed with: ANTH305, ARTH305, CLAS305.
Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

JWST324 Biblical History and Culture (3 Credits)
Study of the political, social, and religious development of the Jewish nation from its inception to its return from exile in Babylonia around 536 C.E. Focus on biblical texts, archeological finds, and source materials from neighboring cultures to reconstruct political history and the development of religious concepts.Cross-listed with: HIST321.
Credit Only Granted for: HIST321, or JWST324.

JWST325 Jews and Judaism in Antiquity I: Sixth Century BCE through the First Century CE (3 Credits)
Political, social, and religious history of the Jews from the Persian Period to the Judean Revolt of 66-70CE. Special attention to the rise of sectarian and revolutionary movements.Cross-listed with HIST370.
Credit Only Granted for: HIST370 or JWST325.

JWST326 Jews and Judaism in Antiquity II: First through Seventh Centuries (3 Credits)
Political, social, and religious history of the Jews from the destruction of the Jerusalem Temple in 70 CE to the Muslim conquests. Special attention to the political transformations in Judaism under late Roman Christianity, and the rise of the Rabbinic movement.Cross-listed with HIST371.
Credit Only Granted for: HIST371 or JWST326.

JWST331 Early Christianity: Jesus to Constantine (3 Credits)
Social and religious history of early Christianity from its origin in the first century to the reign of Constantine.
Prerequisite: Must have completed one course in ancient history at the 200 level. Cross-listed with HIST320.
Credit Only Granted for: HIST320 or JWST331.

JWST333 Jews in Early Modern Times 1450-1750 (3 Credits)
Emergence of new powerful population centers, religious and cultural creativity, new forms of community, and radical messianic movements.
Recommended: HIST282 or JWST234. Cross-listed with HIST373.
Credit Only Granted for: JWST333 or HIST373.
Formerly: JWST419C.

JWST341 American Jewish Literature (3 Credits)
An exploration of the role played by literature in the development of American Jewish ethnic identity. Primary materials include essays, poetry, plays, short stories, novels, films and music.Cross-listed with ENGL331.
Credit Only Granted for: ENGL331 or JWST341.

JWST344 Modern Jewish History II: World Jewry Since 1870 (3 Credits)
Social, political, economic, and cultural change in the Jewish world since 1870. Emphasis on emancipation, assimilation, and new forms of Jewish identity in Western and Eastern European Jewry from the 19th Century to the present.Cross-listed with HIST375.
Credit Only Granted for: HIST375 or JWST344.

JWST345 The Holocaust of European Jewry (3 Credits)
Roots of Nazi Jewish policy in the 1930s and during World War II: the process of destruction and the implementation of the 'final solution of the Jewish problem' in Europe, and the responses made by the Jews to their concentration and annihilation.Cross-listed with HIST307.
Credit Only Granted for: HIST307 or JWST345.

JWST346 Representing the Holocaust (3 Credits)
Different perspectives on how the Holocaust should be represented. Examination of a wide range of texts including fiction, memoirs, critical essays, poems and films in different languages (in translation). Emphasis on the international and comparative nature of Holocaust literary studies and investigation into the propriety of literary representation of historical catastrophe. Consideration of our own role as readers serving as witnesses to an event that has marked itself indelibly in the aesthetic history of the twentieth century.
Credit Only Granted for: ENGL379J, JWST419I, ENGL332, or JWST346.
Formerly: ENGL379J and JWST419I.

JWST347 Tradition and Change: Jewish Religion in the Modern World (3 Credits)
An exploration of the history of the different modern Jewish religious movements that developed in Europe, starting with messianic movements and ending with Reform and Orthodoxy. Emphasis will be placed on the influence of the academic study of Judaism on the development of modern Jewish religious ideologies and practices.
Credit Only Granted for: JWST347, HIST429X, or RELS419R.

JWST369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

JWST370 Before the Holocaust: The Golden Age of Eastern European Jewry (3 Credits)
An exploration of the history of the Jews of Eastern Europe from the period of the Polish Lithuanian Commonwealth until the Holocaust. Topics to be covered include religious, political, social, and cultural transformation of Jewish life in Eastern Europe in the context of the general political changes in the area.
Credit Only Granted for: JWST419E, JWST370, or HIST419Q.
Formerly: JWST419E.

JWST386 Experiential Learning in Jewish Studies (3 Credits)
The Jewish Studies Program's internship program. Pre-professional experience in research, analysis, and writing related to Jewish Studies in a variety of work settings.
Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Restriction: Junior standing or higher.

JWST408 Honors Seminar in Jewish Studies (3 Credits)
An in-depth exploration of a theme in Jewish history, literature, culture or thought. Course subject and readings will vary from year to year, but will generally cut across periods, locations, or disciplines. Students are expected to engage the course material critically and to use the seminar as an opportunity to develop an independent research agenda.
Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Restriction: Junior standing or higher.

JWST409 Research Seminar in Jewish Studies (3-4 Credits)
A capstone course for Jewish Studies. Guides students through advanced source material and subject matter, research skills, and presentation techniques. A substantive paper based on independent research and analysis is one expected outcome.
Prerequisite: Must have completed two upper-level courses in an appropriate area of Jewish Studies; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Repeatable to: 9 credits if content differs.
Formerly: JWST309.

JWST418 Honors Thesis Research in Jewish Studies (3-6 Credits)
Guided research on a thesis under the supervision of the Jewish Studies faculty.
Repeatable to: 6 credits if content differs.

JWST419 Special Topics in Jewish Studies (3 Credits)
Repeatable to: 9 credits if content differs.

JWST429 Advanced Topics in Jewish Studies (3-4 Credits)
Special topics at an advanced level for Jewish Studies. Primarily intended for majors and graduate students.
Repeatable to: 12 credits if content differs.

JWST430 Dead Sea Scrolls (3 Credits)
A study of the Dead Sea Scrolls in their ancient and modern settings, and in terms of contemporary scholarly interpretations of their meaning. Interpretations of the historical significance of these documents, their connections to ancient Jewish sectarian movements, and their implications for our understanding of Judaism, Christianity, and the history of the Bible.
Prerequisite: Must have completed one JWST course or one RELS course; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies. Cross-listed with RELS430.
Credit Only Granted for: JWST430 or RELS430.

JWST432 Jews in Medieval Times 1000-1450 (3 Credits)
Social and cultural life of Jewish communities spread throughout Islam and Christendom. Major topics include the Gaonate; kehila organization; legal, rationalist, and mystical thought; and the context of rising animosity linked to the Crusades and changing Church doctrines.
Recommended: HIST282, JWST234, HIST330, or HIST331. Cross-listed with H IST476.
Credit Only Granted for: HIST476 or JWST432.

JWST452 The Golden Age of Jewish Philosophy (3 Credits)
Jewish philosophy from Maimonides in the 12th century to the expulsion of the Jews from Spain at the end of the 15th Century. Topics include the limitations of human knowledge, creation of the world, foreknowledge and free will, and the existence of God.
Prerequisite: 3 credits in PHIL courses; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies; or permission of ARHU-Philosophy department. Cross-listed with PHIL417.
Credit Only Granted for: JWST452 or PHIL417.

JWST459 Readings in Medieval Hebrew (3-4 Credits)
Readings and analysis of Hebrew texts and literature from the Middle Ages. Language of instruction in English; all texts in Hebrew.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: JWST459 or JWST466.
Formerly: JWST466.

JWST468 Readings in the Hebrew Bible (3-4 Credits)
Readings in the Hebrew text of the Bible. Emphasis in close reading, grammar analysis, and modern interpretations of the Bible. Language of instruction English; all texts in Hebrew.
Prerequisite: HEBR313; or permission of instructor.
Repeatable to: 9 credits if content differs.
Formerly: HEBR441 and HEBR442.

JWST469 Readings in Rabbinic Hebrew (3-4 Credits)
Readings in classical rabbinic texts and related corpora. Emphasis on grammar and reading skills as well as critical analysis of the material. Language of instruction: English; all texts in original language.
Prerequisite: HEBR313; or permission of instructor.
Repeatable to: 9 credits if content differs.

JWST471 Modern Hebrew Literature in Translation (3 Credits)
An exploration of modern Hebrew prose, poetry, and literary essays written from the 1880s through the present in Europe, Palestine, and Israel. An investigation of the challenges confronting authors such as Mendele Mokher Sforim, Avraham Mapu, Chaim Nahman Bialik, Dvorah Baron, S.Y. Agnon, and David Fogel as they tried to create a contemporary secular literature out of an ancient sacred language. All texts in English translation.

JWST478 Readings in Modern Hebrew (3 Credits)
Variable topics in Modern Hebrew Literature.
Prerequisite: HEBR313; or permission of instructor.
Restriction: Junior standing or higher.
Repeatable to: 12 credits if content differs.

JWST491 Judaism and the Construction of Gender (3 Credits)
The study of Jewish culture, religious practice, communal authority, and literature through the frame of such critical categories of analysis as gender, sexuality, masculinity, power, ethics, and the feminine.
Prerequisite: 1 course in JWST; or 1 course in LGBT; or 1 course in WMST. Cross-listed with WMST491.
Credit Only Granted for: JWST419X, JWST491, or WMST491.
Formerly: JWST419X.

JWST492 Sex, Gender, and Jewish Identity (3 Credits)
An exploration of Jewish embodiment, including dynamics related to biological sex, culturally-framed gender, and sexuality. Topics of discussion may include transgender and intersex Jews, stereotypes and gender performance, modesty, genetics, and body alteration. Focus is on contemporary Jewish culture, framed within the larger historical and textual tradition.
Prerequisite: 1 course in WMST; or 1 course in JWST; or 1 course in LGBT; or permission of instructor. Cross-listed with: LGBT448W, WMST498W.
Credit Only Granted for: JWST492, JWST409G, JWST419W, LGBT448W, or WMST498W.
Formerly: JWST409G and JWST419W.

JWST498 Advanced Language Module for Jewish Studies (1-3 Credits)
A supplementary language module for students enrolled in designated Jewish Studies classes. Language of instruction English, texts in original language.
Prerequisite: HEBR212 or JWST282; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

JWST499 Independent Study in Jewish Studies (1-3 Credits)
Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.
Repeatable to: 6 credits if content differs.

KNES - Kinesiology

KNES200 Introduction to Kinesiology (3 Credits)
An overview of kinesiology, the interdisciplinary study of physical activity. Examines human motor behavior and its cultural forms such as sport from the physiological, psychological, sociological, historical, philosophical, and biomechanical perspectives.
Restriction: Must be in Kinesiology program; and freshman standing. Or must not be in Kinesiology program; and must have less than 60 credits.
Credit Only Granted for: KNES200 or KNES289M.

KNES201 Kinesiological Principles of Physical Activity (1 Credit)
An introduction to Kinesiology, the study of human movement, through the experience of learning a specific motor skill or being engaged in physical activity. Emphasis on the theories and knowledge underlying the learning and performance of all motor and sport skills.
Corequisite: Any physical activity course, e.g., KNES 100-190; or permission of SPHL-Kinesiology department.
Restriction: Must be in a major in SPHL-School of Public Health.
Credit Only Granted for: KNES200 or KNES201.

KNES210 Essentials of Exercise Science for Fitness Professionals (2 Credits)
Basic concepts of human anatomy, exercise physiology, applied kinesiology, nutrition and the physiology of exercise training. Includes the CORE knowledge required for the American Council on Exercise (ACE) Personal Trainer and the ACE Group Fitness Instructor National Certification Examinations.
Corequisite: KNES211 or KNES212.
Formerly: KNES289N.

KNES211 Methods of Personal Fitness Instruction (1 Credit)
Development of personal training skills including effective communication, client assessment, fitness testing, goal setting, program design, program implementation, legal responsibilities and business strategies. This course prepares and provides the student the opportunity to sit for the American Council on Exercise (ACE) Personal Trainer National Certification exam.
Prerequisite: Must have completed or be concurrently enrolled in KNES210.
Formerly: KNES289P.

KNES212 Methods of Group Fitness Instruction (1 Credit)
Teaching and evaluation of a variety of group exercise programs including, step, cardio-boxing, cycling, muscle conditioning and circuit training. This course prepares and provides the student the opportunity to sit for the American Council on Exercise (ACE) Group Fitness Instructor National Certification exam.
Prerequisite: Must have completed or be concurrently enrolled in KNES210.
Formerly: KNES289G.

KNES214 Science and Methods of Personal Fitness Instruction (3 Credits)
Basic concepts of human anatomy, exercise physiology, applied kinesiology, nutrition and the physiology of exercise training. Includes the CORE knowledge required for the American Council on Exercise (ACE) Personal Trainer certification.
Credit Only Granted for: KNES214 or KNES210 and KNES211, or KNES210 and KNES212, or KNES289N.
Formerly: KNES210/KNES211, KNES210/KNES212, and KNES289N.

KNES218 Laboratory in Teaching (1 Credit)
The course is designed to prepare the student for the student teaching experience by assisting in a class.
Prerequisite: Permission of SPHL-Kinesiology department.
Repeatable to: 2 credits.

KNES222 Gambling in the New Millennium: Poker, The Preakness, Point-spreads, Powerball and Public Policy (3 Credits)
Is gambling in the public interest? Students will critically examine the various implications of 'what it means to gamble' through investigations of various gambling forms, different sectors of the gambling industry and the related economics, along with consumer behavior, sport, public policy and public health in this context.
Recommended: ENGL101 and COMM107.

KNES235 Swimming Pool Management (2 Credits)
Analysis of the position of the swimming pool manager. The systematic treatment of swimming pool water; swimming pool first aid; and laws pertaining to swimming pool operation. Qualifies the student for a pool operator's license in most Maryland counties.
Credit Only Granted for: KNES235 or KNES335.
Formerly: KNES335.

KNES240 Exploring Cultural Diversity Through Movement (3 Credits)
Cultural diversity through an analysis of the different meanings that movement activities serve within different cultural groups. Students will examine how cultural affiliations can influence why and how members of different cultural groups engage in movement activities.

KNES253 Genetically-Modified Humans: Physical Performance in the Post-Genomic Era (3 Credits)
In this post-genomic era, can society pursue optimal health and maximal physical performance without changing what it means to be human? The remarkable advances in genome technologies offer both promise and peril for the future of human health and physical performance. Through investigations of genetic enhancement, personalized medicine, genetic screening and talent selection, students in Genetically-Modified Humans analyze the many issues related to the use and manipulation of the human genome.
Credit Only Granted for: KNES289X, KNES289H or KNES253.
Formerly: KNES289X, KNES289H.

KNES260 Science of Physical Activity and Cardiovascular Health (3 Credits)
Course details (1) the public health importance of and the processes underlying cardiovascular disease, (2) the risk factors for cardiovascular disease and the methods whereby they were identified, and (3) the principles of the scientific evidence supporting the use of physical activity to prevent cardiovascular disease.

KNES282 Basic Care and Prevention of Athletic Injuries (3 Credits)
Theoretical and practical foundations of the prevention, treatment and rehabilitation of athletically related injuries. Topics include: physical conditioning, preventive taping, recognition of injuries, first aid and CPR.
Restriction: Must be in a major within the SPHL-Kinesiology department.
Credit Only Granted for: KNES282 or KNES381.

KNES286 Empowering Healthy Physical Activity (3 Credits)
Learn evidence-based techniques that health professionals use to promote physical activity programs that meet the needs of diverse populations. Develop and implement an intervention plan targeting a specific population.

KNES287 Sport and American Society (3 Credits)
Sport will be related to such social problems as delinquency, segregation, collective behavior, and leisure; to social processes such as socialization, stratification, mobility, and social control; and to those familiar social institutions the family, the school, the church, the military, the economy, the polity, and the mass media.

KNES289 Topical Investigations (1-6 Credits)
Independent study by an individual student or a group of students in special areas of knowledge not covered by regularly scheduled courses.
Repeatable to: 6 credits.

KNES293 History of Sport in America (3 Credits)
The growth and development of sport in America. The transformation of sport within the perspective of American history, including class sport, professionalization, amateurism, and international involvement.

KNES300 Biomechanics of Human Motion (4 Credits)
The study of human movement and the physical and physiological principles upon which it depends. Body mechanics, posture, motor efficiency, sports, the performance of a typical individual and the influence of growth and development upon motor performance.
Prerequisite: Minimum grade of C- in BSCI201. And 1 course with a minimum grade of C- from (MATH112, MATH113, MATH115); or (must have completed one General Education: Fundamental Studies-Math course with a minimum grade of C-; and must have math eligibility of MATH140 or higher).
Recommended: PHYS121.
Restriction: Must be in a major within SPHL-Kinesiology department.

KNES305 Principles & Application of Exercise Rehabilitation (3 Credits)
In-depth analysis of the basic principles of rehabilitation and exercise programming for common injuries encountered in a clinical setting. Basic assessment techniques, ranges of motion, muscular anatomy, rehabilitative protocols, and exercise modalities are a major focus.
Prerequisite: Minimum grade of C- in BSCI201 and BSCI202; and 1 course with a minimum grade of C- from (KNES300, KNES350, KNES360, KNES370, KNES385).
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES498T or KNES305.
Formerly: KNES498T.

KNES306 Prosthetics for Limb Amputations (3 Credits)
Introduction to the science of prosthetics and the artificial devices that are designed, developed and fit to replace the missing body part or parts lost through trauma, disease or congenital conditions.
Prerequisite: Minimum grade of C- in BSCI201, BSCI202, and KNES300.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES306 or KNES498W.
Formerly: KNES498W.

KNES320 Physiological Basis of Physical Activity and Human Health (4 Credits)
A study of the responses and chronic adaptations to physical activity and exercise, with particular emphasis on the interaction between human health and physical activity. The laboratory component of course will focus on the assessment of physical activity and measurement of physiological adaptations to exercise. Students are expected to gain an understanding and appreciation for the benefits of physical activity and exercise in the context of public health.
Prerequisite: Minimum grade of C- in BSCI201 and BSCI202.
Restriction: Must be in Public Health Science program.
Credit Only Granted for: KNES360 or KNES320.

KNES332 Exercise Testing & Prescription for Fitness Professionals (3 Credits)
Practical applications of exercise physiology and psychology to target fitness instruction for the general adult population Includes discussion of certification standards and professional development as well as evaluation of program safety and current trends.
Prerequisite: Minimum grade of C- in KNES360.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES332 or KNES389G.
Formerly: KNES389G.

KNES333 Motor Development and Fitness for Individuals with Disabilities (3 Credits)
Implications of Federal and State regulations for planning and implementing motor development and physical fitness programs for individuals with disabilities. Evaluation strategies for assessing motor performance and fitness levels in educational programs for these individuals.
Prerequisite: Minimum grade of C- in KNES370.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 60 credits.

KNES334 Adapted Physical Activity: Empowering People with Disabilities to Lead a Healthy and Active Lifestyle. (3 Credits)
Study of the field of adapted physical activity and its impact on the health and wellness of individuals with disabilities. Students will design an adapted physical activity program proposal and develop the skills needed to empower people with disabilities to participate in physical activity and sports programs and to lead active lifestyles.
Credit Only Granted for: KNES498L or KNES334.
Formerly: KNES498L.

KNES342 Sport, Commerce, and Culture in the Global Marketplace (3 Credits)
The Sport, Commerce, and Culture in the Global Marketplace study abroad program is designed for students who are interested in the relationship between sport, culture, and the contemporary global economy.
Recommended: KNES287.
Credit Only Granted for: KNES389A or KNES342.
Formerly: KNES389A.

KNES350 The Psychology of Sports & Exercise (3 Credits)
An exploration of personality factors, including but not limited to motivation, aggression and emotion, as they affect sports participation and motor skill performance.

KNES355 Sport Management (3 Credits)
Application of concepts and issues related to management principles and business concerns across various sections of the sport industry. Principles pertaining to the management of sport organizations.
Prerequisite: Minimum grade of C- in KNES287.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES355 or KNES498M.

KNES360 Physiology of Exercise (4 Credits)
A study of the physiology of exercise, including concepts of work, muscular contraction, energy transformation, metabolism, oxygen debt, and nutrition and athletic performance. Emphasis on cardiovascular and respiratory function in relation to physical activity and training.
Prerequisite: Minimum grade of C- in BSCI202 and BSCI201; or permission of SPHL-Kinesiology department.
Restriction: Must be in one of the following programs (Kinesiology; Public Health Science).

KNES370 Motor Development (3 Credits)
Motor development across the life span. The developmental sequences of motor skills from birth to old age; neuromaturation of neuromuscular system; analysis of the underlying mechanisms of motor skill development; and correlates of motor development.
Restriction: Must be in a major within SPHL-Kinesiology department.

KNES385 Motor Control and Learning (3 Credits)
Physiological and cognitive bases for motor control and their applications to the acquisition of movement skills and understanding of movement disorders. Topics include: neurophysiology, motor control theory, sensory/perceptual processes, perception-action coupling, information processing, memory, attention, individual differences, motivation, practice organization and role of feedback.
Restriction: Must be in a major within SPHL-Kinesiology department.

KNES386 Experiential Learning (3-6 Credits)
Explore and analyze concepts and procedures related to a quality service-learning experience to include planning, implementing, and evaluating a service-learning project.
Prerequisite: Must have completed three KNES core classes.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES389 Topical Investigations (1-3 Credits)
Independent study by an individual student or a group of students in special areas of knowledge not covered by regularly scheduled courses.
Repeatable to: 6 credits.

KNES400 The Foundations of Public Health in Kinesiology (3 Credits)
An investigation of the role of physical activity and inactivity in relation to health and well-being through a public health perspective. Past and current perspectives on health promotion, health education, and social policies and approaches will be examined for various populations.
Prerequisite: Minimum grade of C- in KNES287.
Restriction: Senior standing or higher; and must be in a major within the SPHL-Kinesiology department.
Credit Only Granted for: KNES400 or KNES498A.
Formerly: KNES498A.

KNES402 Biomechanics of Sport (3 Credits)
Mechanical determinants influencing sport techniques. A quantitative, scientific basis for sport analysis with emphasis on the application to numerous sport activities. Evaluation and quantification of the filmed performance of athletes.
Prerequisite: Minimum grade of C- in KNES300.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES405 Principles & Techniques of Manual Muscle Testing (3 Credits)
It is critical for sports medicine and sport performance specialists to understand the location and inter-relationships of the structures of the body that impact human movement. Thus, the primary purpose of this course is to facilitate an in-depth, understanding of the muscles of the body. Specifically, students will learn the origins, insertions, primary and secondary functions, as well as nervous innervations of the major muscle groups of the body. In addition, students will develop palpation skills and learn to grade the function of each muscle through manual muscle testing techniques. These skills form the foundation for assessing functional movement as well as performing safe and effective manual therapy techniques. Thus, while the focus of the class will be to develop sound, introductory palpation and manual muscle testing skills, basic principles of functional movement and manual therapy will also be addressed through hands-on application as well as case study.
Prerequisite: Minimum grade of C- in BSCI201 and BSCI202; and 1 course with a minimum grade of C- from Kinesiology core courses at the 300-level or higher.
Additional Information: This course emphasizes hands-on application of skills. Course participation is critical.

KNES440 Psychology of Athletic Performance (3 Credits)
Examines the psychological factors, mechanisms, and processes in athletic performance. Utilizes a social psychological approach to focus on the study and review of individual performance in both the interpersonal and social context.
Prerequisite: Minimum grade of C- in KNES350.
Restriction: Must have earned a minimum of 75 credits.
Credit Only Granted for: KNES498P, KNES689Z, or KNES440.

KNES442 Psychology of Exercise and Health (3 Credits)
Examines the antecedents and consequences of exerciese behavior. Explores motivation, attitude, control, socialization. Proposes intervention strategies at the individual, organizational and societal levels.
Prerequisite: Minimum grade of C- in KNES350.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES442 or KNES498O.
Formerly: KNES498O.

KNES445 Exercise and Brain Health (3 Credits)
Examines the evidence for exercise to affect brain function and brain health in children, in adults, and in old age. Covers the adaptations to acute and chronic exercise within brain networks related to emotion, stress reactivity, memory, and executive function, and the effectiveness of physical activity and exercise as treatments for depression, anxiety disorders, and cognitive impairment.
Prerequisite: Minimum grade of C- in KNES350.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES498C or KNES445.
Formerly: KNES498C.

KNES451 Children and Sport: A Psychosocial Perspective (3 Credits)
Examination of youth sports from a psychosocial perspective, including the impact of highly structured sports on young athletes and the complex social network of coaches, parents and peers.
Prerequisite: Minimum grade of C- in KNES350.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES455 Scientific Bases of Athletic Conditioning (3 Credits)
An examination of physical fitness/athletic conditioning programs stressing the practical application of exercise physiology theory for enhancing athletic performance. Cardiovascular considerations, strength and power development, nutrition, speed, muscular endurance, environmental considerations and ergogenic aids.
Prerequisite: Minimum grade of C- in KNES360.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES457 Managing Youth Programs: Educational, Fitness and Sport (3 Credits)
An examination of the basic functions involved in managing physical education, fitness, and youth sports programs. Focus on leadership skills, organizational management, and techniques for applying learned skills in a variety of organizational settings that serve the nation's youth.
Prerequisite: Minimum grade of C- in KNES350 and KNES370.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES457 or KNES498Y.

KNES460 Physiology of Aging and the Impact of Physical Activity (3 Credits)
Biology of the aging process in healthy individuals and those with chronic disease, the effects of acute exercise and exercise training on the physiological decline that occurs in humans, and the role that regular physical activity plays on enhancing the quality of life and activities of daily living in individuals.
Prerequisite: 1 course with a minimum grade of C- from (KNES320, KNES360).
Restriction: Must be in one of the following programs (Kinesiology; Public Health Science); and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES498F or KNES460.
Formerly: KNES498F.

KNES461 Exercise and Body Composition (3 Credits)
An in-depth overview on how body composition is measured, what it is composed of, and the physiological and biochemical signals that change it. The effects of acute and chronic exercise on food storage, breakdown, and use as an energy source, is the major focus. This information is applied to important issues in public health and athletic performance.
Prerequisite: 1 course with a minimum grade of C- from (KNES320, KNES360).
Restriction: Must be in one of the following programs (Kinesiology; Public Health Science) ; and must have earned a minimum of 75 credits.

KNES462 Neural Basis of Human Movement (3 Credits)
An introduction to the neural substrates which underlie postural and volitional movement. Neuroanatomical and neurophysiological basis of motor functioning; past and present conceptualizations of motor control and coordination; movement disorders; and maturation of the neuromuscular system.
Prerequisite: Minimum grade of C- in BSCI201, BSCI202, and KNES385; or permission of SPHL-Kinesiology department.
Restriction: Must have earned a minimum of 75 credits.

KNES463 Principles and Methods of Physical Activity Interventions (3 Credits)
Understanding of the planning, implementation, and evaluation of physical activity interventions. Intervention methods and practical strategies fo formulate well-conceived physical activity interventions across a variety of settings and participant populations.
Prerequisite: Minimum grade of C- in KNES350 and KNES360.
Restriction: Must have earned a minimum of 75 credits.
Credit Only Granted for: KNES463 or KNES498G.

KNES464 Exercise Metabolism: Role in Health and Disease (3 Credits)
Examines the role of metabolism in kinesiology, especially as it relates to physical inactivity, health and disease. Includes bioenergetics, substrate utilization, cell signaling, and metabolic gene expression and their impact on chronic health conditions or disease.
Prerequisite: Minimum grade of C- in KNES360.
Restriction: Must have earned a minimum of 75 credits.
Credit Only Granted for: KNES464 or KNES498L.

KNES465 Physical Activity and Disease Prevention and Treatment (3 Credits)
Critically examines the scientific evidence that supports the use of physical activity to prevent and treat age-related diseases, including cardiovascular disease, diabetes, abnormal lipoprotein-lipid levels, hypertension, obesity, osteoporosis and cancer.
Prerequisite: 1 course with a minimum grade of C- from (KNES320, KNES360).
Restriction: Must have earned a minimum of 75 credits.
Credit Only Granted for: KNES465 or KNES498A.

KNES466 Graded Exercise Testing (3 Credits)
Functional and diagnostic examination of the cardiovascular responses to graded exercise testing. Emphasis on electrophysiology, mechanisms of arrhythmias, normal electrical activation of the heart, axis termination and the normal 12-lead electrocardiogram.
Prerequisite: Minimum grade of C- in KNES360.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES467 Genetics in Physical Activity and Sport (3 Credits)
Dedicated to understanding the role of genetics in kinesiology, especially within the contexts of physical activity and sport. Specific genes and phenotypes will be explored.
Prerequisite: Minimum grade of C- in KNES360. And must be concurrently enrolled in STAT100 or have completed STAT100 with a minimum grade of C-; or students who have taken courses with comparable content may contact the department.
Restriction: Must have earned a minimum of 75 credits.
Credit Only Granted for: KNES467 or KNES498Q.

KNES476 Honors Thesis Proposal (3 Credits)
Development of honors thesis proposal based on preliminary research and literature review. Presentation of formal proposal to the thesis committee and fellow honors students.
Corequisite: KNES478.
Restriction: Must be a KNES Honors student; and senior standing.
Credit Only Granted for: KNES476 or KNES498R.

KNES477 Honors Thesis (3 Credits)
Advisement will be on the individual basis. Thesis must be defended in the honors seminar.
Prerequisite: KNES476.
Corequisite: KNES478.
Restriction: Must be a KNES Honors student; and senior standing.
Credit Only Granted for: KNES399 or KNES477.

KNES478 Honors Seminar (1-3 Credits)
Guided discussion of research topics of current interest.
Restriction: Must be a KNES Honors student; and junior standing or higher.
Repeatable to: 4 credits if content differs.
Credit Only Granted for: KNES398 or KNES478.

KNES482 Socio-behavioral Aspects of Human Movement (3 Credits)
Derivation, formulation, and application of research in the socio-behavioral aspects of human movement.
Prerequisite: KNES293, KNES350, and KNES287.

KNES483 Sport Marketing and Media (3 Credits)
Industry practices in sport marketing and media. Marketing strategies and consumer behavior in different sport contexts. Critical examination of selected social and economic issues related to the buying and selling of sport.
Prerequisite: Minimum grade of C- in KNES287.
Recommended: KNES355.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES484 Sporting Hollywood (3 Credits)
Popular representations of sport within the film media related to wider social discourses on bodies and the politics of various categories of subjectivity (gender, sex, race, class and nationality).
Prerequisite: Minimum grade of C- in KNES287 and KNES293.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES484 and KNES498N.

KNES485 Sport and Globalization (3 Credits)
Examination of sport culture from a global perspective; focuses on theorizing the similarities and differences between various national sporting cultures.
Prerequisite: Minimum grade of C- in KNES287.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES487 Women, Sports and Culture (3 Credits)
A study of the historical barriers to women's participation in physical activity, efforts to dismantle those barriers, and the differentiation that exists in women's sport and physical culture today. Exploration of the historical and contemporary factors involving female athletes in U.S. culture.
Prerequisite: Minimum grade of C- in KNES287.
Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.
Credit Only Granted for: KNES498E or KNES487.

KNES497 Kinesiology Senior Seminar (3 Credits)
Discussions of contemporary issues vital to the discipline, critiques of research in the student's area/areas of special interest, completion of a major project where the student will be asked to demonstrate the ability to carry out investigative processes in problem solving and critical writing under faculty direction.
Prerequisite: A professional writing course with a minimum grade of C-; and must have completed 6 KNES core courses and 2 KNES option courses, all with a C- or higher; and must have completed STAT100 with a C- or better.
Restriction: Senior standing or higher; and must be in Kinesiology program; and permission of department.

KNES498 Special Topics in Kinesiology (3 Credits)
Topics of special interest in areas not covered by regularly scheduled courses.
Prerequisite: Permission of SPHL-Kinesiology department.
Repeatable to: 99 credits if content differs.

KORA - Korean

KORA101 Elementary Korean I (3 Credits)
Introduction to the Korean language. Primary emphasis on oral skills, but Hangul, the Korean alphabet, will also be introduced.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score; and permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must be a non-Heritage student with no background in Korean.

KORA102 Elementary Korean II (3 Credits)
Continued training in elementary spoken and written Korean.
Prerequisite: KORA101; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must be a non-Heritage student; and permission of instructor required for new students.

KORA201 Intermediate Korean I (3 Credits)
An intermediate-level course designed for non-Heritage students. It begins the second year of instruction in the University's two-track Korean Program.
Prerequisite: KORA102; or permission of instructor.

KORA202 Intermediate Korean II (3 Credits)
The second stage of an intermediate-level course designed for non-Heritage students. It continues the second year of instruction in the University's two track Korean Program.
Prerequisite: KORA201; or permission of instructor.

KORA211 Introductory Reading for Speakers of Korean I (3 Credits)
Designed to improve the language skills of students already conversant in Korean; instruction entirely in Korean; introduction in hangul; reading and writing of simple journal entries.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score; and permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not have completed two or more years of schooling in Korea.

KORA212 Introductory Reading for Speakers of Korean II (3 Credits)
Continuation of KORA211; grammar, style, usage, and vocabulary of written Korean.
Prerequisite: KORA211; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Must not have completed four or more years of schooling in Korea.

KORA241 History of the Korean Language (3 Credits)
The origins of the Korean language and its development from earliest recorded times to the present. The relationship of Korean to other languages. Taught in English.

KORA269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

KORA311 Korean for Heritage Speakers, Advanced-Low I (3 Credits)
Begins the second year of Heritage-language instruction in the University's two-track Korean Program.
Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score; and KORA212. Or permission of instructor.
Restriction: Not open to students who have completed six or more years of schooling in Korea.

KORA312 Korean for Heritage Speakers, Advanced-Low II (3 Credits)
Concludes the second year of the Heritage-language instruction in the University's two-track Korean Program.
Prerequisite: KORA311; or must have appropriate Foreign Language Placement Test (FLPT) score.
Restriction: Not open to students who have completed eight or more years of schooling in Korea.

KORA345 Korean Language and Linguistics (3 Credits)
An exploration of Korean language and society, in particular the role and nature of the alphabet, Korean sounds, lexical and grammatical structures, and usage in today's South Korea.
Prerequisite: KORA102 or KORA211; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Credit Only Granted for: KORA345 and KORA399A.

KORA369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

KORA398 Special Topics in Korean Studies (3 Credits)
Study of particular aspect of Korean language, literature, and/or culture. Topic and language of instruction to be announced when course is offered.
Repeatable to: 9 credits if content differs.

KORA499 Independent Study Korean (1-3 Credits)
Independent study under faculty supervision.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

LARC - Landscape Architecture

LARC120 Digital Fundamentals (2 Credits)
An introduction to fundamental computer tools and techniques commonly used in design communication and landscape architecture practice. Non-drafting computer tools will be used to orient basic digital image capture, manipulation, and presentation formatting.
Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and must be in Landscape Architecture program.

LARC121 Digital Design Futures (3 Credits)
Students are provided with the opportunity to 1) explore basic design principles and practice, 2) explore and apply computer concepts and principles, 3) learn and apply basic computer tools used in landscape architecture and allied disciplines, and 4) demonstrate competency in design vocabulary and computer applications through demonstrated deliverables used in the built environment design fields.

LARC140 Graphic Fundamentals Studio (4 Credits)
Basic techniques and application of various media for graphic communication associated with landscape architecture.
Recommended: Concurrently enrolled in LARC160.
Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and must be in Landscape Architecture program.

LARC141 Design Fundamentals Studio (4 Credits)
Fundamentals of basic design focusing on creative problem solving associated with landscape architecture.
Prerequisite: LARC140.
Recommended: Concurrently enrolled in LARC263.
Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and sophomore standing or higher; and must be in Landscape Architecture program.

LARC151 Urban Agriculture: Designing and Assessing Edible Landscapes (3 Credits)
Students will examine the growing development of urban agriculture and edible landscapes. Urban agriculture has seen a recent growth and interest in cities across the globe. From Paris to New York, from Baltimore to Detroit, urban agriculture is an emerging land use to address a variety of needs. Redevelopment, food deserts, community engagement and environmental justice are just some of the issues and topics that are connected to the recent growth of urban agriculture. This course will take a critical examination of urban agriculture's contribution to the food system, its input and outputs in the urban landscape, and the planning and design of urban agriculture and edible landscapes.

LARC152 Greening Cities: Who Wins, Who Loses, and Who Cares? (3 Credits)
Greening Cities' can have many interpretations: improving or adding urban economic activity, realizing energy efficiency, greening urban transport systems, etc. An important component of livable and sustainable cities and metropolitan ecosystems are the plants and landscapes that are inhabited by plants. With the majority of humans now living in cities, a survey of urban ecosystem principles and an examination of design and planning strategies for plant and landscape resources in urban and metropolitan regions is critical.
Credit Only Granted for: LARC152 or PLSC289I.
Formerly: PLSC289I.

LARC160 Introduction to Landscape Architecture and Environmental Design (3 Credits)
History, theory, philosophy and current practice of the profession of landscape architecture. Explores the interactive relationship between humans and their environment by examining people's perceptions of and changing attitude towards the landscape, as well as, an examination of how these are related to ecological and cultural influences. Topics include urban, ecological, community and creative design.

LARC162 Environmental Justice: Same World, Different Built Environment (3 Credits)
Environmental Justice will be explored in the context of the built environment. What unequal public built environmental threats exist? How can these threats be prevented or eliminated? Public schools, public parks, access to clean water, air pollution, tree coverage are among the built environments examined in the course.

LARC188 Special Topics in Landscape Architecture (1-3 Credits)
A lecture course for students interested in Landscape Architecture to cover topics not formally taught in existing courses. An introductory class on a group of closely-related topics for students with an interest in this discipline.
Repeatable to: 6 credits if content differs.

LARC221 Digital Design Tools (3 Credits)
The development and application of computing skills as used by the landscape architecture profession. This Computer-Aided Design and Drafting (CADD) course develops computer drafting using a variety of software programs. It also introduces students to Geographic Information Systems (GIS) mapping technologies.
Prerequisite: LARC120 and LARC141.
Recommended: LARC240 and LARC265.
Restriction: Sophomore standing or higher; and must be in Landscape Architecture program.

LARC240 Graphic Communication and Design Studio (4 Credits)
Exploration of graphic presentation techniques and original concept development for landscape architecture planning and design.
Prerequisite: LARC141 and LARC263.
Corequisite: LARC221 and LARC265.
Restriction: Sophomore standing or higher; and must be in Landscape Architecture program.

LARC263 History of Landscape Architecture (3 Credits)
A survey of landscape architecture history from the ancient Western civilizations to the twentieth century with consideration of parallel developments in the Eastern World, European Africa and the Americas.

LARC265 Site Analysis and Ecological Principles (3 Credits)
Principles and methods of site analysis with an emphasis on the application of ecological principles in landscape architecture, architecture and planning.
Prerequisite: LARC141.
Corequisite: LARC240 and LARC221.
Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and sophomore standing or higher; and must be in Landscape Architecture program.
Credit Only Granted for: LARC265 or ARCH460.

LARC320 Principles of Site Engineering (3 Credits)
The study and application of landscape construction principles as applied to grading, drainage, site layout, storm water management, and vehicular and pedestrian circulation.
Prerequisite: LARC221.
Corequisite: LARC340.
Restriction: Must be in Landscape Architecture program; and junior standing or higher.

LARC321 Landscape Structures and Materials (3 Credits)
An examination of the use, properties, and detailing of materials used in landscape construction. The use and design of structures in the landscape.
Prerequisite: LARC320; and LARC340.
Restriction: Must be in Landscape Architecture program.
Credit Only Granted for: LARC321 or PLSC321.

LARC340 Site Planning and Design Studio (5 Credits)
An examination of the influence of landscape character and site features (natural and cultural) on landscape architecture, architecture and planning through application in the studio setting.
Prerequisite: LARC221; and LARC240; and LARC265.
Corequisite: LARC320.
Restriction: Must be in Landscape Architecture program; and junior standing or higher.

LARC341 Regional Design Studio (5 Credits)
An examination of the landscape architect's role within the interdisciplinary regional design field incorporating GIS technologies, spatial modeling, and the regional design process.
Prerequisite: LARC320; and LARC340.
Restriction: Junior standing or higher; and must be in Landscape Architecture program.

LARC388 Honors Thesis Research (3-6 Credits)
Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.
Prerequisite: Must be in the AGNR Honors Program.
Repeatable to: 6 credits if content differs.

LARC389 Internship in Landscape Architecture (3 Credits)
A supervised internship where students earn credit for work experience related to their career goals. Each student must keep a work log, work on a special project, and produce a report related to this project. An evaluation from the external supervisor of the project is required. Participation requires application to the internship advisor in the preceding semester.
Prerequisite: LARC221; and LARC240; and LARC265.
Restriction: Must be in Landscape Architecture program; and junior standing or higher.
Repeatable to: 6 credits.

LARC398 Seminar (1 Credit)

LARC420 Professional Practice (3 Credits)
An introduction to and comparative study of the professional concerns of design firms. Focus on planning, legal, ethical, marketing and management considerations of interdisciplinary practices.
Prerequisite: LARC321.
Restriction: Must be in Landscape Architecture program.

LARC440 Urban Design Studio (5 Credits)
The landscape architect's role within the interdisciplinary urban design process, focusing on urban site design issues. Pedestrian friendly site design and the future of sustainable development will be studied.
Prerequisite: LARC321; and LARC340; and LARC341.
Restriction: Must be in Landscape Architecture program.

LARC450 Environmental Resources (3 Credits)
A review of ecosystems and an examination of planning strategies for preservation, conservation, management and development of sensitive natural and cultural landscape resources in the mid-Atlantic region.
Prerequisite: ENST200; or permission of AGNR-Plant Science & Landscape Architecture department.

LARC451 Sustainable Communities (3 Credits)
Explores concepts, strategies and examples of community design which address the needs of a growing population while preserving the environment and its resources.

LARC452 Green Infrastructure and Community Greening (3 Credits)
A critical look and exploration of green infrastructure (GI) elements in the built environment in contributing to ecosystems services and the sustainability of the built environment. The course explores the science, issues, challenges, and the policy, planning and design solutions offered by green infrastructure.
Prerequisite: PLSC100 or PLSC101; or permission of instructor.
Restriction: Junior standing or higher.
Credit Only Granted for: LARC489G or LARC452.
Formerly: LARC489G.

LARC461 People and the Environment (3 Credits)
Focus is placed on human and environmental interactions. Students will look at both natural and built environments and how they influence human health and well-being. Many environmental settings will be examined. These include hospitals, public housing neighborhoods, school settings, retirement communities, transportation corridors and green spaces. We will also explore how racial and socio-economic factors affect living and working environmental conditions. Ultimately, students will be using this knowledge to create environments that support individuals, families and various community groups' health and well-being.
Credit Only Granted for: LARC489K or LARC461.
Formerly: LARC489K.

LARC470 Landscape Architecture Seminar (3 Credits)
A combination of self-directed study, seminar, and lecture formats. An introduction to aspects of research methods, critical analysis, and proposal writing with a focus on urban and community design.
Prerequisite: LARC321; and LARC341.
Corequisite: LARC440.
Restriction: Senior standing; and must be in Landscape Architecture program.

LARC471 Capstone Studio: Community Design (5 Credits)
A capstone experience that emphasizes the integration of critical thinking skills and methodologies introduced throughout the landscape architecture curriculum. Students apply design and analysis methodologies, evaluate alternative solutions, involve community residents and engage in final design development, using the master plan and site design process, report writing, and oral and graphic presentations. Final presentations are open to the university and the community.
Prerequisite: LARC440; and LARC470.
Restriction: Senior standing; and must be in Landscape Architecture program.

LARC489 Special Topics in Landscape Architecture (1-4 Credits)
Credit according to time scheduled and organization of course. A lecture and/or studio course organized as an in-depth study of a selected specialization of landscape architecture not covered by existing courses.
Prerequisite: Permission of AGNR-Plant Science & Landscape Architecture department.
Repeatable to: 4 credits if content differs.

LARC499 Independent Studies in Landscape Architecture (1-4 Credits)
Independent studies in landscape architecture including field, studio or library research under the direction of a faculty member.
Prerequisite: 12 credits in LARC courses; or permission of AGNR-Plant Science & Landscape Architecture department.
Restriction: Must be in Landscape Architecture program; or must be in Plant Sciences program.
Repeatable to: 4 credits if content differs.

LASC - Certificate in Latin American Studies

LASC148 Special Topics in Latin American Studies (3 Credits)
Topics to be announced when offered.

LASC234 Issues in Latin American Studies I (3 Credits)
Interdisciplinary study of major issues in Latin America and the Caribbean, including Latin America's cultural mosaic, migration and urbanization. Democratization and the role of religions. Taught in English.Cross-listed with SPAN234, PORT234.
Credit Only Granted for: LASC234, PORT234, or SPAN234.

LASC235 Issues in Latin American Studies II (3 Credits)
Major issues shaping Latin American and Caribbean societies including the changing constructions of race, ethnicity, gender and class as well as expressions of popular cultures and revolutionary practices. A continuation of LASC/PORT/SPAN234, but completion of 234 is not a prerequisite. Taught in English.Cross-listed with SPAN235, PORT235.
Credit Only Granted for: LASC235, PORT235, or SPAN235.

LASC248 Special Topics in Latin American Studies (3 Credits)
Topics to be announced when offered.

LASC250 History of Colonial Latin America (3 Credits)
Introductory survey of the history of Latin America from pre-Columbian Indian cultures to the beginning of the wars for independence (ca. 1810), covering cultural, political, social, and economic developments. Major themes include conquest, colonialism, indigenous culture, African slavery, religion, race and ethnicity, and gender ideologies.Cross-listed with HIST250.
Credit Only Granted for: LASC250 or HIST250.

LASC251 Latin America Since Independence (3 Credits)
Introductory survey of the history of Latin America from the era of independence (c. 1810-1825) through the early 1980s. Major themes include independence and sovereignty, postcolonialism and neocolonialism, nation- and state-building, liberalism, citizenship, economic development and modernization, social organization and stratification, race and ethnicity, gender relations, identity politics, reform and revolution, authoritarianism and democratization, and inter-American relations.Cross-listed with HIST251.
Credit Only Granted for: HIST251 or LASC251.

LASC269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

LASC286 Internship in Latin American/Caribbean Studies (1-6 Credits)
Internship experience with an organization that works with or studies Latin American and/or the Caribbean. This is an experiential learning course that provides semester-long training that enriches the student's academic field of study and the LASC Certificate. Students submit a final written report of how the experience ties into their major field of study.
Prerequisite: LASC234, SPAN234, LASC235, SPAN235, LASC250, HIST250, LASC251, or HIST251; and permission of Latin American Studies Center required.
Restriction: Minimum cumulative GPA of 2.5; and cannot have more than 60 credits total.
Additional Information: The course is primarily intended for students seeking the Certificate in Latin American Studies, but exceptions will be considered for students with educational or career interests which lie in this area. Student internships must be approved by the Director and students must secure an appropriate faculty mentor to supervise the internship course.

LASC348 Special Topics in Latin American Studies (3 Credits)
Topics to be announced when offered.

LASC348E Caribbean Literature in English (3 Credits)
Political and literary traditions that intersect in the fiction, poetry, and drama written in English by Caribbean writers, primarily during the 20th century.Cross-listed with: ENGL362.
Credit Only Granted for: ENGL362 or LASC348E.

LASC369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

LASC448 Special Topics in Latin American Studies (3 Credits)
Intensive study of a selected topic related to Latin American Studies.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

LASC458 Senior Capstone Course in Latin American Studies (3 Credits)
Capstone course for advanced students in the Latin American Studies Certificate Program or other students with appropriate preparation. Interdisciplinary topics will vary each semester.
Prerequisite: LASC234 and LASC235; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must be in Latin American Studies Certificate program; and senior standing.

LASC486 Internship in Latin American/Caribbean Studies (1-6 Credits)
Internship experience with an organization that works with or studies Latin American and/or the Caribbean. This is an experiential learning course that provides semester-long training that enriches the student's academic field of study and the LASC Certificate. Students submit a final written report of their experience, including critical analysis of the institutional relevance to their major field of study and to Latin American Studies. Students will also be asked to give an oral presentation.
Prerequisite: Student must have completed at least two LASC courses, one of which must be a required/core course (LASC/SPAN234, LASC/SPAN235, LASC/HIST250, or LASC/HIST251); and permission of Latin American Studies Center required.
Restriction: Minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits.
Additional Information: The course is primarily intended for students seeking the Certificate in Latin American Studies, but exceptions will be considered for students with educational or career interests which lie in this area. Student internships must be approved by the Director, and students must secure an appropriate faculty mentor for the internship course. An internship course will be approved only if a faculty supervisor is available.

LASC499 Independent Study in Latin American Studies (1-3 Credits)
Independent Study in Latin American Studies.
Restriction: Permission of instructor.

LATN - Latin

LATN101 Elementary Latin I (4 Credits)
Additional Information: A student who has two units of Latin in high school may register for LATN101 for the purposes of review, but ordinarily not for credit.

LATN102 Elementary Latin II (4 Credits)
Prerequisite: Must have completed LATN101 at University of Maryland, College Park; or permission of ARHU-Classics department.

LATN120 Intensive Latin (4 Credits)
Elements of Latin grammar and vocabulary; elementary reading. The first year's study of Latin compressed into a single semester.
Prerequisite: Permission of ARHU-Classics department.
Restriction: Must not have completed LATN102.

LATN201 Intermediate Latin (4 Credits)
Prerequisite: Must have completed LATN102 at University of Maryland, College Park; or permission of ARHU-Classics department.
Formerly: LATN203.

LATN269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

LATN301 Plautus (3 Credits)
Plautine drama. Literary, linguistic and socio-cultural aspects. Readings are in Latin.

LATN302 Ovid (3 Credits)
Major works of Ovidian poetry. Literary and moral atmosphere of Augustan age. Readings are in Latin.

LATN303 Petronius (3 Credits)
Reading and analysis of Petronius' Satyricon with an emphasis on the literary climate of the Neronian Age and on the emergence of the novel as a literary genre. Readings are in Latin.

LATN304 Cicero and Sallust (3 Credits)
Selected speeches of Cicero and selections from the historian Sallust. Rhetorical, social and political context. Readings are in Latin.
Prerequisite: LATN201; or students who have taken courses with comparable content may contact the department.

LATN351 Horace and Catullus (3 Credits)
Readings are in Latin.
Prerequisite: LATN201; or students who have taken courses with comparable content may contact the department.

LATN369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

LATN386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

LATN403 Roman Satire (3 Credits)
Readings are in Latin.

LATN405 Lucretius (3 Credits)
Readings are in Latin.

LATN410 Latin Historians (3 Credits)
Latin historical writing as a literary genre. Influences, style, and literary techniques. Readings are in Latin.

LATN415 Vergil's Aeneid (3 Credits)
Vergil's Aeneid: readings of selections in Latin and of the entire epic in English translation along with critical essays.
Formerly: LATN305.

LATN424 Silver Age Latin (3 Credits)
Reading and analysis of selected texts. Emphasis on the role of Nero and Seneca in literary developments. Readings are in Latin.

LATN472 Historical Development of the Latin Language (3 Credits)
An analysis of the development of the Latin language from archaic times to the Middle Ages.
Credit Only Granted for: LATN472 or LING431.

LATN488 Latin Readings (3 Credits)
The reading of one or more selected Latin authors from antiquity through the Renaissance. Reports.
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.
Additional Information: Readings are in Latin.

LATN499 Independent Study in Latin Language and Literature (1-3 Credits)
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

LBSC - Library Science

LBSC208 Special Topics in Information Studies (3 Credits)
Special topics in aspects of information use, technology, and policy.
Repeatable to: 6 credits if content differs.

LBSC386 Experiential Learning (3-6 Credits)
Restriction: Junior standing or higher; and must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

LBSC499 Workshops, Clinics, and Institutes (1-9 Credits)
Workshops, clinics, and institutes developed around specific topics or problems. Primarily for practicing librarians.
Repeatable to: 9 credits.

LGBT - Lesbian Gay Bisexual Transgender Studies

LGBT200 Introduction to Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)
An interdisciplinary study of the historical and social contexts of personal, cultural and political aspects of LGBT life. Sources from a variety of fields, such as anthropology, history, psychology, sociology, and women's studies, focusing on writings by and about LGBT people.
Credit Only Granted for: LGBT200.

LGBT264 Quare/Queer Contentions: Exploration of Sexualities in the Black Community (3 Credits)
Centering the subjectivities of queer people of color generally and more specifically, Black people (as the word 'quare' invites us to do), Quare/Queer Contentions takes up key moments within the history of the Black community and asks us to consider the work and presence of LGBTQ people in these moments. The course also contends with the everyday experiences of LGBTQ subjects in the Black community. Quare/Queer Contentions, therefore, interrogates the material realities of Black queer people in the context of family, religion, cultural/creative work, among others. Interdisciplinary in orientation, the course will employ primary and secondary texts, film, art, autobiographical narratives and policy data.Cross-listed with: AASP264, WMST264.
Credit Only Granted for: LGBT264, AASP264, or WMST264..

LGBT265 Lesbian, Gay, Bisexual, and Transgender Literatures (3 Credits)
Exploration of literary and cultural expressions of sexuality and gender. Study of a range of historical periods and literary genres, such as essay, poetry, novel, drama, film. Topics include sexual norms and dissidence, gender identity and expression, the relationship between aesthetic forms and sexual subjectivity. Interpretation of texts particularly through the lens of queer theory. Examination of how sex and gender intersect with other forms of difference, including race and class.
Restriction: Must not have completed ENGL265. Cross-listed with ENGL265 .
Credit Only Granted for: ENGL265 or LGBT265.

LGBT285 Homophobia in the U.S. Society in the New Millennium (3 Credits)
An interdisciplinary investigation of the evolving forms of homophobia that continue to thrive and grow in the contemporary U.S., despite historical gains. Special attention to manifestations of homophobia in U.S. social, cultural, political, and legal arenas such as: popular culture/media, religious and cultural/ethnic communities, state and federal legislation, and queer subcultures. Focus on students' powers and responsibilities within struggles to end discrimination based on sexuality.
Credit Only Granted for: LGBT285 or LGBT289I.
Formerly: LGBT289I.

LGBT291 International Perspectives on Lesbian and Gay Studies (3 Credits)
Exploration of the construction and representation of sexualities in culture around the globe, with particular emphasis on literature and media.
Restriction: Must not have completed CMLT291.

LGBT298 Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)
Study of particular themes and issues in LGBT studies.
Repeatable to: 9 credits if content differs.

LGBT310 Transgender Studies (3 Credits)
Introduces students to the interdisciplinary field of transgender studies, providing a history of the field and engaging current debates within it. Students will explore the emergence and consolidation of trans identities, practices, cultures, and knowledges across medical, historical, sociological, cultural, and artistic contexts, paying particular attention to dynamics of race, class, and ability, to global and transnational difference, and to the implications of transgender studies for understanding gender and sexuality overall.Cross-listed with: WMST310.
Credit Only Granted for: LGBT310 or WMST310.

LGBT327 Lesbian, Gay, Bisexual, and Transgender Film and Video (3 Credits)
Comparative analysis of forms, themes, and the politics of representation in film and video by and/or about LGBT people.
Restriction: Junior standing or higher. Cross-listed with: ENGL359F.
Credit Only Granted for: LGBT327 or ENGL359F.

LGBT350 Lesbian, Gay, Bisexual, and Transgender People and Communication (3 Credits)
Study of differences, stereotypes, and values distinguishing LGBT people and of effective means of communicating such differences to non-LGBT people. Emphasis on contemporary LGBT life and on the development of didactic skills. Preparation and presentation of forums on LGBT people; facilitation of workshops in various outreach locations (residence halls, Greek system, classes).
Prerequisite: LGBT200; and permission of LGBT Studies Program.

LGBT359 Special Topics in Lesbian, Gay, Bisexual, and Transgender Literatures (3 Credits)
Study of selected writers or particular themes in Lesbian, Gay, Bisexual and Transgender literatures.
Prerequisite: Must have completed two lower-level English courses, at least one in literature.
Repeatable to: 9 credits if content differs. Cross-listed with ENGL359.

LGBT386 Lesbian, Gay, Bisexual, and Transgender Community Organization Internship (3-6 Credits)
Supervised internship experience with a community organization that expressly serves lesbian, gay, bisexual, and transgender people. Students will be expected to relate course material to experience in an analysis of an organization's activities.
Prerequisite: 9 credits in LGBT courses.
Restriction: Permission of LGBT Studies Program.

LGBT398 Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)
In-depth study of particular themes and issues in LGBT studies.
Prerequisite: LGBT200.
Restriction: Sophomore standing or higher.
Repeatable to: 9 credits if content differs.

LGBT448 Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)
In-depth study of particular themes and issues in LGBT studies.
Prerequisite: LGBT200; or permission of LGBT Studies Program.
Restriction: Junior standing or higher.
Repeatable to: 9 credits if content differs.

LGBT448W Sex, Gender, and Jewish Identity (3 Credits)
An exploration of Jewish embodiment, including dynamics related to biological sex, culturally-framed gender, and sexuality. Topics of discussion may include transgender and intersex Jews, stereotypes and gender performance, modesty, genetics, and body alteration. Focus is on contemporary Jewish culture, framed within the larger historical and textual tradition.
Prerequisite: 1 course in WMST; or 1 course in JWST; or 1 course in LGBT; or permission of instructor. Cross-listed with: JWST492, WMST498W.
Credit Only Granted for: JWST492, JWST409G, JWST419W, LGBT448W, or WMST498W.
Formerly: JWST409G and JWST419W.

LGBT459 Selected Topics in Sexuality and Literature (3 Credits)
Detailed study of sexuality as an aspect of literary and cultural expression.
Prerequisite: Must have completed two lower-level English courses, at least one in literature.
Repeatable to: 9 credits if content differs.

LGBT465 Theories of Sexuality and Literature (3 Credits)
An in-depth study of the ways in which sexuality and sexual difference create or confound the conditions of meaning in the production of literary texts. Attention to psychoanalysis, history of sexuality, feminist theory, and other accounts of sexual identity.
Prerequisite: Must have completed two lower-level English courses, at least one in literature.
Restriction: Must not have completed ENGL465. Cross-listed with ENGL465.
Credit Only Granted for: ENGL465 or LGBT465.

LGBT488 Seminar in Lesbian, Gay, Bisexual, and Transgender Studies (1-3 Credits)
Developments in theories and methods of LGBT Studies, with emphasis upon interaction between the humanities and the social sciences in the elaboration of this interdisciplinary area of scholarship.
Prerequisite: 9 credits in LGBT courses; and permission of LGBT Studies Program.
Recommended: LGBT200. And ENGL265; or CMLT291.
Repeatable to: 9 credits if content differs.
Formerly: CMLT498Y.

LGBT494 Lesbian Communities and Differences (3 Credits)
The meanings of lesbian communities across many lines of difference. Using lesbian-feminists of the 1970s as a starting point, we will look both back and forward in history, tracing changes and exploring the meanings of these in their social and historical contexts.
Prerequisite: Must have completed one course in Women's Studies, preferably WMST200 or WMST250. Cross-listed with WMST494.
Credit Only Granted for: LGBT494 or WMST494.

LGBT499 Independent Study (1-3 Credits)
Directed research and analysis in LGBT Studies on a topic selected by the student.
Prerequisite: LGBT200; and permission of LGBT Studies Program.
Restriction: Senior standing.
Repeatable to: 6 credits if content differs.

LGBX - Lesbian Gay Bisexual Transgender Studies Education Abroad

LGBX200 Gender, Equality, and Sexuality in Scandinavia (3 Credits)
Sweden is one of the most gender equal countries in the world and is well-known for its progressive culture supported by forward-thinking laws and legislation. This course explores how concepts of gender, body, sexuality and race intersect in current debates about changing family structures, children's rights, and new ethical dilemmas in a changing Scandinavia.Cross-listed with: WMSX200.
Credit Only Granted for: WMSX200 or LGBX200.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

LGBX201 Sex Education and Sexual Reform in Europe (3 Credits)
Provides insight to the ways in which sexual reform and sex education has shaped not only the history of sexuality in Europe, but also the very core of the various national identities. We will look into the different movements, campaigns, policies, and public debates regarding sexuality. We will discover the ways in which sex and sexuality are conveyed in sexual education aimed at children and youth by reading and watching examples of sex educational material.Cross-listed with: WMSX201.
Credit Only Granted for: WMSX201 or LGBX201.
Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

LING - Linguistics

LING200 Introductory Linguistics (3 Credits)
An exploration of the nature of human language, designed for non-majors. Introduction to the basic concepts and methodology of modern linguistic analysis (sound systems, word formation, sentence structure). Additional topics may include: semantics, pragmatics, social aspects of language, dialects, language change, acquisition, writing systems, typology, language universals, comparison with other communication systems, etc.
Credit Only Granted for: HESP120 or LING200.
Additional Information: Does not count toward the Linguistics major and does not fulfill prerequisite requirements for all upper-level courses.

LING210 Structure of American Sign Language (3 Credits)
Overview of phonology, morphology and syntax of American Sign Language. History of the language and the unique social, political and linguistic situation of the deaf.

LING240 Language and Mind (3 Credits)
The study of language as a cognitive phenomenon. Focus on mastering the concepts and technical skills required for further courses in linguistics. Ways of representing people's knowledge of their native language, ways in which that knowledge is attained naturally by children, and how it is used in speaking and listening. Additional topics may include: animal communication, language and the brain, language and thought.
Additional Information: Required for Linguistics majors and recommended for students in related fields.

LING248 Introduction to Laboratory Research in Linguistics (2-3 Credits)
Individualized, collaborative research course aimed at developing skills for laboratory research in language acquisition, sentence processing or neurolinguistics. Learning to conduct research in laboratory linguistics as part of a research team that will create original research in the field.
Recommended: LING200 or LING240.
Restriction: Permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: A two-semester commitment is required, i.e. Ling248 is followed by Ling448.

LING262 HERITAGE LANGUAGES AND THEIR SPEAKERS (3 Credits)
An interdisciplinary examination of the phenomenon of heritage language (a bilingual's home language which is distinct from the dominant language of the wider society). Relationship between linguistic structure, cultural and social aspects of language use, and language change. Interpretations of experimental and theoretical work. Relevance of heritage languages for linguistic theory, language policy, and education.
Additional Information: One class per week will be in-field instruction in collecting data from heritage speakers.

LING269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

LING272 Biophysics of Language (3 Credits)
Examines the nature of mental representation of language in the physiology of the mind/brain, how it evolved, how it emerges in learners' minds, and how it decays through injury and illness. Insights from linguistics, cognitive psychology, neuroscience, animal behavior, molecular biology, and biophysics are brought to bear on how an abstract systematic behavior can arise within an animal brain.

LING311 Syntax I (3 Credits)
Basic concepts, analytical techniques of generative syntax, relation to empirical limits imposed by viewing grammars as representations of a component of human mind. Aspects of current theories.
Prerequisite: LING240.

LING312 Syntax II (3 Credits)
Continuation of LING311. Development of theories of syntax. Criteria for revising theories. Methods and strategies of scientific efforts to explain natural phenomena.
Prerequisite: LING311.

LING320 Phonetics (3 Credits)
Representations and models of acoustic and articulatory phonetics. Develops concepts and skills for description, measurement and scientific analysis of the sound systems of human languages, including various varieties of English.
Prerequisite: Minimum grade of C- in LING200.
Recommended: LING240.
Additional Information: This course counts as a core course for the linguistics major. Only one of Ling320 or HESP403 can be used to count towards the Linguistics major.

LING321 Phonology I (3 Credits)
Properties of sound systems of human languages, basic concepts and analytical techniques of generative phonology. Empirical limits imposed by viewing grammars as cognitive representations. Physiological properties and phonological systems; articulatory phonetics and distinctive feature theory.
Prerequisite: LING240.

LING322 Phonology II (3 Credits)
Continuation of LING321. Further investigation of phonological phenomena and phonological theory. Revising and elaborating the theory of the phonological representation; interaction of phonology and morphology.
Prerequisite: LING321.

LING330 Historical Linguistics (3 Credits)
A traditional presentation of language change. Language types and families, sounds and writing systems, grammatical categories. Reconstruction of proto-languages by internal and comparative methods.
Prerequisite: LING321.
Recommended: LING311.

LING350 Philosophy of Language (3 Credits)
The nature and function of language and other forms of symbolism from a philosophical perspective.
Prerequisite: PHIL170 or LING311. Cross-listed with PHIL360.
Credit Only Granted for: LING350 or PHIL360.

LING369 Special Topics in Study Abroad (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

LING386 Experiential Learning (3-6 Credits)
Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

LING410 Grammar and Meaning (3 Credits)
The basic notions of semantic theory: reference, quantification, scope relations, compositionality, thematic relations, tense and time, etc. The role these notions play in grammars of natural languages. Properties of logical form and relationship with syntax.
Prerequisite: Permission of instructor; or LING311.

LING411 Comparative Syntax (3 Credits)
Comparison of data from a variety of languages with respect to syntactic theory in order to investigate how parameters of universal grammar are fixed differently in different languages. Attempts to work out fragments of grammars for some languages.
Prerequisite: LING312; or permission of instructor.

LING419 Topics in Syntax (3 Credits)
Topics vary.
Prerequisite: LING311.
Repeatable to: 12 credits if content differs.

LING420 Word Formation (3 Credits)
Examination of shape and meaning of possible words, both across languages and within particular languages. Interaction between principles of word formation and other components of a grammar: syntax, logical form and phonology.
Prerequisite: LING321 and LING311.

LING429 Topics in Phonology (3 Credits)
Advanced seminar in phonology. Topics vary.
Prerequisite: LING322.
Repeatable to: 6 credits if content differs.

LING439 Topics in Diachronic Linguistics (3 Credits)
Repeatable to: 6 credits if content differs.

LING440 Grammars and Cognition (3 Credits)
Relationship between the structure, development and functioning of grammars and the structure, development and functioning of other mental systems. Interpretations of experimental and observational work on children's language, aphasia, speech production and comprehension.
Prerequisite: LING321 and LING311.

LING444 Child Language Acquisition (3 Credits)
Examines language acquisition in infancy and early childhood: the nature of children's linguistic representations and how these develop naturally. Role of (possible) innate linguistic structure and interaction of such structure with experience. Evaluation of methods and results of current and classic research leading to contemporary models of language development.
Prerequisite: LING311.

LING448 Advanced Laboratory Research in Linguistics (2-3 Credits)
Individualized, collaborative research course aimed at developing skills for laboratory research in language acquisition, sentence processing or neurolinguistics. Conducting a research project in laboratory linguistics as part of a team creating original research relevant to current issues in linguistics.
Prerequisite: LING248; and (LING200 or LING240).
Restriction: Permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: This course is part of a two-semester sequence. Ling248 is a prerequisite. Ling248 and Ling448 must be completed in the same laboratory.

LING449 Topics in Psycholinguistics (3 Credits)
Critical evaluation of primary research in psycholinguistics. Relating theoretical hypotheses to experimental hypotheses and predictions. Evaluation of experimental results. Emphasis on hands-on experience and experimental methodologies. Specific topics vary.
Prerequisite: LING321 and LING311; or permission of ARHU-Linguistics department.
Repeatable to: 6 credits if content differs.

LING451 Grammars and Variation (3 Credits)
Grammars and the use of language in a variety of styles: formal, casual, literary, etc. Consequences for concepts of grammars. Variation theory. Literary styles.
Prerequisite: LING311.

LING453 Mathematical Approaches to Language (3 Credits)
The aspects of mathematics used in linguistic discussions: recursion theory, Chomsky's hierarchy of grammars, set theory, Boolean algebra, finite state grammars, context-free grammars, etc. Applications to theories of grammars. Formalizations of grammatical theories.
Prerequisite: LING312.

LING460 Diversity and Unity in Human Languages (3 Credits)
Fundamentals of grammatical typology as they relate to issues in social attitudes towards language. Linguistic structure of standard and non-standard languages and dialects. Relationship of different writing systems to linguistic structure. Issues in bilingualism and multilingualism.
Prerequisite: LING240 or LING200.

LING499 Directed Studies in Linguistics (1-3 Credits)
Independent study or research on language under the supervision of a faculty member.
Prerequisite: Permission of ARHU-Linguistics department.
Repeatable to: 6 credits if content differs.

MATH - Mathematics

MATH107 Introduction to Math Modeling and Probability (3 Credits)
A goal is to convey the power of mathematics as shown by a variety of problems which can be modeled and solved by quantitative means. Also included is an introduction to probability. Topics include data analysis, equations, systems of equations, inequalities, elementary linear programming, Venn diagrams, counting, basic probability, permutations, combinations, tree diagrams, standard normal and normal distributions. The mathematics of finance is covered. The course includes problem solving and decision making in economics, management, and social sciences.
Prerequisite: Must have math eligibility of Math 107 or higher; and math eligibility is based on Math Placement Exam or successful completion of MATH003 with appropriate eligibility.
Restriction: Not open to students majoring in mathematics, engineering, business, life sciences, and the physical sciences;; and must not have completed MATH120, MATH130, MATH136, or MATH140; and must not have completed MATH220; and must not have completed any MATH or STAT course with a prerequisite of MATH120, MATH130, MATH136, MATH140 or MATH220.
Credit Only Granted for: STAT100, MATH107, MATH110, MATH111, MATH112, or MATH113.
Formerly: Math 110 and Math 111.
Additional Information: Students who have credits for MATH107 may not also receive credits for STAT100, MATH110, MATH 111, MATH112, or MATH113.

MATH110 Elementary Mathematical Models (3 Credits)
Topics include simple and compound interest; recursion for computing balances; installment loans and amortization; approximating data by linear models; analysis of applications to real-world collections of data; probability; conditional probability; independence; expected value; graphing and analysis of systems of inequalities; linear programming and applications.
Prerequisite: Must have math eligibility of MATH110 or higher; and math eligibility is based on Math Placement Exam or successful completion of MATH003 with appropriate eligibility.
Restriction: Not open to students majoring in mathematics, engineering, business, life sciences, and the physical sciences;; and must not have completed MATH120, MATH130, MATH136, or MATH140; and must not have completed MATH220; and must not have completed any MATH or STAT course with a prerequisite of MATH120, MATH130, MATH136, MATH140 or MATH220.
Credit Only Granted for: MATH107, MATH110, MATH112, or MATH113.

MATH111 Introduction to Probability (3 Credits)
Logic, Boolean algebra, counting, probability, random variables, expectation, applications of the normal probability distribution.
Prerequisite: Must have math eligibility of MATH111 or higher; and math eligibility is based on Math Placement Exam or successful completion of MATH003 with appropriate eligibility. Or MATH110.
Restriction: Not open to students majoring in mathematics, engineering or the physical sciences; and must not have completed STAT100; and must not have completed any MATH or STAT course with a prerequisite of MATH141.
Credit Only Granted for: MATH107, MATH111 or STAT100.

MATH113 College Algebra and Trigonometry (3 Credits)
Topics include elementary functions including graphs and applications of: polynomial, rational, exponential, and logarithmic functions. Systems of equations and applications. Trigonometric functions: angle and radian measure, graphs and applications.
Prerequisite: Must have math eligibility of MATH113 or higher; and math eligibility is based on the Math Placement Exam or the successful completion of MATH 003 with appropriate eligibility.
Restriction: Must not have completed MATH115, MATH120, MATH130, MATH136, or MATH140; and must not have completed any course with a prerequisite of MATH120, MATH130, MATH136, MATH140 or MATH220; and must not have completed MATH112 or MATH220.
Credit Only Granted for: Students who have credits for MATH113 may not also receive credits for MATH107, MATH110, MATH112, or MATH115.

MATH115 Precalculus (3 Credits)
Preparation for MATH120, MATH130 or MATH140. Elementary functions and graphs: polynomials, rational functions, exponential and logarithmic functions, trigonometric functions. Algebraic techniques preparatory for calculus.
Prerequisite: Must have math eligibility of MATH115 or higher; and math eligibility is based on the Math Placement Exam or the successful completion of MATH003 with appropriate eligibility. Or MATH113.
Restriction: Must not have completed MATH140; and must not have completed any MATH or STAT course with a prerequisite of MATH140.
Credit Only Granted for: Students who have credits for MATH115 may not also receive credits for MATH112 or MATH113.

MATH120 Elementary Calculus I (3 Credits)
Basic ideas of differential and integral calculus, with emphasis on elementary techniques of differentiation and applications.
Prerequisite: 1 course with a minimum grade of C- from (MATH112, MATH113, MATH115). Or must have math eligibility of MATH120 or higher; and math eligibility is based on the Math Placement Test.
Restriction: Not open to students majoring in mathematics, engineering, the biological sciences, biochemistry, chemistry, or the physical sciences.
Credit Only Granted for: MATH120, MATH130, MATH136, MATH140, or MATH220.
Formerly: MATH220.

MATH121 Elementary Calculus II (3 Credits)
Differential and integral calculus, with emphasis on elementary techniques of integration and applications.
Prerequisite: MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.
Restriction: Not open to students majoring in mathematics, engineering, the biological sciences, biochemistry, chemistry, or the physical sciences.
Credit Only Granted for: MATH121, MATH131, MATH141, or MATH221.
Formerly: MATH 221.

MATH130 Calculus I for the Life Sciences (4 Credits)
Basic ideas of differential integral calculus, with emphasis on elementary techniques and applications to the life sciences.
Prerequisite: Minimum grade of C- in MATH115.
Restriction: Must be in a major in CMNS-Biological Sciences UG Program; and not open to students majoring in mathematics, engineering, or the physical sciences.
Credit Only Granted for: MATH120, MATH130, MATH220, or MATH140.

MATH131 Calculus II for Life Sciences (4 Credits)
Continuation of MATH130, including an introduction to autonomous differential equations, probability (including conditional probability and the normal and binomial distributions), and statistical reasoning (including confidence intervals). Alongside the mathematical concepts will be applications in biology.
Prerequisite: Minimum grade of C- in MATH130; or minimum grade of C- in MATH140.
Restriction: Must be in a major in CMNS-Biological Sciences UG Program.
Credit Only Granted for: MATH121, MATH131, MATH141, or MATH221.

MATH135 Discrete Mathematics for Life Sciences (4 Credits)
Basic discrete mathematics, with emphasis on relevant models and techniques to the life sciences.
Prerequisite: Minimum grade of C- in MATH115; or must have math eligibility of MATH140 or higher; and math eligibility is based on the Math Placement Test.
Restriction: Must be in the Biological Sciences or Neuroscience major; and not open to students majoring in mathematics, engineering, or the physical sciences.

MATH136 Calculus for Life Sciences (4 Credits)
Continuation of MATH135, including basic ideas of differential integral calculus, with emphasis on elementary techniques and applications to the life sciences.
Prerequisite: Minimum grade of C- in MATH135.
Restriction: Must be in the Biological Sciences or Neuroscience major.
Credit Only Granted for: MATH120, MATH130, MATH136, or MATH140.

MATH140 Calculus I (4 Credits)
Introduction to calculus, including functions, limits, continuity, derivatives and applications of the derivative, sketching of graphs of functions, definite and indefinite integrals, and calculation of area. The course is especially recommended for science, engineering and mathematics majors.
Prerequisite: Minimum grade of C- in MATH115. Or must have math eligibility of MATH140 or higher; and math eligibility is based on the Math Placement Test.
Credit Only Granted for: MATH120, MATH130, MATH136, MATH140 or MATH220.

MATH141 Calculus II (4 Credits)
Continuation of MATH140, including techniques of integration, improper integrals, applications of integration (such as volumes, work, arc length, moments), inverse functions, exponential and logarithmic functions, sequences and series.
Prerequisite: Minimum grade of C- in MATH140. Or 1 course with a minimum grade of B- from (MATH130, MATH136); and permission of CMNS-Mathematics department.
Credit Only Granted for: MATH121, MATH131, MATH141, or MATH221.

MATH199 Special Topics in Mathematics (3 Credits)
Many games have a mathematical component. We will introduce several games, play them, and investigate the underlying mathematics. Students will work in teams on projects that involve developing strategies for new games.
Prerequisite: Permission of CMNS-Mathematics department.

MATH206 Introduction to Matlab (1 Credit)
This course is intended to prepare students for subsequent courses requiring computation with MATLAB. Covers basics of MATLAB including simple commands, variables, solving equations, graphing differentiation and integration, matrices and vectors, functions, M-files and fundamentals of programming in the MATLAB environment. When offered in Winter and Summer terms, the course is offered in a format suitable for online distance learning.
Prerequisite: 1 course with a minimum grade of C- from (MATH136, MATH140).

MATH212 Elements of Numbers and Operations (3 Credits)
Reviews and extends topics of arithmetic and number theory related to the elementary school curriculum, particularly number systems and operations with natural numbers, integers, and rationals.
Prerequisite: Must have completed one year of college preparatory algebra.
Restriction: Must be in one of the following programs (Early Childhood Education; Special Education; Elementary Education).
Credit Only Granted for: MATH212 or MATH210.

MATH213 Elements of Geometry and Measurement (3 Credits)
Properties of geometric objects in two and three dimensions; parallel lines, curves and polygons; ratio, proportion, similarity; transformational geometry and measurement, constructions, justifications and proofs.
Prerequisite: MATH212.
Restriction: Must be in one of the following programs (Early Childhood Education; Special Education; Elementary Education).
Credit Only Granted for: MATH211 or MATH213.

MATH214 Elements of Probability and Statistics (3 Credits)
Permutations and combinations; probability; collecting and representing data; using statistics to analyze and interpret data.
Prerequisite: MATH212.
Restriction: Must be in one of the following programs (Early Childhood Education; Special Education; Elementary Education).
Credit Only Granted for: MATH211 or MATH214.

MATH240 Introduction to Linear Algebra (4 Credits)
Basic concepts of linear algebra: vector spaces, applications to line and plane geometry, linear equations and matrices, similar matrices, linear transformations, eigenvalues, determinants and quadratic forms.
Prerequisite: 1 course with a minimum grade of C- from (MATH131, MATH141).
Credit Only Granted for: MATH240, MATH341, or MATH461.

MATH241 Calculus III (4 Credits)
Introduction to multivariable calculus, including vectors and vector-valued functions, partial derivatives and applications of partial derivatives (such as tangent planes and Lagrange multipliers), multiple integrals, volume, surface area, and the classical theorems of Green, Stokes and Gauss.
Prerequisite: Minimum grade of C- in MATH141.
Credit Only Granted for: MATH241 or MATH340.

MATH246 Differential Equations for Scientists and Engineers (3 Credits)
An introduction to the basic methods of solving ordinary differential equations. Equations of first and second order, linear differential equations, Laplace transforms, numerical methods and the qualitative theory of differential equations.
Prerequisite: Minimum grade of C- in MATH141.
Credit Only Granted for: MATH246 or MATH341.

MATH274 History of Mathematics (3 Credits)
An overview of aspects in the history of mathematics from its beginning in the concrete problem solving of ancient times through the development of abstraction in the 19th and 20th centuries. The course considers both mathematical ideas and the context in which they developed in various civilizations around the world.
Prerequisite: MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.

MATH299 Selected Topics in Mathematics (1-3 Credits)
Topics of special interest under the general guidance of the departmental committee on undergraduate studies.
Prerequisite: Permission of CMNS-Mathematics department.

MATH307 A Condensed Introduction to Mathematical Proof (2 Credits)
Students develop proof-writing skills including logic of proofs, induction and convergence concepts.
Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340).
Recommended: MATH461, MATH240, or MATH341.
Credit Only Granted for: MATH307 or MATH310.
Additional Information: Math majors may not use this course to satisfy the upper-level math requirement.

MATH310 Introduction to Mathematical Proof (3 Credits)
To develop the students' ability to construct a rigorous proof of a mathematical claim. Students will also be made aware of mathematical results that are of interest to those wishing to analyze a particular mathematical model. Topics will be drawn from logic, set theory, structure of the number line, elementary topology, metric spaces, functions, sequences and continuity.
Prerequisite: Minimum grade of C- in MATH141; and must have completed or be concurrently enrolled in MATH240, MATH341, or MATH461; and must have completed or be concurrently enrolled in MATH241 or MATH340.
Restriction: Must be in a major within the CMNS-Mathematics department.
Credit Only Granted for: MATH307 or MATH310.
Additional Information: Math majors may not use this course to satisfy an upper-level requirement.

MATH312 Mathematical Reasoning and Proof for Pre-Service Middle School Teachers (3 Credits)
Reasoning and proof as addressed in the middle school curriculum. Topics include proportional reasoning, logic and proof, types of numbers, field axioms, Euclidean and non-Euclidean geometry.
Prerequisite: MATH212 and MATH213.
Restriction: Must be in one of the following programs (Elementary Education; Special Education; Middle School Education).

MATH314 Introduction to Probability, Data, Analysis and Statistics for Preservice Middle School Teachers (3 Credits)
Analysis of bivariate data, probability and randomness, law of large numbers, central limit theorem, probabilities for independent and dependent events, counting techniques, random variables and probability distributions, expected values, sampling distributions, and confidence intervals.
Prerequisite: MATH214.
Restriction: Must be in one of the following programs (Elementary Education; Special Education; Middle School Education).
Credit Only Granted for: MATH314 or STAT100.

MATH315 Algebra for Preservice Middle School Teachers (3 Credits)
Algebraic concepts and techniques developed in the middle grades, with their larger mathematical context. Equations, inequalities and functions (linear, polynomial, exponential, logarithmic), with multiple representations of relationships. Common misconceptions of beginning algebra students.
Prerequisite: MATH212.
Restriction: Must be in one of the following programs (Elementary Education; Special Education; Middle School Education).
Credit Only Granted for: MATH112, MATH113, or MATH315.

MATH340 Multivariable Calculus, Linear Algebra and Differential Equations I (Honors) (4 Credits)
First semester of the MATH340-341 sequence which gives a unified and enriched treatment of multivariable calculus, linear algebra and ordinary differential equations, with supplementary material from subjects such as differential geometry, Fourier series and calculus of variations. Students completing MATH340-341 will have covered the material of MATH240, MATH241, and MATH246, and may not also receive credit for MATH240, MATH241 or MATH246.
Prerequisite: MATH141 and MATH140; and permission of CMNS-Mathematics department; and permission will be granted only to incoming freshmen.
Credit Only Granted for: MATH241 or MATH340.

MATH341 Multivariable Calculus, Linear Algebra, Differential Equations II (Honors) (4 Credits)
A continuation of MATH340.
Prerequisite: Minimum grade of C- in MATH340.
Restriction: Open to second semester Freshmen only.
Credit Only Granted for: MATH240, MATH246, MATH341 or MATH461.

MATH386 Experiential Learning (3-6 Credits)
Prerequisite: Must have learning proposal approved by the CMNS Mathematics Department.

MATH401 Applications of Linear Algebra (3 Credits)
Various applications of linear algebra: theory of finite games, linear programming, matrix methods as applied to finite Markov chains, random walk, incidence matrices, graphs and directed graphs, networks and transportation problems.
Prerequisite: 1 course with a minimum grade of C- from (MATH461, MATH240, MATH341).

MATH402 Algebraic Structures (3 Credits)
For students having only limited experience with rigorous mathematical proofs. Parallels MATH403. Students planning graduate work in mathematics should take MATH403. Groups, rings, integral domains and fields, detailed study of several groups; properties of integers and polynomials. Emphasis is on the origin of the mathematical ideas studied and the logical structure of the subject.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).
Restriction: Must not be in any of the following programs (Mathematics (Master's); Mathematics (Doctoral)).
Credit Only Granted for: MATH402 or MATH403.

MATH403 Introduction to Abstract Algebra (3 Credits)
Integers; groups, rings, integral domains, fields.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH340); and 1 course with a minimum grade of C- from (MATH341, MATH241); and minimum grade of C- in MATH310. Or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: MATH402 or MATH403.

MATH404 Field Theory (3 Credits)
Algebraic and transcendental elements, Galois theory, constructions with straight-edge and compass, solutions of equations of low degrees, insolubility of the quintic equation, Sylow theorems, fundamental theorem of finite Abelian groups.
Prerequisite: Minimum grade of C- in MATH403.

MATH405 Linear Algebra (3 Credits)
An abstract treatment of finite dimensional vector spaces. Linear transformations and their invariants.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and minimum grade of C- in MATH310.

MATH406 Introduction to Number Theory (3 Credits)
Integers, divisibility, prime numbers, unique factorization, congruences, quadratic reciprocity, Diophantine equations and arithmetic functions.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH241, MATH246, MATH340, MATH341, MATH461); or permission of CMNS-Mathematics department.

MATH410 Advanced Calculus I (3 Credits)
First semester of a year course. Subjects covered during the year are: sequences and series of numbers, continuity and differentiability of real valued functions of one variable, the Riemann integral, sequences of functions and power series. Functions of several variables including partial derivatives, multiple integrals, line and surface integrals. The implicit function theorem.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241); and minimum grade of C- in MATH310. Or students who have taken courses with comparable content may contact the department.

MATH411 Advanced Calculus II (3 Credits)
Continuation of MATH410.
Prerequisite: Minimum grade of C- in MATH410; and permission of CMNS-Mathematics department.
Credit Only Granted for: MATH411 or MATH412.

MATH416 Applied Harmonic Analysis: An Introduction to Signal Processing (3 Credits)
Introduces students to the mathematical concepts arising in signal analysis from the applied harmonic analysis point of view. Topics include applied linear algebra, Fourier series, discrete Fourier transform, Fourier transform, Shannon Sampling Theorem, wavelet bases, multiresolution analysis, and discrete wavelet transform.
Prerequisite: Minimum grade of C- in MATH141; and 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and familiarity with MATLAB is required.

MATH420 Mathematical Modeling (3 Credits)
The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and minimum grade of C- in STAT400. And 1 course with a minimum grade of C- from (CMSC106, CMSC131); or students who have taken courses with comparable content may contact the department. Cross-listed with AMSC420.
Credit Only Granted for: AMSC420 or MATH420.

MATH424 Introduction to the Mathematics of Finance (3 Credits)
Introduction to the mathematical models used in finance and economics with emphasis on pricing derivative instruments. Designed for students in mathematics, computer science, engineering, finance and physics. Financial markets and instruments; elements from basic probability theory; interest rates and present value analysis; normal distribution of stock returns; option pricing; arbitrage pricing theory; the multiperiod binomial model; the Black-Scholes option pricing formula; proof of the Black-Scholes option pricing formula and applications; trading and hedging of options; Delta hedging; utility functions and portfolio theory; elementary stochastic calculus; Ito's Lemma; the Black-Scholes equation and its conversion to the heat equation.
Prerequisite: Minimum grade of C- in MATH141; and 1 course with a minimum grade of C- from (STAT400, STAT410); and permission of CMNS-Mathematics department.
Recommended: MATH246, MATH240, MATH241, MATH340, or MATH341.
Credit Only Granted for: BMGT444, MATH424.

MATH430 Euclidean and Non-Euclidean Geometries (3 Credits)
Hilbert's axioms for Euclidean geometry. Neutral geometry: the consistency of the hyperbolic parallel postulate and the inconsistency of the elliptic parallel postulate with neutral geometry. Models of hyperbolic geometry. Existence and properties of isometries.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

MATH431 Geometry for Computer Applications (3 Credits)
Topics from projective geometry and transformation geometry, emphasizing the two-dimensional representation of three-dimensional objects and objects moving about in the plane and space. The emphasis will be on formulas and algorithms of immediate use in computer graphics.
Prerequisite: 1 course with a minimum grade of C- from (MATH461, MATH240, MATH341).

MATH432 Introduction to Topology (3 Credits)
Metric spaces, topological spaces, connectedness, compactness (including Heine-Borel and Bolzano-Weierstrass theorems), Cantor sets, continuous maps and homeomorphisms, fundamental group (homotopy, covering spaces, the fundamental theorem of algebra, Brouwer fixed point theorem), surfaces (e.g., Euler characteristic, the index of a vector field, hairy sphere theorem), elements of combinatorial topology (graphs and trees, planarity, coloring problems).
Prerequisite: Minimum grade of C- in MATH410.

MATH436 Differential Geometry of Curves and Surfaces I (3 Credits)
Curves in the plane and Euclidean space, moving frames, surfaces in Euclidean space, orientability of surfaces; Gaussian and mean curvatures; surfaces of revolution, ruled surfaces, minimal surfaces, special curves on surfaces, 'Theorema Egregium'; the intrinsic geometry of surfaces.
Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH461, MATH240, MATH341); and must have completed two 400-level MATH courses with a minimum grade of C- (not including MATH461, 478, and 480's).

MATH437 Differential Forms (3 Credits)
Introduction to differential forms and their applications, and unites the fundamental theorems of multivariable calculus in a general Stokes Theorem that is valid in great generality. It develops this theory and technique to perform calculations in analysis and geometry. Topics include an introduction to topological spaces, the Gauss-Bonnet Theorem, Gauss's formula for the linking number, and the Cauchy Integral Theorem. Applications include Maxwell's equations of electromagnetism, connections and gauge theory, and symplectic geometry and Hamiltonian dynamics.
Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).
Recommended: MATH405, MATH403, MATH436, MATH410, or MATH432.

MATH445 Elementary Mathematical Logic (3 Credits)
Elementary development of propositional and predicate logic, including semantics and deductive systems and with a discussion of completeness, incompleteness and the decision problem.
Prerequisite: Minimum grade of C- in MATH141.

MATH446 Axiomatic Set Theory (3 Credits)
Development of a system of axiomatic set theory, choice principles, induction principles, ordinal arithmetic including discussion of cancellation laws, divisibility, canonical expansions, cardinal arithmetic including connections with the axiom of choice, Hartog's theorem, Konig's theorem, properties of regular, singular and inaccessible cardinals.
Prerequisite: 1 course with a minimum grade of C- from (MATH403, MATH410).

MATH452 Introduction to Dynamics and Chaos (3 Credits)
An introduction to mathematical dynamics and chaos. Orbits, bifurcations, Cantor sets and horseshoes, symbolic dynamics, fractal dimension, notions of stability, flows and chaos. Includes motivation and historical perspectives, as well as examples of fundamental maps studied in dynamics and applications of dynamics.
Prerequisite: MATH341. Or MATH246; and (MATH240 or MATH461). Also offered as: AMSC452.
Credit Only Granted for: AMSC452 or MATH452.

MATH456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses). Or permission of instructor. Also offered as: CMSC456, ENEE456.
Credit Only Granted for: MATH456, CMSC456 or ENEE456.

MATH461 Linear Algebra for Scientists and Engineers (3 Credits)
Basic concepts of linear algebra. This course is similar to MATH 240, but with more extensive coverage of the topics needed in applied linear algebra: change of basis, complex eigenvalues, diagonalization, the Jordan canonical form.
Prerequisite: Minimum grade of C- in MATH141; and must have completed any MATH or STAT course with a prerequisite of MATH141.
Credit Only Granted for: MATH240, MATH341, or MATH461.
Additional Information: This course may not be used towards the upper level math requirements for MATH/STAT majors.

MATH462 Partial Differential Equations (3 Credits)
Linear spaces and operators, orthogonality, Sturm-Liouville problems and eigenfunction expansions for ordinary differential equations. Introduction to partial differential equations, including the heat equation, wave equation and Laplace's equation. Boundary value problems, initial value problems and initial-boundary value problems.
Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341).

MATH463 Complex Variables (3 Credits)
The algebra of complex numbers, analytic functions, mapping properties of the elementary functions. Cauchy integral formula. Theory of residues and application to evaluation of integrals. Conformal mapping.
Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340).

MATH464 Transform Methods for Scientists and Engineers (3 Credits)
Fourier transform, Fourier series, discrete fast Fourier transform (DFT and FFT). Laplace transform. Poisson summations, and sampling. Optional Topics: Distributions and operational calculus, PDEs, Wavelet transform, Radon transform and applications such as Imaging, Speech Processing, PDEs of Mathematical Physics, Communications, Inverse Problems.
Prerequisite: 1 course with a minimum grade of C- from (MATH246, MATH341).

MATH470 Mathematics for Secondary Education (3 Credits)
An advanced perspective on some of the core mathematics underlying high school mathematics courses. Topics include number systems, functions of one variable, equations, inequalities, trigonometric functions, curve fitting, and polynomials. The course includes an analysis of alternate approaches to mathematical ideas and problems, and makes connections between ideas that may have been studied separately in different high school and college courses.
Prerequisite: MATH141 and MATH140; and must have completed one 400-level MATH course (not to include MATH461, 478, and 480's).

MATH475 Combinatorics and Graph Theory (3 Credits)
General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and permission of CMNS-Mathematics department. Cross-listed with CMSC475.
Credit Only Granted for: MATH475 or CMSC475.

MATH478 Selected Topics For Teachers of Mathematics (1-3 Credits)
Prerequisite: Permission of CMNS-Mathematics department.
Additional Information: Math majors may not use this course to fulfill the upper-level math requirement.

MATH480 Algebra for Middle School Teachers (3 Credits)
Prepares teachers with elementary certification to teach Algebra 1 in middle school. Focuses on basic algebra concepts and related theoretical ideas.
Prerequisite: MATH214.
Restriction: Must be a middle school teacher; and permission of CMNS-Mathematics department.
Credit Only Granted for: MATH480 or MATH483.
Additional Information: Not applicable to MATH/STAT major or minor requirements.

MATH481 Statistics and Data Analysis for Middle School Teachers (3 Credits)
Prepares teachers with elementary certification to teach simple data analysis and probability in middle school. Focuses on understanding basic statistics, data analysis, and related theoretical ideas.
Prerequisite: MATH214.
Restriction: Must be a middle school teacher; and permission of CMNS-Mathematics department.
Credit Only Granted for: MATH481 or MATH485.
Additional Information: Not applicable to MATH/STAT major or minor requirements.

MATH482 Geometry for Middle School Teachers (3 Credits)
Prepares teachers with elementary certification to teach geometry in middle school. Focuses on understanding basic geometry concepts and related theoretical ideas.
Prerequisite: MATH214.
Restriction: Must be a middle school teacher; and permission of CMNS-Mathematics department.
Credit Only Granted for: MATH482 or MATH484.
Additional Information: Not Applicable to MATH/STAT major or minor requirements.

MATH484 Geometry for High School Teachers (3 Credits)
Focuses on concepts related to geometry, including several geometry axiom schemes, transformations, and similarity. Includes constructions with Geometer's Sketchpad.
Prerequisite: MATH141; or students who have taken courses with comparable content may contact the department.
Restriction: Senior standing.
Credit Only Granted for: MATH482, MATH484, or MATH498E.
Formerly: MATH498E.

MATH485 Statistics for High School Teachers (3 Credits)
Focuses on concepts related to statistics and data analysis, including probability, sampling, distribution of data, and inference.
Prerequisite: MATH141; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: MATH481 or MATH485.
Additional Information: May not be used towards the upper level math requirements for the MATH minor.

MATH486 Calculus for High School Teachers (3 Credits)
Focuses on concepts related to one-variable calculus including limits, continuity, derivative, integrals, series, and applications of these topics.
Prerequisite: MATH141; and cannot be used toward the upper level math requirements for MATH/STAT majors.

MATH487 Number for Middle Grades Teachers (3 Credits)
The rational number and proportional reasoning concepts developed in the middle grades and the larger mathematical context for these. Multiple representations of relationships, including verbal descriptions, diagrams, tables, graphs, and equations. Common misconceptions.
Prerequisite: Must have admission to M.A. or M.Ed. with concentration in Mathematics Education; or permission of CMNS-Mathematics department.
Restriction: This course may not be used towards the upper level math requirements for the MATH/STAT major.
Credit Only Granted for: MATH487 or MATH498K.
Formerly: MATH498K.

MATH489 Research Interactions in Mathematics (1-3 Credits)
Students participate in a vertically integrated (undergraduate, graduate and/or postdoctoral, faculty) mathematics research group. Format varies. Students and supervising faculty will agree to a contract which must be approved by the department. Up to three credits of MATH489 may be applied to the mathematics degree requirements. See the department's MATH489 online syllabus for further information.
Prerequisite: Permission of CMNS-Mathematics department.
Repeatable to: 10 credits if content differs.

MATH498 Selected Topics in Mathematics (1-9 Credits)
Topics of special interest to advanced undergraduate students will be offered occasionally under the general guidance of the departmental committee on undergraduate studies.
Repeatable to: 9 credits if content differs.

MEES - Marine-Estuarine-Environmental Sciences

MEES432 Physiological Ecology of Animals (3 Credits)
An examination of the influence of environmental constrains on animal function and energetic efficiency in the context of abiotic conditions in the habitats occupied by individuals.
Prerequisite: BSCI361; or students who have taken courses with comparable content may contact the department; or permission of instructor.
Credit Only Granted for: MEES498E, MEES698E, MEES432, or MEES632.
Formerly: MEES498E.

MEES498 Topics in Marine-Estuarine-Environmental Sciences (1-4 Credits)
Lecture and/or laboratory series organized to study a selected area of marine-estuarine-environmental sciences not otherwise considered in formal courses.

MIEH - Maryland Institute for Applied Environmental Health

MIEH240 Global Health Projects: Addressing Health Needs with a focus on Reciprocity and Relationships (3 Credits)
Explore the needs of global communities, design interventions, and reflect on the potential outcomes in improving health in the communities served, while also focusing on students' own subjective experiences. Students will explore their roles as learners and the role of community members as local experts.

MIEH300 A Public Health Perspective: Introduction to Environmental Health (3 Credits)
Environmental health is that branch of public health that deals with the human health effects of exposure to chemical, physical, and biological agents in the community, workplace, and home. Activities within Environmental Health Sciences are associated with recognizing, assessing, understanding, and mitigating the impacts of chemical, physical, and biological agents as well as understanding how human behavior and action impacts the environment. This course focuses on the central concepts, principles, issues, and applications of the essential scientific components and strategies of control of major environmental health problems.
Prerequisite: Minimum grade of C- in CHEM131 and CHEM132; and must have completed or be concurrently enrolled in SPHL100 or PHSC300.
Restriction: Must have earned a minimum of 60 credits.
Credit Only Granted for: SPHL498N or MIEH300.
Formerly: SPHL498N.

MIEH309 Environmental Health Research (1-3 Credits)
This research-based course will provide undergraduates with the opportunity to work closely with one of the faculty researchers in the Maryland Institute for Applied Environmental Health (MIAEH) within the School of Public Health. Our research covers multiple fields within the environmental health sciences (e.g. environmental epidemiology, exposure science, risk assessment, environmental microbiology, environmental microbial genomics, food toxicology, airborne infection transmission, environmental justice, and children's environmental health) that involve either laboratory-based research or non-laboratory based studies. Students will not only gain invaluable research and interpersonal skills but also contribute to MIAEH's ongoing environmental health research programs.
Restriction: Must have completed a minimum of 45 credits; and must have permission of instructor.
Repeatable to: 9 credits if content differs.

MIEH321 Environmental Determinants of Emerging Infectious Diseases (3 Credits)
Examines the influences of environmental factors, economic development, migration, and land use changes on emergence and reemergence of infectious diseases. Explores how population growth, development, and climate change impact natural reservoirs of infectious diseases and how they are transmitted through human populations. Includes historical accounts, newly emerging and reemerging diseases.

MIEH330 Environmental Justice, Racism, and Environmental Health Disparities: How where you live can kill you (3 Credits)
Examination of environmental justice history, theory and science; discussion of linkages between the physical, natural, and social environments and environmental injustice; analysis of how environmental injustice can lead to adverse health conditions and environmental health disparities; discuss environmental justice case studies; and understanding of tools that can be used to understand and address environmental justice issues.
Prerequisite: Minimum grade of C- in MIEH300.
Restriction: Must be in a major in SPHL-School of Public Health.
Credit Only Granted for: MIEH210 or MIEH330.
Formerly: MIEH210.

MIEH331 The Built Environment, Sustainability, and Public Health: The Good, the Bad, and the Ugly (3 Credits)
Provides students with a fundamental understanding of theory, concepts, and issues related to the built environment; how the built environment influences behaviors and health outcomes; and opportunities to improve the built environment through planning, zoning, and community development initiatives that can make communities healthier, just, and more sustainable.
Prerequisite: Minimum grade of C- in MIEH300; or permission of instructor.
Credit Only Granted for: MIEH215 or MIEH331.
Formerly: MIEH215.

MIEH400 Introduction to Global Health (3 Credits)
Exploration of theoretical frameworks and practical perspectives on issues shaping the global health panorama. Determinants examined through: biological and epidemiological; social, cultural and economic; environmental and geographic; multi-section, legal and institutional perspectives with synopsis of how these issues are addressed by international and community organizations in developing countries.
Prerequisite: Minimum grade of C- in MIEH300; and 1 course with a minimum grade of C- from (SPHL100, PHSC300).
Restriction: Must be in the Public Health Science program or must have permission of the program director; and must have completed 60 credits.
Credit Only Granted for: MIEH400 or SPHL498A.
Formerly: SPHL498A.

MIEH480 Introduction to Occupational Health (3 Credits)
An introduction to the field of occupational health and safety. Introduction to basic concepts in occupational safety and health, as well as the methods used to anticipate, recognize, evaluate, and control environmental factors or stresses arising in or from the workplace. In addition to instructor-led lectures, guest speakers will be invited to discuss case studies and/or discuss workplace hazards unique to specific populations.
Prerequisite: Minimum grade of C- in MIEH300.
Recommended: BSCI201; and EPIB301.
Restriction: Must be in a major in SPHL-School of Public Health.

MITH - Maryland Institute for Technology in the Humanities

MITH388 Digital Humanities Research Assistantship (1-3 Credits)
An applied introduction to the theory and practice of digital research. The internship includes regular meetings with MITH staff, including designers, developers, information professionals, project managers, and faculty, to gain knowledge of existing digital scholarship and resources within the arts and humanities. Students may contribute to existing MITH projects or propose a small, independent research project on which they will receive support from MITH staff.
Restriction: Permission of instructor.
Repeatable to: 6 credits.

MITH498 Special Topics in Applied Digital Humanities (3 Credits)
An introduction to special topics, and technical approaches, for theoretically grounded humanities and social sciences digital research. Class meetings will introduce students to a variety of technical approaches potentially applicable to the specific topical foci; the theoretical basis for selecting, evaluating, and modifying technical approaches; and best practices in project management.
Repeatable to: 9 credits if content differs.

MLAW - MPower Undergraduate Law Programs

MLAW100 Justice and the Law (3 Credits)
An exploration into the relationship between justice and law, including psychological, philosophical, political and legal approaches to justice, as well as an analytical framework for understanding human rights.
Restriction: Course enrollment is restricted to students in the College Park Scholars Justice and Legal Thought Program (CPJT).

MLAW150 Law in a Just Society (3 Credits)
An exploration of the theoretical questions relating to such fundamental questions of jurisprudence as 'what is law?' and 'how can law be deployed as both an enemy and ally of justice?
Restriction: Must be in the College Park Scholars - Justice and Legal Thought program.

MLAW217 Mock Trial (3 Credits)
Experience the excitement and reward of arguing, and perhaps winning your client's case in court. Mock Trial is designed for students who are interested in learning practical techniques for shaping the evidence, using the law, and exploiting the courtroom to create a coherent and convincing case theory.Cross-listed with GVPT217.
Credit Only Granted for: MLAW217, GVPT217, or GVPT319A.
Formerly: GVPT319A.

MLAW298 Special Topics in Legal Studies (1-3 Credits)
Substantive and experiential approaches to legal phenomena. Topics vary.
Repeatable to: 6 credits if content differs.

MLAW304 Introduction to Law and Social Inquiry (3 Credits)
An exploration of the relationship between law and society from an interdisciplinary perspective. Major themes cover the impact of law on society, society on law and social change.
Restriction: Must be in the Law and Society (MLAW) minor.

MLAW305 Law and Legal Institutions in Social Context (3 Credits)
An exploration of case law, statutes, and regulations separately and together in their social context.
Prerequisite: MLAW304.
Restriction: Must be a student in the Law and Society Minor.

MLAW358 Selected Topics in Law and Society (3 Credits)
An interdisciplinary exploration of topics in law and society. Major scholarly interpretations of specific substantive fields of law.
Restriction: Must be in the Law and Society Minor.
Repeatable to: 6 credits if content differs.

MLAW377 The Legal Profession (3 Credits)
Designed to introduce students to a variety of legal fields. The course is designed to combine social science literature about the legal profession with real world experiences with lawyers and legal workers. It will address questions about law as a profession, field of advocacy and as a business.
Restriction: Must be in the Law and Society Minor.

MLAW388 Law and Society Internship (1-4 Credits)
Participation in the Law and Society Internship (LASI) offers students the opportunity to enhance their education through practical skill building in the realm of law-related professionals.
Repeatable to: 7 credits.

MLAW404 Law & Society Capstone: Implications of Technology on Law & Society (3 Credits)
An exploration of the implications of technology on law and society from a variety of perspectives.Significant issues will be taken from contemporary scholarship and court cases.
Restriction: Student must be enrolled in the Law and Society minor.

MLSC - MD Language Science Ctr

MLSC308 PULSAR Language Science Research Seminar (1 Credit)
Research seminar for students in the PULSAR language science program. Weekly presentations and discussions on diverse topics in language science research, as well as on developing research skills.
Restriction: Must be in PULSAR program or have permission of the instructor.
Repeatable to: 4 credits.
Credit Only Granted for: BSOS338P or MLSC308.
Formerly: BSOS388P.

MUED - Music Education

MUED155 Fundamentals for the Classroom Teacher (3 Credits)
The fundamentals of music theory and practice, related to the needs of the classroom and the kindergarten teacher.
Restriction: Must be in one of the following programs (Early Childhood Education; Elementary Education) ; or must be a Pre-Elementary Education major; or must be a Pre-Early Childhood Education major.

MUED186 Pre-professional Experiences I (2 Credits)
An orientation into the role of the music teacher in the school and community. On-site school visits at elementary, middle and high school levels form the basis for discussion and exploration of all facets of the music education profession.
Restriction: Must be in Music Education program.
Additional Information: Fulfills the College of Arts and Humanities requirement for ARHU158.

MUED187 Pre-Professional Experiences II (1 Credit)
Regular on-site school visitation at elementary, middle and high school levels arranged to expand student understandings and reflections of music instruction in classroom settings.
Prerequisite: MUED186.
Restriction: Must be in Music Education program.

MUED213 String Technique and Pedagogy I (2 Credits)
A study of violin, viola, cello and bass technique and pedagogy; beginning level. Emphasizes group process playing and teaching.
Restriction: Must be in Music Education program.

MUED214 String Technique and Pedagogy II (2 Credits)
A study in violin, viola, cello and bass technique and pedagogy; intermediate to advanced level. Emphasizes group process playing and teaching, chamber music and individual technique development.
Restriction: Must be a major in Music Education-instrumental option.

MUED215 Woodwind Technique and Pedagogy (2 Credits)
Playing experience on instruments of the woodwind family. Historical and acoustical background. Basic concepts of teaching. Methods and materials. Techniques of individual and class instruction.
Restriction: Permission of ARHU-School of Music department.

MUED216 Percussion Technique and Pedagogy (2 Credits)
Playing experience on percussion instruments. Historical and acoustical background. Scoring for percussion. Principles of improvisation. Basic concepts of teaching. Methods and materials. Techniques of individual and class instruction.
Restriction: Must be in Music Education program.

MUED217 Brass Instrument Technique and Pedagogy (2 Credits)
Playing experience on instruments of the brass family. Historical and acoustical background. Principles of improvisation. Basic concepts of teaching. Methods and materials. Techniques of individual and class instruction.
Restriction: Must be in Music Education program.

MUED222 Classroom Instruments Technique and Pedagogy (2 Credits)
An introduction to the fundamentals of classroom instruments technique and pedagogy for the choral and general teacher.
Prerequisite: MUED187 and MUED186.
Restriction: Must be in Music Education program.

MUED269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUED311 Teaching Elementary Instrumental Music I (2 Credits)
Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to teach fundamental musical skills at the elementary level.
Prerequisite: MUED187.
Restriction: Must be in Music Education program.

MUED320 Teaching Secondary Instrumental Music I (2 Credits)
Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to extend secondary-level musical skill through planned instruction and development of teaching materials.
Prerequisite: MUED187.
Restriction: Must be in Music Education program.

MUED333 Classroom Vocal Pedagogy (2 Credits)
An introduction to the fundamentals of group vocal pedagogy for the choral and general classroom teacher, including the teaching of posture, breathing, resonance, registration, articulation and foreign language diction as appropriate to needs of the child or adolescent singer in K-12 classroom settings.
Prerequisite: MUED187 and MUED186.
Restriction: Must be in Music Education program.

MUED369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUED386 Experiential Learning (3-6 Credits)
Prerequisite: Must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

MUED411 Teaching Elementary Instrumental Music II (4 Credits)
Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to develop and/or maintain an exemplary curricular-oriented, research-based, comprehensive elementary instrumental music program.
Prerequisite: MUED320 and MUED311.
Restriction: Must be in Music Education program.

MUED420 Teaching Secondary Instrumental Music II (4 Credits)
Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to develop and/or maintain an exemplary, curricular-oriented, research-based, comprehensive secondary instrumental program.
Prerequisite: MUED320 and MUED311.
Restriction: Must be in Music Education program.

MUED471 Teaching General Music (4 Credits)
An examination of children's musical development via model teaching experiences. Students in this course will be involved in learning appropriate techniques and materials used to plan, deliver, and assess musical instruction effectively in general music settings for K-12 students. The focus is on how to implement a sequential, balanced, and comprehensive music curriculum (i.e., artistic processes: creating, performing, and responding) that emphasizes opportunities for students to construct their own learning.
Prerequisite: MUED222 and MUED333.
Restriction: Must be in Music Education program.

MUED472 Teaching Choral Music (4 Credits)
Preparation for teaching choral classes through the integration of conducting technique, vocal pedagogy, knowledge of repertoire, and the application of appropriate instructional strategies in the context of peer teaching and field experience assignments.
Prerequisite: MUED471.
Restriction: Must be in Music Education program.

MUED473 Teaching General Music for Instrumentalists (2 Credits)
Introduction to current trends, materials and approaches in general music instruction.
Prerequisite: MUED311; and MUED320.
Restriction: Must be in Music Education program.

MUED474 Field Experiences: Pre-Student Teaching (2 Credits)
Field experiences to fulfill teaching requirements in K-12 music teacher education program.
Prerequisite: MUED420 and MUED411; or (MUED472 and MUED471).
Restriction: Permission of ARHU-School of Music department; and senior standing.

MUED484 Student Teaching in Elementary School: Music (6 Credits)
Fulfills elementary teaching requirements in K-12 music teacher education program. Limited to music education majors who have previously applied.
Corequisite: MUED494.
Restriction: Permission of ARHU-School of Music department; and must be in Music Education program.

MUED489 Field Experiences (1 Credit)
Series of field experiences in K-12 settings.
Restriction: Permission of ARHU-School of Music department; and must be in Music Education program.
Repeatable to: 6 credits.

MUED494 Student Teaching in Secondary School: Music (6 Credits)
Fulfill secondary teaching requirements in K-12 music teacher education program. Limited to music education majors who have previously applied.
Corequisite: MUED484.
Restriction: Permission of ARHU-School of Music department; and must be in Music Education program.

MUED499 Workshops, Clinics, Institutes (1-3 Credits)
Innovative and experimental dimensions of music education offered to meet the needs of music teachers and music supervisors allowing students to individualize their programs.
Repeatable to: 6 credits if content differs.

MUET - Ethnomusicology

MUET269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUET369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUSC - School of Music

MUSC102 Class Piano (2 Credits)
Functional piano training for beginners. Development of techniques for school and community playing. Basic piano techniques; chord, arpeggio and scale techniques; melody and song playing; simple accompaniments, improvisation for accompaniments and rhythms; sight reading and transposition and playing by ear.

MUSC103 Beginning Class Piano II (2 Credits)
Functional piano training for beginners. Development of techniques useful for school and community playing. Basic piano techniques; chord, arpeggio, and scale techniques; melody and song playing; simple accompaniments, improvisation for accompaniments and rhythms; sight reading and transposition, and playing by ear. MUSC 103 is a continuation of MUSC 102; elementary repertoire is begun.
Prerequisite: MUSC102; or permission of ARHU-School of Music department.

MUSC106 Beginning Classical Guitar (2 Credits)
Introduction to classical guitar notation, technique, literature and performance. No previous musical experience required.

MUSC123 Movement for Singers (1 Credit)
Systematic exercises, improvisations and dances in conjunction with artistic vocal expression. Performance and critique of stage deportment, gestures and recital techniques.
Prerequisite: Permission of ARHU-School of Music department.

MUSC126 Vocal Diction: English and Latin (1 Credit)
Augmentation of private voice study. Phonetics and diction for singers of English and Latin vocal literature.
Prerequisite: Permission of ARHU-School of Music department.

MUSC127 Vocal Diction: Italian (1 Credit)
Augmentation of private voice study. Phonetics and diction for singers of Italian vocal literature.
Prerequisite: Permission of ARHU-School of Music department.
Restriction: Must be in a major within the ARHU-School of Music department.

MUSC128 Sight Reading For Pianists (2 Credits)
A course to give the piano major an opportunity to develop proficiency in sight reading at the keyboard.
Repeatable to: 4 credits.

MUSC129 Ensemble (1 Credit)
Rehearsal and performance of selected works for small ensembles of instruments, piano, or small vocal groups. After two registrations in MUSC129, the student will elect MUSC229 for two additional semesters and MUSC329 thereafter.

MUSC130 Survey of Music Literature (3 Credits)
A study of the principles upon which music is based, and an introduction to the musical repertory performed in America today.
Restriction: Must not be in any of the following programs (Music (Professional Program); Music Education).

MUSC140 Music Fundamentals I (3 Credits)
Introductory theory course. Notation, scales, intervals, triads, rhythm, form and basic aural skills.
Restriction: Must not be in any of the following programs (Music (Professional Program); Music Education).

MUSC150 Theory of Music I (3 Credits)
A study of basic concepts and skills in tonal melody and harmony through analysis and composition.
Prerequisite: Departmental audition and entrance examination.
Restriction: Must be in one of the following programs (Music (Liberal Arts Program); Music (Jazz Performance Option); Music (Winds & Percussions Performance Option); Music (Voice Performance Option); Music Composition; Music (Professional Program); Music (Piano Performance Option); Music Performance-Winds and Percussion; Music Theory and Composition; Music Performance-Piano; Music Performance-Jazz Studies; Music Performance-Voice; Music Performance-Strings; Music (Strings Performance Option)).

MUSC151 Theory of Music II (3 Credits)
A continuation of MUSC150, including study of more advanced harmonic techniques of the eighteenth century, such as modulation and chromatic harmonies. Emphasis on sight singing, ear training, analysis and compositional skills.
Prerequisite: Minimum grade of C- in MUSC150.

MUSC202 Intermediate Class Piano I (2 Credits)
Advanced keyboard techniques. Continuation of skills introduced in MUSC103. Transposition, modulation and sight reading; methods of teaching functional piano.
Prerequisite: MUSC103; or must have equivalent piano training.

MUSC203 Intermediate Class Piano II (2 Credits)
Advanced keyboard techniques. Continuation of skills introduced in MUSC202. Transposition, modulation and sight reading; methods of teaching functional piano. Development of style in playing accompaniments and in playing for community singing. More advanced repertory.
Prerequisite: MUSC202; or must have equivalent piano training.

MUSC204 Popular Music in Black America (3 Credits)
Traces black popular music in the U.S. with a special focus on spirituals, ragtime, the blues, early jazz, RB, Motown, funk, soul, and rap. Examines how these styles have been borrowed by the American music industry.

MUSC205 History of Popular Music, 1950-Present (3 Credits)
A historical survey of rock music (blues, rock, soul, metal, rap, etc.) from circa 1950 to the present, with emphasis on popular music as music and popular music as social history.

MUSC210 The Impact of Music on Life (3 Credits)
Music as a part of culture. Materials drawn from traditions throughout the globe to illustrate issues of historical and contemporary significance, including the impact of race, class and gender on the study of music.
Credit Only Granted for: MUET210 or MUSC210.
Formerly: MUET210.

MUSC215 World Popular Musics and Identity (3 Credits)
Focus on popular musics in different cultures with an emphasis on cross-cultural comparisons and analysis of how musics and identity intersect.
Credit Only Granted for: MUET200 or MUSC215.
Formerly: MUET200.

MUSC220 Selected Musical Cultures of the World (3 Credits)
A survey of selected musical cultures of the world, such as India, Japan, China, Indonesia, West Africa, Eastern Europe and the Near East.
Credit Only Granted for: MUET220 or MUSC220.
Formerly: MUET220.

MUSC226 Vocal Diction: French (1 Credit)
Augmentation of private voice study. Phonetics and diction for singers of French vocal literature.
Prerequisite: Permission of ARHU-School of Music department.
Restriction: Must be in a major within ARHU-School of Music department.

MUSC227 Vocal Diction: German (1 Credit)
Augmentation of private study. Phonetics and diction for singers of German vocal literature.
Prerequisite: Permission of ARHU-School of Music department.
Restriction: Must be in a major within ARHU-School of Music department.

MUSC228 Introduction to Accompanying for Pianists (2 Credits)
A course to introduce the piano major to accompanying at an intermediate level of difficulty. Class instruction will center on rehearsal and coaching geared toward performance, and will be supplemented by experience working as an accompanist in voice classes or applied studios.
Prerequisite: Permission of ARHU-School of Music department.
Restriction: Must be in a major within ARHU-School of Music department.
Repeatable to: 10 credits.

MUSC229 Ensemble (1 Credit)
Rehearsal and performance of selected works for small ensembles of instruments, piano, or small vocal groups. After two registrations in MUSC129, the student will elect MUSC229 for two additional semesters and MUSC329 thereafter.

MUSC248 Selected Topics in Music (1-3 Credits)
Designed to allow a student of theory or music history to pursue a specialized topic or project under the supervision of a faculty member.
Prerequisite: Permission of ARHU-School of Music department.
Repeatable to: 6 credits if content differs.

MUSC250 Advanced Theory of Music I (4 Credits)
A continuation of MUSC 151, with further study of chromatic and modulatory techniques of the nineteenth century. Emphasis on sight singing, ear training, analysis and compositional skills.
Prerequisite: Minimum grade of C- in MUSC151.

MUSC251 Advanced Theory of Music II (4 Credits)
A continuation of MUSC250, concentrating on late nineteenth-century chromatic harmony and an introduction to twentieth-century melody and harmony. Emphasis on sight singing, ear training, analysis and compositional skills.
Prerequisite: Minimum grade of C- in MUSC250.

MUSC260 Music as Global Culture (3 Credits)
Explores how and why people create, transform, and move music around the globe. Taking a comparative approach to Western art musics and other musics of the world, course will examine a variety of musical practices in their social, political, and economic contexts. Experiential knowledge will be developed through hands-on ethnographic research.
Prerequisite: MUSC151.
Restriction: Must be in a major within the ARHU-School of Music department.
Credit Only Granted for: MUSC220 or MUSC260.

MUSC269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUSC289I Exploring the Power of Musical Performance in Social Engagement (3 Credits)
Explores the ways people, across cultures and times, have drawn on music's power to further causes such as revolution and social change or to bring attention to injustices such as discrimination, exclusion, or oppressive working conditions.

MUSC310 Music History I (3 Credits)
A historical study of Western music from Antiquity to 1600.
Prerequisite: MUSC151; and permission of ARHU-School of Music department.
Credit Only Granted for: MUSC310 or MUSC331.
Formerly: MUSC331.

MUSC320 Music History II (3 Credits)
A historical study of Western music from 1600 to 1800.
Prerequisite: MUSC310; and permission of ARHU-School of Music department.
Credit Only Granted for: MUSC230 or MUSC320.
Formerly: MUSC230.

MUSC328 Introduction to Chamber Music for Pianists (2 Credits)
A course to introduce the piano major to chamber music at a moderately difficult level. Class instruction will center on actual rehearsal and coaching geared toward performance, and will be supplemented by further experience in applied instrumental studios.
Prerequisite: Permission of ARHU-School of Music department.
Repeatable to: 10 credits.

MUSC329 Ensemble (1 Credit)
Rehearsal and performance of selected works for small ensembles of instruments, piano, or small vocal groups. After two registrations in MUSC129, the student will elect MUSC229 for two additional semesters and MUSC329 thereafter.

MUSC330 Music History III (3 Credits)
A historical study of Western music from 1800 to present.
Prerequisite: MUSC320; and permission of ARHU-School of Music department.

MUSC339 Honors in Music (3 Credits)
The production of one or more recitals or lecture-recitals; one or more compositions; or one or more honors theses in addition to regular degree requirements. Two semesters required.
Prerequisite: Permission of ARHU-School of Music department.
Corequisite: MUSC349.
Repeatable to: 6 credits.

MUSC349 Honors Seminar in Music (1 Credit)
Group discussion of projects undertaken in MUSC339. Two semesters required.
Corequisite: MUSC339.
Repeatable to: 2 credits.

MUSC360 Music in Western Culture Before 1900: Music as a Public Art (3 Credits)
Course will be looking at roughly 800 years of Western art music in Europe and America (ca.1100-1900) through the lens of selected 'moments'--intersections of historical space and time, observing music as an art form practiced in a public eye, both as a social event and a cultural practice.
Prerequisite: MUSC260.
Restriction: Must be in a major within the ARHU-School of Music department.
Credit Only Granted for: MUSC310 or MUSC360.

MUSC361 Music in Western Culture After 1900 (3 Credits)
Continuation of MUSC 360. A historical study of Western classical music, popular music, and jazz since 1900.
Prerequisite: MUSC360.
Restriction: Must be in a major within the ARHU-School of Music department.
Credit Only Granted for: MUSC330 or MUSC361.

MUSC369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUSC379 Opera Workshop (1 Credit)
Open to music and non-music majors (by audition). Operatic production and performance, performance techniques and coaching, stage direction, set design, costume design and make-up. Repertory will include smaller operatic works, excerpts or scenes.
Restriction: Must complete a departmental audition.
Repeatable to: 4 credits.

MUSC386 Experiential Learning (3-6 Credits)
Prerequisite: Permission of ARHU-School of Music department.
Restriction: Junior standing or higher.

MUSC388 Music Internship (3 Credits)
Pre-professional field work in music.
Prerequisite: Permission of ARHU-School of Music department.
Corequisite: MUSC389.
Repeatable to: 6 credits.

MUSC389 Music Internship Analysis (1 Credit)
Documentation and evaluation of field work experience.
Corequisite: MUSC388.
Repeatable to: 2 credits.

MUSC400 Music Pedagogy (3 Credits)
Conference course. A study of major pedagogical treatises in music, and an evaluation of pedagogical techniques, materials, and procedures.
Prerequisite: MUSP315; and permission of ARHU-School of Music department.

MUSC420 Introduction to Ethnomusicology (3 Credits)
Study of principal concepts and methods in ethnomusicology, covering history of field, linguistics and anthropology, music in various settings, musical cognition and ethnography of performance.
Prerequisite: MUSC210 and MUSC130; or permission of ARHU-School of Music department.
Restriction: Junior standing or higher.

MUSC428 Repertoire Coaching of Vocal or Chamber Music (2 Credits)
A course for piano students who wish to go further than the work offered in MUSC128, MUSC228 and MUSC328 by becoming specialists in the areas of vocal coaching or chamber music coaching. Elements of pedagogy, conducting and responsible artistic decision-making for the entire musical production.
Prerequisite: Must have completed or be concurrently enrolled in MUSC328.

MUSC435 Music of North America (3 Credits)
A survey of North American music from Colonial times to present.
Prerequisite: Permission of ARHU-School of Music department.

MUSC436 Jazz: Then and Now (3 Credits)
Major styles and influential artists of the past 75 years of jazz.

MUSC438 Area Studies in Ethnomusicology (3 Credits)
Advanced study of musics in selected parts of the world.
Repeatable to: 9 credits if content differs.

MUSC439 Collegium Musicum (1 Credit)
Open to undergraduates and graduates, music majors and non-majors. Procurement, edition and performance of music not belonging to a standard repertory: early music, compositions for unusual performing media, works which demand reconstruction of their original circumstances of performance. Outcome of a semester's work may be one or more performances for the public.
Prerequisite: Permission of ARHU-School of Music department.
Repeatable to: 5 credits.

MUSC443 Solo Vocal Literature (3 Credits)
The study of solo vocal literature from the Baroque Cantata to the Art Song of the present. The Lied, Melodie, vocal chamber music and the orchestral song are examined.
Prerequisite: MUSC330 and MUSC331; or students who have taken courses with comparable content may contact the department.

MUSC444 Wind and Percussion Literature (1 Credit)
Recital program notes and written projects in wind or percussion literature.
Prerequisite: Permission of ARHU-School of Music department.
Corequisite: MUSP420 or MUSP419.

MUSC445 Survey of the Opera (3 Credits)
A study of the music, librettos and composers of the standard operas.
Prerequisite: MUSC330 and MUSC331; or students who have taken courses with comparable content may contact the department.

MUSC446 String Literature (1 Credit)
Recital program notes and written projects in string literature.
Prerequisite: MUSP316; and permission of ARHU-School of Music department.

MUSC448 Selected Topics in Music (1-3 Credits)
Prerequisite: Permission of ARHU-School of Music department.
Repeatable to: 6 credits if content differs.

MUSC448E Financial Entrepreneurship for Arts Leaders (3 Credits)
An introduction to financial entrepreneurship for the arts leader in order to prepare students for diverse and ever-changing careers in the arts and creative fields. Topics explored will include Professional Paperwork (resumes, cover letters, biographies, job searches), Financial Literacy (taxes, budgets, boards, tickets sales, musicians unions), Marketing (website development, social media, press packets, record labels vs. online distribution, headshots, audience development, community engagement, branded content), Communication (public speaking, writing), and Technology (online tools, computer software, peripherals, recording, photography/videography, on campus resources).Cross-listed with: ARHU340.
Credit Only Granted for: ARHU340 or MUSC448E.

MUSC450 Musical Form (3 Credits)
A study of the principles of organization in music with emphasis on eighteenth and nineteenth century European music. Reading and analysis of scores exemplifying the musical forms.
Prerequisite: MUSC251.

MUSC451 Analysis of Music (3 Credits)
A course in the analysis of music. Discussion of individual works, with emphasis on their unique characteristics and on the relation of analysis to performance.
Prerequisite: MUSC450; or permission of instructor.

MUSC453 Jazz Improvisation I (3 Credits)
Jazz theory, notational conventions, improvisation techniques, reading and analysis of music, and performance in small combo format.
Prerequisite: MUSC251; or students who have taken courses with comparable content may contact the department. And permission of ARHU-School of Music department.
Credit Only Granted for: MUSC345 or MUSC453.
Formerly: MUSC345.

MUSC454 Jazz Improvisation II (3 Credits)
Continuation of MUSC453 including scoring and transcription.
Prerequisite: MUSC453; or students who have taken courses with comparable content may contact the department. And permission of ARHU-School of Music department.
Credit Only Granted for: MUSC346 or MUSC454.
Formerly: MUSC346.

MUSC455 Theory of Jazz (3 Credits)
Analysis of jazz harmony, with emphasis on principles of substitution, reharmonization, and syntax. Topics may also include chord/scale relationships, phrasing and articulation, notation, and introductory arranging concepts such as orchestration and form.
Prerequisite: MUSC250; or permission of ARHU-School of Music department.
Restriction: Must be in a major within ARHU-School of Music department.

MUSC456 Jazz Arranging (3 Credits)
A comprehensive approach to jazz arranging. Topics to include chord scale theory, voicing techniques, part and score layout, and formal construction of an arrangement.
Prerequisite: MUSC455; and permission of ARHU-School of Music department.
Credit Only Granted for: MUSC448N or MUSC456.
Formerly: MUSC448N.

MUSC460 Tonal Counterpoint I (3 Credits)
A course in Eighteenth-Century contrapuntal techniques, analysis and original composition of two-voice dances, preludes, and inventions. Includes an introduction to the study of fugue and canon.
Prerequisite: MUSC251; or permission of ARHU-School of Music department.

MUSC461 Theory and Analysis of Atonal and Twelve-tone Music (3 Credits)
An advanced technical introduction to theory and analysis of atonal and twelve-tone music, with an emphasis on music by Schoenberg, Webern, Bartok, and Stravinsky.
Prerequisite: MUSC251 and MUSC450; and permission of ARHU-School of Music department.
Restriction: Must be in Music Theory and Composition program. Jointly offered with MUSC661.
Credit Only Granted for: MUSC46 1 or MUSC661.

MUSC463 Technology and a Career in Music (3 Credits)
A hands-on introduction to technology as it applies to music creation and recording. Digital audio workstations, music notation software, and cloud-based music technology are used to create and manipulate musical examples with an eye toward their practical applications for professional musicians.
Recommended: Ability to read music on a grand staff (treble and bass clef).
Additional Information: No previous experience with technology is required.

MUSC464 The Theories of Heinrich Schenker (3 Credits)
An advanced analysis course in tonal music with specific emphasis on the theories of the early 20th century theorist Heinrich Schenker. Specific analyses of music by Bach, Mozart, Haydn, Beethoven, Chopin, and Brahms.
Prerequisite: MUSC251 and MUSC450; and permission of ARHU-School of Music department.
Restriction: Must not have completed MUSC651.
Credit Only Granted for: MUSC464 or MUSC651.

MUSC467 Piano Pedagogy I (3 Credits)
A study of major pedagogical treatises in music, and an evaluation of pedagogical techniques, materials, and procedures.
Prerequisite: Permission of ARHU-School of Music department.

MUSC468 Piano Pedagogy II (3 Credits)
Application of the studies begun in MUSC467 to the actual lesson situation. Evaluation of results.
Prerequisite: MUSC467; and permission of ARHU-School of Music department.
Repeatable to: 6 credits.

MUSC469 Orchestral Excerpts for String Players (1 Credit)
In-depth study of the orchestral excerpts required for professional orchestra auditions.
Restriction: Permission of ARHU-School of Music department.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: MUSC469, MUSC448B, MUSC448Q, MUSC448V, or MUSC448X.
Formerly: MUSC448B, MUSC448Q, MUSC448V, and MUSC448X.

MUSC470 Harmonic and Contrapuntal Practices of the Twentieth Century (3 Credits)
A theoretical and analytical study of twentieth century materials.
Prerequisite: MUSC251; or students who have taken courses with comparable content may contact the department. And permission of ARHU-School of Music department.

MUSC471 Contemporary Compositional Techniques (3 Credits)
Continuation of MUSC470, with emphasis on the analysis of individual works written since 1945.
Prerequisite: MUSC470; and permission of ARHU-School of Music department.

MUSC481 Music in the Renaissance (3 Credits)
Survey of western music from 1450 to 1600.

MUSC483 Music in the Classic Era (3 Credits)
Survey of western music from 1750 to 1820.

MUSC484 Music in the Romantic Era (3 Credits)
Survey of western music from 1820 to 1900.

MUSC485 Music in the 20th Century (3 Credits)
Survey of western music from 1900 to the present.
Prerequisite: Permission of ARHU-School of Music department.

MUSC486 Orchestration I (3 Credits)
A study of the ranges, musical functions and technical characteristics of the instruments and their color possibilities in various combinations. Practical experience in orchestrating for small and large ensembles.
Prerequisite: MUSC251; and permission of ARHU-School of Music department.

MUSC490 Conducting (2 Credits)
Vocal and instrumental baton techniques.
Prerequisite: MUSC251.

MUSC491 Conducting II (2 Credits)
Baton techniques applied to score reading, rehearsal techniques, tone production, style and interpretation.
Prerequisite: MUSC490; or students who have taken courses with comparable content may contact the department.

MUSC492 Keyboard Music I (3 Credits)
The history and literature of harpsichord and solo piano music from its beginning to the romantic period. Emphasis is placed on those segments of repertory which are encountered in performance and teaching situations at the present time.
Prerequisite: Permission of ARHU-School of Music department.

MUSC493 Keyboard Music II (3 Credits)
The history and literature of harpsichord and solo piano music from the Romantic period to the present. Emphasis is placed on those segments of repertory which are encountered in performance and teaching situations at the present time.
Prerequisite: MUSC492; and permission of ARHU-School of Music department.

MUSC499 Independent Studies (1-3 Credits)
Independent research on a topic chosen in consultation with the instructor, which may culminate in a paper or appropriate project.
Prerequisite: Permission of ARHU-School of Music department.
Additional Information: May be repeated once for credit.

MUSP - Music Performance

NOTE ABOUT MUSP COURSES

Undergraduate Music Performance Courses are available in three series:

1. ***Minor Series**: 2-credits each course. Prerequisite: permission of department chairperson. Limited to music majors studying a secondary instrument and to non-music majors. Each course in the series must be taken in sequence. The initial election for all new students, both freshman and transfer, is 102. Transfer students are evaluated for higher placement after one semester of study. One-half hour private lesson per week plus assigned independent practice. MUSP 102, 103 Freshman Courses. MUSP 202, 203 Sophomore Courses. MUSP 302, 303 Junior Courses. MUSP 402, 403 Senior Courses.*
2. ***Principal Series**: 2-4 credits each course. Prerequisites: departmental audition, entrance examination, and permission of department chairperson. Limited to majors in music programs other than performance and composition. Each course in the series must be taken in sequence. The initial election for all new students, both freshman and transfer, is 109. Transfer students are evaluated for higher placement after one 1330 | Page semester of study. One-hour private lesson per week plus assigned independent practice. Courses 109, 208, and 409 may be repeated once for credit, but only one successful attempt in each course may be applied towards baccalaureate degree requirements. MUSP 109, 110, Freshman Courses. MUSP 207, 208 Sophomore Courses. MUSP 305, 306 Junior Courses. MUSP 409, 410 Senior Courses. Recital required in MUSP 410.*
3. ***Major Series**: 2-4 credits each course. Prerequisites: departmental audition, entrance examination, and permission of department chairperson. Limited to majors in performance and composition. Each course in the series must be taken in sequence. The initial election for all new students, both freshman and transfer, is 119. Transfer students are evaluated for higher placement after one semester of study. One-hour private lesson per week plus assigned independent practice. Courses 119, 218, and 419 may be repeated once for credit, but only one successful attempt in each course may be applied towards baccalaureate degree requirements. MUSP 119, 120 Freshman Courses. MUSP 217, 218 Sophomore Courses. MUSP 315, 316 Junior Courses. MUSP 419, 420 Senior Courses. Recital required in MUSP 420.*

***Instrument designation**: Each student taking a music performance course must indicate the instrument chosen by adding a suffix to the proper course number, such as: MUSP 102A music performance: A--piano; B--voice; C--violin; D--viola; E--cello; F--bass; G--flute; H--oboe; I--clarinet; J--bassoon; K--saxophone; L--horn; M--trumpet; N-- trombone; O--tuba; P--euphonium; Q--percussion; T--composition; U--world instruments; V--harp; W--electronic composition; X--hist inst - keyboard; Y--hist inst - strings; Z--hist inst - winds.*

MUSP102 Music Performance (2 Credits)

MUSP269 Special Topics in Study Abroad II (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUSP302 Music Performance (2 Credits)

MUSP303 Music Performance (2 Credits)

MUSP369 Special Topics in Study Abroad III (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

MUSP386 Experiential Learning (3-6 Credits)
Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.
Restriction: Junior standing or higher.

MUSP402 Music Performance (2 Credits)
Senior course, in the minor series.

MUSP403 Music Performance (2 Credits)
Senior course, in the minor series.

NAVY - Navy

NAVY100 Introduction to Naval Science (3 Credits)
Introduction to the naval profession and concepts of sea power. Major topics explored are the mission, strategy, organization, and descriptions of the U.S. Navy and Marine Corps. Students will gain a basic understanding of warfighting capabilities, required leadership skills, training and education, and the duties and responsibilities of a U.S. Navy and Marine Corps Junior Officer. The student will learn Naval courtesy and customs, military justice, and nomenclature as well as the professional competencies required to become a naval officer.

NAVY101 Sea Power and Maritime Affairs (3 Credits)
Introduces the student to the key themes of naval and maritime history. Curriculum presents an analysis through lectures, reading, and student discussion of the relationship of sea power to American history. Classical concepts and contemporary employment of sea power are examined by viewing historic and current naval and maritime developments.

NAVY108 Naval Science Leadership Lab (1 Credit)
Introduces the student to a variety of instructional sessions and/or activities that will develop the leadership component of the Naval ROTC program. The Naval Science leadership lab may include, but not be limited to, close-order drill, physical fitness training, ceremonial functions, Department of the Navy policy, guest lecturers, general military training (GMT), Anti-Terrorism Force Protection (ATFP), traffic safety, nutrition, stress management, prevention of sexual harassment, and operations security.Corequisite: 1 course from NAVY100-402 course range.
Corequisite: 1 course from NAVY100-402 course range.
Restriction: Permission of UGST-Navy ROTC.
Repeatable to: 8 credits.

NAVY200 Leadership and Management (3 Credits)
Introductory course designed to familiarize students with the theories, processes, and behaviors that enable effective leadership and managerial competence. Students will engage in analytical discussions, review leadership development and education, and Navy/Marine Corps-based case study discussions in order to develop their understanding of personal strengths, values and growth opportunities in the context of team, group and organizational leadership.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY201 Navigation (3 Credits)
Introduces the student to a broad yet thorough education in basic surface ship navigation. Curriculum presents an overview of tools of the modern naval watch officer, and topics include celestial navigation, rules of the nautical road, piloting, practical chartwork, tides, instruments, publications, records, and electronic navigation systems. Instructional sessions and/or activities develop the maritime proficiency core competency of the Naval Reserve Officer Training Corps (NROTC) program.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students enrolled in the University of Maryland NROTC program.

NAVY300 Naval Ship Systems I (Engineering) (3 Credits)
Introduces the student to a comprehensive fundamental understanding of United States naval engineering principles and systems. Topics include thermodynamics, incompressible fluid flow, electrical theory, hydraulics and pneumatics, power train components, fluid/lube oil systems, desalination, fundamentals of nuclear power, propulsion systems (internal combustion, gas turbines, and steam), electrical distribution, ship stability and control and damage control. Students will also examine case studies to apply and analyze course topics within naval ships systems contexts.
Recommended: MATH140 and MATH141.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY301 Naval Ship Systems II (Weapons) (3 Credits)
Introduces the student to a comprehensive fundamental understanding of United States naval weaponry. Includes theory and employment of weapons systems, including the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance, and explosives. Radar and sonar systems and major weapon types, including capabilities and limitations. Facets of command, control, and communications as means of weapons system integration. Curriculum presents an in-depth review of surface, sub-surface, aviation, and Marine Corps weapons and platforms.
Recommended: MATH140, MATH141, and PHYS161.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY302 Evolution of Warfare (3 Credits)
Traces the development of warfare, from earliest recorded history to the present, with focus on the impact of major military theorists, strategists, tacticians, and technological developments. The student acquires an intermediate sense of strategy and develops an understanding of military alternatives and the impact of historical precedent on military thought and actions.
Recommended: NAVY100 and NAVY101.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students in the NROTC program.

NAVY400 Naval Operations and Seamanship (3 Credits)
Capstone course for senior NROTC Navy-option midshipmen in advanced navigation, communications, naval operations, and naval warfare. Students learn through simulation in a computer classroom known as the Maritime Skills Simulator (MSS), in addition to lectures, discussions, and qualitative and quantitative tests/examinations. Students will engage in discussions regarding the moral and ethical responsibilities or military leaders, as well as the essential attributes of character required for effective leadership.
Recommended: NAVY201.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY401 Leadership and Ethics (3 Credits)
Integrates an intellectual exploration of Western moral traditions and ethical philosophy with military leadership, core values, the Uniform Code of Military Justice, and Navy regulations. The course provides students with a basic understanding of major moral traditions including Relativism, Utilitarianism, Kantian Ethics, Natural Law Theory, Divine Command Theory, and Virtue Ethics.
Recommended: NAVY200.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY402 Fundamentals of Maneuver Warfare (3 Credits)
A detailed study of the characteristics of modern warfare and their interactions with maneuver warfare doctrine, with a focus on the United States Marine Corps. Throughout the course, there is a strong focus on leadership, as the fundamental purpose of this course is to develop the skills, knowledge, leadership background and mentality necessary for a successful future leadership and service, whether in the military or the civilian sector.
Recommended: NAVY100, NAVY101, NAVY200, and NAVY108.
Restriction: Permission of UGST-Navy ROTC.
Additional Information: Priority in enrollment will be given to students in the NROTC program.

NEUR - Neuroscience

NEUR200 Introduction to Neuroscience (3 Credits)
In an evolutionary sense, the job of the nervous system is to produce, control, and coordinate behaviors that help an animal survive and reproduce. Neuroscience is the study of how the nervous system does that. Provides a broad introduction to neuroscience, always keeping the behavioral consequences in view.
Prerequisite: Minimum grade of C- in BSCI170 and BSCI171. Cross-listed with: PSYC202.
Credit Only Granted for: PSYC309U, NEUR200, PSYC202 or PSYC301.
Formerly: PSYC309U.

NFSC - Nutrition and Food Science

NFSC100 Elements of Nutrition (3 Credits)
Fundamentals of human nutrition. Nutrient requirements related to changing individual and family needs.

NFSC103 Nutrition and Sports Performance (3 Credits)
